Discards Reduced to a minimum

When you stock

STILL'S HANDLES

Every hardware man knows that his profits on handle sales can be greatly reduced if a portion of his stock is not saleable. You can eliminate these losses by selling "Still's Handles." We are handle specialists, and for your protection we stamp our name on all handles.

Losses on discards are reduced to a minimum when you stock "Still's" line of pick, axe, sledge, hammer, cant hook and peavie handles.

J. H. Still Mfg. Company

ST. THOMAS - ONTARIO

Western Representatives: **Frederic Sara & Co., Calgary.**
Ontario Representatives: **Grant Chater, 926 Traders Bank Building, Toronto.**
Quebec and Maritime Provinces Representatives: **John R. Anderson, 36-38 St. Dizier St., Montreal.**

Quick Shipment

On All Kinds of

HANDLES

We offer you deferred or immediate shipments of Axe, Hammer, Peavy, Pick and Cant Dog Handles. These are made from the finest of clear, selected, straight-grained Second Growth Hickory, White Ash and Maple.

We assure their excellence and uniformity by exercising special precautions to have all stock split the right way of grain.

We make clean, beautifully balanced baseball bats of selected, straight-grained white ash. Write to-day for prices and details.

Darrah Bros.

Sutton, Que.

MODERNIZE YOUR TORCH STOCK

ENTIRELY AUTOMATIC

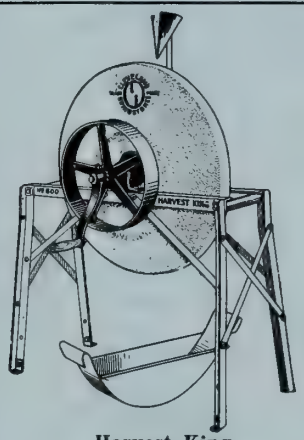
Just touch a match to the wick of this torch and in a few seconds a needle pointed flame of over 1,400° Fahr. will result. No adjustments, priming, pumping or blowing.

A most practical torch for—

Electricians
Mechanics
Repairmen
Plumbers
Automobilists
and Dentists

LENK AUTOMATIC BLOW TORCH

QUICK TURNOVER



Just the tool for making Radio Hook-ups

Plenty of Prospects, large sales, excellent profits.
Your Jobber or direct with your Jobber's name.

FULLY GUARANTEED
Retail at $2.50
Packed Six to a handsome Counter Display.

THE LENK MFG. CO. Boston, Mass

Harvest King

This Winter is the Time to Sharpen Tools

Farmers have begun to put away their tools after a season of use and every one of them is dull. During the winter is their biggest opportunity to sharpen them for use next season.

Pass this suggestion along to the farmers who come into your store and you'll be surprised at how many grindstone sales you make—and most hardware dealers already know that if the grindstones you sell are the Sterling or others of the well-known "Cleveland" line, your customer will be particularly well satisfied with his grindstone.

The Cleveland Stone Company

814 Union Bldg. Cleveland, Ohio

Grinding Wheels, Abrasive Articles, Motor and Belt Driven Grinding Machinery.

COMBINATION SQUARES

LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

AN ADDED ATTRACTION---

To your window display would be the PEXTO SPECIAL CHRISTMAS ASSORTMENT, as illustrated above (space required 4 ft. x 2½ ft.) The Assortment consists of nine of the regular Pexto Mechanics hand tools put up in attractive Xmas boxes, at no extra cost to you, making suitable gifts for the Mechanic, Automobilist or Handy-Man-Around-the-House.

These tools can be sold individually or as an Assortment Complete. After the holiday season, those not sold can be stocked as regular goods, an advantage over goods made for the holiday trade only.

These goods are backed by the Pexto Oval, a mark of quality and a positive guarantee of materials and workmanship. If your jobber cannot supply you, write us direct.

Sinking the Ship by Half Ounces!

The captain of a ship at sea doesn't waste one minute when he is told that his ship has sprung a leak. He sets about having that leak plugged. He knows even a small leak will sink his ship if he doesn't. There are hundreds of hardware dealers whose "business ship" is sinking every day under their feet through loss of profits over the weigh scale. Thousands of others are just chugging along with the business ship barely afloat—leaking profits every time goods are weighed, and the odd half ounce given away to an unappreciative customer.

Sinking the business ship by half ounces—in overweights with an old-fashioned scale.

Dayton Hardware Scale

Stops Profit Leaks!

Shows on a chart the exact weight to the fraction of an ounce — so you can get paid for all of it.

Shows the exact price all ready calculated, so no mistakes are made and no time is lost.

Ensures an absolutely square deal between store and customer.

The Dayton Hardware Scale can certainly save money for you. Send for illustrated folder.

The profit saver—famous Dayton Hardware Scale with counting scoop and extra capacity platform rack.

CRYSTAL WARE

We Now Have a Full Line of This New Triple-Coated White Ware

We are glad to be able to announce that we are now producing a full line of Crystal Ware—our new big seller. The vogue for high-class white enameled ware grows stronger every day, and we produce Crystal Ware to satisfy this demand.

Recent additions to this splendid line include Rice Boilers, Savoy Cookers, Convex Kettles, London Kettles, Preserving Kettles, Straight Kettles, Dish Pans, Flaring Sauce Pans, Straight Sauce Pans, Potato Pots, Roasters and Roasting Pans. This makes Crystal Ware a complete line—the equal of which cannot be found anywhere on the market.

Crystal Ware is triple-coated clear white enameled ware, trimmed on edges in royal blue. All pails have black enameled hardwood grips. It has the finish of finest white crockery without the breakage. It appeals to women because of its unusual beauty, and because it harmonizes with the porcelain white trims so popular on electric, coal and gas ranges.

Crystal Ware sells on sight. It is proving one of the best propositions that any hardware man can handle. It makes a beautiful window display and is a handsome line to display inside your store. Be wise and place your order for Crystal Ware immediately.

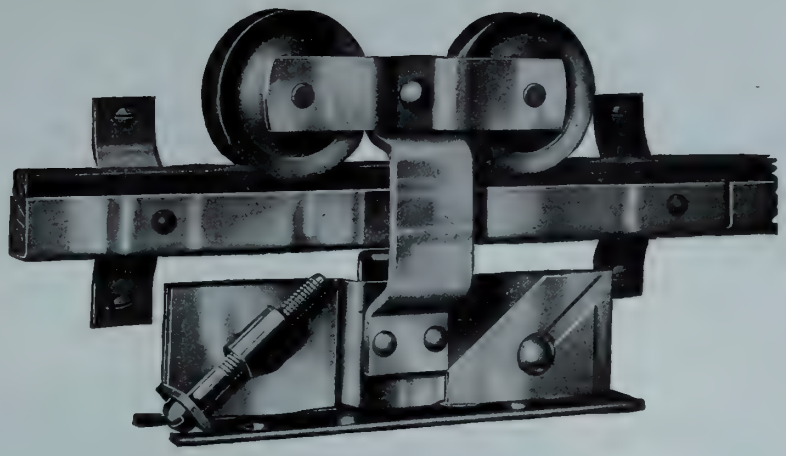
Keep Production Moving ON Bassick Casters



IF every Bassick dealer kept the factory production of his vicinity "moving on Bassick Casters" we would probably have to move pretty fast to keep up with dealers' orders.

But more to the point—every one of those dealers would have a list of big customers that would make his yearly sales figures a record to be proud of. Bassick casters will give these customers confidence in your general line of hardware.

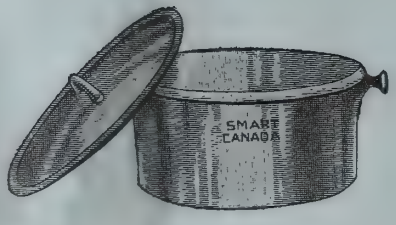
Hatch Parlor Door Hanger

Quality — Value

Every feature necessary to make it at once high grade, practical and of good value has been incorporated into the Hatch Parlor Door Hanger. Builders everywhere should know its value—know how easy it is to instal and how permanent is that installation.

They should know how smoothly and noiselessly a door slides when equipped with a Hatch, and know something of the satisfaction that the Hatch Hanger is giving in hundreds of homes.

And here is your opportunity to tell your customers about these hangers, to display them, recommend them and to sell them. Satisfied purchasers and mighty nice profits will follow.



Packed in box complete with bolts, stops and bumpers it is easily handled and takes up little room. Single set includes 7 feet of track. Double set includes 14 feet.

Our catalogue, sent on request, contains valuable information for any hardware man. Write for it.

When Father Carves That Holiday Turkey

DON'T let him go at the job with a dull knife that will mess up the bird and cause him to swear like a golfer.

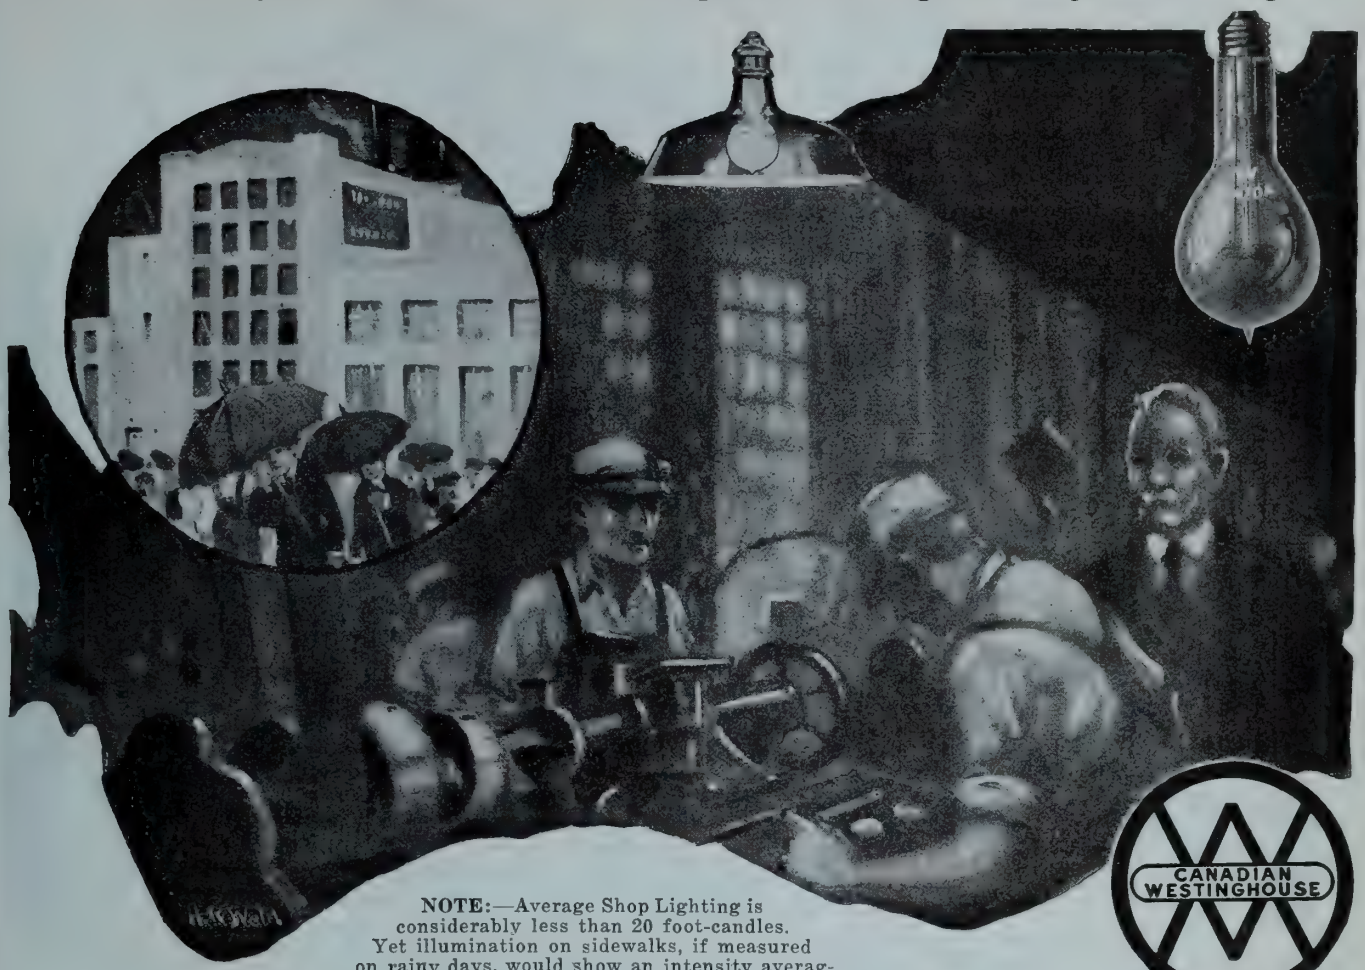
Sell him a Carborundum Knife Sharpener.

Two or three strokes and his knife will be keen—off will come the clean, nicely cut, savory slices and carving will become a pleasure.

And right now is the time to get in your stock of these sharpeners. The big jobbers have thousands of them all put up in the handy display boxes—and so have we.

There is a chance for you to put one of these sharpeners in every home in your community because it makes every household knife a sharp knife.

Holiday cutlery displays will soon be attracting buyers to your windows.



Be sure that you show Carborundum Knife Sharpeners along with Carving Sets and Household Knives.

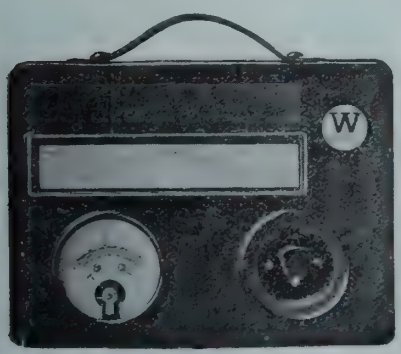
"What lighting intensity are you getting?"

NOTE:—Average Shop Lighting is considerably less than 20 foot-candles. Yet illumination on sidewalks, if measured on rainy days, would show an intensity averaging 1,200 foot-candles.



What Lighting Intensities are you getting?

That is a good question to ask any of your customers. Whether they are Industrial or Commercial Establishments, they are vitally concerned with the item of light which affects their employes.

Make our Engineering Service a part of your staff.

Ask the leading question.

Then call upon us and we will co-operate with you in giving your customers the proper lighting intensities.

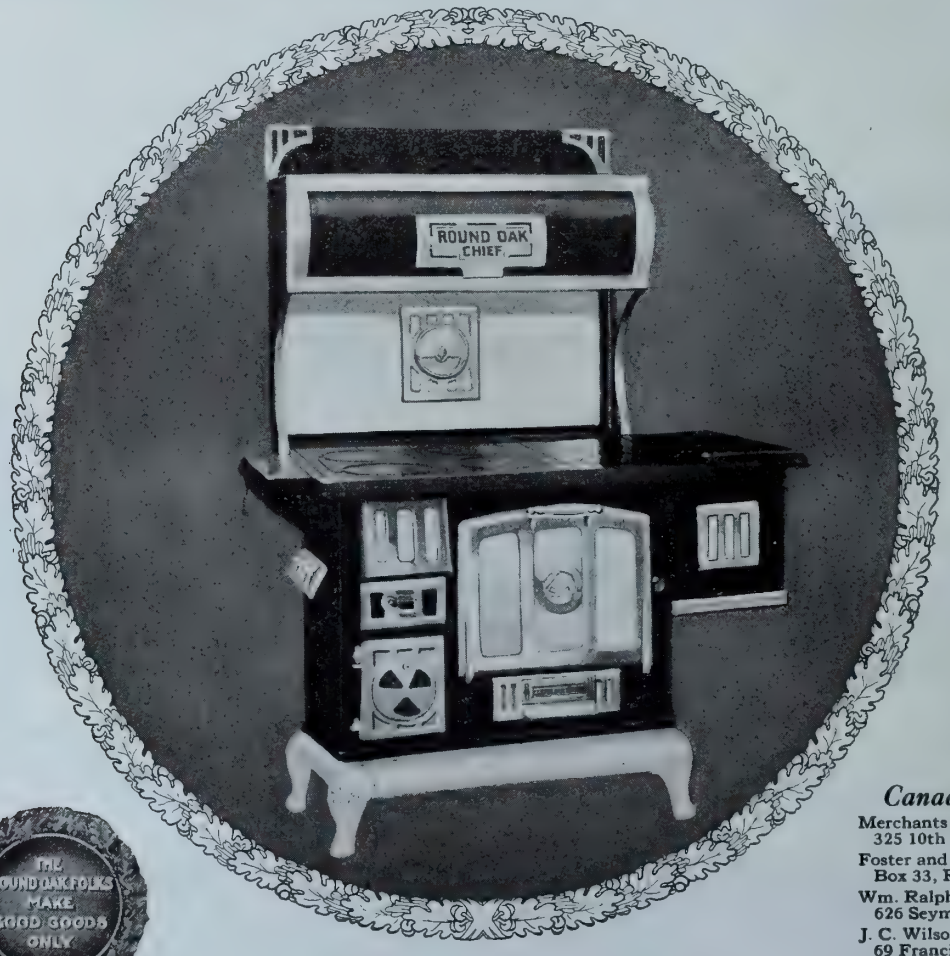
Exclusive
ROUND OAK
Dealerships Are Being Granted

Within the next few months there will be appointed a few more exclusive dealers in Canada.

We make it a policy to co-operate sincerely and liberally with our dealers. This type of co-operation naturally requires time and effort on our part. We shall, therefore, add no more dealers than we can properly assist.



The Round Oak line offers many advantages. It is exclusively a quality line, one that has been well and favorably known for over half a century. It is a line that insures satisfied customers—a line upon which the dealer can build for the future.

It is a complete line. A dealer can profitably concentrate upon it. It includes the famous Moistair Heating System, Iron-Bilt Furnaces for pipe installation, Pipeless Furnaces, Heating Stoves, Coal and Wood Ranges, Combination Three-Fuel (gas, coal, wood) Ranges, and Porcelain Enameled Ranges.

Without obligation

we shall be glad to lay our proposition before you. Please write.

he *must* have dividers

Every machinist has his set of dividers. In laying out work—measuring dimensions between lines or points, transferring lengths taken direct from a graduated steel rule—scribing arcs and circles—he uses them daily.

With such a steady demand it's good policy to learn something about the Starrett Spring Divider No. 77.

They're different from the ordinary dividers. If you will examine the quick-adjusting automatic closing spring nut you can see at once why the 77 appeals to the critical machinist. The thread engages the screw at the slightest pressure when the leg comes in contact with the nut. When pressure is withdrawn, it releases itself immediately, sliding freely on the screw. Its use saves much valuable time in opening and closing. Also made with solid nut.

Fay Spring Dividers No. 77

Fine Wire

Baling Wire

WIRE

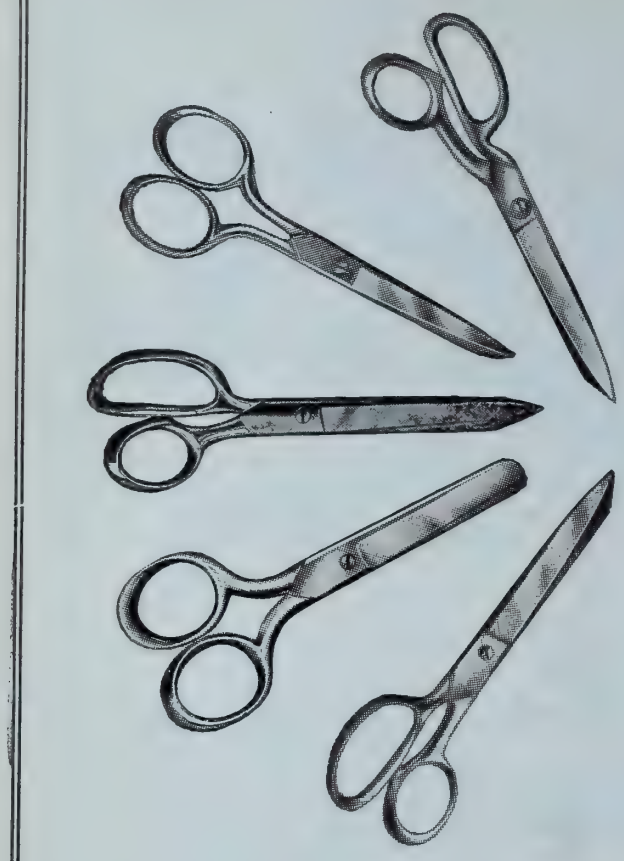
Nails and Bale-Ties

In our factory is made every kind and size of wire that is used anywhere in Canada. We are also equipped to make special wire to order for any particular purpose.

Our line of superior Bale-Ties and Baling Wire made from genuine Bessemer stock, is stronger and better though at ordinary cost.

Our high-grade wire nails and fence staples, of best design and of sturdiest materials, are sent, strongly packed so that they may be stocked and handled without litter or waste.

Stocks are complete and we are ready, always, to make prompt shipments.



Besides Bale-Ties and special Hay Baling Wire made from genuine Bessemer stock, we also manufacture Wire Nails, Fence Staples, Fine Wire, Bright, Annealed and Liquor Finished, Square, Pine, Brush, Bookbinders', Hat, Florists' and a fine quality of tinned or bright Mattress Wire, properly packed.

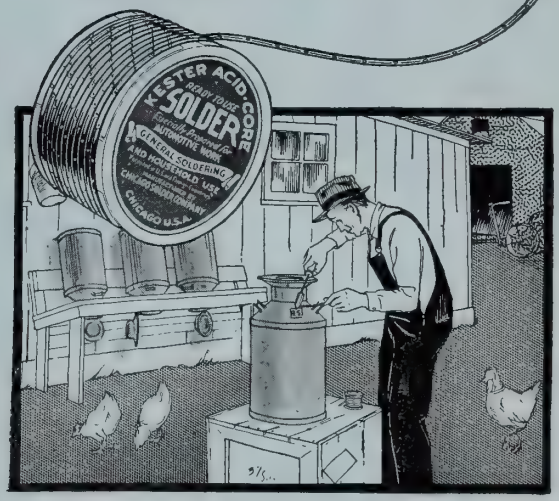
KESTER

Acid Core WIRE SOLDER

THE daily need for solder is apparent the year 'round on the average farm, but its neglected use is due to the messy method of using ordinary solder and flux, which has little appeal for the busy farmer.



Your next call for either solder or flux is your chance to make a satisfied and permanent customer. Take a spool or carton of Kester Acid Core Wire Solder and say to him, "this solder requires only heat to do *neat, rapid* and *permanent work.*"

Explain also, how the extensive use of solder prolongs the utility of various equipment.

Then *show him* how this solder contains tiny pockets, which supply the flux at the proper time.

Tell him, "Kester comes coiled in one-pound cartons or on one-pound spools, but it is more economical to buy it on the five or ten pound spools."

When he has indicated his choice, then you've made a "Kester Sale"—*clean, quick and profitable.*

Get Ready for This

Be prepared for a big Christmas season's selling of Canadian Beauty Appliances. Just so there will be no possible chance, we are going to run at selected intervals three large-sized fresh new advertisements.

These three advertisements suggest in a new and powerful way that Canadian Beauty Appliances make wonderful gifts. Has it ever struck you that of all the goods you handle, electrical appliances are the most suitable as Christmas gifts? It's a fact.

Take full advantage of this. Dress up your window with Canadian Beauty Appliances so that you will cash in on this striking advertising. Keep a good stock on hand and give it a good show inside the store.

Be ready for the early shopper. Sow the seed of the gift idea early. Don't wait until after Christmas shopping has begun. If you do you'll lose out on some good business. Stock up now—right now! Be ready for the "earliest worm!"

This Christmas Gift Campaign for Canadian Beauty is really splendid. Dates on which the advertisements will appear in the big Canadian daily papers will be sent you shortly. Meanwhile, we are "all set" to fill your orders.

Fear Another Inflation of Hardware Prices: Discuss Lowering of Distribution Expenses

Trend Toward More Efficient Merchandising Raises Question of Reducing Cost of Services Between Hardware Wholesalers and Retailers at National Hardware Ass'n Convention—Prices Definitely on Upgrade—Standardization of Hardware Discussed

EDITOR'S NOTE:—Many subjects of interest to all branches of the hardware trade both in Canada and the United States were discussed at the twenty-eighth annual convention of the National Hardware Association held in Atlantic City. Representatives of Hardware and Metal were in attendance and secured the following details concerning discussions which are of particular interest to Canadian hardwaremen:—

MUCH time was devoted by the wholesalers attending the convention to the discussion of means for combating steadily increasing overhead expenses and to thereby enable more economical distribution of merchandise in order to offset other elements which are developing in connection with such distribution. The average overhead expense of a group of representative wholesalers was shown to have increased from 16.05 per cent. in 1916 to 20.47 per cent. in 1921. In view of curtailed business in the last two years, the increasing competition for such business as exists and the tendency for merchandise to flow through channels having less costly expenses of distribution, discussion centered around a number of subjects of direct interest to retailers.

Standardization of Hardware

The question of standardization in hardware was introduced by a representative of the Department of Commerce. It was shown that in reply to an invitation for an expression of opinion from retail merchants, 2,112 retailers of 2,149 who replied favored the standardization of hardware commodities. It was shown that in single bit axes there had been 6,118 varieties in use representing variations of thirty-four models. These had been greatly decreased as result of the department's efforts.

Another Advance in Price

It was shown that hardware prices have recommenced an advance. An index figure of 100 representing the average price of hardware before the war had risen to 257 during the war, declined to 135 last January, risen to 155 in September and is now 165. Charts were provided showing that a second period of inflation is commencing, the inflation of wholesale prices being equal to that of the Civil War period. Prohibition was thought to be a splendid thing for business, it being estimated that a billion and a half dollars was annually being turned into regular business channels now which formerly went into the liquor business.

Service to Retailer Now Important

The wholesalers present expressed the opinion that service to the retail customer was now the big element with them and the sales end of the business is being emphasized to a much greater extent than buying or credit, which have each had their day.

Discussion of a chart detailing wholesalers' overhead expenses during the last few years showed an increase in expenses with a corresponding decline in turnover. More scientific pricing of goods was suggested as a solution. Concentration on certain lines was also suggested, it being estimated that 16 lines of merchandise represented 60 per cent. of sales and another 16, making a total of 32 lines, represented 80 per cent. of sales.

Want Retailers for Radio Supplies

A representative of the Radio Corporation of America pointed to the necessity of careful selection of retail distributors for radio equipment and stated that good retail outlets were now more required for radio supplies than were wholesalers. He stated that electrical dealers were poor as a class for handling this line and that the hardware merchant with a little study of the equipment was the best merchandiser for it. Some wholesale hardware firms have established a special department for radio business. Other wholesalers pointed out that they were willing to instal special departments and special salesmen for this line but they objected to the manufacturers' provision for discount only on large quantity buying, pointing out that many of them were not disposed to "plunge" into the business at first. Asked as to the necessary investment by a retailer to enter the business, the representative estimated this at $1,000 for a merchant in a centre of about 5,000

(Continued next page)

Send Bricks by Parcel Post

Read in this article the stories of various hardware merchants who tell of kegs of nails, locomotive jackscrews, and bricks for building being sent by Parcel Post.

(Continued from previous page)

Outlook for Builders' Hardware

Manufatcurers of builders' hardware, when questioned regarding the outlook for building in 1923 pointed out that while some of the need for building has been met that it will take four or five years' normal building to catch up with requirements. As for the year 1923 it was pointed out this would depend largely on the extent of labor troubles but there was said to be plenty of building in sight. The tendency seems to be toward larger construction such as buildings and industrial plants and fewer residences. Such construction calls for better grades of builders' hardware. There was said to have been much substitution for brass and copper during the war and much propaganda is now being spread to show that builders' hardware of these metals is much cheaper in the end than substitutes which last but a very short time. Business in copper screen cloth was said to have greatly increased last year.

Unit System of Packing and Pricing

The unit system of packing and pricing, which has had some attention at Canadian gatherings of hardwaremen recently, came in for discussion. Some wholesalers were of the opinion that this change had a tendency to decrease the volume of sales as frequently ten articles were sold where formerly a dozen were sold. It was pointed out that the unit system brought orders in odd amounts such as two, four, seven articles and caused much trouble unless adopted generally. A builders' hardware manufacturer who has adopted this system found it greatly facilitated their work by eliminating the expressions;—each, pair, dozen, gross, package, etc. It was pointed out that both the association of hardware retailers and manufacturers had adopted this system. The majority of wholesalers favored it providing it was adopted by all manufacturers. Dealing with the work of standardization manufacturers pointed out that many sizes, designs and finishes of builders' hardware were now being eliminated in accordance with the recommendations of the government. It was held that all could make more money with reduced overhead by following this plan.

Small Tools to Advance

Discussing the situation regarding small tools it was shown that stocks have been considerably decreased. Shortage of labor and higher cost of raw materials would, it was said, increase prices to the trade in the near future. As for competition from European imports it was pointed out that in tools where labor is the biggest factor this competition is keener than where material is a bigger factor than labor. Both tools and builders' hardware have been advancing in price since May and further increases were predicted.

Concerning trade relations with farmers it was pointed out that even at today's higher prices for agricultural products, these are equal to 1913 prices while manufactured products are still fifty per cent. above those of that time. In view of this situation the farmer could hardly be expected to be as big a customer as would otherwise be the case.

JUDGE CALLS ROLLER SKATES SPORTING GOODS, NOT TOYS

Judge Albert B. Anderson, in the United States court, has ruled that roller skates are sporting goods, and, as a result, the United States Government is $59,000 richer.

Sporting authorities had expressed a difference of opinion in the preliminary hearings, most of them saying that roller skates were toys. Sporting goods are subject to tax, while toys are not.

Parcel Post to Retailers

Much discussion also centered around the question of handling parcel post shipments to retailers. It was pointed out that such business was generally handled at a loss, but a suggestion to institute a service charge was promptly shelved. One wholesaler outlined a plan whereby he carried his own insurance on such parcels and thereby put it on a self-sustaining basis. His average parcel post order was valued at $2.71.

Send Bricks by Parcel Post

Some odd developments in connection with the parcel post were outlined, which are of peculiar interest in Canada at this time because of extensions being made in this service in this country. One merchant pointed out that the brick used in the construction of a bank building in his town in the West came by parcel post. In another town a merchant stated that the draymen were very unpopular and as a result orders for much heavy and bulky merchandise were placed for delivery through the parcel post. The government paid the bill and thereby went into competition with local delivery men. Another merchant told of a shipment of ten kegs of nails going through parcel post. Of course they had to be split up into packages to conform to maximum weight regulations but the carrying charges were less by parcel post than by other means. In another case fifteen locomotive jack screws were said to have been ordered by parcel post. Further in connection with postal matters a resolution was passed favoring the placing of the second class mail matter on a self-sustaining basis and thereby enabling a reduction in first class mail, the surplus from which now balances the deficit on second class mail.

THE BUSINESS MAN'S GOAL

Net profits—the most vital factor in business. Absolutely essential to the growth, yes, even to the existence of any business, this single item stands out head and shoulders above the rest as the most important figure on the dollars and cents balance sheet.

It is even more interesting from another standpoint, for it is an exact measure of the ability and efficiency of an executive. It is his score in the game of business.

Every activity of every day of our business year carries on toward this single goal "Net Profit."—A Message to Business Men from Roger W. Babson.

The Mennen Case

Consideration was given to the decision of the Federal Trade Commission in connection with The Mennen Case, by which a wholesaler would be compelled to grant the same price on quantity purchases to all buyers irrespective of their status. It upheld the right of any buyer to get the same price from wholesaler on a certain quantity purchase and would force the jobber to sell to a consumer at the extreme price granted a retailer for any quantity. Much opposition was taken to this decision, the hardwaremen taking the stand that it would play directly into the hands of chain stores, premium houses, etc. It was decided to make legal representations in court against this decision at the time the Mennen Company's appeal is heard.

Returned Goods

The question of merchandise being returned to wholesalers by retailers was cited as an aggravated one. An investigation of the trouble in some cases had revealed that certain salesmen were largely to blame due to taking an inaccurate record of the retailer's wants and to errors in filling such orders. In some cases retailers were said to be returning goods improperly packed thus resulting in much loss to wholesalers, and in other cases goods were returned after long periods in retail stores where they had been shelf warmers.

One prominent manufacturer pointed out that much educational work was being done through the trade newspapers and that this subject could best be dealt with through that medium. One wholesaler followed the plan of charging 5% as a handling charge where the return of goods was definitely the retailer's fault.

Collecting Interest on Accounts

The collection of interest on overdue accounts was also an interesting topic, it being pointed out that 82 per cent. of the wholesalers who are members of the association follow this plan. It was held by some that revenue raised by this means was sufficient to pay for depreciation on buildings and equipment. To prevent subsequent argument or claim on long standing accounts it was suggested that accounts receivable be turned into promissory notes bearing interest.

Want Retailers on Board in Connection With Discussion of Combine Legislation

Interesting Facts Brought Out in Hearing of Special Committee Regarding Efforts of Ontario Government to Enforce Anti-Combine Legislation—The Value of Established Resale Prices—Retailers' Representative Favors Board to Regulate Prices if Retailers Are On It

By Staff Correspondent Hardware and Metal

EDITOR'S NOTE:—Some interesting points have been brought out in connection with the hearings this week of the special committee appointed during the spring session of the Ontario Legislature to consider the proposed new Provincial Bill which has for its object the preventing of fixed resale prices. The Bill was the outcome of the case brought by the Attorney-General of Ontario against a number of wholesale grocers and manufacturers some months ago. That case was in itself an outcome of the Board of Commerce investigation into alleged combines existing among manufacturers, wholesalers and retailers which began in Hamilton in 1920 and ended in Toronto some time later. At that investigation A. W. Roebuck, representing the Attorney-General of Ontario, discovered what he considered were combines in restraint of trade. The Board of Commerce, consisting of W. F. O'Connor and James Murdock, the present Canadian Minister of Labor, in their judgment decided that up to that time they had not heard any evidence to condemn the retailers, wholesalers or manufacturers for their resale price agreements, etc., but stated that they were making further investigation and a definite decision would be given later. However, the Board of Commerce ceased to function a short time afterwards and no further investigations were made.

The Attorney-General through Mr. Roebuck then instituted suit against certain wholesalers of Ontario and a number of manufacturers. The judge decided that the Attorney-General had no right to bring such an action, but made no decision as to the rights or otherwise of a manufacturer to fix resale prices.

The Bill introduced into the last Ontario Legislature endeavored to give the Attorney-General this right, to prevent entirely the right of a manufacturer to fix by agreement his resale price from wholesaler to retailer or from retailer to consumer. Several objections were raised to the Bill at the time and it was decided to hold the matter over and in the meantime to secure opinions from the various parties interested. Hence the special committee and the session this week.

MR. ROEBUCK, in support of the Bill, reviewed several combine cases that had come before the court during the past twenty years. He also cited the Colgate and the Shrader cases in the United States. He claimed that the Shrader case came under the anti-combine Sherman Act of the United States and that the point in the judgment was that it was illegal to agree with a purchaser that he will not sell goods at a certain fixed price.

He then quoted from certain agreements between Canadian manufacturers and certain wholesalers. He thought that the most ironbound agreement of all was one in which the wholesaler was bound to sell at a fixed price and had to make an affidavit whenever called upon that he had lived up to the agreement in every way. There was also a second form of agreement between the same manufacturer and the wholesale trade in which the wholesaler was entitled to a rebate each six months if the price had been maintained.

"Do the railways fix their rates so that there won't be competition?" was asked by one member of the committee.

Mr. Roebuck—"The Dominion Railway Board arranges that."

Scope of the Bill

Mr. Roebuck referred to the method of the E. B. Eddy Company in selling the trade. They notify, he said, their customers of the price at which goods are to be sold to the retailer only, but there is no agreement as I understand it. The Bill as drafted would only touch resale agreements and would not, for instance, affect such an arrangement as the Eddy Company's.

"Is there any such legislation in any other province?" was asked. "No," was the answer.

E. M. Trowern—"Nor in the world?"

Mr. Roebuck—"There are in several states of the United States."

Mr. Trowern—"But not in operation."

"Could the Dominion Government enact a similar law?" he was asked.

"I don't think so," was the reply. "This is clearly a civil matter for the legislature."

Under this Bill, Mr. Roebuck stated, it would be impossible for a Montreal manufacturer, for instance, to collect a bill in Ontario if he had a re-sale agreement with the Ontario firm.

Hugh Blain—"They would send it with a Bill of Lading attached."—(Laughter).

Hon. Mr. Raney thought the big point at issue was whether the consumer and the retailer should be bound by an agreement to which they are not a party.

Mr. Ellis, of Barber Ellis, manufacturers, stated that he had been fifty years in business. Fifty years ago the business slogan was, "Business is War." To-day, however, this has been changed and the motto is, "Co-operation." He maintained that business men should co-operate more and not try to cut each other's throat. He made the point that if such a law were to come into effect in Ontario it would not affect, for instance, Manitoba, where his firm has a plant in Winnipeg. If a representative of theirs were to do anything contrary to this Act in Winnipeg a competitor of ours would come into Ontario and find us guilty of a criminal offence. He thought that was one feature that undoubtedly should be considered carefully.

Postage Stamps Could Be Cut

E. M. Trowern, secretary of Dominion Board, Retail Merchants' Association, Ottawa, made one of his characteristic fighting addresses in defence of the retail merchant and against the meddling in business affairs by men who, he claimed, knew little or nothing about them.

He asked the committee if they appreciated the number of things that the Bill, if passed, would affect. For instance, there were postage stamps. What would happen if every dealer in postage stamps were allowed to cut the price? Then there were automobiles, all of which were sold on the fixed price basis from dealer to consumer. There were sheriffs' and lawyers' fees, shoe polish, dry goods, furniture, different kinds of food products, implements, optical goods, pianos, sewing machines, typewriters, newspapers. There were also milk dealers. What would happen if the farmers were not allowed to fix the price of their milk to dealers?

Mr. Raney—"Are you in favor of the appointment of a board of some kind to regulate these prices?"

Mr. Trowern—"Yes, if the board is properly constituted and includes merchants." His suggestion was perhaps three manufacturers, three wholesalers and three retailers. Mr. Trowern maintained that in business there were perhaps three per cent. fakirs or pirates and ninety-seven per cent. endeavoring to make a fair and honest living. Included in the former were those who cut the price of one article and "soaked" the public on others.

"Without your merchants this country

Canadian Products In Export Markets

Possibilities Which Exist for Hardware and Other Products in the South African Market

Written for Hardware and Metal by G. PARKER WOOD, representative in South Africa of Meakins & Sons, Ltd., Hamilton, Ont.

G. PARKER WOOD

SOUTH AFRICA with an area of 473,096 square miles (not including Basutoland and Swaziland) is bigger than France, Germany, Switzerland, and Portugal put together and having a white population of over 1,400,000 with many millions of natives of many different tribes.

South Africa is quite a young country, the development has hardly seriously started, whilst the possibilities are unlimited. The total income for the year 1921 was roughly £132,000,000 derived from mining, farming, manufacturing, merchanting, etc. During 1921 the total value of exports amounted to £70,-800,508 of which gold accounted for £42,-988,731, diamonds £1,355,487, farm produce £17,723,287.

During the last twenty years, South Africa has experienced many ups and downs and trade conditions have varied considerably. As an instance, during the first quarter (January, February, March) of the present year the imports totaled £12,232,594 as compared with nearly £19,000,000 for the corresponding period last year, while the exports for the same period fell from £14,321,336 to £12,182,071, a total falling off of over £7,000,000.

The exports include ostrich feathers, wool, cotton, corn, grain, meal, Angora hair, maize, wattle bark, etc.

Want Hardware

When their possibilities are more fully recognized, South African products and industries will play an important part in the development of empire trade. There is not space enough to give even a list of the principal articles of merchandise imported but a few items can be mentioned viz: Electrical fittings, cotton piece goods, leather goods, agricultural, electrical, mining and manufacturing machinery, lubricating oils, builders and general hardware, etc., etc.

The South African parliament assembles at Cape Town, the capital is Pretoria, but the commercial hub is Johannesburg, the "Golden City", so called because it has grown up by reason of gold and it lives by gold. Unlike so many mining centres it is not likely to fade away, but is growing bigger and bigger every year, new suburbs are continually springing up. From a mining camp thirty years ago Johannesburg is to-day a magnificent city. Unfortunately during the last months we have had labor difficulties that have led up to a mad revolution. Johannesburg became engulfed in a tidal wave of blood and beer. All the forces that debase, mislead, maim, and murder, ran amok and for a few days the rabble seemed to be gaining. Much damage was done, much property destroyed and many lives needlessly lost. Johannesburg went back, back, bruteward, gutterward, slimeward, and in that midnight of feud and blood and drink and greed and lust, the clock of commerce was set back.

Revolution Settled

Fortunately the forces of right prevailed and the revolutionaries were rounded up and to-day they stand sighing, cringing, whimpering. As we see them now, they are just the type of men who resent, scorn and threaten all that tends to thrift, honesty and decency. Just a few arrogant, defiant men without reason, commonsense or restraint, led forward with satanic, idiotic impudence this revolution, the stupidest, wickedest, costliest family quarrel in the history of South Africa. Unfortunately the effect was felt in every corner of the country, almost everybody has suffered. But now in the afterglow of a bitter hard fight, with all shoulders to the wheel with energy redoubled, with gallant, confident, efficient service, progress will be natural and automatic. With our troubles apparently ended, there is reflected throughout the land a better spirit, a desire to "make good" and on every hand a move forward.

Extending Railways

The South African government is extending its railways in various parts of the country, at a cost of £4,037,629 on 21 new lines, covering 851 miles, which will mean the opening up of large agricultural districts. Johannesburg municipality has entered into an arrangement with the National Bank of South Africa Ltd., London, to float a loan of £1,000,-000 to be used in extensive improvements. This loan, an accomplished fact now, is a tangible proof of confidence in the Rand and its industrial resources. Sound banking methods are yielding the benefit of appreciating values to the mutual advantage and to the immense gain of South African interests. Visibly and rapidly we are returning to normal. Traveling over this country as we do, and seeing so plainly the turning tide, we feel justified in expressing optimism. Could we but fly to some lofty height, whence, looking down, take in this nation at a glance, in all its wide extent! Hear the roaring oceans, east and west and south, and ever and again between their mighty voices catch the murmuring of woods and streams, the ring of axes in the forest, the clang of factory bells, the crash of the battery-stamps, the hum of traffic and the shouts of playing children. See the yellowing harvest, the mountain sides veined with granite and gold and silver, see coal and iron bursting from the hills, see flocks and herds fairly burrowing in lush pastures, see fishermen drawing in the rich spoils of the sea—and always in the midst of the pervading harmony, constant and penetrating comes the call, Forward! Everybody!

It is going to be a hard, long struggle, but we are in this fight to win. We are going forward doing the best we know, and the best we can, without a break or a rest or even a doubt of the outcome.

Canada's Trade Expands During Past Six Months

THE summary of Canadian trade covering the first half of the fiscal year, issued by the Department of Customs and Excise this week, shows that up until September 30th last, Canada's trade has expanded appreciably. The fact that the increase is on her exports, while imports remain about stationary, is taken as being very encouraging. On September 30 the grand total of Canadian trade stood at $759,374,880, or $37,664,156 more than in the six months period which ended on that date last year. When comparing the figures for September of the present year with those of the same month in 1921, an increase of $13,857,005 is shown. In this month alone Canada's trade this year totalled $133,252,691 as against $119,395,-686 in 1921.

It is in export figures that the mark-

There's A Knack In Selling A Farmer

Still a Sticker on Prices Though Getting Better Return for His Product—Farmers on Prospect List Respond to Specials in Automobile Accessories and Such Lines—Ottawa Hardwareman Finds Good Possibilities for Sale of Bee Supplies

A natural setting has been achieved in this arrangement of Fall sporting goods by Cuzner Hardware Co., Ltd., Ottawa, Ont., through the use of cedar trees brought in from the bush. A model tent is shown, surrounded with the usual camping accoutrements of the sportsman, including vacuum bottle, flashlight, traps, ammunition, compass, axes, gun covers, hunting knives, rifle cleaners, etc.

SELLING a farmer is by no means the easiest task which confronts the hardware merchant, whose place of business is in close proximity to the provisions market, according to Willard W. Cuzner, president of the Cuzner Hardware Company, Ltd., of Ottawa, who recently discussed this phase of his business with Hardware and Metal.

"They are a hard lot to handle," he said, "and you have to handle them very judicially if you want to retain their custom." Mr. Cuzner laid special emphasis upon the fact that the average farmer is a sticker on prices. "He is at all times a bargain hunter and will very often travel from store to store in the hope of getting a certain article five cents cheaper."

Mailing Lists of Farmers

A farmers' mailing list is kept in this store and at various seasons of the year circulars are sent out calling attention to seasonal merchandise. At the beginning of the present year a circular of this nature was sent out announcing a special sale of spark plugs at 99 cents, the regular price having been $1.25. A feature of this circular was the opening remarks which were couched in the following manner:

"You may not have bought goods from us before, but just because we don't know each other is no reason why we should not get together and do business.

"Why not give us a trial? A visit to our store will convince you that our aim is to give satisfaction and good service to our patrons, and to charge reasonable prices.

"Watch our weekly specials."

Very often a gentle reminder or a suggestion contained in a business circular of this nature, will result in a sale. The educational or suggestive angle was adopted by this firm with very satisfactory results in connection with the offering of a certain make of bee hive at a popular price. Circulars were printed; some were distributed amongst the farmers on the market and others were sent out by mail. Special attention was drawn to the fact that: "There are thousands of people who not only keep bees for pleasure, but who have made it a most profitable vocation." After setting forth the sterling qualities of a certain make of bee hive, the circular went on to say: "We are in a position to take care of your needs in supplies. We carry a grade of properly made hives and fixtures at an exceedingly low price. Prompt and careful service will be given to our customers."

When the growing season opens up, this firm is right after the farmer trade again with the following appeal:

Dear Sir:—

As a grower of fruit and vegetables you will before long be in need of a good sprayer and spraying material.

Too many people postpone or overlook the importance of spraying their plants or trees. Greater production will more or less tend to increase your purchasing power.

Eliminate all possible losses caused by insects.

Destroy same. Spray freely.

To-day's Offer

Hand sprays regular 85c and $1.00 for 69c.

——— Spraying material ½ box 10c. 1 box 18c.

We also stock paris green, arsenate of lime, etc.

If you desire a particular make of sprayer, which we do not stock, upon short notice shall endeavor to procure same for you.

Arguments Which are Selling Stoves

Aggressive Advertising of Stoves, Ranges, Heaters, Fireplace Furnishings Bringing Results—How a Hardwareman Changed the Ideas of a Confirmed Mail Order Stove Buyer

A DISCUSSION of sales of stoves and hunting equipment at this time of year brings to mind the story of a hardwareman who recently sold a kitchen range to a man who for years had patronized mail order houses, and how this sale was brought about through an initial sale of hunting equipment.

An old farmer entered Jones' hardware stotre and asked for a package of shells, for which he paid, and after having told the proprietor that there wasn't anything else he started towards the door.

There was a double row of cooking stoves and ranges, reaching almost through the entire store and one faced the entrance. When the old fellow had reached this stove he stooped, opened the oven door and looked into the oven.

Jones who had followed him asked if he was thinking of buying a stove.

"No," said the farmer, "I got one a couple of years ago; but 'the old woman' says it's no good. She says it won't bake."

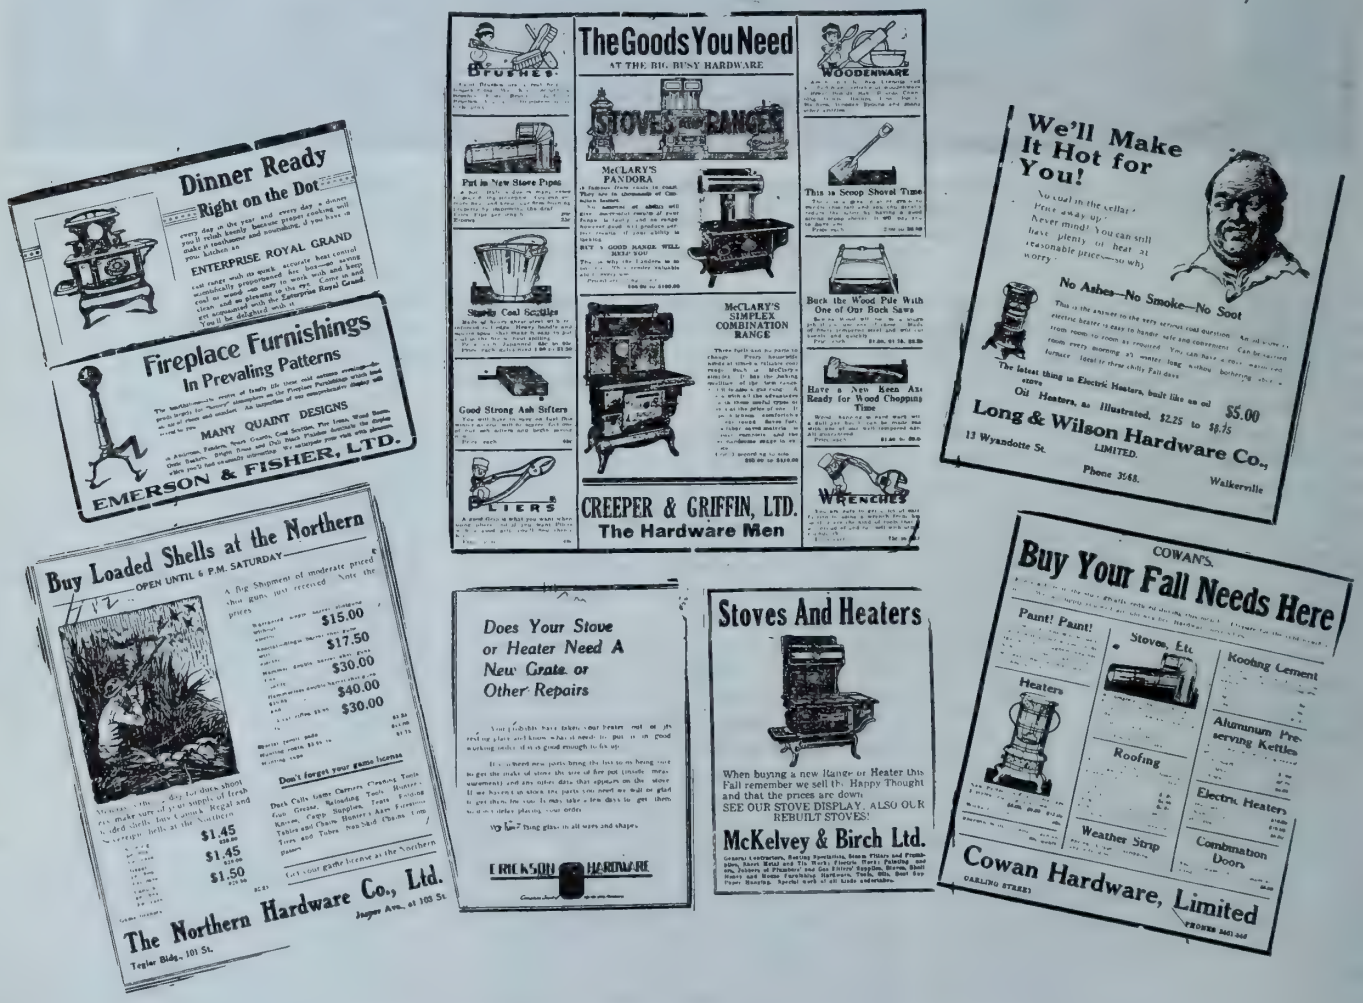
"What is the matter with it?" asked Jones.

"The oven 'leaks'," said the farmer, "at least 'the woman' says that she can't keep it hot enough to bake bread without having the draft on all the time and if she does that it gets too hot and burns the bread."

"What kind of a stove did you buy? Where did you get it?"

"I got it in ———. How much is this one?"

"One hundred dollars. What did you pay for yours?"



"Fifty-nine-fifty. That is an awful price to pay for a stove."

"Never mind about that. Would you like to trade your old stove off if you could get a good deal?"

Jones realized here that he had made a mistake in naming the price on his stove before he had even gotten the farmer to the point of saying that he might buy a new stove, but he made the best of the situation and that was why he suggested the trade, which at once got the farmer interested.

Then he went ahead and made a very good selling demonstration of his stove, and it is interesting to note in this connection that he carried in stock only two makes—one a cheap cast iron, the other a malleable, but each in various sizes and styles—four and six holes, with or without warming cabinet and water reservoir.

He pointed out first that the fire box in his high grade stove came in four

Group of Retail Hardwaremen's ads on stoves and sport goods.

When "The Frost is on The Pumpkin"

The week before Thanksgiving Day on November 6 offers the hardware merchant an opportunity to feature the sale of silverware, carving sets, and other such articles of table equipment for the feasting season. It is the time of year when friends do much visiting and the hostess is anxious for the table to look the best. A special Thanksgiving window such as this might be arranged making use of wheat sheaves, pumpkins and other articles of the harvest to indicate plentiful supply of foodstuffs.

pieces which fitted each other perfectly and which made it possible to replace one of them if it should be damaged in any way. The fire box in the mail order stove was in one piece.

Taking the top off he showed that there was quite an air space between the outside of the fire box and the oven, and here was where he put in his strongest argument for his stove.

"This air space," said he, "heats the sides of the oven without bringing the sides into direct contact with the hot fire box. That was where the trouble came in with your stove. The side of your oven was right up against the fire box; that was what made the sheet iron 'warp.'

"Then note the thickness of our oven sides. To be sure, it takes a bit more time to heat the oven, but once it is hot it will keep the heat so much longer, and there is much less danger of the sides 'springing' the way yours did."

But all this time, the farmer seemed uneasy and thinking of something besides what Jones was telling him, and finally he let it out.

"That may all be so, but look at your price. It is nearly twice as much as my stove cost me all laid down here."

"Sure," said Jones, "that is a fact, but just figure this out: You paid about a third less for your stove, and it is useless now—two years after you bought it. You know Jim Smith, who owns the place on the corner just beyond you. He is in town to-day. You can easily find out what he thinks of my stove. He bought one six years ago."

By good luck Jim Smith happened to pass by, and Jones called him in.

"How about it, Jim, what does Mrs. Smith think of that stove she bought from us?"

"Jim" was one of these pleasant individuals who hate to admit that anything a merchant sells them turns out absolutely satisfactory, so his reply was not just what Jones would have liked, but it gave him a chance to point out that Mrs. Smith had won a prize for the best batch of bread at the county fair the previous fall, so there couldn't be any doubt as to the baking qualities of the oven—and the stove had then seen six years' service.

Finally the farmer said that he would see what "the women" thought about it, and "maybe next time they came to town they would come in and look again."

"Oh, is Mrs. Jones in town? Why didn't you say so before? Where is she? I'll send one of the boys out and ask her to come over."

So Mrs. Jones was brought over, and it didn't take long for Jones to point out to her just where his stove was strong as compared with the one she had and didn't like.

THERE'S A KNACK IN SELLING

(Continued from page 39)

And now that the cold weather is here no opportunity has been lost to let the farmer know that the Cuzner Hardware is prepared to solve his fuel problems.

Nor has the hunting season been overlooked. As a special drawing card this firm took pains to put in a good seasonal window trim—a hunting scene, as nearly realistic as possible. A couple of cedar trees were brought in from the bush and a small tent was erected. Surrounding these was all the paraphernalia of the hunter: rifles, traps, compasses, axes, gun covers, hunting knives, thermos bottles, shot guns and rifle cleaners, etc.

Chatham Hardwareman Gets Valuable Prospect List at Local Fair

A FREE separator contest was arranged by the Willard Hardware Co., Ltd., of Chatham, Ont., in connection with the local fair. Any farmer or farmer's wife was eligible for a coupon on which they wrote their name, post office, lot no., concession, township, kind of separator and number of years in service. Of those entering 51% were men and of this number 31% had not a separator of any kind; 45% had separators under 10 years old; 13% had machines from 10 to 15 years old. The veteran was one showing 25 years. The entries included 21 makes of cream separators but 68% of the total was made up by four leading makes.

(Encouraging persons visiting a fair to give such information provides the merchant with an excellent prospect list to work on for washing machines, vacuum cleaners and all such equipment. It represents a valuable and inexpensive list at the cost of prize money.)

Will be a 60 to 65 Per Cent. Year

A REVIEW of the iron and steel industry on this continent reveals some interesting facts notable among which is the fact that production is now again up to 70 per cent. compared with 50 per cent. during the coal strike and the most severe periods of the car shortage. Production of steel ingots this year is nearly double that of last year and taking it all through this year is regarded as a 60 to 65 per cent. year compared with 40 per cent. last year. Railways are buying equipment in better volume now than for some time, much structural steel is being used, the automobile industry is active, implement works are getting a fair start again and much construction of oil storage tanks is producing plate business to make up for that lost by lack of marine construction.

Prices are not expected to alter much for the next four months from the higher levels recently established. Labor costs are now twenty per cent. higher than in the summer months and producers still claim to be making small margin of profit. Present pig iron prices are out of proportion to steel because of the shortage caused by the blowing out of furnaces due to coal shortage. Stocks are reduced throughout the country and a continuation of 70 per cent. production into the winter is quite to be expected.

A New Era of Merchandising

THERE ARE unmistakable signs of a continually mounting ground swell in the sea of merchandising plans and ideas. This development is inexorable. It is progressing every day and retail merchants who do not "take time by the forelock" may find themselves in a perilous position.

The signs are represented by such factors as the large numbers of persons now entering into the retail hardware business thus creating more competition. The 5, 10 and 15 cent stores are showing more extensive ranges of hardware and are featuring it strongly. Other branches of retail trade are cutting in considerably on the sale of a number of profitable specialties which formerly were closely identified with hardware. Progress is being made in the establishment of chain stores. Department and mail order firms are going aggressively after business. These are but some of the signs that the merchandising of hardware is undergoing a change, that the best brains in the business are seeking more economical means of distribution. Buyers are raising a cry against the big spread between manufacturers' prices and those asked by the final distributor, and the middleman is getting the blame. Progress has already been made toward more efficient merchandising and when prices are more stable this development may proceed apace.

To hold their place in the new era of merchandising retailers will necessarily have to give close attention to buying and selling with a view to rapid stock turnovers. The big trouble to-day is that curtailed business has increased the unit overhead cost. This must be reduced by more rapid turnover at lower margins where the goods are more likely to be purchased. It has been a common thing in the past for 20 per cent. of the hardwareman's stock to be "dead" from the time it entered the store. The day is here when a great deal more than three turnovers a year must be made in the hardware trade, and in planning to meet this competition the hardware merchant has the advantages of experience, personality and close contact with buyers. What he needs is better merchandising principles, accounting methods providing a constant reference as to the condition of the business, and efficient retail salesmen to back up his effort. He will find that more attention must be concentrated on selling, and the merchant's time should be employed in planning improvements along these lines rather than taken up with work which subordinates can do.

Where Business Newspapers Assist

INCREASING appreciation of the value of the co-operation between the U. S. Department of Commerce and the editors of business newspapers was expressed by Julius Klein, director of that department, at the convention of the Associated Business Papers Inc. This sympathetic attitude has brought much intelligent assistance to the government's efforts and it is no secret that the editors so consulted are regarded as authorities.

With the changing aspect of both domestic and foreign trade the business newspaper is assuming an even more important position. The need is for specialized effort as applied to specific problems. This applies in a very real sense to export trade where much educational work must be done among business interests at home as well as abroad. Oftentimes possibilities in export markets might be so developed as to relieve acute merchandising conditions at home such for instance as the recent orgy of domestic peddling of various commodities due to shortsighted buying. The situation regarding export trade is rapidly changing. Whereas formerly it consisted largely of self selling staples it now runs more extensively to manufactured goods. Such business must be handled with thorough understanding of facts and efficient methods, hence the need for close relations with the business men through the business newspapers. In this connection Dr. Klein states "by indulging in such alliances with business paper editors, we are sending the message to the merchants and we feel that one of the most important parts of this work is our close association with editorial pages such as yours."

Brief

THAT THE deepening of the St. Lawrence waterway to allow ships from the great lakes to carry their cargoes to the seaboard without transferring would result in such economies as to allow the famer fifteen cents a bushel more for his wheat, was the statement made to the gathering of the National Conference of Business Paper Editors in New York. It is evident that with reconstruction going on gradually in Europe and the ultimate return of competition of European grain in the world's markets, that the prosperity of our farmers on this continent rests very largely in adequate transportation facilities both by rail and water. In this, therefore, the merchants of the farming communities have a very real interest.

Canadian Hardwaremen Pay Tribute To the Late James Hardy

GLOWING tribute is paid the personality and integrity of the late James Hardy of the firm of James Hardy & Son, Toronto, Secretary of the Canadian Wholesale Hardware Assn., in the following expressions from representative Canadian hardware manufacturers and wholesalers. The sudden death of Mr. Hardy at Atlantic City was dealt with in last week's issue of Hardware and Metal. The funeral from his home in Toronto was largely attended by many social and business admirers.

In the passing of James Hardy, of James Hardy & Son, Toronto, the Canadian Wholesale Hardware Association are not only losing their founder and organizer, but an official, he having been secretary since its inception, who was dearly loved and whose unbounded worth was thoroughly appreciated.

Mr. Hardy had such a vast amount of executive ability, and this, coupled with his wonderful personality, incurs by his passing, one of the greatest losses in the mercantile and financial centres of Canada, that has occurred for some time.

We, the Canadian Wholesale Hardware Association, have lost our real head, and we feel it most keenly.

T. M. BIRKETT, Ottawa.
President, Canadian Wholesale Hardware Assn.

* * * * *

It came as a great shock to me when I read of the sudden death of Mr. James Hardy. Our association has lost a valuable member and a loyal supporter. The writer has known Mr. Hardy for the past twenty years or more and suffice it to say that to come into contact with Mr. Hardy was a pleasure not soon forgotten; his personality and friendship endeared him to us all.

ALBERT J. TEAKLE,
The Herman Young Co., Reg'd., Quebec.

* * * * *

James Hardy was one of two splendid Englishmen with whom I became acquainted soon after their arrival in Canada and who continued as valued friends all through their lives. The other was the late Hon. Senator Nichols. It is a coincidence that both were accountants, both took up association work, but Mr. Nichols later became father of our electrical development and head of the Canadian General Electric Co. They never reaped the rewards for their great services to Canadian industry. Mr. Hardy and I came together on The Empire, now The Mail and Empire—he as auditor and I as financial editor. In later years, when he organized many Canadian metal industries, price fixing was one of the factors. This brought us into constant conflict over current market quotations, special discounts and other association news. His interests lay in maintaining association figures for his clients while our duty to our readers lay in giving the prices as they actually were. There were and are to-day very often great variations in the figures quoted to rival buyers. Mr. Hardy made many a trip to our office and there were many hot arguments, but he was a big man and at no time did these affect our personal relations.

In later years he began to take a more democratic view, finding that there was more to be gained by giving all the facts frankly. Shortly before his death one of the editors told me that Mr. Hardy had handed him a very confidential file for his perusal, "leaving it to him to decide what was fair." He thoroughly understood that we never opposed fair agreements on terms and prices and working arrangements that would aid and enable Canadian manufacturers to develop, and on several occasions when off duty he would express his accord with us in refusing to suppress facts or in opposing short-sighted policies, but said that in all his associations there were some very small men who could not be induced to take a broad view; who, in effect wanted tariffs, monopolies and fixed prices to make up for incompetence and bad service.

J. B. MACLEAN,
President, MacLean Publishing Co., Ltd., Toronto.

In the death of Mr. James Hardy the business community has lost one of the most upright, honorable and able men in Canada.

ROBT. HOBSON,
President The Steel Co. of Canada Ltd., Hamilton, Ont.

* * * * *

In the passing of Mr. James Hardy, Canadian business life has lost a strong pillar. He was possessed of such a wide diversity of gifts that his counsel and advice were invaluable in any business situation. His was a broad open mind that could clearly see both sides of a question and his fairness of judgment was a wonderful guide to the satisfactory solution of business problems. He was undoubtedly one of the most widely known men in the country coming into contact as he did with all branches of commercial life, and possessing a wonderfully kind disposition numbered his friends by the thousands. His mind retained what was vital in the last thirty or more years of Canada's commercial life and in the discussion of problems, his memory could be counted on to furnish "what had transpired before" and, therefore, with his passing a gap is left which will be almost impossible to fill. His public service was not confined to his own country for in a great many instances he was called by business interests in the U. S. to "come over to Macedonia" and help them.

It was touching indeed at Atlantic City to receive from his American friends by the hundred, sincere tributes to his worth and regrets at his passing which was an evidence of his wide friendships and the wonderful regard in which he was held by all people.

S. H. ALEXANDER,
Wood, Alexander & James, Hamilton, Ontario.

* * * * *

The life of James Hardy was doubtless shortened by the hard work he undertook in the interests of his clients. He was a great help to the jobbers, manufacturers and bankers. He was the captain of the commercial fleet, and sailed it successfully through heavy storms and kept it from many a wreck. Several times he must have strained his strong constitution in bringing what he had in mind to a successful conclusion, but he generally carried his ideas through, and being a fair fighter, the losing side always held him in respect and admiration.

A. F. HATCH,
Canada Steel Goods Co., Hamilton, Ont.

* * * * *

It was with deep regret that I learned of the death of my old friend, Mr. James Hardy, as my association with him goes back many years to the early days of Jenkins & Hardy, as secretaries of various trade associations that they and I were connected with.

I can only bear testimony to the strict impartiality displayed at all times by Mr. Hardy, and his desire at all times to do what was right and equitable, and though of late years I have not met him in his official capacity, I know he continued the policy of being fair and just to all.

With many others I shall miss his good fellowship and genial ways.

WM. McMASTER,
Montreal.

(Continued on Page 55.)

Events in the Trade

NEW STORE

Montreal.—Lambert Hardware Co., 2552 St. Hubert St., is building a new $20,000 store.

John R. McMullen has opened a new hardware store in Truro, N. S., under the firm name of McMullen Hardware.

BUSINESS CHANGES

Dresden, Ont.—W. J. Jeffs hardware merchant has been succeeded by Sharpe Bros.

Coatsworth, Ont.—W. F. Beattie hardware merchant has been succeeded by John Goodison.

ONTARIO INCORPORATIONS

E. Evans Co. Ltd., head office Toronto, capital $40,000, to manufacture hardware specialties and novelties.

PERSONAL

W. D. Shambrook, Duro Aluminum Ltd., Hamilton, Ont., has returned after a trip throughout Western Canada calling on the firm's representatives.

J. A. E. Bureau, of Richardson & Bureau, Montreal, left this week on a trip through the western provinces to the coast. Mr. Bureau will be away for a period of six weeks.

M. C. Hermann, representing the Aluminum Goods Mfg. Co., Manitowoc, Wis., visited their Canadian representatives in Montreal last week.

W. S. Fallis, vice-president and managing director Sherwin-Williams Co. of Canada, and W. J. Delaney, advertising manager, left Montreal this week to attend their Western Canada sales convention to be held in Winnipeg on October 31st, November 1st and 2nd.

Stanley Baldwin who, it is said, may become chancellor of the British exchequer in Bonar Law's cabinet, was, until he became prominent in the Conservative party, a director of the Baldwin Company, which controls steel plants in Canada and South Wales. He resigned his directorship when he took office, so that his interests in the company today are purely financial.

CANADIANS AT NATIONAL HARDWARE ASS'N CONVENTION

The following Canadian wholesale hardwaremen and manufacturers attended the twenty-eighth annual convention of the National Hardware Association of the United States at Atlantic City, N. J., October 17 to 20:—Thos. Birkett, Ottawa, President, Canadian Wholesale Hardware Ass'n; Colonel Robert Starke, Starke-Seybold Co., Montreal; Gordon Seybold, Starke-Seybold Co., Montreal; A. E. Gilverson, Rice Lewis & Son Co., Toronto; W. J. Lawson, Rice Lewis & Son. Co., Toronto; T. B. Williamson, H. S. Howland & Sons Co.; S. H. Alexander and Mr. Fleming, Wood, Alexander & James, Hamilton, Ont.; C. S. Whitwam, Hobbs Hardware Co., London, Ont.; the late James Hardy, secretary of the Canadian Wholesale Hardware Ass'n., whose death was announced in last week's issue of Hardware and Metal; Colonel Arthur Hatch, Canada Steel Goods Co., Hamilton; Geo. Spence, The Steel Co. of Canada, Hamilton; Geo. Griffith, B. Greening Wire Co., Hamilton; H. G. Wright, president E. T. Wright Co., Hamilton; C. H. McGhie, Welland Vale Mfg. Co., St Catharines, Ont.; G. D. Davies and H. L. Southall of Hardware and Metal.

QUEBEC HARDWARE PARTNERSHIP DISSOLVED

Of interest to the trade, especially in Eastern Canada, is the announcement that the Herman Young Co., reg'd., wholesale hardware merchants of Quebec City, has been dissolved by mutual consent. Upon the retirement of Herman Young the total assets of the company are acquired by A. J. Teakle, former partner and the business will be carried on under the same name and address.

The firm was established by Mr. Young's father in 1854 as a retail store. After the death of Mr. Young, Sr., it was conducted under the partnership of Herman Young and Jas. Young, until 1910, when the latter withdrew and Mr. Teakle was admitted as a partner.

Mr. Teakle's connection with the firm covers a period of 34 years, and commencing as a junior clerk he worked his way to manager, the position he held prior to the partnership arrangement in 1910. During this time he has seen the business grow from a small retail establishment to its present standing.

After continued growth as a wholesale and retail store it was decided to conduct only a wholesale business, and it was in September, 1921, that establishment under its present status took place.

A. J. TEAKLE
Former partner in the wholesale hardware business of Herman Young Co., Quebec City, who has now acquired the total assets of the company.

MARITIME WHOLESALERS MEET

Halifax, N. S.—The quarterly meeting of the Executive of the Maritime Wholesale Hardware Dealers Association was held in the Board of Trade rooms. St. John and Halifax hardware firms were represented at the meeting, which dealt with routine business.

Those from St. John were J. F. Tilton, of the W. H. Thorne and Company; R. M. Bartsch, of the S. Haywood Company; T. D. MacAvity, of T. MacAvity and Sons. J. S. Neil, of J. S. Neil and Son, Fredericton, N. B., was also present.

HARDWAREMAN VICTIM OF BOGUS CHECK ARTIST

Thomas H. Boyd, hardware merchant, 2252 Queen Street east, Toronto, is minus a fire basket and $23.75 in cash. All that he has to show for the utensil and the money is a bank check for $29.75 signed or printed by a corporation that does not exist, except in fancy, and marked "accepted" by means of a spurious stamp. The bit of "official" paper, obtained Mr. Boyd knows not how or where, is payable to one Harvey Lang, and endorsed by "Harvey Lang, Munro Park." The Munro Park number given does represent a house, but nobody there knows Harvey Lang.

It's the old, old story: A well-dressed man of thirty-two or so motored up to Boyd's store. The stranger entered, said he was Harvey Lang, and had met Boyd before, etc. Lang made a purchase and produced the check in payment.

Mr. Boyd did his banking in the usual way. The date was October 11th. In due course, although the shock was sudden when it came, the check was returned by the bank on which it was drawn. Harvey Lang was without an account there, etc.

NEW INDUSTRY IN FORT WILLIAM

Fort William, Ont.—A new industry has commenced operation in Fort William. The buildings once occupied by the National Tube Company on Montreal street, west, Fort William are now housing a manufacturing enterprise known as the Swanson Iron Works, whose specialty is the fabrication of ornamental gates and fencing, and the manufacture of all classes of structural iron work, and general repairs.

Mr Swanson, head of the new firm, is well known at the head of the lakes as an artisan in the working of iron, having been connected with the Port Arthur Structural Iron Works and later in business for himself under the firm name of Swanson and Peterson.

SECOND ANNUAL INTERNATIONAL SALES CONVENTION OF HOOVER SUCTION SWEEPER CO.

The second annual international sales convention of the Hoover Suction Sweeper Company was held for a week near North Canton, Ohio. Here, on the Hoover farm several miles from city and factory distractions, were gathered nearly two hundred of the organization's sales force and officials, representatives from America, Canada, England, Holland and Switzerland. The personnel included sales, advertising, service and engineering officials, district and divisional sales managers, American and foreign, and a number of salesmen who had in the past year exceeded their fixed sales quota and "delivered the Blue Vase" symbolic of great achievement.

The convention site lay in a grove of shady trees where sleeping quarters were afforded the delegates by means of a number of small tents. Meals were served in a large tent and another canvas edifice provided place for the real business of the conference. In this last tent sessions were held both morning and afternoon, sessions devoted exclusively to the study of methods designed to increase Hoover sales. Qualified sales instructors and officials led the meetings and every moment was fruitful and instructive to the assembly.

Western Canada News

D. D. Farmer, hardware merchant of Troucha, Alta., was a Calgary visitor during the week.

Len. Smith, of the Blackie Hardware, Blackie, Alta., spent a day in Calgary calling on the hardware jobbers.

The Minor Hardware and Motor Co., Ltd., has been incorporated at Abbey, Sask.

C. B. Phillips has sold his hardware business at Rosetown, Sask., to Graham Bros.

The Standard Stove, Range and Furnace Repair and Sheet Metal Works has been organized at Vancouver with John L. Dionne as the principal shareholder.

Vancouver.—The Jamieson Engineering Co. has been incorporated at Victoria with capital of $50,000. Head office will be located in this city.

The Burrard Iron Works, Vancouver, has taken out a permit for the erection of a two storey brick and tile workshop to cost $8,000.

T. E. Yuill, manager of the Calgary branch of The J. H. Ashdown Hardware Co., Ltd., has just returned from a week's visit to head office at Winnipeg.

W. S. Fisher, president of the Enterprise Foundry Co., of St. John, N. B., and past-president of the Canadian Manufacturers' Association, is on the coast on a business trip.

Le Roy Smith, secretary of the California Retail Hardware and Implement Association, San Francisco, California, spent a few days in Winnipeg on a pleasure trip.

Vancouver.—The foundry and machine shop of Letson and Burpee, 172 Alexander Street, was damaged by fire to the extent of $10,000, all of which is covered by insurance. The foundry and pattern shop were badly gutted. D. A. McIntosh, the manager, announces that the burned portion will be rebuilt immediately.

L. C. Goebel has commenced a hardware business at Kamsack, Sask.

The marriage of Miss Dorothy Dowding to Frederic Leslie Sara, manufacturers' agent of Calgary, Alta., took place on Saturday.

Harry Rushton, buyer for J. A. Thompson, Locanville, Sask., was a caller at the J. H. Ashdown Hardware Company.

J. L. Hoult, sales manager, the Standard Chemical Company, Limited, Montreal, was on a business trip to the Winnipeg branch office.

J. H. Flack, supervisor of sales for the Thos. Davidson Manufacturing Co., Ltd., of Montreal, spent a few days of this week in Calgary and district.

Valentine Quinn, manager of the Granby Consolidated Mining and Smelting Company, Vancouver, stated that one-third of British Columbia's copper production is steadily going to Germany.

Vancouver.—"Buyers week" has been definitely set for next February at the same time as the convention of the Associated Boards of Trade of B. C. Details are in the hands of a committee of the whloesale bureau of the board of trade which is behind the move.

Bissett & Webb, Limited, hardware brokers, Winnipeg, have leased the Ashdown Building, conveniently located in the wholesale district, at the foot of James Ave., two blocks off Main Street. This building is on the C. N. R. transfer track, and is of reinforced concrete construction.

Among the visitors to Vancouver this week were A. T. Diplock, general sales manager the Steel Company of Canada, who installed Stuart R. Kell as B. C. manager in place of W. F. Irwin, who has been transferred to Winnipeg. Mr. Kell was introduced to the trade by Messrs. Irwin and Diplock.

"If We Could Hold All Our Customers"

Every hardwareman knows what it would mean to his business if he only lost customers by death or removal from the district or other such unavoidable cause.

BUT- ***one of the big causes of business failure to-day is the loss of customers through avoidable causes, An article peculiarly fitting to the hardwareman's case will appear in next week's issue of HARDWARE and METAL. Be sure to read it. It will help stop some leakages of business in your store.***

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

Re New Immigration Policy for Canada.

Editor of Hardware & Metal,
Toronto.

What do you think of the above policy discovered by our Dominion Government? In the opinion of the writer, and I am confident that 99 per cent. of the retailers throughout Canada, if they give it a thought, figure it a joke.

Can you tell me of what use it is to bring in immigrants only to lose them again?—and to lose more each succeeding year?

What our Government needs to do is to devise some scheme to retain the people we have in Canada before bringing in others.

It is no doubt true that a flow of immigrants would help steamship companies and railroads, but what is to become of them after they land? Go on the land, you say. Why 75 per cent. of the farmers want, or will be compelled to quit the farm. Why? Because farming cannot be made to pay.

There should be a general stock-taking of the overhead expense in the running of Canada, and you will need no commission either to get the information. The employees alone, drawing pay are at least 50 per cent. too many.

A station agent claimed that in one week, with only two trains a week, 24 inspectors passed through going or coming.

Another party told me that he was in a creamery east of Edmonton and while there a scale inspector, a sanitary inspector, a creamery inspector and a cream inspector called.

Again we are informed that it costs $1,600 to disburse a $2,500 soldier loan.

To get back to the new immigration policy, I venture to say that it will cost the country $1,000 per head to bring immigrants to Canada.

There are millions of tons of anthracite coal west of Edmonton, about 65 miles from Brule on the Transcontinental Railroad, and the East had to bring coal from Wales.

Is it any wonder that we Westerners sometimes want to cut the line at the Great Lakes, and I am of the opinion that the East will never make up until some move in that direction is made.

Thanking you for space in your valued paper, and hoping to hear from some more Western Hardware Dealers. Yours truly,

L. C. PORTEOUS,

Grande Prairie, Alta.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

STUMP PULLERS

Hugh Sherk & Son, Ridgeway. Ont.—We are desirous of obtaining a stump puller. Would you kindly advise us accordingly?

Answer.—The A. J. Kirstin Canadian Co., of Sault Ste. Marie, Ontario.

WHITE MOP WRINGER

White's Limited, Collingwood, Ontario.—Will you forward us the address of the White Mop Wringer Company, of Canada?

Answer.—This firm is located at Paris, Ont. This is their Canadian factory. The head office is at Fultonville, N.Y.

ICE PLOWS

S. McIntyre, Hardware, Durham, Ont.—Could you give us the address of a firm handling ice plows?

Answer.—The Robert Donaldson & Sons, Montreal, Que.

WOODEN PIPES

J. L. Demers, Thetford Mines, Que.—Can you supply us with the name of a manufacturer of wooden pipes?

Answer.—The Dominion Wood Pipe Co., New Westminster, B. C.; The Vancouver Wood Pipe & Tank Co., Vancouver, B.C.

ROTARY VENTILATORS

Taylor Bros., Ltd., Carleton Place, Ont.—Kindly advise us the makers of ventilators, which create a vacuum inside.

Answer.—B. F. Sturtevant Co. of Canada, Ltd., Galt, Ont.; Canadian Blower & Forge Co., Ltd., Kitchener, Ont.; Canadian Sirocco Co., Ltd., Windsor, Ont.; Sheldons, Ltd., Galt, Ont.; H. H. Robertson Co., Ltd., Sarnia, Ont.

ELECTRIC FLOOR POLISHERS

Saskatoon Hardware Co., Ltd., Saskatoon, Sask.—Kindly give us the name of the manufacturer of an electric floor polisher.

Answer.—The A. D. Fisher Mfg. Co., Toronto; The Canadian Floor Waxer & Polisher Co., Ltd., 666A Yonge St., Toronto.

GIANT WIRE STRETCHERS

Martin, Finlayson & Mather, Ltd., wholesale hardware, Vancouver, B. C.—Please inform us who are the makers of "Giant" and "Little Giant" wire stretchers.

Answer.—The Richards-Wilcox Canadian Co., Ltd., London, Ont.

SCREW HOOKS AND EYES

Messrs. R. T. Holman, Ltd., Summerside, P.E.I.—Kindly state who manufactures screw hooks and screw eyes.

Answer.—The Steel Company of Canada, Ltd., Hamilton, Ont.; The Canada Steel Goods, Ltd., Hamilton, Ont.; The Canada Foundries & Forgings, Ltd., Brockville, Ont.; Mesrs. Taylor Forbes, Ltd., Guelph, Ont.

ONE MINUTE WASHER

Brown & Newell, Aylmer, Ont.—Please inform us where we can obtain repairs for the One Minute washer.

Answer.—The One Minute Mfg. Co., Newton, Iowa, U.S.A.

NATIONAL CREAM SEPARATOR

Messrs. Bonthron & Drysdale, Hensall, Ont.—Kindly advise us where we can get repairs for the National cream separator.

Answer.—The National Dairy Machine Co., Goshen, Indiana, U.S.A.

BICYCLES

Rose's Hardware, Hamilton, Ont.—Kindly advise us where we can secure a line of bicycles.

Answer.—The Iver Johnson Arms & Cycle Works, Fitchburg, Mass.; Hyslop Bros., Ltd., 12 Shuter St., Toronto; The Planet Bicycle Co. of Toronto; The Berlin & Racycle Mfg. Co., Ltd., Kitchener, Ont.; Canada Cycle & Motor Co., Weston, Ont.

CHAMBERLAIN WEATHER STRIP

G. A. Stabley Hardware Company, Lucan, Ont.—Can you please inform me where we can secure the Chamberlain weather strip?

Answer.—The Chamberlain Weatherstrip Company, 598 Yonge Street, Toronto, Ontario.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

HELPING THE DEALER SELL

Messrs. Smith and Hemenway Co., Inc., of New York City, are distributing a new booklet to the trade entitled "Helping the Hardware Dealer Sell." This booklet deals more specifically with their line of Red Devil tools, but it also contains a number of other practical sugestions. The subjects covered in this book include: Making your windows work; Advertising your store by mail; Sales ideas for hardware dealers; newspaper advertising pays, and numerous other paragraphs, calling attention to the different methods which can be applied for merchandising tools. Copies will be supplied on request to the above manufacturers.

NEW WILLIAMS CATALOGUE

J. H. Williams & Co., Ltd., of St. Catharines, with export office at New York City, have ready for distribution a new and complete export catalogue, showing their lines of drop-forged specialties. These include hand hammers of all kinds, nail, machinists, tinners, riveting, plow, blacksmiths—and the following wrenches: Stillson (wood and steel handle patterns) screw or monkey wrenches (3 patterns), automobile and bicycle wrenches and adjustable "S" wrenches. The book is well illustrated and gives full particulars such as dimensions and list prices. Copy will be furnished on request to above manufacturers.

Twenty Years Ago

Following items reproduced from issues of Hardware and Metal of October, 1902:

"It is now stated as a positive fact that the Gurney Company will locate works at Toronto Junction."

"Incorporation has been granted John McPherson Taylor, of Guelph; George D. Forbes, of Hespeler, and Adam Taylor, Emma Taylor and Jas. S. Taylor, of Guelph, to manufacture hardware, radiators, boilers, etc., under the name The Taylor-Forbes Co., Ltd., with capital of $300,000."

"H. S. Chestnut, of the firm of R. Chestnut & Sons, Fredericton, N.B., was united in marriage September 24 with Miss Annie Isabette, B.A., eldest daughter of Deputy Provincial Secretary R. W. L. Tibbitts."

"J. B. Skelton, who has for some time been in charge of the hardware department of J. W. Shields' general store, Grand Valley, Ont., has taken charge of a hardware business in Palmerston formerly carried on by Mr. Lynch. Before his departure the citizens of Grand Valley held a dance in his honor and presented him with an address and a gold watch and chain."

"Kirkham & Stewart hardware merchants, Lethbridge, Alta., have dissolved partnership, D. Stewart continues."

"Elias H. Lyons, of New York, died suddenly in that city. He was for a number of years with M. & L. Samuel Benjamin & Co., Toronto. He leaves two brothers, Mr. Abraham Lyons, of Lyons & Marks, Toronto, and J. Lyons, of Sydney Sheppard & Co., Buffalo."

"J. E. Elliott, of the firm of McLennan McFeely & Co., wholesale hardware firm, of Vancouver, B. C., was in Montreal this week en route to New York. A number of his old friends in the trade called upon him at the Windsor Hotel and exchanged experiences extending into the dim and misty past."

"J. L. McAvity has purchased the iron foundry business of McLean & Holt, City Road, St. John, N.B."

THE trend of hardware prices continues in an upward direction, another heavy budget of advances being recorded this week. Manufactured cotton products supply one of the feature changes in this direction, higher quotations being in effect on cotton rope, sash cord, cotton clothes lines, awning cord, seine twines, candlewick and cotton wrapping twine. Turpentine continues to feature with two separate advances within the past few days, thus establishing a new high record price for the season. Other lines on increased price levels include, all grades of solder, lead sheets, and the Mephisto line of auger and car bits.

GASOLINE leads the current reductions with the third decline in as many weeks. Yale padlocks also appear with a price revision, some of the lines being reduced. Other hardware lines on easier levels include Redlich wood faucets and new list prices on Starr ice skates. Ingot metals continue to display strength, tin, lead and spelter featuring in this respect with slight advances in certain quarters. Wrought piping remains on a firm basis, a further advance on American markets being recorded.

IN THE steel situation it is noted that consumers are generally doing little buying except for prompt delivery. The effect of this changed policy is becoming marked, prices and supplies of finished steel in primary centres working towards easier conditions during the last few weeks. Transportation difficulties in some quarters promise to continue, but the fuel situation is steadily more favorable to buyers. The domestic bar product market is steady, with steel lines in general responding to the raw material trend.

IN CERTAIN quarters it is pointed out that the seasonably mild weather that has prevailed has retarded to some extent the movement of winter lines. Reports from wholesale centres indicate that buying of fall needs has been fair, the volume of trade, however, recently showing steady improvement. More activity is looked for with the arrival of colder weather, combined with the stimulus of holiday anticipations. Booking of Christmas lines including plated ware, carvers, cutlery, safety razors, clocks and companion articles, is generally good and shows a decided improvement over this period of last year.

Montreal, Que.

MONTREAL, Oct. 26.—An outstanding feature of the weekly hardware markets is the general advance in quotations on cotton goods, including cotton rope, sash cord, clothes lines, awning cord and wrapping twine. Seine twine is also increased three cents per pound. Continued strength in the undertone of the market for lead products resulted in higher prices on solders and lead sheets. Agricultural wrenches are also advanced, and radiator valves are increased in price through a revision in discounts. Ingot metals continue to display a firm market tone, and tin, lead and spelter are quoted higher on the local market.

A price decline of twenty-five cents on all gauges of galvanized sheets is quoted by some firms. Yale padlocks show a price revision, some of the lines being reduced. Wrought pipe remains very firm in tone, a further advance on American markets being recently recorded.

TENDENCY IN COTTON REFLECTS ON ROPE

Montreal.

The strengthening tendency noted in raw cotton circles during recent weeks is now reflected on cotton rope and other products. Rope is advanced three cents per pound, and following are revised quotations:

COTTON ROPE—

3/16 dia.	0 45 per lb.
1/4" and up	0 44 per lb.

REVISED DISCOUNT ON RADIATOR VALVES

Montreal.

Through a revision in discounts, radiator valves, both standard and with removable disc, are increased in price approximately ten per cent. The discount is now 54 per cent., formerly being 58 per cent. In the list of compression goods a few other lines of brass valves are slightly higher, although the standard line remains at former quotations.

Following are prevailing discounts:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	54%
Do., removable discs	54%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins gate or straightway	16%
Jenkins iron body, globe and angle	5%
Jenkins iron body, gate	25%

AGRICULTURAL WRENCHES NOW QUOTED AT FIFTY OFF

Montreal.

Through a revision in discounts agricultural wrenches show a slight increase in prices. These are now quoted at 50 per cent. off, former discount being 50 and 2½ per cent.

SASH CORD ALSO ADVANCED IN PRICE

Montreal.

Newer high prices are now quoted on sash cord, revised quotations being three cents higher than formerly. Following are present price levels:

SASH CORD—	per lb.
No. 6	0 60
No. 7	0 59
No. 8 and up	0 58

LITTLE CHANGE RECORDED IN SCRAP MARKET

Montreal.

There is little or no change to report in the waste material market, prices remaining nominally unchanged, and activity now described as limited. Insofar as iron and steel scrap is concerned the improved situation in pig iron is pointed out as having a tendency to check any great movement. Non-ferrous metals are quieter after the temporary improved showing in past months, and dealers report only a hand-to-mouth business. Scrap rubber is very dull, and following are average dealers' buying quotations:

SCRAP—	
Automobile Tires	0 50
Rubber Shoes	0 02
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11½
Wrought iron, R. Rd., No. 1 per gr. ton.	10 00
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 to 10 00
No. 2 busheling	8 00
Boiler plate	8 00 to 9 00
No 1 machinery cast	20 00 22 00

NO CHANGE IN COTTON WASTE QUOTATIONS

Montreal.

Notwithstanding higher quotations are announced on practically all other cotton goods, prices on cotton wastes remain unchanged. Dealers state that the undertone of the market is undoubtedly firmer, but it is altogether likely that no revision will be made until later on in the year. Current trade is said to be quite seasonal, and following are prevailing prices:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

STEADY TONE IN SOIL PIPE AND FITTINGS

Montreal.

Soil pipe and fittings remain at unchanged discounts with the undertone of the market continuing fairly firm. Manufacturers, however, now anticipate a steady market as the strong tendency, while still present to a degree, is not as marked as in previous weeks owing to an improved situation in the coal and pig iron markets. Demand for both pipe and fittings is good, and is keeping up remarkably well notwithstanding the advancing season. Present quotations are as follows:

SOIL PIPE—	
2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net
Fittings—	
2 and 6 inch	45%
8 inch	net

AWNING CORD NOW HIGHER IN PRICE

Montreal.

In line with other cotton goods, awning cord prices are advanced, and following are new prices: No. 3½ $2.70 per doz.; No. 4 $3.60 and No. 4½ $5.00 per dozen hanks.

ADVANCED QUOTATIONS ON COTTON CLOTHES LINES

Montreal.

Cotton clothes lines in the various lengths are advanced in price, the increase being about five per cent. Following are new prices:

CLOTHES LINES—	Per Doz.
30 ft. hanks	$2 30
40 ft. hanks	2 85
48 ft. hanks	3 45
60 ft. hanks	4 30

GALVANIZED SHEETS LOWER IN SOME QUARTERS

Montreal.

The expected revision in galvanized sheet prices is now announced by certain local distributors who are quoting all gauges at twenty-five cents per 100 lbs. lower than former figures. This change is made in face of a fairly firm undertone in the market, as outlined in previous issues, and is due to more ample supplies available and a stock accumulation in some quarters. To strengthen the tendency in these products the close of navigation is again pointed out as a strong factor to be considered in future, and in the opinion of local dealers, any further decline, if any, will be very gradual.

Imports from overseas are arriving and between now and the close of navigation regular shipments are expected. Black sheets are unchanged with a range still noted among jobbing circles. Average quotations are the following:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 75
26 gauge	6 75	7 50
24 gauge	6 15	6 90
22 gauge	5 80	6 55
18—20 gauge	5 10	5 85
Other Brands—		
10¾ oz	6 75	7 50
28 U. S. gauge	6 35	7 10
26 U. S. gauge	6 05	6 80
24 gauge	5 90	6 65
2 gauge	5 90	6 65
18—20 gauge	5 75	6 50
16 gauge	5 60	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25
20 x 28 IC, 112s	12 75
20 x 28 IC, 112s	15 00
20 x 28 IXX, 56s	8 50
20 x 28 IXXX, 56s	10 00

Welsh, polished, 60s	6 75
Galvanized, 52s	7 25
Galvanized, 60s	7 75

SEINE TWINE THREE CENTS PER POUND HIGHER

Montreal.

Seine twine in all sizes shows a price advance of three cents per pound.

BAR PRODUCTS MARKET DISPLAYS STEADY TONE

Montreal.

A steady market tone now prevails in iron and steel bar products, and notwithstanding a decidedly easier trend in the pig iron markets, any recession in the prices of finished products is not though to be in line, for the present at least. As far as local price levels are concerned it is realized that these are lower than in other domestic market centres, and on closer margin with mill prices. Thus while keen competition is undoubtedly responsible for this it is not likely that distributors will announce a recession in face of a steady tone in production circles. Business in general is reported as seasonal, this month and November usually bringing an improved buying movement over the previous summer period. The absence of larger construction work, however, is still felt. Following are quotations for average sized inquiries:

IRON AND STEEL—		
Common bar iron, 100 lbs.		3 15
Refined iron		4 65
Irish finish machinery steel		3 20
Mild steel		3 15
Single reeled machinery steel		5 25
Band steel	3 50	3 65
Spring steel	4 75	8 50
Sleighshoe steel		3 15
Tire steel		3 35
Harrow tooth steel		3 30
Toe caulk steel		4 05
Mining tool steel, per lb.		0 20½
Black Diamond tool and cast steel, per lb.		0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

TEN PER CENT. ADVANCE IN "MEPHISTO" BITS

Montreal.

An advance of ten per cent. is made in quotations on "Mephisto" auger bits. Auger and car bits are now quoted at net list, electricians and expensive at plus ten per cent.

HIGHER WROUGHT PIPE ON PRIMARY MARKETS

Montreal.

In describing the firm tone still noted in the wrought iron and steel pipe market, local mills point to the recent advance in American mill prices, steel piping having been further advanced four dollars per ton. This stronger tendency has continued in this product notwithstanding the revision in August last when all sizes were brought to higher levels. A strong factor in the market has been the good demand which has continued all through the summer and fall months, the call at the present time said to be well up to expectations. Local mills are gradually improving the delivery question, but they are still in the midst of an active season. Quotations are firm at list No. 56.

COTTON TWINE ADVANCED TWO CENTS PER POUND

Montreal.

An advance of two cents per lb. is recorded in cotton twine, both in balls and cones. Following are new prices:

COTTON TWINE—	Per lb.
3 ply in balls	0 52
3 ply in cones	0 50
4 ply in balls	0 55
4 ply in cones	0 53

YALE PADLOCK PRICES UNDER REVISION

Montreal.

Manufacturers of Yale padlocks announce a revision in prices, certain lines being lower in price while others show little if any change. Following are a few of the numbers with reduced prices: Nos. 823, 833, 843, 853, and 863.

LEAD SHEETS & SOLDERS AT NEW HIGHER PRICES

Montreal.

Higher quotations are now announced on all grades of solder and all weights of lead sheets, the firmer tone in metals in primary markets reflecting on these products. Lead sheets are advanced one-half cent per lb., while solders are one cent higher throughout. Virgin metals continue in a strong position, spelter and lead showing steady gains during the past week, while tin closely follows. Although other lead and zinc products remain at former figures, there is a very firm undertone evident in the market in general. Following are revised quotations:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 11
Load sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs. sq. ft., lb.	0 10
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26
Do., strictly, lb.	0 23
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

HEATING SYSTEMS STILL ON ACTIVE MOVEMENT

Montreal.

Manufacturers of hot water and steam boilers, radiators, also stoves and heaters, are still enjoying an active demand for their products. Although the season is advancing, stoves are selling in particularly good volume, and a brisk trade well into next month is now anticipated. With regard to heating systems, new construction work is still making progress and the outlook in this respect appears promising for later months. There is still a firm tendency in the market generally, the recent easier trend in pig iron only having an indirect bearing on the manufacture of these products up to the present. Manufacturers were naturally fairly well supplied in anticipation of the active season, and other basic costs are yet on a high plane.

ADVANCED PRICES IN MANY INGOT METALS

Montreal.

Metals generally are firm in tone, copper appearing to be the only metal neglected. There is a considerable buying movement in other lines on all markets, and while present figures may appear high it is thought probable that even higher prices may be seen.

TIN.—This metal has advanced in London with heavy transactions, and there is evidently great interest being taken. The advance is considered more or less artificial, but it can likely be maintained for some time yet. Local market is firm at 40 cents.

COPPER.—There is no particular improvement in this metal, but the decline has at least been arrested and the market is a little steadier. Producers are somewhat firmer in their ideas, but export business is still light and until this improves there is little likelihood of any great advance. Quotations are unchanged at 17¾ cts. for electro, 17½ cts. for casting.

LEAD.—London has been very firm during the past week and prices there touched a new high for the year. The American market is also firm and the outlook would seem to promise higher prices. Quotation locally is advanced to 7¾ cents.

SPELTER.—Spelter shows surprising strength in London and there have been inquiries for export from the U. S. which has a firming tendency on American markets. East St. Louis is quoted at over 7 cents, which represents an advance of over 60 per cent. in the past three or four months. Local market strong at 9½ cents.

ANTIMONY.—Offerings from China are somewhat higher in price, and a general improvement is looked for in this metal. Supplies locally are scarce and the market is firm at 7¼ cents for Chinese and 7¾ cents for high grade English.

ALUMINUM.—There is very little change in aluminum either locally or on outside markets, and price remains at 22 cents.

Toronto, Ont.

TORONTO, Oct. 26.—The price advances on manufactured cotton products supply one of the premier market developments this week. Cotton rope, sash cord, cotton clothes lines, awning cord in white and drab, seine twines, candle wick and cotton wrapping twines all reflect the upward trend of raw cotton in varying extent. As foreshadowed in last week's report, all grades of solder are quoted higher.

Gasoline appears with the third decline in as many weeks, another reduction of one cent per gallon being in effect this week. Wrought piping is on a distinctly firm trend, with some advances having been recorded in primary markets. Steel lines respond more closely to the raw material conditions.

GASOLINE PRICE AGAIN REDUCED TO 31 CENTS

Toronto.

Another reduction in the price of gasoline brings the average local quotation to 31 cents. The decline is again to the extent of one cent per gallon, this being the third reduction of this nature having been recorded in as many weeks. This condition is ascribed to weakness in primary markets combined with a falling off in the volume of consumption. The current demand for coal oil is brisk and while the price situation of this product remains firm, no revisions have been made.

HIGHER QUOTATIONS NOW IN EFFECT ON SOLDERS

Toronto.

As foreshadowed in last week's issue of Hardware and Metal, an advance has now developed in solder prices. The extent of the increase is one cent per pound on the various grades of commercial, strictly and wiping solder. The quotation on wire solder of thirty cents per lb., remains unchanged. This movement is generally attributed to the steady upward climb of primary metal costs, tin being slightly higher with spelter distinctly gaining. While varying fluctuations have occurred in the virgin metal markets, manufacturers of solders and lead goods generally point out that the gradual improvement has strengthened the raw material situation. Following are revised quotations:

LEAD AND ZINC GOODS—	
Lead pipe, list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 23½
Do., wiping, lb.	0 22
Do., guaranteed, lb.	0 25
Do., commercial, lb.	0 22
Zinc shets, per lb.	0 11 0 12

EAVESTROUGH BUSINESS IN FAIR VOLUME

Toronto.

Current trade in eavestrough and conductor piping is still described as fairly good for this time of the year, although the brisk movement noted during recent weeks is now subsiding somewhat with the advent of colder weather and the consequent recession in building activity. The tone of the market remains fairly firm, although the current decline in

flat galvanized sheets is expected by some to reflect in the market for the finished products in the near future. There has been no further change since the last revision in discounts on trough and pipe. Prevailing quotations follow:

TROUGH (Eave)—			
O. G. Square Bead—	Per 100 ft.		Per 100 ft.
8 inch	$15 90	15 inch	$28 80
10 inch	17 70	18 inch	36 80
12 inch	21 20		
O. G. Round and Half Round—			
8 inch	16 90	15 inch	29 80
10 inch	18 70	18 inch	37 80
12 inch	22 20		
Less 70 per cent.			
PIPE (Conductor)			
Plain, round or corrugated.	Per 10 ft. in 10 ft. lengths.		
2 in., in 10 ft. lengths, list	18 40

4 in. in 10 ft. lengths, list	29 60		
5 in. in 10 ft. lengths, list	40 00		
6 in. in 10 ft. lengths, list	49 00		
Less 70 per cen.			
CONDUCTOR ELBOWS—			
Plai, round or round corrugated:			
2 inch, list	5 25		
3 inch, list	6 00		
4 inch, list	10 50		
5 inch, list	24 00		
6 inch, list	29 00		
Less 60 per cent.			

MODERATE ACTIVITY IN LOCAL STEEL TRADE

Toronto.

Steel markets during the past weeks are reported moderately quiet, but on the whole current business has been well up to expectations. The prolonged favorable weather is described as an assisting factor in some directions. The viewpoint is expressed that no general price changes are anticipated, local quotations being fairly steady and at unchanged levels. Present indications are that this trend will remain in evidence during ensuing weeks. The opinion is generally held, however, that the upward price movement is over for the present and while a fair amount of activity is mostly recorded, it is stated that the usual quiet session lies ahead and therefore any future developments are considered likely to be of a downward nature. Prevailing average local prices follow:

IRON AND STEEL—		
Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	**8 00**
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel	4 50	4 75
Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

GOOD FALL TRADE IN PIPE FITTINGS

Toronto.

No further changes have been announced in quotations on pipe fittings, but it is noted that the undertone of the market continues on a much firmer basis than formerly. Wrought nipples and couplings are stated to be exceptionally strong, chiefly owing to the upward trend of the raw materials, although no further increases are in sight, as yet. The movement of these products is described as fairly good and quite up to general expectations for this season of the year. The average call for pipe fittings has kept up in better volume this year because of the marked activity in small building circles and the consequent improved call for these goods. Following are current unchanged discounts:

PIPE FITTINGS—	
Cast iron fittings	27%
Plus, cast iron	27%
Do., solid	27%
Do., countersunk	27%
Bushings, mail	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flaged unions	27%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	34%
Do., ⅛ in. to 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk. and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ⅛ in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%
MALLEABLE FITTINGS—	
New piece list, adopted June 1, 1922.	
Discounts: Class A, less 60 per cent.	
Discounts: Class B, less 70 per cent.	
Discounts: Class C, less 70 per cent.	

STEEL LINES RESPOND TO MATERIALS TREND

Toronto.

A summary of the sheet market this week shows raw material prices, notably coke and pig iron, now working lower and lines of finished steel are responding slightly. This accounts for the recent downward trend to some extent, while there is also evident a feeling among buyers to await the completion of this process. Trade in sheets is described as fairly good, although it is recognized that the quieter season lies ahead. Quotations remain steady at the recently revised levels, which follow:

GALVANIZED SHEETS—	Premier and Apollo
10¾ oz.	6 65
U. S. 28 base	6 25
U. S. 26 base	5 95
22 and 24	5 80
18 and 20	5 65
16	5 50
12 and 14	5 35
	Queen's Head
28 gauge, base	7 15
26	6 75
24	6 45
22	6 30
	Fleur de Lis
28 gauge, base	6 90
26	6 50
24	6 20
22	6 05

An extra 40c. per 100 lbs. is charged for Key stone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets. 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

BLUE ANNEALED SHEETS—	
10 gauge, base	4 25
12 gauge	4 30
14 gauge	4 35
16 gauge	4 40
BLACK SHEETS—	
18-20 gauge	5 05
22-24 gauge	5 10
26 gauge	5 15
28 gauge	5 25

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

MODERATE TRADE NOTED IN TIN PLATES

Toronto.

Trade in tin plate is described as on a moderately quiet basis, but is generally in keeping with expectations for this season of the year. There has been no further price development, quotations being more or less steady. A heavier volume of trade is noted in Welsh tin plate than formerly, combined with slightly lower importations in the United States. While the eastern market offers better opportunity in this direction, the Welsh products have appeared in larger quantities also in the coast sections, the canning industry reporting that shipments can be made via Panama in competition with the Pittsburgh mills. Current local prices continue as follows:

PLATES, CANADA—	
Ordinary, 52 sheets	4 90
Do., 60 sheets	5 00
Blued and oiled, boxes, 52s'	5 20
Do., Do., 60's	5 30
WELSH CANADA PLATES—	
Cold polished, 18 x 24,—52's	6 25
Do., do., 60's	6 50
PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	12 75
IX, 20 x 28, 112 sheets	15 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC. 14 x 20. 112 sheets	12 00

WROUGHT PIPING ON DISTINCTLY FIRM TREND

Toronto.

Wrought piping remains on a distinctly firm basis, with a tendency to further advance prices being noted in southern markets. Domestic producers, however, up to the present, have resisted the trend in this direction, it being stated that prevailing market conditions are not conducive to higher levels at this season of the year. The fact that the winter is now approaching is pointed out as a factor to be considered. The active building season has brought a noticeable volume of activity in pipe, especially the smaller sizes, and trade of this class is still recorded as fairly brisk. While producers claim that raw material costs point towards advanced quotations, list No. 56, continues to govern the domestic markets.

WROUGHT PIPE

Price List No. 56. **August 23, 1922.**

Standard Buttweld Pipe S/C

Size	Steel Blk.	Gen. Galv.	Wrot. Blk.	Iron Galv.

COPPER PRODUCTS ON STEADY PRICE BASIS

Toronto.

No further revision has been announced in prices on copper and brass products since the upward climb of quotations on rods and tubing. These goods, however. continue to remain on a firm basis, owing to the strengthening effect of the virgin metal markets, coupled with the steady decrease in the visible supply of scrap copper. Current trade in these lines is reported as very fair, and up to expectations for this period of the year. Following are prevailing quotations:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22

COPPER—

Rods, base, per lb.	0 30
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

CONDITIONS AGAIN QUIET IN SCRAP MATERIALS

Toronto.

There is no outstanding activity to record this week in the scrap material markets. In spite of this, prices have generally remained unchanged. Scrap rubber is still quite dull. Business is done in boots and shoes at around 2.00c. Little else is required.

Scrap iron and steel grades have continued quiet. Mills and foundries are operating fairly actively, and dealers in the expectation of better business are not offering concessions.

Non-ferrous scrap has been in fair demand and firm. White metals are stronger, but not particularly active. Following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings, (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	20 00	21 00
Stove plate	16 00	17 00
Grate bars	12 00	13 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper wire	11 00	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50

Heavy Lead	5 25	5 75
Tea Lead	3 25	3 75
Scrap zinc	4 50	4 75
Scrap Rubber		
Boots and shoes	2.00	....
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	0 60	1 00

FAIR ACTIVITY NOTED IN BOILER TUBES

Toronto.

A fair volume of activity is now recorded in boiler tubes. Distributors state that delivery has slowed up somewhat during the past two weeks, shipments from the mills not being quite so prompt. Some efforts to shade prices are still being recorded in certain quarters, it being stated, however, that the local market has considerably improved in this respect. A seasonal call for tubing, especially in smaller sizes, is generally reported for construction and repair purposes. Following are prevailing unchanged quotations:

BOILER TUBES—

Size	Seamless.	Lapweld
¾ inch	$19 00	$.....
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	24 00	.....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	.....
2½ inch	26 00	23 00
3 inch	34 00	27 50
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	55 00	40 00

FIRMER UNDERTONE IN MOST INGOT METALS

Toronto.

An undercurrent of strength has continued in practically all the ingot metals with the exception of copper. This metal, contrary to general expectations, has weakened slightly in certain quarters, although there is a good demand for semi-finished products such as copper and brass sheets and rods. Tin provides the leading price advance, but the higher levels are bringing a reaction in buying interest. The entire ingot metal situation still hinges upon the stability of European exchange, but current conditions are admittedly much improved over the situation apparent at this time last year.

COPPER.—Consumers of copper are more or less reserved and the general situation has failed to sustain the steady gain recently recorded. While the undertone is easier, however, prices have registered very little change, the domestic quotations of 17½ cents remaining in effect.

TIN.—The London tin market has provided the feature in this metal with trading of an unusually large nature. Prices have consequently risen, due to the strengthened undertone in primary centres. While a slight reaction is now evident in buying interest owing to the higher levels, there is reported to be some danger that the London advance is of a speculative nature. Domestic prices are higher, the new quotation being between 38½ and 39 cents.

LEAD.—This market remains in a strong condition as consumers' stocks are generally considered low and the metal now being called for is reported going into immediate consumption. The London market is also strong, and both primary and domestic price levels remain firm. Local quotations continue unchanged at $7.50.

SPELTER.—The spelter markets continue strong with an advancing tendency. There is a strong sustained buying interest with calls for prompt shipment from stock reflecting the present condi-

Higher Price Levels on Cotton Products

Practically All Manufactured Cotton Goods Register Advances—Current Revisions Reflect the Steady Upward Trend of Raw Cotton—Supplies Moderate With Heavier Requirements

SASH CORD, cotton clothes lines, cotton rope, awning cord, seine twines and candle wick, are all advanced in price this week. This series of market revisions in manufactured cotton products reflects the recent trend of raw cotton which has been climbing steadily. The new quotations, which are given herewith, represent increases of varying extent on the different lines.

A shortage in the cotton crop this season, when compared with previous records, has given an undertone of strength to the situation during recent weeks, this being represented in the previous advances recorded earlier in the season. Large speculative buying just recently, however, has added materially to the current situation of small supplies and increasing consumption, which conditions have naturally been reflected in the market for manufactured cotton goods.

The general advance of this nature was foreshadowed in last week's Hardware and Metal, a market report to the effect that cotton wrapping twines had been increased being the forerunner of the general upward movement in similar products. The raw material market in practically all directions is reported as conspicuously firm, although a reaction has naturally been expected in certain quarters. Raw cotton has fluctuated to some extent all season, but the general result has been a decidedly upward trend.

Sash cord has been increased three cents per lb. all through the list. Cotton rope is also 3 cents higher. There has been no change in cotton waste prices. Following are new quotations on the products listed above:—

COTTON ROPE—
⅛ in., $0.49; 5-32 in., $0.48; 3-16 in., $0.45; ¼ in., and up, $0.44.

SASH CORD—
No. 6, $0.60 per pound; No. 7. $0.59 per lb.; No.'s 8, 9, 10, 12, $0.58 per pound.

COTTON CLOTHES LINES—
In 40 foot lengths, $3.00 per dozen.
In 48 ft. lengths, $3.60 per dozen.
In 60 ft. lengths, $4.50 per dozen.

AWNING CORD—
White, No. 3½ $2.70 per dozen.
White No. 4, $3.60 per dozen.
White, No. 4½, $4.95 per dozen.
Drab, No. 4, $4.30 per dozen.
Drab, No. 4½, $6.10 per dozen.

SEINE TWINE—
Base, 71c. per lb.

CANDLE WICK—
$0.58 per pound.

COTTON WRAPPING TWINE—
In sacks, 3 ply, $0.55 per lb.; In sacks, 4 ply, $0.58 per lb. In cones. 3 ply, $0.52 per lb. In cones, 4 ply, $0.55 per lb.

tion of primary centres. Domestic prices on zinc are again slightly higher, the average level now being $8.50, as compared with the former level of $8.25.

ANTIMONY.—The current position of antimony is slightly easier, both on primary and domestic market. Local prices are consequently lower, the average prevailing quotation being 8 cents. It is pointed out that this mark is higher than earlier prices this season, which reflects the general degree of improvement.

ALUMINUM—Little change is recorded in the aluminum markets, current trading in domestic circles remaining of a moderate nature. Prices are practically unchanged, the local figure hovering between 21 and 22 cents.

London, Ont.

LONDON, Oct. 26.—Hardware business has been excellent during the past week in this district. All fall lines are moving well now and a very satisfactory volume of trade is reported by jobbers and merchants.

Several important lines, including turpentine and cotton goods, are quoted at higher prices.

PRICE OF TURPENTINE CONTINUES TO CLIMB

London, Ont.

The price of turpentine has again moved up this week, the new level being another ten cents per gallon higher. A fair seasonal sale is noted. Following is the highest mark of the season:

TURPENTINE—

	Imperial Gallon
1 bbl. lots	2 30
2 to 4 barrel lots	2 29
5 gal. lots	2 45

PRICE NOW STEADIER ON LINSEED OIL

London, Ont.

A good seasonal sale continues for linseed oil. Prices remain unchanged this week at the following levels:

LINSEED OIL—

	Raw	Boiled
1 to 2 barrels	1 10	1 13
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, add 15c gallon.

SASH CORD PRICES FIVE PER CENT. HIGHER

London, Ont.

Cotton goods have been advanced in price approximately five per cent. The new cash prices on sash cord follow:

SASH CORD—

8 to 12 ..... per lb.	0 58
7	0 59
6	0 60

LOWER LIST PRICES ON STARR ICE SKATES

London, Ont.

Booked orders are now going forward for the Starr line of ice skates. The 1922 lists show varying reductions from 10 cents to $100 per pair from last year's levels. Revised list prices with current discount follows:

ICE SKATES—

	List per Pr.
Acme No. 100	1 75
Plain Hockey, No. 153	1 60
N.P. Hockey No. 150	1 80
Acadia, No. 156	2 00
Ladies' Beaver, No. 157	2 50
Do., No. 162 flanged	3 00
Climax No. 173	3 25
Regis, No. 194	3 00
Dreadnought No. 193	3 75
Glazier, No. 184	3 25
Bulldog No. 154	2 00
Imperial, No. 196	5 00
Mercury, No. 197	6 00
Velox, No. 181	6 00
Regal, No. 189	4 50
Tube No. 190-H N.P.	6 00
Tube, No. 190-H Aluminum	5 00

Discount Less 30 per cent.

SEINE TWINES ALSO AT INCREASED LEVEL

London, Ont.

Seine twine prices are on a new higher level this week, the revised quotations being as follows:

SEINE TWINE—

No. 18, and larger, 1 lb. rolls, $0.75 lb.; No. 18 1 lb. rolls, $0.76; 15 and smaller, ¼ lb. rolls, $0.77 lb.

REDLICH WOOD FAUCETS AT EASIER PRICES

London, Ont.

New stocks of Redlich wood faucets now arriving are priced lower. The new quotations follow:—No. 2, $1.95 per dozen; No. 4 $2.70; No. 6, $3.95 per dozen.

WAGON HARDWARE ALSO AT ADVANCED LEVELS

London, Ont.

Wagon hardware and malleable plough clevises have been advanced in price approximately five to 7½ per cent.

CANDLEWICK PRICES NOW ON HIGHER LEVEL

London, Ont.

In conjunction with the increased levels on manufactured cotton goods generally, the quotation on candlewick has been advanced to 59 cents per pound.

THREE CENTS ADVANCE IN COTTON TWINE PRICE

London, Ont.

Cotton wrapping twines have also been advanced, the extent of this revision being three cents per pound. New quotations follow:

COTTON WRAPPING TWINE—

Balls, 3 ply, 57c. lb.; Balls, 4 ply, 61c. lb.; Cones, 3 ply, 53c. lb.; Cones, 4 ply, 57c. lb.

HIGHER PRICE LEVELS ON BUILDING PAPERS

London, Ont.

It is generally expected that new higher prices will go into effect this week on building papers. Revised levels on plain and tarred will be found on the curent market quotation pages.

SHORTAGE IN CUT NAILS STILL EVIDENT

London, Ont.

An advance is reported as imminent in the base price on wire nails. The present level is $3.75 locally. No change has been announced in cut nail prices, the current base being $4.60. A shortage in cut nails, however, is still evident.

REVISED QUOTATIONS ON COTTON CLOTHES LINES

London, Ont.

Cotton clothes lines are also higher in price. The revised quotations on these products are given herewith:

CLOTHES LINES—

Twisted Cotton—

80 ft., $2.35 doz.; 48 ft., $3.45 doz.; 60 ft., $4.35 doz.

Braided Cotton—

Star, 50 ft., $4.80 dozen.

Winnipeg, Man.

WINNIPEG, Oct. 26.—The wholesale hardware trade report that business is showing a slight improvement for seasonable lines and retailers state that business is not up to the mark due largely on account of the fine weather which is keeping the farmers active on the land. Collections have not shown much improvement although there has been a splendid movement of grain, money has not yet got into business channels. Orders for Christmas goods are coming in briskly.

There are very few changes in market quotations. Linseed oil has advanced and turpentine is ruling firm. Lower prices have been quoted on sandpaper, boiler tube expanders and fine hair brushes.

STOVES AND HEATERS IN SEASONABLE MOVEMENT

Winnipeg.

Wholesalers report a seasonable call for all lines of stoves and heaters. Quotations remain steady and unchanged.

BRISK SALES ON SKATES AND WINTER LINES

Winnipeg.

Wholesalers report that bookings for skates and other winter sporting goods are very satisfactory. McCullough skates are quoted at $5.00.

AGAIN FIRMER TONE TO TURPENTINE MARKET

Winnipeg.

The tone of the turpentine market is showing more firmness. Southern markets have advanced and the demand is active. Quotations locally of $2.15 per gallon remains very strong.

GASOLINE REDUCED TWO CENTS PER GALLON

Winnipeg.

A reduction of two cents per gallon is made on quotations on gasoline. Ordinary lines are quoted at 34 cents per gallon with higher grades at 36½ cents and the extra grades at 39 cents.

BOILER TUBE EXPANDERS DECLINE IN PRICE

Winnipeg.

There has been a decline in the price of boiler tube expanders. Following are prevailing quotations:

TUBE EXPANDERS—
1½ inch, $4.00; 1¾ inch, $4.00; 2 inch, $4.00; 2¼ inch, $4.75; 2½", $5.75; 3", $7.00; 3½", $9.00.

LOWER PRICES ON SAND PAPER

Winnipeg.

Quotations on sand paper have been reduced this week. Number one-half is quoted at $7.15 per ream. Number ones $8.10. Number one and one-half $9.45. Number two $10.95.

LOWER PRICES ON FINE HAIR BRUSHES

Winnipeg.

There has been a slight reduction in quotations on fine hair brushes. Number ones are quoted at $1.15, twos at $1.20, threes at $1.25. Fours $1.35, fives $1.45, and sixes $1.60.

GOOD SEASONABLE DEMAND FOR CURLING STONES

Winnipeg.

Enquiries are coming in freely for all lines of curling stones. There is no change in quotations on these lines.

HIGHER PRICES QUOTED ON LINSEED OIL

Winnipeg.

Reports from Southern markets state that linseed oil is scarce with the market ruling firm. An advance of 5 cents per gallon has been recorded on the local market making raw $1.15 per gallon and boiled $1.18.

Vancouver, B. C.

Sale of Heating Equipment in Coast Circles Well Ahead of Previous Records

VANCOUVER, B. C., October 26.—A gradually growing optimistic tone seems to be evident among the hardware trade on the B. C. Coast, particularly the distributing end and more closely again to that branch dealing with heating equipment. One of the leading distributors told Hardware and Metal that it was evident from sales made already this month that the volume would be well ahead of last October. This is easily accounted for in the increased building, all of which is requiring more appliances.

Repair parts form a good end of the trade and distributors are keeping well up with the demand. Ten years ago it will be remembered that the Coast was in the midst of the biggest building boom on record, the demand for building hardware and stoves and furnaces being commensurately great. Many of the furnaces have now served their usefulness and replacements are in order, both whole and parts. The building program in Greater Vancouver which has been active for many months has subsided to some extent due to the approach of the winter season when building operations must always be lessened. Again, demand does not seem to be quite as keen as it recently was for houses to buy.

Wholesalers report fairly good business from several districts, chief of which is Vancouver Island where mining and lumbering are very active. Prince Rupert is maintaining a steady demand, but to the east, along the line of the Grand Trunk, conditions are not very satisfactory from a selling standpoint. There is no change in the quietude of the Okanagan, but good trade is developing from the Boundary and Kootenay districts. Collections may be said to be gradually improving, complaints of slow accounts not being nearly as frequent as they were a little while ago. Local bankers say they are not faced with as many requests for extensions as a year ago at this time. They regard the situation as reasonably satisfactory.

An interesting development in the trade occurred this week with the auction sale at the premises of the Canadian Pacific Junk Co. While junk dealers were naturally in evidence, retailers were also noted among the buyers. This concern had a fine showing not only of household hardware such as hammers, saws, wrenches, files, etc., but also a good line of plumbing and building material for which several contractors were keen bidders.

With the opening of the Arena, sporting goods houses report good advance sales in skates, hockey sticks and sweaters. The professional season opens a good three weeks ahead of last year. Rugby and soccer footballs have sold well this season and basketballs are also selling fast. It may be interesting to note that in the Sunday School League alone, four divisions—eighty teams are entered for the season's matches, which is a record.

Price changes are negligible. Special windows are being put on by a couple of the larger stores, featuring stoves.

Hamilton, Ont.

Require Colder Weather to Stimulate Movement of Seasonal Hardware Lines

HAMILTON, October 26.—Current reports indicate that business and industry here are in much the same position as a week ago. Manufacturers in most lines are well employed, with hardware and steel lines being fairly busy. Another new plant has just been located in Hamilton, and it is generally stated that prospects are good for many American firms establishing factories here during the next year or so. Wholesale and retail trade both continue to move forward slowly, prices on most lines of goods still holding firm.

One of the chief features of the local industrial situation is the extent to which the shortage of railway cars is reported to be holding up deliveries of material, such as steel. Producers of steel products state they are operating as well as possible under these circumstances, but it is pointed out that difficulty is being experienced in obtaining basic materials.

Moderate activity is generally recorded in most quarters of the iron and steel trade, while sheet supplies are now in heavier volume. The recent improvement continues in the boiler tube market, a steadier tone being evident with more extensive construction and repair work at this season. Range boilers are also reported fairly active. Hardware business is fair to good this week, but it is expected that the arrival of colder weather will stimulate the sale of many seasonal lines. Wholesalers record that a bustle of activity is noted in supplying rush orders for stoves, accessories, heaters and companion goods.

Automobile accessory displays show a distinct departure from the summer tourists lines to assortments of winter equipment. Jobbers report that merchants are putting their winter stock in shape to handle this business when it comes.

Price changes for the week with few exceptions have been relatively small and unimportant; mostly of the nature of adjustments on small lines of shelf goods, and affording no indications of a general character.

A good deal of painting is still going on, and the number of newly painted houses in this district is far in excess of any former years. One painter has stated that he has work that will carry him right up to the time when the weather will stop outside work.

A good business is being done in fall sporting goods ,and it is expected that the sale of skates, hockey sticks and hockey equipment will be good.

Calgary, Alta.

Grain Movement at Its Height in West: Threshing Now Practically Completed

CALGARY, October 26.—This week a campaign for "Wider Markets for Alberta Coal" was inaugurated at a luncheon of the Calgary Board of Trade. The success of the campaign means a lot, not only to operators and miners, but to the general trade of the province. Figures were given showing that in 1921 Alberta mines supplied about one-third of the coal mined in Canada. With little extra capital expense this amount could be largely increased, and the present campaign is to provide the market, with Manitoba as the main battle ground. Campaign plans include a proper co-operation between operators and miners, a better freight rate, and systematic education of the more distant markets as to quality and best methods of use. The idea to be put over is that when they know what is to be known about Alberta coal they will want it. The importance of having this industry handled wisely is evident.

The new board of directors, together with other officials of the National Railway System, were among the visitors to the city. No announcement of future plans as regards the city were made, and none are expected until after the new chief takes hold, but speculation is rife, as it is apparent that present terminals are inadequate, both from the standpoint of the railway and the public. An early decision is looked for, either in favor of a union station, or to provide proper terminals for the National Railways, both for passengers and freight.

A satisfactory solution of the dispute between the gas company and the city was arrived at, and the expectation of a sufficiently augmented supply of gas for the winter has relieved householders of a source of worry. Price for next year is fixed at 48 cents per 1,000 feet and thereafter to be adjusted for three year periods on the basis of earning eight per cent. on a fixed capitalization, over and above a fixed expense and amount set aside for drilling, with any surplus or deficit to be carried forward to next three year period.

Weather is still greatly against seasonable business. It is common to see tea being served on lawns and verandahs, and this sort of weather has continued throughout the fall with one small break. Grain movement is at its height and threshing practically completed, and the movement of surplus farm help back to the city is noticeable. It is believed work can be supplied our own people.

Recently collections have shown some slight improvement, although not to the extent of being a general one. Credit men are not looking for any marked activity in this department until November. The price of grain, while showing some improvement, is still under what would seem to be a fair figure, when considered from the standpoint of the higher costs of labor and other necessaries of production, and the present tendency is to ship grain for storage rather than for present sale. Car shortage is reported from some localities and handling facilities both to the east and west are at present pretty badly congested.

Jobbers report a good activity in miners' and mill supplies. Lumber mills along the Crow's Nest Pass are expected to turn out a big season's cut, and purchasing is heavier than for some time.

The price changes effective this week are of a minor nature, showing slight adjustments on isolated lines of small shelf goods, the only exception to this being on linseed oil which advanced five cents a gallon and is now quoted at 1.21 for raw and 1.24 for boiled at Calgary, Edmonton and Lethbridge. With the advancing season demand has slackened and small stocks will be carried over.

Some of the jobbers are unloading odd lines of loaded shells at a price, and late advertisements show the city retailers have cut prices on this line about 20 cents a box. It is felt that loaded shell stocks will have to be cleaned up during the next two or three weeks or carried over for another year, and retailers are looking for a reduction for 1923 business. Football and especially rugby lines are very active. The school league has made the latter a very popular game and sporting goods departments are reaping the benefit. Golf lines have provided more business than in any former years, and all summer sporting goods lines are well cleaned out.

St. John, N. B.

Colder Weather Brings Call on Maritime Hardware Merchants for Stoves and Heaters

ST. JOHN, N. B., October 26.—Last week saw the first snap of cold weather in St. John, N. B., with eight degrees of frost, and had the effect of making the citizens who had not prepared their homes for the cold weather sit up and take notice. There was the usual rush for oil heaters which is experienced by St. John hardware dealers each year when the first touch of cold weather comes. Many citizens had deferred buying coal in the hope that there would be hard coal on the market before the winter weather set in, consequently householders were caught without coal for heating purposes, and the local merchants were swamped with orders for soft coal and Welsh coal, in small quantities. Hardware dealers handling stoves rose to the occasion and made big displays of stoves and heaters suitable for burning wood and soft coal, and also largely advertised wood burning furnaces. Many householders are standing to one side their self feeders and having to install stoves suitable for burning all kinds of fuel.

It is felt that outdoor painting is practically all over, although there are a few jobs still on the way, and are being rushed with all possible speed. For the first time in the history of St. John a hardware clerk was up before a committee for nomination as candidate for mayor of the city. During the past year a citizens' committee has been very active campaigning for municipal distribution of hydro power, developed by the government of New Brunswick, and re-called the present mayor because of his aversion to the mandate of the people given at the last election. Two names were before the committee, G. Fred Fisher, a retired business man, and Roy Willet, president of the Hardware Clerks' Association, both advocates of municipal distribution of the hydro current. Mr. Willet's nomination for mayor was defeated by one vote, and immediately the result of the voting was declared the Willet party joined forces with the successful hydro nominee. The election is to take place on November 13.

W. F. Buritt, president of the St. John Board of Trade, and M. E. Agar, a prominent St. John hardware merchant, along with other citizens, members of the Board of Trade, recently conferred with the premier of New Brunswick, Hon. W. E. Foster, with reference to the appointment of a permanent secretary for the Maritime Board of Trade. The cost will be around $8,000 a year, and the New Brunswick Government is asked to contribute $2,000 and the Nova Scotia Government $3,000. Each member of the board in the maritime provinces is asked to contribute one dollar per head per year. It is felt that great benefits will acrue to the maritime provinces by having their boards of trade amalgamated. There is to be a special meeting of the local board to discuss the situation. The Moncton board has strongly endorsed a recent resolution of the St. John board advocating that New

Brunswick should be directly represented on the directorate of the Canadian National Railways.

Communications have been sent by Hon. P. J. Veniot, minister of public works, to all of the teachers in the schools of the province, requesting them to inform pupils that the change in the rule of the road from drive to the left to drive to the right, becomes effective on December 1, 1922. In this way, notice of the change will be given to the great majority of the people in the province of New Brunswick. J. F. Tilton, director of and buyer for W. H. Thorne & Co., Ltd., hardware merchants, St. John, N. B., has been one of the main men responsible for this change of the rule of the road.

Robert S. O'Mears, junior trade commissioner of the commercial intelligence service, department of trade and commerce, Ottawa, was in St. John last week, and was kept busy with interviews by men engaged in the export trade. Several of their problems have found solutions through his efforts, and he has been able to establish new contracts asked for by some of them. Mr. O'Mears said that he firmly believed that there was a good future for the maritime provinces, especially along export lines. He was supplied with information regarding the lines of production and manufacture. He said that it was up to the maritime provinces, for the good of their trade, to expand their export markets for manufactured goods, as they could not hope to compete in the west of Canada with the manufacturers of Ontario and Quebec on account of the high freight rates. So far as exports went, the maritimes had the advantage over the west on account of the possibility of direct water shipments, eliminating the expense of rail haul.

The Nashwaak Pulp and Paper Company's lumber cut on the Nashwaak River will be about fifty per cent. more than was anticipated some weeks ago, and will be three times as great as that of last year. The increased operations on the Nashwaak is taken as an indication of improving conditions in the lumber and allied markets in the United States. Employment agents report a scarcity of experienced woodsmen and say they are having difficulty in supplying the companies with the men required for carrying on the enlarged operations, although wages are from ten to fifteen dollars per month higher than they were last year.

The secretary of the St. John Board of Trade advised Hardware and Metal that he had received a notification from the Canadian Pacific Railway that the grain shipments through St. John would be exceedingly heavy this year and that they strongly recommended an additional grain conveyor. The secretary stated, however, that the time was too short for the consideration of additional equipment, but that other berths would be found for tramp steamers to accommodate the increased traffic.

CONGOLEUM CO. ADDITION TO PLANT

The Congoleum Company of Canada, Montreal, reports the completion of an addition to their plant which adds fifty per cent. to their output.

Fred Vine, of the travelling staff of the J. H. Ashdown Hardware Co., Ltd., Calgary, has recovered from a serious illness.

TRIBUTES TO LATE JAMES HARDY

(Continued from page 43)

It was with great surprise and deep regret that I learned of the sudden death of James Hardy in Atlantic City last week, after meeting him in Montreal about ten days previous when he appeared in his usual health.

Having known Mr. Hardy for over thirty years, social and business relations between us have at all times been most pleasant, and I have always remarked how genial he was in dealing with our association affairs. He had always the interests of both manufacturer and wholesaler at heart, which brought close relations and mutual benefit between these sections in all provinces of the Dominion. I am sure the loss will be keenly felt by all associations with which he was connected.

I beg to convey my deepest sympathy to his family in their bereavement.

ALEX. PRUDHOMME,
President, A. Prudhomme & Fils, Ltd., Montreal.

* * * * *

The passing of the late Mr. James Hardy has taken from the business life of Canada a man that has played a very large part on the constructive side of the commerce of the country. He had the confidence of all whom he came in contact with, his word was his bond. He might have eased up on his responsibilities as the years pressed upon him, but he preferred to play the game to the end, he died in harness, and the terribly sudden call that took him away was a great shock to all his friends and business acquaintances. He died at Atlantic City. He had gone to attend the National Convention, where no one was more welcome. The very sincere and deep sympathy offered by our American associates went to show the great respect and admiration they had for him.

ROBERT STARKE,
Starke-Seybold, Ltd., Montreal.

* * * * *

After twenty-five years of intimate acquaintanceship I feel that I cannot say more than that not only the hardware trade but the commercial life of the provinces of Ontario and Quebec have lost a real friend and adviser in the death of James Hardy. While he was masterful and not in the least excitable he had the wonderful faculty of pouring oil on troubled waters—still at the same time seeing that justice was done to everybody concerned be he manufacturer, merchant or consumer—and on financial points his many years of training as an accountant—made him an "invaluable" manager of the trade associations of which he was secretary. "To meet him was to admire him as a man, and to know him was to realize his great worth."

GEORGE CAVERHILL,
Caverhill, Learmont & Co., Montreal.

* * * * *

The directors of our company have been associated directly with the late Mr. Hardy since 1889, not only in connection part of the time with association work, but also because of his firm having been the official auditors of the company for many, many years.

We always esteemed Mr. Hardy because of his very wholesome manner and person and his very broad view of business matters, and we also regarded him as a very strict disciplinarian in connection with official auditing.

We feel a personal loss in the death of Mr. Hardy, a man who was above reproach in every way, and one who will be very hard indeed to replace because of his long experience.

JOHN M. TAYLOR,
President, Taylor-Forbes Co., Guelph, Ontario.

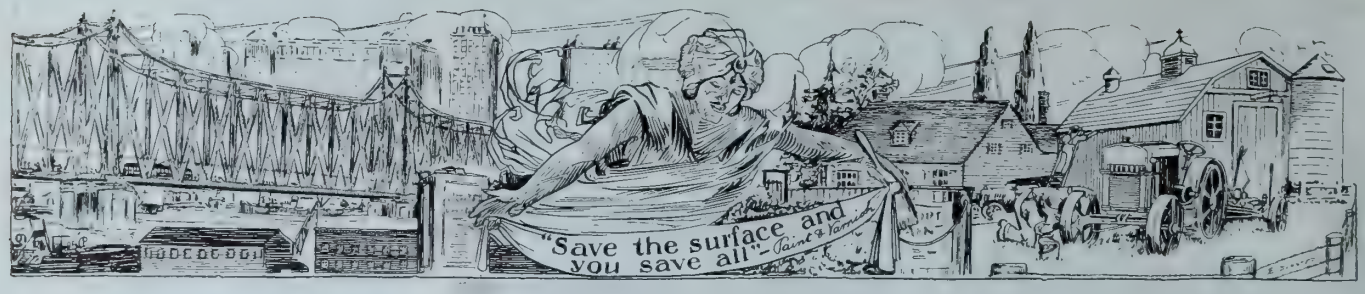
* * * * *

It was with deep regret that we learned of the sudden passing away of the esteemed secretary of the Canadian Wholesale Hardware Association, Mr. James Hardy, at Atlantic City a few days ago and we feel that the association suffers an almost irreparable loss.

We have been intimately associated with the late Mr. Hardy for several years and we are pleased to express our great admiration for his many sterling qualities.

He was a man of broad vision and sound judgment, and it was always his endeavor to promote harmony at meetings of the association. The members were always further ahead when his wise counsels were followed.

The late secretary had a charming personality, which with his remarkable gift for organization enabled him to successfully guide and direct, for so many years the association which he promoted.



Mr. Hardy was possessed of a wonderful energy which always put life into a gathering when he entered and his cheerful presence will be greatly missed.

N. HOWDEN,
President, D. H. Howden & Co., Ltd., London, Ont.

* * * * *

We were greatly shocked to learn of the sudden passing of James Hardy with whom we have been in such close touch for so many years. He was in every sense the jobbers' friend and it was always a pleasure to meet him, and he will be greatly missed by all who had the pleasure of his acquaintance.

G. C. DAVIS,
Frothingham & Workman, Ltd., Montreal.

A Productive Fall Paint Campaign

Successful Paint Merchants Are Concentrating Attention on Benefits of Save the Surface Before Winter's Inclement Weather Sets in—Farmers Responding in Rural Districts—Neglect to Protect Property Indirectly Affects Every Individual

POSSIBILITIES in connection with a Fall paint sales campaign have been proven by many merchants. Reports from practically all sections would indicate that October and November are becoming more and more recognized as ideal months for extending an effort in the paint and varnish departments. It is learned that merchants who have brought their sales returns to higher levels in these sections of their stores are those who are thoroughly convinced that strong arguments can be put forth in favour of painting before the severe winter weather is on hand, and have taken hold of the opportunity in a wholehearted and conscientious manner. Being certain that not only themselves will benefit through increased business, but that it is a paying proposition for their customers, they have well advised the buying public in their locality to protect their property holdings against the ravages of winter which always follow.

These arguments follow along general lines such as: buildings and all other surfaces around the home require best protection during the winter. Certainly a surface which has not been painted during the spring and summer months should not be allowed to go over the winter without it.

The house, barn or any other exposed surface is well dried out after the strong sun in the past summer and surfaces are more receptive, this condition allowing the paint to be absorbed more readily, assuring a better hold. Lastly, but by no means of minor importance, because the autumn months afford proper weather conditions for painting.

Appealing to Various Classes

Being well acquainted with these facts the dealer then makes it a point to impart this information to his customers and make his appeals. There were some who delayed painting during the past spring and summer season and have every intention of further putting it off until next season, believing the earlier months of the year to be the only period for this work. There were undoubtedly other persons entering his store from day to day who had no intention of painting this year but hoped to do an extensive job the following spring. Their property is in need of paint, but it will, in their opinion, wait until next season without any injury. They do not realize what six months of average winter weather will do to an unprotected surface.

These prospects constitute part of the field on which the hardware merchant works. In appealing to men customers, the retailers may be dealing with a farmer whose properties include both buildings and implements, the man who owns his home in town or city, or perhaps he is the owner of various buildings including houses, office buildings, stores or even a factory. Whether a rural or urban customer his holdings should be protected, and an appeal is made. Women customers are in most cases housewives and they are canvassed for inside decoration materials to make the home more beautiful and attractive for the family during the following long winter evenings. She may live in either town or country, home surroundings are dear to her in either case.

The Farmer Appeal

It would seem that farmers are one of the best classes to which an appeal can be made this year. In farming communities a good crop has been harvested, and when this is safely in the barns they will be in a good mood to listen to arguments put forth. It should be easier to persuade them that their implements, which made it possible for them to gather in their bumper crops, should be kept in good repair for next season. The question also of painting their houses and barns should receive more favorable consideration when they are assured of good receipts when their grain is marketed at a little later date.

During the past few years the people of this country have gradually been becoming educated to the value and necessity of preventing the deterioration of all materials through the use of paint and varnish. Nevertheless, there is still much which can be done along these lines to increase the use of preservatives that will in turn benefit the community. In this instance the dealer who handles paint, varnish and brushes is in an excellent position to act as a teacher.

How many persons realize that any loss of the world's wealth ultimately affects every individual? We read in our daily papers of property destroyed by fire, and the statement frequently follows that the owner of the destroyed property was fully covered by insurance. The customary conclusion, then, is that the owner will experience no loss be-

Bring People in Through Demonstration

PEOPLE must be brought into your store. A good way is through a Saturday paint demonstration. Feature a leader and send out handbills, coupons, letters and newspaper ads. Trim the windows with real sales ideas. Ideas that will stop people and bring them in. Show cards help make an effective window.

At your demonstration, have a trained representative from the factory on hand. The salespeople must be trained and prepared with the right selling arguments. Put a sales estimate on them and on the store. Have someone demonstrating the paint by actually painting it out on wood strips or panels or siding. Let the people do some painting themselves and get the "feel" of the brush. Let them see how much space a brushful will cover under actual painting conditions. Have plenty of color cards and be prepared to suggest correct color schemes. Let the people ask questions. Educate them to paint.

cause he will receive from the insurance company practically the amount of money which the property was worth.

Affects Every Individual

However, if we are not the unfortunate possessor of a one-track mind, the realization quickly comes to us that the frequency and extent of fires in our community has much to do with what we, who have so far suffered no loss from it, must pay in premiums for our insurance; furthermore, and what is far more momentous, a portion of the world's wealth has been destroyed, never to be reclaimed. Apparently the loss of one man's property is no loss to another, but in reality it is, because it has reduced the total amount of wealth available.

Wealth, like many other things, is merely a question of supply and demand. There is a certain amount of it in the world, and the scarcer it becomes the more valuable it is. Therefore, is it not to everyone's advantage to preserve wealth in order that there will continue to be a sufficient supply for the world's ever-increasing population?

Wood, steel, concrete, bricks and scores of other materials which themselves make up a large part of the world's wealth are continually being lost from the world's supply, because they are deteriorating from a process almost equally as destructive as fire; that is, these materials are being continually worn away and decayed by the action of the weather upon them. And where does this deterioration start? The answer invariably is at the surface. Hence protection of the surface against these destructive elements will prolong the life of these materials indefinitely. In other words, Save the Surface and You Save All.

Here, then, is the chance for the dealer to benefit himself, the manufacturer and, most of all, the customer. Hook up with the Save the Surface Campaign. Explain the meaning of the slogan to your customers. (It is surprising how many laymen do not understand it). Do not overlook the amateur painter or the housewife who wants a quarter pint can

(Continued on page 64)

The Brush Department

Fall housecleaning is under way and many housewives are prospective buyers of brushes, mops, etc., and such kindred materials. These can be grouped very effectively in window displays such as this. Note the use made of a panel with brush samples affixed. This is placed prominently in the paint department of the store when not shown in the window and it is kept handy to be inserted in the window whenever opportune. It has pulled in good returns. On the floor of the display are shown floor brushes, scrub brushes, whitewash and paperhangers' brushes, all in demand now.

Group photo of those attending the annual sales convention of the Sherwin-Williams Co., Montreal, as reported in last week's issue of Hardware and Metal. This group includes district sales managers and representatives from Fort William to the Atlantic Coast.

Boeckh's Brush News

How About Some of These?

With hardwood floors and small rugs so prevalent, the soft Hair Floor Brooms are becoming increasingly popular, and Boeckh's High Quality Brooms are the ideal. They are built to give absolutely satisfactory service and measure up to Boeckh's standard of high quality in every way, being backed by the Boeckh Guarantee. They are made of the best selected Bristles, Horse Hair, etc., that will take off every particle of dust, yet will not scratch the most highly polished floor. They are properly constructed to get into the corners and out of the way places, and are equipped with removable handles, and in addition have Rubber Protectors on each end. See illustration below.

These Rubber Protectors are the very latest improvement on Hair Floor Brooms, as they provide absolute protection to the furniture, base-boards, etc., besides protecting the ends of the blocks from unnecessary wear. This will particularly interest housewives, but it is of equal importance to caretakers, etc., in Warehouses, Offices, Public Buildings, etc., where sweeping must be done quickly. These Rubber Protectors mean added speed in accomplishing the work without damaging the surrounding furniture, etc.

Lines with Rubber Protectors are specially described in our Supplement Price List No. 60. If you are not already stocking these it will pay you to get particulars regarding them at once, as this is an opportunity for you to get new business.

Canada Paint Co. Salesmen in Convention

Interesting and Instructive Discussion at Sales Convention of Canada Paint Co. in Montreal— Lead Corroding Process Investigated Thoroughly

MONTREAL.—What is described as the most enthusiastic sales convention ever held by the Canada Paint Co. ended Saturday noon, after four days of work and pleasure combined. Proceedings commenced on Wednesday morning and at the opening session prize awards were presented to winners by the general manager, Royal Cluxton, in recognition of their excellent work during the year. The three leaders, known as "Top-Notchers," were as follows:

R. Traversy, Montreal, first.

Nap. Dansereau, Montreal, second.

L. P. M Dechene, Quebec, third.

Another very interesting event during the proceedings was the presentation of a gold watch and certificate of loyalty and esteem to Frank Bell for having completed 25 years of continuous service with the company. Frank made a suitable response, and was carried on the shoulders of his fellow-workers to the cheers of the convention. Mr. Bell is the twenty-ninth employee to have received this honor.

After welcoming the representatives, and making the presentations, the regular sessions commenced, these being held both morning and afternoon of each day, under the chairmanship of Mr. Cluxton, assisted by sales-managers S. M. Ward and W. H. Newton. Luncheon was served each day at the Queen's Hotel, the party being conveyed to and from these popular parts of the program by automobile.

On Friday afternoon the party were taken by autobus to their white lead corroding plant, where the process of white lead manufacture was shown in detail, commencing at the plant which melts the pig lead, to the final stage where it is placed in the irons. That much interest was taken in this part of the program was manifest in the number of questions asked by the representatives who were apparently fully bent on a thorough knowledge of the goods they were selling.

Although according to schedule the convention was to have closed on Friday evening, owing to the interesting discussions on their various products taking up considerable time it was found necessary to continue proceedings until Saturday noon.

WANT RETAILERS ON BOARD

(Continued from page 37)

would not be worth a cent," he declared emphatically.

Mr. Trowern referred to the intimation by members of the committee that the consumers should be called in in the matter of fixing rates. He asked if consumers were called in in connection with fixing prices on railway tickets, on the sale of theatre tickets. "It can't be done. It is absurd," he declared.

Hon. Mr. Drury, prime minister, asked if he was in favor of fixing the prices on all farm products.

Mr. Trowern replied that he was as far as it was possible. But there are cases where it would be impossible, for instance, if one farmer grew a better quality of apple than another, he would be entitled to a better price.

The Ford Co.'s Agreement

H. S. Pritchard, of the Ford Motor Company, read the agreement his company has with their dealers in regard to the re-sale of Ford cars and parts to the ultimate consumer. They sell outright to the dealer for cash and the dealer signs a contract preventing him from selling at a price less than the fixed re-sale figure. The agreement, he said, was air-tight and that for each violation the dealer was assessed $100.00 and the contract was also terminated. They had the same prices in every part of Canada from Halifax to Vancouver, apart from freight charges, and he believed this was the correct principle.

Apart from A. W. Roebuck, Toronto lawyer, who introduced the matter, there was no one who spoke against the principle of fixing the re-sale price. All were in favor of it.

During the last day and a half several members of the committee intimated that what they wanted to get at was a reduction in the high cost of living. It was plain, they said, that the cost of living was still mounting and that there did not appear to be any let-up. This statement was questioned by E. M. Trowern, secretary Dominion Board, Retail Merchants' Association, who claimed that cost had gone down and that living was cheaper. The big point at issue so far as the committee of the Legislature was concerned was as to whether fixing the re-sale price of an article from the wholesaler to the retailer and from the retailer to the consumer enhanced or otherwise the cost to the ultimate consumer or user.

Method of the Eddy Company

J. F. Taylor, secretary and sales manager of the E. B. Eddy Company, Hull, Quebec, explained that his company distributed their output to the legitimate wholesale trade through the retailer. "We think," he said, "that is the proper method. If someone writes to us asking the privilege of buying our goods we investigate their case fully. We write them a confidential letter asking for full information and if that letter is acknowledged they secure our goods. We send them our price list and they are to maintain those prices to the retail trade. We do not, however, say at what price the retailer shall sell to the consumer. We have always felt that if we did not give the distributor a fair margin of profit, it would only be a matter of time when he would not be interested in our line."

R. R. Hall, M.P.P., wanted to know why there was such a great spread in so many instances between the price the producer received and the price the consumer paid.

The conference adjourned until called again by the chair when representatives of several other industries and trades will be heard.

Velvet Finish

(The Can with the Orange and Black Label)

There is no limit to the sales possibilities of a decorative material such as **Floglaze** Velvet Finish. This dull mat enamel is in strong demand for the finishing of walls, ceilings, woodwork, etc., of homes, hospitals, schools, churches and such like.

Owing to its unique composition, **Floglaze** Velvet Finish produces a dull lustre in a natural manner. This dispenses with the usual necessity of rubbing or polishing. Being readily washable without injuring the finish, enables bright sanitary conditions to be maintained at all times.

Floglaze Velvet Finish furnishes a powerful lever for the increasing of profits in your paint department.

Our dealers' booklet, "A Guide to larger Profits," describes Floglaze Velvet Finish fully. Write for this book.

Weekly Paint Markets

Montreal

MONTREAL, October 26.—A further advance in turpentine quotations, and a substantial reduction in shellac prices in some quarters attract attention in the paint markets this week. Turpentine continues on its steady upward climb, and two advances of five cents per gallon are recorded this week with some firms, while others are withdrawing quotations. Although this product has now touched a new high level there is still a feeling that even higher prices are likely in the not far distant future. As outlined in our last issue lower shellac prices were expected at an early date. These are now announced by certain firms, the new prices showing a substantial reduction from former levels. No change in quotations is announced by other firms, thus a wide variation is quoted among local distributors. The linseed oil market remains on a steady to firm basis, with seed transportation still a strong factor in the market. Local seed stocks are admittedly low, one local crusher stating that they were forced to close down temporarily because of no supply on hand. Although lower prices are thought to be in line, if transportation would reach a more normal state, it is felt that slightly higher prices might appear before any recession is made.

LINSEED OIL REMAINS ON STEADY TO FIRM BASIS

Montreal.

Linseed oil remains in a steady to firm position owing to the prevailing conditions in the seed market, which is fluctuating slightly but on a fairly firm tendency. Although a slightly easier tone in both markets, if seed transportation showed signs of improving, is looked for by some well informed, the present market tone is said to have every appearance of a further stiffening. Rather than returning to a more normal state transportation still presents a difficult problem, seed shipments not arriving from production centres in anything like the volume that might be expected at this season. This situation has gradually reached a more acute stage, and at the present time certain local mills report no supply on hand, thus necessitating a temporaray shut-down. Usually crushers are commencing to work on a surplus for next year's requirements at this season, but up to the present immediate demand is keeping them busy.

With no stocks accumulating, demand keeping up in good volume, and interest in the market for future being shown by larger buyers, the oil market is again described as firm at the following quotations:

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.....	1 02	1 04
5 to 8 bbl. lots, per gal.....	1 00	1 02

Less quantities, add ten cents per gallon.

TURPENTINE PRICE AGAIN TEN CENTS HIGHER

Montreal.

A strong upward tendency continues in the turpentine market, and developments during the week on the local market were two advances of five cents each with some firms, while others have withdrawn quotations. Closely following the market in the south prices were increased towards the middle of last week, with a further rise at the beginning of this week. Distributors state that they are now forced to keep pace with primary markets because of no surplus stocks here and little improvement towards importing heavier supplies in sight. In describing the situation at producing centres reports state that a brisk demand is still in evidence and all market quotations show it. Larger consumers and manufacturers are buying very freely regardless of high prices prevailing, and demand from foreign countries continues along steady lines. Opinions are expressed that from present indications the range of prices now quoted will hold throughout the balance of the season providing they do not go even higher. Local importers are convinced that a strong market tone will prevail during the coming weeks, and further advances would not be surprising within the near future. Revised quotations are the following:

TURPENTINE—

1 barrel lots	2 00	2 10
2 to 4 barrel lots, per gal.....	1 98	2 08
Broken lots	2 10	2 15

MARKED REDUCTION IN SHELLAC QUOTATIONS

Montreal.

As outlined in last week's issue of Hardware and Metal, new lower prices on shellac were expected. These are now announced by some distributors, although others are quoting former levels, thus making a wide variation in local jobbing circles. The reduction was a substantial one, being approximately 75 cents per gallon on both white and orange in all quantities. Following a rather unsteady market in primary centres, the situation is again improved due to a better buying movement not only for immediate requirements but for future also. Although comparatively heavy shipments from overseas recently arrived, spot stocks are again described as scarce because of difficulty in getting railroad shipments through. Revised prices with the range noted, are:

SHELLAC—

In barrels	4 25—5 05	3 75—4 55
5 gallon jugs	4 25—5 15	3 75—4 65
1 gallon jugs	4 55—5 25	4 05—4 75

RESIN MARKET ALSO SHOWS STRENGTH

Montreal.

The resin market, like that of turpentine, is firm with an advancing market recorded in southern circles. Demand, both domestic and foreign, on this product is reported good and although present prices are considered high there seems every indication of a strong tone continuing. Local quotations are slightly higher as follows:

RESIN—

Per bbl. of 280 lbs.,	
G., medium grade	$ 8 50
Water white	10 50

BRUSH MARKETS IN SATISFACTORY POSITION

Montreal.

The undertone of the brush market continues on a fairly strong basis since the revision in prices on September 1st last. Local manufacturers and distributors state that fall business has been quite satisfactory up to the present, although a slight slackening in trade is now noticeable. A good consumer demand has been felt for paint brushes practically all through the past summer season, and for this reason stocks are reported as considerably lower than in other former years. Prospects therefore appear favorable for trade in future months, especially at the time when dealers anticipate their requirements for next year.

Toronto

TORONTO, October 26.—The feature of current paint markets is the rapid advance in turpentine prices, this condition being accentuated this week by two further advances, thus establishing a new higher mark for the season. The ten cent increase foreshadowed in last week's market report materialized within a few days, to be followed by a further rise of five cents per gallon, thus bringing into effect the new quotation of $2.35, in one-barrel lots. Distributors point out that they are practically compelled to follow the trend of prices at southern supply centres, there being no stocks of mention on hand, with conditions being such as to prevent accumulations. The fact that current trade is just moderate in domestic circles has no material result in the present quota-

(Continued on page 64)

THE Fall Season is the ideal time for painting and varnishing. Don't let your customers wait till Spring to have it done. Give them these good, sound reasons for using paint and varnish now:

—because of proper weather conditions.

—surfaces are now in their most receptive condition, practically every trace of moisture having been eliminated by the summer sun.

—the wood being dry it absorbs more readily and the paint holds better.

—a surface needing protection should never be allowed to go over the winter without it.

—property needs more protection during winter than at any other time.

The Save the Surface advertisements now appearing advocate Fall Painting. But this is not enough. Each merchant must put his own personal effort behind the idea if he is to get the best results.

The development of Fall painting ensures you a more evenly distributed and profitable Paint and Varnish business.

Save the Surface Campaign

43 St. Sacrement Street Montreal, Que.

If interested tear out this page and place with letters to be answered

WEEKLY PAINT MARKETS

(Continued from page 62)

tions, it being stated that heavier shipment to European consumers has been the chief fact responsible for higher prices at production areas. That the present firmness will remain more or less in evidence during the winter season is also the opinion expressed by certain distributors, the fact that producers enter the current period with little supplies on hand and also face restricted receipts at this time of the year, being cited as premier reasons for this viewpoint.

OIL PRICES FIRMING UP TO CURRENT LEVEL

Toronto

Local quotations on linseed oil are slightly firmer this week, although no change has been made in the average level in effect during the past couple of weeks. In quarters where decidedly easier prices were in evidence, however, it is noted that a tendency to increase and thus conform to the level of $1.10 for raw is now apparent. The general oil market is described as on a steady to firm tone, and although flax seed prices have continued to fluctuate more or less, the transportation of this product from the west is now reported to be showing signs of improvement. While an easier tendency in oil prices has been looked for in some quarters, it is significant that no large stocks of oil are accumulating and the demand is seasonably fair, with the trend of prices at present firm. More interest is being reported in future commitments.

LINSEED OIL—

	Per Gallon Raw	Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, 15 cents per gallon.

MOVEMENT OF PAINTS WELL SPREAD OVER

Toronto.

The ideal weather experienced during recent weeks has been of great advantage to the fall movement of paints and varnishes. Added stimulus has been given the seasonal activity in these products at this time of the year through the fact that fall weather conditions have kept up remarkably well and as a result the current volume of business has been well spread out over a longer period than usual. Manufacturers and distributors describe the present movement as satisfactory, although a falling off in volume is naturally evident with the approach of winter.

WINDOW GLASS SALES IN BRISK VOLUME

Toronto.

A fairly good demand for window glass is now generally recorded, seasonal activity being in full swing. This degree of improvement in current sales has served to steady the domestic markets to some extent, while it is noted that the Belgian franc has remained on a steadier basis, this factor also having a tendency to strengthen the prevailing situation. Stocks in most cases are considered at a comparatively low level as the amount of window glass required for new buildings this year has taxed supplies in many quarters heavily. Therefore, certain best selling sizes are reported with a temporary shortage. During the prevailing season which is usually an active period, a steady to firm market condition is generally looked for.

Turpentine Price Reaches New High Mark

Quotations Register Two Further Advances During Week Thus Establishing Season's High Record —Domestic Markets Depending Upon Current Shipments—No Accumulation of Supplies Evident

TWO ADDITIONAL advances in turpentine prices during the past week place present levels on a new higher mark for the season. The revised Toronto level is $2.35 per gallon in one-barrel lots, a quotation which primarily represents the upward climb of prices at southern supply centres. A strong upward tendency has been evident during recent weeks, this condition being principally due to the heavier-than expected European demand. Recent reports from production areas indicate that the consumers' requirements in the United Kingdom have been largely responsible for current increases.

The advances, both in primary and domestic markets, have been almost too rapid for consumers to follow, and a spirit of hesitancy is evident over the prevailing levels. From the level of $2.20 reported in last week's issue of Hardware and Metal, the additional advance of ten cents per gallon as foreshadowed also developed. In addition to this, quotations have been generally advanced a further five cents, thus establishing a new season's record.

Distributors state that they are practically forced to keep advancing local prices in accordance with the rising levels of supply centres, as the market conditions for some time past have been such that no accumulations were possible. Stocks continue to be distributed as soon as shipments arrive, and it is further stated that heavier importations are difficult to secure in view of similar conditions prevailing at Savannah and other primary markets.

Current trade in turpentine is admittedly a little quieter since the price has shown such a tendency to leap upwards, but is seasonably fair. A firm outlook is generally looked for during the ensuing weeks, and while it is admitted that some slight recession from prevailing levels may develop, it is felt that any such declines will be of brief duration, and winter prices be on a higher average than previously expected. Producers point out that receipts from the woods are small and the viewpoint is also expressed in some quarters that seasonal requirements combined with export demand will likely sweep the markets clean of supplies before the early 1923 crop can be looked for. Revised local levels follow:

TURPENTINE—

1 barrel lots	2 35
2 to 4 barrel lots	2 34
5 gallon lots	2 50

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

PIG LEAD INJECTS FIRM PRICE TREND

Toronto.

The price of pig lead continues to remain in a firm position, and this tendency reflects to a greater or less extent on the current tone of white lead in oil. That some advances in the prevailing levels of this product might have developed if a heavier movement was seasonal at this period, is admitted in certain market quarters. It is pointed out, however, that the quieter session is now at hand. Quotations are firm but unchanged at $13.45 per cwt. in ton lots.

CANADA'S TRADE EXPORTS

(Continued from page 38)

ed increase, which is reflected in grand total, is found. During the first six months of the present fiscal year exports of domestic goods totaled $388,233,296 or an increase of $52,556,165 over the total for the first six months of the previous year, which was $335,677,131. The increase in September alone was over thirteen million. During the past month Canadian goods to the value of $71,592,628 found their way out of the Dominion to other countries while in September, 1921, the total exports were $58,263,182.

Turning to the import figures it is noted that goods to the total value of $363,915,736 were imported into Canada in the first six month of this year as compared with $378,815,250 in the same period a year ago. A comparison of the figures for the month of September shows only a slight increase in favor of 1922.

PRODUCTFUL FALL CAMPAIGN

(Continued from page 58)

of paint and a small brush. Help her in her painting problems, for you know she is quite apt to get the painting "bug."

The quarter pint can of paint and small brush frequently are the bait for a sale of 10 gallons of paint and several $5 or $6 brushes. By the use of display signs or other advertising, call the attention of your community to the truth of the above mentioned facts concerning the preservation of at least our own nation's wealth, if not that of the world.

WHEN you wonder why your customers ask for Pratt & Lambert Varnish Products remember the Pratt & Lambert advertising in MacLean's, The Saturday Evening Post, American, Good Housekeeping and House Beautiful. And, at the same time, don't forget that the quality in P&L advertising is more than matched by the quality in every P&L can — a fact that makes a great deal of difference with present-day buyers.

Oct. 7. 1922.

Messrs. Benjamin Moore & Co. Ltd.
West Toronto. Ont

Gentlemen;-

We have used Muresco in large quantities for the past fifteen years and wish to say that we are satisfied that there is nothing on the market today that compares with Muresco as a wall-finish.

MURESCO is strictly a hot water proposition, we mean by this that it is necessary that it be mixed with boiling water When allowed to cool and is thinned down to brushing consistency you have a piece of goods that will not show brush-marks, streaks or laps, will not rub off, crack or peel, and in finished appearance is equal to that of a flat-wall paint.

We believe that mechanics should appreciate muresco for its easy brushing qualities and superior hiding power especially.

We have sold a good deal of muresco to the public and they not only have been pleased with results but invariably become enthusiastic boosters which we believe to be the most effective advertising for any products today.

Wishing to congratulate you on your success in producing such a piece of goods and for maintaining the highest standard of quality throughout, we are

Yours very truly

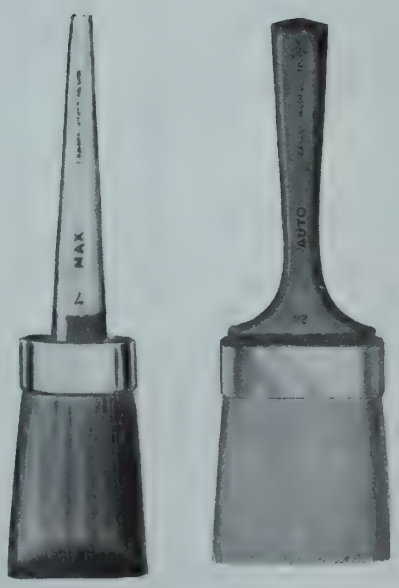
Do You Want The Brush Business?

The day is past when painters bought cheap brushes.



They realize good brushes mean good work. To-day painters take pride in their brushes and in their work.

You as a dealer can profit by this demand.

CANADA Brushes are recognized everywhere as GOOD Brushes—they satisfy—they are absolutely guaranteed.

If you are not already selling CANADA brushes it will pay you to get our dealer proposition.

Do this to-day. Write us about your Spring order.

DECOTINT

The Sanitary Cold Water Paint for Walls and Ceilings

Deco-Tint Products

DECOTINT—A sanitary cold water paint for walls and ceilings.

HAT-BRITE—Straw Hat Enamel.

POLISH-OL—Auto and furniture polish.

METAL-BRITE—A metal polish for all metal surfaces.

DECO-WAX—A paste polish for floors, furniture, woodwork, automobiles, &c.

STOVE PIPE ENAMEL
SHOE HEEL ENAMEL

H+W

Twenty-Two Beautiful Tints for Your Customers to Choose from

DECOTINT solves the old, old riddle of how to secure permanently beautiful interior walls and ceilings at little cost.

Decotint—so inexpensive, so artistic, so sanitary—in a range of twenty-two beautiful tints from among which it will be so easy for your customers to select the color combination they most desire.

Decotint is put up in handy-sized packages and is ready for use with the mere addition of cold water. It is very easy to apply and is extremely durable, retaining its original brightness and beauty indefinitely. Unlike cheap kalsomine paint it will not chalk or rub off on the clothing.

Order a supply now and let your customers know you handle this and the other Deco-Tint Blue Labeled products listed here.

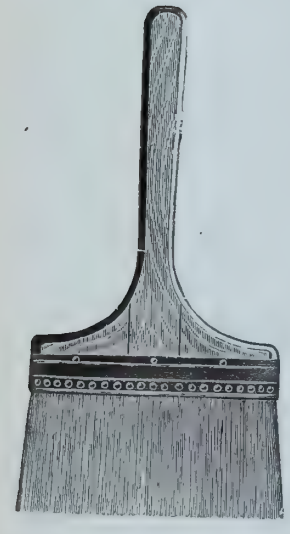
More Sales

Meakins' Reputation Always

Why argue?



You have no time in the business day to argue with customers. You can't afford to have your clerks doing it either. When an old-established product such as Meakins Brushes is offered there is instant consumer acceptance. You don't have to argue and explain and convince as is the case where you are handling an unknown line.

Meakins Brushes are known right across the continent; warehouses strategically placed quickly supply the needs of hardware men the country over.

Per Hour

Eliminates Long Selling Talks

There is a Meakins Brush for every purpose, and each individual brush has built into it the concentrated experience of seventy years of brush making.

Have more sales per hour; stock Meakins Brushes, display them, talk about them—and your brush department will show healthy, pepful profits.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Thaws Frozen Pipe Quickly

Does a Better Job in Less Time

DESOLVO
AND COLD WATER

"It Makes Good"

What more could a trade mark guarantee. Desolvo sells continuously because it makes good and brings re-orders from satisfied customers. This handy cleaner has become a staunch friend everywhere for it is so easy to use and so effective in its work. It mixes readily with cold water and generating heat as it works, cleans thoroughly the most hopelessly clogged sewer and drain pipes.

Its low cost makes it quite easy for you to sell Desolvo in large quantities and it is thus very profitable for you to keep a large stock on hand.

Display Desolvo and talk up its uses to your customers and you will enjoy splendid business in the quick, ever increasing volume of easy profitable sales.

Write today for suggestions to help stimulate business in Desolvo.

Stocking up and Stockings up

Says the Wise Old Owl

Hang up the Gillette stocking,
For Santa Claus is knocking-
Knocking at the moment at your door
And your stocking must be wide
If you want to get inside
All the Christmas trade that
Santa has in store.

Now is the time to hang up your Christmas stocking—to get ready to make Christmas, 1922, **your** biggest Christmas yet.

The Gillette shaving service is your Christmas stocking. It will make your Christmas profitable and in 1923, and the years to come, your customers will be calling on you again and again for blades.

The Christmas buying will start very soon now, and, from now on until Christmas, your Gillette sales will be on the jump.

A representative stock means that you will not lose a single sale.

Sort up now and, in making your selection, remember the feminine element in Christmas buying. More than 60% of the Gillette razors bought at Christmas are bought by women.

Every Gillette buyer—New Improved or Brownie, is your future customer for blades.

Gillette Safety Razor

The New Improved $5.00

GILLETTE SAFETY RAZOR CO.
OF CANADA LIMITED
MONTREAL

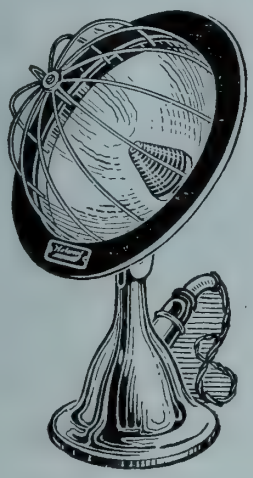
Your Opportunity

Don't get the idea the Heatray sales depend upon scarcity of coal—they do not.

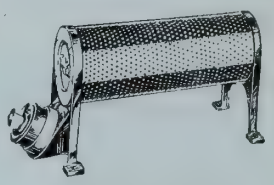
There is a good hungry market for them always. Yet this winter, the necessity of conserving fuel is your opportunity for the biggest sales in history.

The more you **push** HEATRAY and other National Electric Heaters—the more you will sell.



National Electric Heaters are better sellers because they are better heaters for the price. Make comparisons.

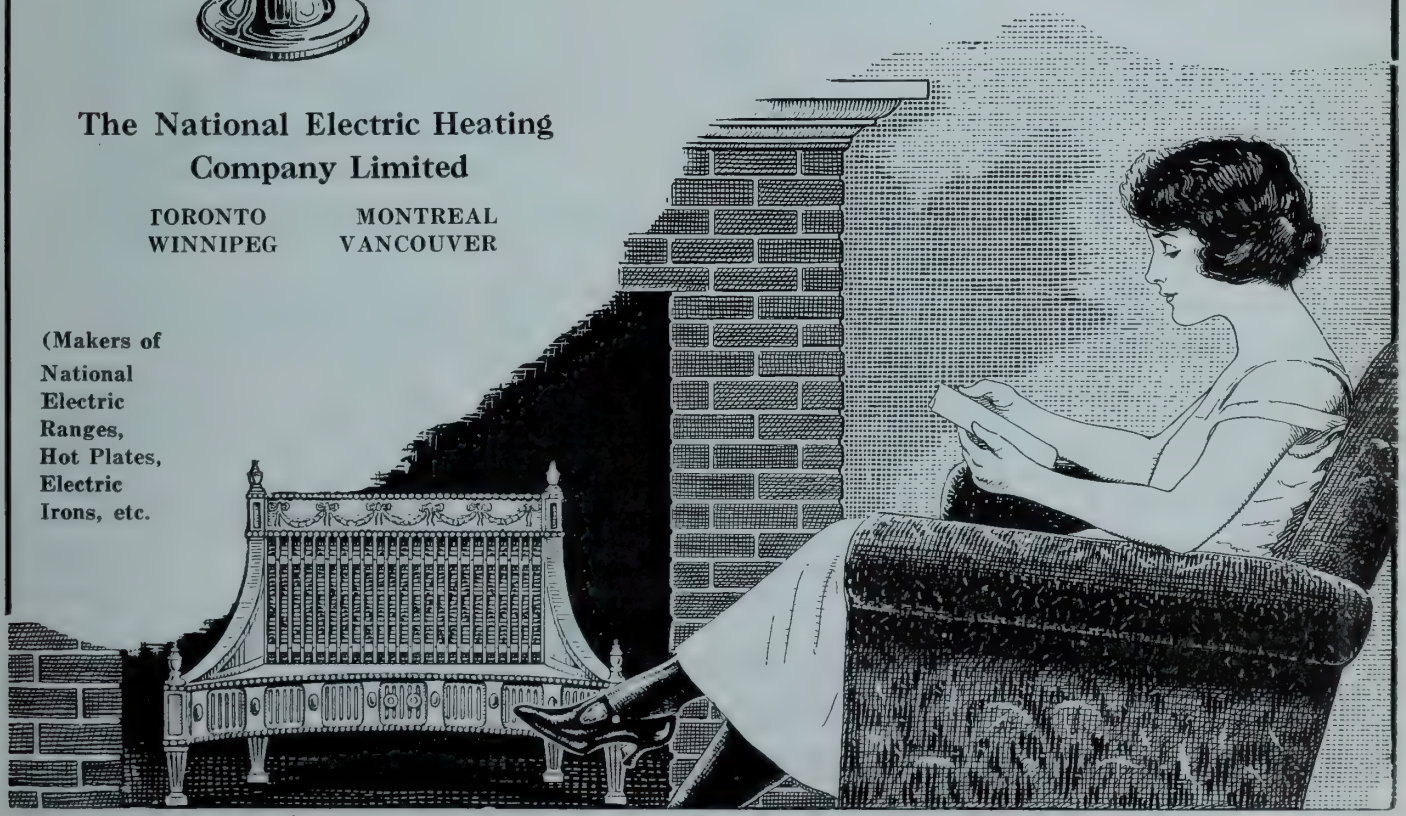
National Electric Bungalow-type Grate Sizes 14 x 18 inches. Choice of any standard finish, $22.75.



National Electric Mantel-type Grates Choice of two sizes and three styles.

Have you got a Heatray demonstrating its powerful heat in your store? Are you showing the line in your windows?

Have you Catalog "D"? It shows our complete line and will interest you. Write if you haven't got it.



National Electric Type "C" Air Heater. Many styles and sizes.

COGHLIN

Springs

FOR FORDS

We give the same exacting care to the production of springs for Fords that we give to the manufacture of Coghlin Springs for larger cars.

Only the finest quality of alloy spring steel is used in the springs we make for Ford. They are heat-treated, oil tempered, and assembled in graphite. Every spring undergoes an exacting test before it leaves the factory.

And each leaf of every spring bears the Coghlin trademark.

Our experience of more than half a century of making springs to meet the exacting conditions of railway use gives us a knowledge that guarantees first grade service from every Coghlin Spring you buy.

Dealers: If you take pride in giving your customers full value and satisfaction, DEMAND Coghlin Springs from your jobber. If he cannot supply you, write to us.

Makers of Springs since 1869

JENKINS BRASS GLOBE VALVE

You Can Sell Them With Confidence

No matter how severe the service genuine Jenkins Valves will function to your customer's satisfaction.

Because every Jenkins Valve is made that way—and tested for service before it leaves the Jenkins factory.

The Jenkins line is complete — a valve for every customer's needs. The Jenkins Brass Globe Valve featured above is suitable for 150 lbs. working steam pressure and 250 lbs. working water pressure.

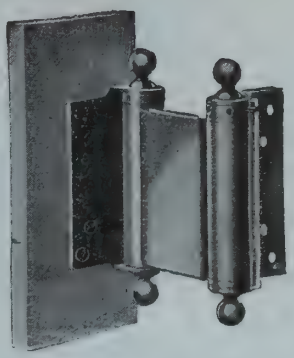
Dollar Turpentine

is a fact and we can supply your full requirements promptly.



The specifications for quality imposed upon our Pure Turpentine make it an excellent thinner for paints, varnishes, colors, etc.

The price is $1.00 per imp. gal. F.o.b. La Tuque, Que., in steel drums of 46 imp. gals. Large stocks are on hand for immediate deliveries.

We invite correspondence from all turpentine dealers.

BROWN CORPORATION

Quebec, P.Q.

Strongest Steel Hinge Ever Made

Save $1.50 or More on Every Door

No hanging strip is required with the Lawson "Nu"-Jamb spring hinge. This means a saving of $1.50 or more on each door. The hinge fastens on the door jamb; can be mounted more quickly and easily than any other hinge. More solid support than if hanging strip were used. Here is a real seller.

WHY

Do You Import Bar Iron?

Our goods have a reputation in the Canadian market, thoroughly established for the last twenty years.

And compare favorably in quality with most imported brands, yet are considerably lower in price and close to hand.

You can get quicker delivery from us.

Copy of tests made by Strength of Materials Laboratory prove our claims as to quality.

	9-16 Sq.	⅞ Rd.	1 Sq.	1⅜x½
Elastic Limit, per sq. in.	39.000	33.300	33.000	35.300
Ultimate Strength	54.600	54.300	52.000	50.000
Elongation in 8 in.	25%	27%	29%	26%
Reduction	47%	49%	50%	50%

SPRING HINGES

Top Pivot

Top Socket

This type of hinge is for office gates. It is known as the Chicago "Sagless" Gate Spring Pivot Hinge.
It has Ball Bearings.
No matter if the gate is heavy or wide, it will swing it easily, without sagging.
The spring does not carry the weight of the gate and a very light tension is applied—a desirable feature on office gates.
Backed by a world-wide reputation.

Spring Hinge and Bracket

Chicago Spring Butt Company.

Rats Are a Scourge!

Urge your community to quickly exterminate the rats with Macdonald Rat Traps. The top illustration shows how the trap is fabricated—it is so strong it lasts indefinitely and will catch several rats in a single night or day.

TRADE MARK Red Devil Tools

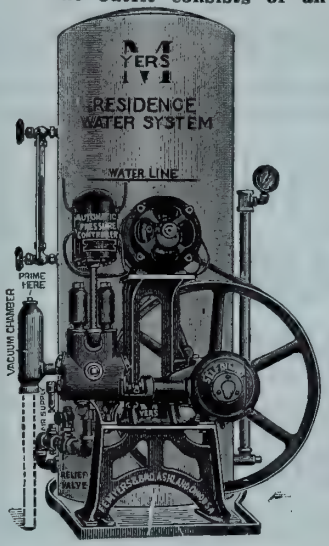
"Red Devil"

Corrugated Lock Washers Build and Hold Trade

"RED DEVIL" Lock Washers absolutely prevent loosening and rattling. They have six points of contact where others have only two—three times the gripping power of others. It requires 1¼ turns to loosen them, while others loosen with a ¾ turn. That means 66 2-3% greater efficiency.

A boon to machinists, garage mechanics and individual owners of automobiles, tractors, motorboats, etc.—to be applied wherever bolts or nuts are used.

Send for schedule of sizes and trade prices.



SMITH & HEMENWAY CO., Inc.,
Mfrs. of "Red Devil" Tools,
89 COIT ST., - IRVINGTON, N. J.

PNEUMATIC WATER SUPPLY SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

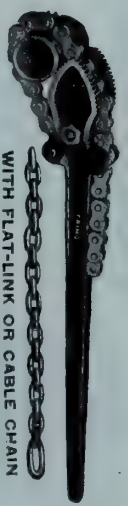
The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep.

The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System Catalogue and prices. Now is the time to interest your customers.

The STEEL TROUGH & MACHINE CO., Ltd.
Tweed, Ont., Canada

"TRIMO" Quality Tools



Strength, dependability, design, balance—these things enter into all Trimo Tools; their specific points of superiority are built into each particular tool.

In the Trimo Pipe Wrench, for instance, the following points should be noted:

Spiral Spring always in place—Steel Frames that will not break—Nut Guards that protect adjustment nut—and the Inserted Jaw in handle that can be replaced when worn.

Trimo Pipe Wrenches, Trimo Chain Pipe Wrenches, Trimo Nut Wrenches, Trimo Pipe Cutter (hand).

At your jobbers or write direct.

GREASE CUPS FOR EVERY PURPOSE

No. 249

The No. 249 Ratchet Grease Cup is designed for use in places of vibration. The cap is fitted with a locking device that makes it impossible for the cap to jar loose.

A light, strong cup drawn from sheet metal. The locking device is entirely inside, nothing to catch dirt. Made in seven sizes and all finishes.

No. 200

The No. 200 Grease Cup provides an inexpensive and very serviceable general purpose cup; only two parts cap and base, nothing to get out of order. Drawn from sheet metal, brass and steel, it is light and extremely strong. Made in eight sizes: ¼ ounce to ½ pound capacity. Rough and blued steel and dull, polished and nickel plated brass finishes.

The Empress line of lubricators consists of more than twenty different styles of oilers and thirty types of standard grease cups beside many special styles. We also make spring shackle bolts and dowel pins.

Crown Metal Shingles

Will Outlast Them All

They are being used where efficiency in roofing is of the greatest concern. They are absolutely storm and wind proof. Locked together securely on all four sides, they make the strongest roof on the market. Ornamental in design; they are easily sold and you have only to mention the ease with which the roof can be laid to make many sales. Point out that they require no solder, mallets, seamers, tongs, etc. Point out that they are made from **Special Quality Copper Bearing Shingle Plate, a guarantee of their long life.** We will be pleased to give you further details or any advice on sheet metal work—write us.

July 12, 1922.

Messrs. Geo. W. Reed & Co., Limited,
37 St Antoine Street,
City.

Gentlemen:-

As we believe that a good product deserves praise, we have pleasure in informing you that the Plastio Cement roofing, which you put on our factory in 1903, is still giving good service.

While some repairs have lately been necessary, the roof as a whole after 19 years, is still in serviceable condition.

Yours very truly,
THE ROBERT MITCHELL CO., LIMITED
Secretary Treasurer

WVS/AM

The Proof of a Good Roof is in Its Wearing Qualities

Reed's Roofing Cements

Have stood the test of time.

If you want to build up a profitable side line, send us in a trial order TO-DAY.

REED'S ROOFING CEMENTS are put up in convenient 5 and 10 lb. tins for household use, and in 100 lb. drums, half-barrels and barrels for industrial purposes.

The Cements are the result of our 70 years' experience in roofing. They are plastic, elastic, water and weather proof, and are absolutely unaffected by climatic changes.

For flat low pitched roofs, use Reed's Liquid Roofing Cement.

For medium pitched roofs, use Reed's Semi-Plastic Roofing Cement.

For high pitched roofs, use Reed's Plastic Roofing Cement.

Reed's Roofing Cements are the cements of a thousand uses.

Place your order immediately and cash in on this profitable line.

Strength and Durability

—is what counts in every walk of life. The former denotes power, showing that the possessor has the necessary qualifications to "accomplish."

With it must be "Durability" that which testifies as to the ability to stand up under the test of time. Aero Cordage possesses both. For sash cord, clothes lines, signal cord, tow lines, anchor cables, bell cord, whistle cord, trolley cord, awning cord, etc., be sure you specify "Aero" because it will pay you.

Put up in hanks and coils.

Aero Cordage is made by covering special twisted fibre core with braided multiple plies of cotton under high tension.

The only truly weather, rot and stretch proof cordage made.

AERO CLOTHES LINE PULLEYS

Made of wood—are self-lubricating and work smoothly and noiselessly.

They are weather proofed to repel moisture—they will not freeze up. The large axle and bearing make AERO Pulleys capable of carrying heavier loads than any others —and the space between the groove and guard allows the knots to pass freely. Made in two sizes, 2¾ in. and 6 in.

Order from your jobber.

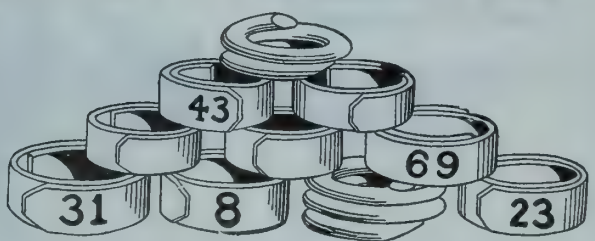
GEORGIAN BAY SPRING AND BABBITT WORKS
Distributors for Ontario: WHITES LIMITED, Collingwood

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL.

IT PAYS A DEALER to be sure of his goods

The dealer who stocks the "Minimax" Washing Machine makes no error in judgment. It is an entirely reliable machine of the newest wing design, dolly type. Like all

Maxwell



Products, it embodies the most approved modern features—quiet action, compactness, a swinging, reversible, quick-release wringer, and adjustable "4th" leg for uneven floors and draining. The sheerest and the weightiest fabrics are washed by the "Minimax" with equal success.

LUFKIN

COMBINATION SQUARES

LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.
On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

SEND FOR CATALOGUE — LUFKIN — MECHANICS' TOOLS

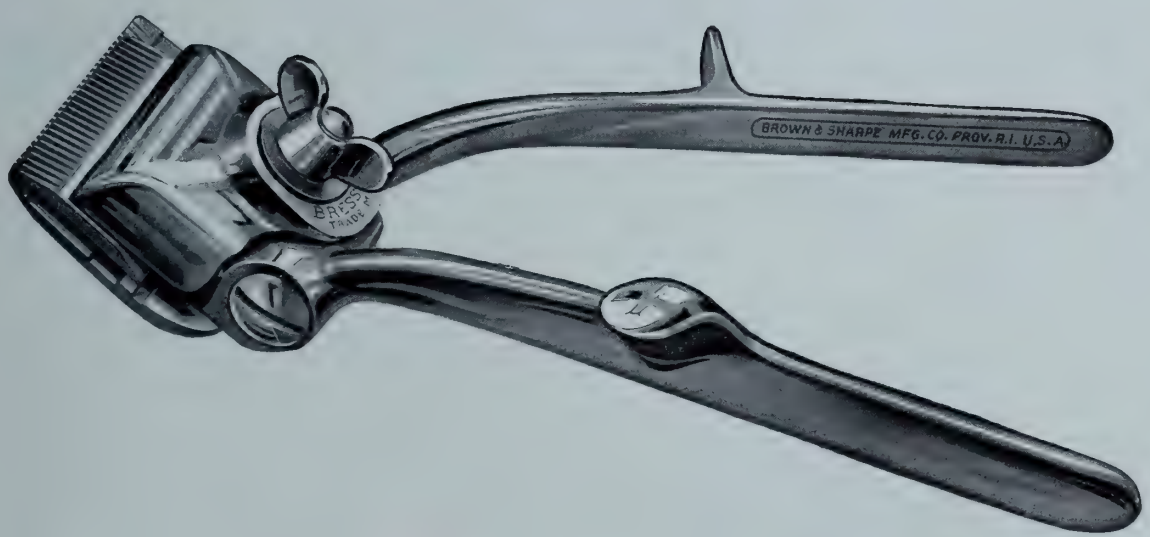
Extend Your Clipper Sales—
Sell Every Prospect



THERE is a big field for the dealer who sells Brown & Sharpe Hair Clippers—a field of countless prospects; people who cut their children's hair at home, men with beards, barbers, actresses, girls with bobbed hair, hospitals, etc.

Close cutting qualities, natural grip, correct balance and long life are real reasons why Brown & Sharpe Hair Clippers give complete satisfaction. There is a size for every requirement, from No. 000 which cuts next to shaving to No. 3 which cuts hair 5/16″ long. The "Bressant" is a popular model, taking six sizes of plates, Nos. 000, 00, 0, 1, 2 and 3. The 000 and 00 are becoming especially popular, providing an ideal combination—close cutting clippers with wide plates and indestructible springs.

Every Brown & Sharpe Hair Clipper you sell makes a satisfied customer for you, and a prospect for future sales. The type of men who buy hair clippers for family use are usually good prospects for your other lines.

There is a big field almost untouched for the dealer who sells Brown & Sharpe Hair Clippers. Envelope Stuffers on the new No. 000 and No. 00 "Bressant" sizes, imprinted with the dealer's name, furnished when requested.

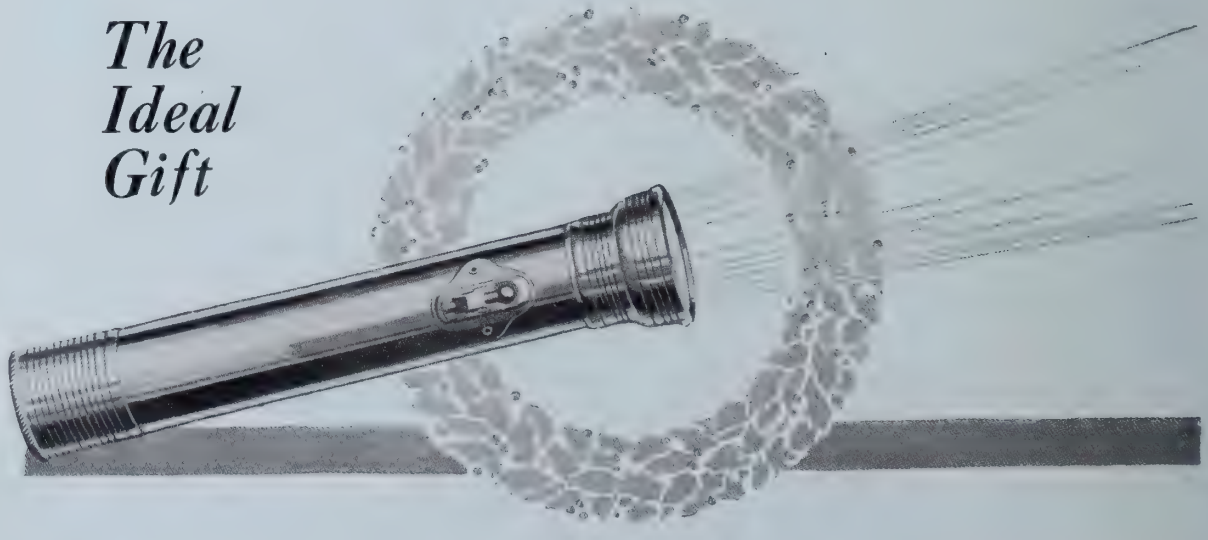
EVEREADY

FLASHLIGHTS & BATTERIES

Will Add Greatly to Your Christmas Sales Profits

EVEREADY advertising will this year turn a large portion of the Christmas Gift Trade to Eveready dealers. A smashing poster campaign will be on the boards a month before Christmas. Right on top of this comes a nation-wide advertising campaign in the newspapers and magazines. Attractive window displays and some wonderful sales helps are ready for your use.



All to help you sell more Eveready Flashlights this Christmas than have ever been sold before. Eveready Flashlights are ideal gifts for every member of the family—and every man, woman and child in Canada is going to know about it before another month has passed.

This is the biggest undertaking in our history, and it is going to mean *real money* for every retailer who gets in line with the Eveready Christmas Drive.

Ask your Jobber for full particulars—how you can get a generous share of the Profits Eveready Dealers will make this season. He will be glad to tell you about it.

New Christmas Lines

Hundreds of thousands of Canadians buy Christmas gifts every year in hardware stores. The hardware man's revenue from this business could be considerably increased by simply introducing Diamond Ware, Pearl Ware and Crystal Ware as Christmas Gift lines.

In your neighborhood there must be a large number of homes where the housewife is doing her daily kitchen work with an incomplete set of cooking utensils. Suggest to your customers that a most thoughtful Christmas gift would be the "filling up" of this set with Diamond, Pearl or Crystal Ware, or else the gift of a complete new set of SMP wares.

The idea is a really good one. It means a big turnover in lines that in previous Christmas seasons slowed up through the hardware men pushing other lines.

We are backing this idea with heavy Fall and Christmas season advertising in the newspapers of Canada. A little co-operation from SMP dealers will net very satisfactory results.

Holly Boxes. Roasters in Pearl, Crystal and Lumino Wares are put up in Holly Boxes. Also nickel-plated tea kettles and Hot Blast Electric Heaters. Specify Holly Boxes when ordering. No extra charge.

Ingersoll WATCHES

Announcement

THIS is to tell you officially that we have purchased the assets of Robt. H. Ingersoll & Bro., including trade marks, trade names and good-will.

We shall market in Canada, under the name INGERSOLL WATCH CO. Inc., the complete line of Ingersoll watches—and at ***New Reduced Prices,*** effective immediately.

Thus the fame and prestige of Ingersolls and their quick saleability, are joined with the factory facilities and financial strength of the Waterbury Clock Company.

WATERBURY CLOCK CO.
Owners of Ingersoll Watch Co. Inc.

Is Your Stock Ready?

During the past two years practically no Ingersolls have been sold in Canada. That means many people, right in your own community who would ordinarily have supplied themselves with Ingersolls, have not done so.

And now just when this banked-up demand is combined with the Fall and Holiday Season—always a big selling season for Ingersolls—we start things moving with:-

1. NEW REDUCED PRICES.
2. THE BIGGEST ADVERTISING CAMPAIGN ever put behind Ingersolls in Canada. Features the new prices.

How about your stock? Check it up and order what you need. The reduced prices are effective immediately.

Russian rubles and U. S. dollars

EIGHT years ago one Russian ruble was worth fifty cents —in New York, Hongkong, or Moscow. What would a truckload of rubles bring on any market today?

Eight years ago an American dollar was worth a dollar. Today it is still worth the same old dollar.

Eight years can make a tremendous difference, or they can make no difference at all.

Take a sheet of "Armco" Ingot Iron. You can count on it to stand up on any job, because years of service tests have proved that it will resist rust, the common enemy of all iron and steel.

Every sheet of "Armco" Ingot Iron that leaves the mill, just as every dollar that leaves the U. S. Mint, must come up to certain definite specifications. Every sheet is made to the same standard.

"Armco" Ingot Iron is soft enough to work into form easily and quickly—strong and tough enough to bear the strain of working.

Why stock up on Russian rubles when American dollars are on the market? Use "Armco" Ingot Iron.

Stronger
Lasts Longer
Only 3 Parts
and
It Gets Into The Corners

It's the New

Little Giant
Pipe Wrench

A glance at the illustration shows why this new wrench is being instantly and joyfully accepted by the plumbing, gas and steam fitting trades.

The "LITTLE GIANT" Pipe Wrench has only the three essential parts of a wrench, the Handle, the Movable Jaw and the Adjusting Nut. Everything else has been eliminated. On account of being "end-opening," the "LITTLE GIANT" will get into corners and narrow spaces as no other wrench can.

And here is one more BIG point. In spite of the extreme strength which is built into the "LITTLE GIANT" Wrench it's drop forged from the best steel and heat treated to give maximum service—it weighs less than AN ORDINARY wrench. That means something toward the end of the day.

Write for circular 300 D, and our complete catalog showing screw plates, pipe stocks and dies, vises, cutters, etc.

Basement Type Paint Oil Battery

Handle Paint Oils Safely and Economically

No matter how large or how small the volume of your paint and lubricating oil business, you will profit by a battery of Bowser tanks, such as shown above. Install a tank of each kind of oil. The all-metal, evaporation-proof construction prevents leakage and gumming. The piston-type measuring pumps deliver exactly the amount of clean oil required, eliminating spillage. Thus you will be paid for all the oil you buy.

And you save three-fourths of the time used in measure and funnel service.

The complete equipment keeps your store neat and clean and gives it an inviting appearance—which results in greater patronage.

Bowser equipment has never started or contributed to a fire.

Write for illustrated booklet C-16 and learn how to make more money selling oils and paints.

A "BISSELL" SWEEPER

is more than a box, four wheels and a brush—

WHAT A REAL piece of carefully created mechanism after all! 83 parts entailing 358 operations go into the making of a Bissell. And yet it is the essence of simplicity to use—automatic in adjustment, almost "fool-proof" and goes on for years sturdily performing its daily duty, needing only the ordinary care of cleanliness and a drop of oil occasionally. It has taken many, many years of experience and study of bristles, carpets, adjustments and mechanical principles resulting in scores of patents, to make a sweeper that does the best work, does it easily, sweeps all kinds of carpets and lasts for years. Truly a Bissell is more than a box, four wheels and a brush.

"Frost River" Refrigerators

The feature of this Refrigerator is its all-steel construction, giving more economic refrigeration and greater durability. The Galvanized Sheet Steel body will neither shrink, swell nor rust, and the special system of ventilation renders it absolutely sanitary under all circumstances.

"FROST RIVER"—EFFICIENCY AND ECONOMY

The insulation is a special lino-felt quilting covered with water-proof sheathing, applied to inner and outer walls, leaving a ¾ inch still air space between. This has resulted in a high rate of efficiency — as proven by an actual test, showing that 16 lbs. of ice lasted 67 hours, obtaining a minimum food chamber temperature of 48 degrees in a room temperature of 68 degrees F.

The interior lining is pure, white, smooth, hard baked enamel, with rustless tinned wire shelves—sanitary drip cup connecting with outside drip pipe, carries away odors and waste water—a feature exclusive to this type of refrigerator.

All trimmings, locks, hinges and handles are solid polished brass and body is mounted on easy moving roller bearing casters. "Frost River" Refrigerators are made in three sizes, the largest being the double door style.

Full particulars, dimensions, prices and descriptive literature sent on application.

Your Plumbing Sanitary Engineer

October 5, 1922.

SANITARY ENGINEER is to the Plumbing trade what HARDWARE AND METAL is to the Hardware trade.

The same indispensable merchandising, market and technical information which make you as a hardware man a close reader of this paper, is given from the plumber's point of view in SANITARY ENGINEER, Canada's only Plumbing business paper.

90 per cent. of the worth-while Plumbing establishments in Canada are interested readers of SANITARY ENGINEER.

Look at the contents of the October 1st number and then decide whether your plumbing department can afford to be without it.

"Selling Plumbing Fixtures on the Instalment Plan"—In which the author outlines a tried and proven plan for stimulating business by use of the Instalment Plan.

"Overhead"—In which K. B. Allison points out a few of the leaks in the "Overhead roof" that are costing a great many shops hundreds of dollars each annually.

"Rub-a-Dub-Dub—Three Men in a Tub"—Another screamingly funny sketch, written and illustrated by the inimitable Major Laurie Anthes. This story tells how Si Ensilage, a farmer from Pumpkin Centre, sold himself a set of plumbing fixtures. There's a laugh in every line, also a moral with a kick like a mule.

"How I Sell More Plumbing Fixtures"—An interesting and valuable story of an Eastern Plumber's successful sales methods.

"A Discussion of the Sales Tax"—

Sewage Disposal Problems—

Modern Plumbing Practice—

Questions and Answers—

Snappy Editorials—

Discuss Fixing of Hardware Prices

Washing Machine Manufacturers Say Service Work on Electric Machines Militates Against Large Profits on Fixed Price Basis —Paint Manufacturer Says Fixed Prices Protect Legitimate Channels of Trade—Wholesalers Say it Stabilizes Market

EDITOR'S NOTE:—The question of establishing fixed resale prices promises to come in for considerable discussion in connection with certain governmental action being taken in the province of Ontario, as outlined fully in last week's issue of Hardware and Metal. This question is one which extends beyond the province of Ontario: it is a national one. Fixed prices form an important phase of the general discussion which is going on concerning merchandising methods and the expressed desire to eliminate all waste so as to reduce the spread in price between manufacturer and consumer. In the following article the opinions of some representative hardware manufacturers are given on this subject:—

"THERE is no doubt that price fixing on some commodities works an injustice, yet to separate the one from the other is well nigh impossible, so consequently all must suffer for the offences of the few," says an Ontario manufacturer of washing machines. Concerning his particular line of business this manufacturer states:—

"The washing machine business has been one which has always been handled on an extremely close margin and in the old days before the coming of electric machines there was practically no service work required on hand power washers. Quite frequently in the days before we had our washing machine association washers were sold below cost. This did the company selling the goods below cost a loss and the industry lost because the quality could not be put into the goods at the prices at which they were finally sold.

"The association, formed possibly fifteen or twenty years ago, has done a lot for the industry as a whole and still few of us have made a fortune out of washing machine business. Since those days the electric washing machine has entered into the field and thrown a new problem on us which is the problem of service work and is as much a legitimate integral cost as any other.

"If an industry is not in a healthy condition the product which the industry develops will not be of the quality necessary to give the satisfaction which every manufacturer desires should be had from his product. Even now after nearly half a century the older washing machine could not show continuous profit which would enable any of the older line washing machine companies to attract any new capital. If such is the case after operation under an agreement with regard to prices, what would be the results in open and ruthless competition?"

Prevents Unscrupulous Cutting

A paint manufacturer in favor of fixed retail price gives his opinion as follows:—

"We are in favor of a fixed retail price for one specific reason and about the only reason that we consider important. Perhaps 85% of the merchants have a fixed policy in their business that they will not sell goods without a legitimate profit. For these people a fixed price is unnecessary but unfortunately there are a number of so-called merchants who for lack of experience, or for spite, think it is a smart piece of business to get hold of a line of goods and sell it at 5% or 10% above cost, especially if it is a line that is fairly well known and handled by the majority of merchants. We appreciate that even a fixed price will not keep this kind of a man straight but it helps. There may be many other reasons, good and bad perhaps, for having a fixed resale price, but this we consider is about the only one that would seriously influence us in fixing a resale price."

Should Be in Retailer's Hands

A brush manufacturer states as follows:—

"Re a fixed resale price. We do not have any of this in the brush business, for the reason that brushes are not a fast selling article and the small merchant in the back country asks a great deal larger profit than the merchant in one of the larger cities. We tried it out on several lines and found it did not work to anybody's satisfaction. In reference to the writer's own views, he never was in favor of it, as he always considered that any goods he bought for himself were his own after he paid for them and he should be able to sell the goods for any profit, small or large, that he considered was necessary under the circumstances and it always galled the writer to have to handle goods on which there was a fixed resale price. Under these circumstances, he is not in favor of a resale price on any of our own goods."

Fix Prices on Specialties

Another brush manufacturer says:—

"In the matter of specialties and some other lines, we are of the opinion that it is much better for all concerned to permit of making a definite resale price on certain classes of goods and therefore do not see that there would be any real advantage in the passing of such a bill, whereas on the other hand it might prove detrimental in a great many instances."

In discussing the question of fixing resale prices, relative to the efforts of the Ontario government to enforce Anti-Combine legislation, with Montreal wholesalers, it was readily seen that a broad question is involved insofar as the wholesale trade is concerned. According to one jobbing house there are

many lines on which the wholesaler benefits by the fact that set resale prices greatly assist towards stabilizing the market for those particular products. This would apply to lines which are nationally advertised and well known. Salesmen were placed on an even footing and it then rested with the wholesaler or distributor to sell his service rather than sell his goods at a price.

Suggested Prices to Retailer

There were many hardware goods distributed by the wholesaler where list prices were given as resale levels, with the jobber securing a discount. Although these were generally recognized as fixed resale prices they were really sugested quotations for sale to the retailer. The manufacturer, if a competitor through selling direct to the trade, uses these list prices, and it seems a fair proposition for both parties. In some cases to-day the discount given is not sufficient to cover selling expenses and then offer a fair margin of profit, but this could be remedied by the wholesalers themselves, perhaps through their association. An instance of this, as affecting Montreal wholesalers was pointed out.

A certain well-known Ontario manufacturer issues list prices, and offers a

Do fixed resale prices bring bigger profits to the retailer? Read the opinions expressed in this article.

discount of 20 per cent. to local distributing houses. The list prices are resale quotations, and adopted by the manufacturer who also solicits the retail trade. The margin here was not sufficient to allow a fair net profit when the sales tax, freight charges and selling costs were considered, but to remedy the situation the wholesaler could sell retail at plus 5 per cent. and still compete with the Ontario manufacturer. The latter was forced to collect 4½ per cent. sales tax, as compared with 2¼ per cent. from the wholesaler, and the manufacturer sold f. o. b. Toronto, where the local houses quoted f. o. b. Montreal. Service also was a point in favor of the jobbing house, and rightly considered by the majority of dealers. They purchase in small quantities from their wholesaler, in quarter dozens for sorting rather than in full dozens from the manufacturer.

When asked by Hardware and Metal if the Canadian Wholesale Hardware Association could not deal with the matter of determining resale prices satisfactorily this informant stated that they could, and did, on some commodities but it would not work out as satisfactorily on certain well-known articles because prices, from manufacturer to consumer, were very often thoroughly established by the producer and everyone worked in harmony by adopting these prices. The consumer also knew the market value for such an article, he or she having often seen it through extensive advertising.

Coming back to the proposed legislation in Ontario, any action by the government through the Attorney General was scored by this wholesale merchant. It it has been proven by certain government officials that prices were being upheld by manufacturers or wholesalers at the expense of the buying public then let a board or committee representing proper authorities deal with the matter. Let the manufacturer, wholesaler and the retailer have a say in the matter.

Too Many Retail Hardware Stores?

"ARE THERE too many hardware stores in Toronto? Yes, I think there are."

This was the opinion of a prominent hardware wholesaler when discussing an article dealing with this subject which appeared in the October 21 issue of Hardware and Metal. The fact that the expression of natural city growth and urban expansion during the past few months has contributed to this condition in Toronto, is a matter of general interest to the hardware trade, as other centres, also suffering from "growing pains," may be in a similar position and be confronted with like difficulties in retail business relations.

The cause and remedy which were suggested by this wholesale merchant for the conditions outlined in the caption, "Are there too many retail hardware stores in Toronto?" contain vital phases of distinct importance to all retailers, as well as being based upon a different interpretation of current trade impressions and practice than previously outlined by the Toronto Retail Hardware and Paint Club when this subject came up for discussion at a former meeting.

At that time, the large number of newcomers into the retail hardware business was attributed to several elements, among which were, intensive building activity, lack of retail experience, and miscalculation of the proportion of trade available in certain districts referred to. It was also suggested that local wholesalers were partly to blame through being too anxious to open up new accounts.

Insufficient Volume

"I agree with the retail merchants that there is not a sufficient volume of retail trade in many of these districts to support such a large number of new stores," remarked this wholesaler to Hardware and Metal. "For my part I have discouraged the idea of opening up at this time. In many parts of the city, stores are being erected in far greater proportion to dwelling houses and buildings of that type, with the result that the capital of those investing in this manner is threatened and their future jeopardized.

"Quite recently a man who had quite a good position in the hardware business informed me that he was going into the retail end, and intended to open up a store in one of the fast growing localities. This man had years of experience, so all of the newcomers are not 'greenhorns.' He had the opportunity to study retail trade conditions and should not have been led away with false impressions. I advised against the proposition, but he had evidently made up his mind. We got his account all right, but what is the result? He is up against strenuous competition, there having been a sufficient number in that locality already before he arrived on the retail horizon. Now he is barely existing, and the same remark applies to the others. And this is the season when the trade should be good, with the holiday volume of business approaching. How are they to pull through the winter, or the slack period after Christmas, when the volume of business will simply not be there? It isn't always a case of one getting it and the other going without.

Have Too Little Capital

"Then again, many of those commencing business have far too little capital to stand a strain of this nature. The well-established merchant will hardly fear the 'survival of the fittest.' Business has been that, more or less, since the beginning. But they are all suffering from the influx to some extent, and why?

"The keynote of the whole situation lies in buying and selling. The duty of the retail merchant is to sell goods to the consumer. Ninety per cent. of the retailer's time should be devoted to this function. If it is properly performed, through the aid of window displays, attractive store interior, retail local advertising and other factors, there is no need to fear for his steady and ultimate success.

"But the retailer is paying far too much attention to buying. This is because many of them, not only in the city

Natural Setting for Fall Sport Display

The use of autumn leaves on lattice work combined with the use of some stuffed animals, gives this Fall sporting goods display a realistic touch, and it contains real selling value. The background was painted on wall board by the window dresser of the Mills Hardware Co., Hamilton, Ont. This shows the ducks in natural position in flight. The display is covered in at each end with lattice work on which leaves have been placed. The setting is simple, not overdone, and shows all the various rifles and guns in stock. There is also on exhibition a sporting rifle 280 cal. which was loaned for the display, it not being made now and therefore a rare and valuable specimen. During the last fifteen years the firm has collected some very fine stuffed animals for just such use as this. These add greatly to the display. Note that prices are large and plain, and there is a full description of each rifle on each card.

but in the country as well, have opened up accounts with a large number of jobbing houses and manufacturers. The old timers, as well as the newcomers, have divided their purchasing and in this manner have also divided their attention, increased their overhead, extended their bookkeeping, have additional worry and increased drain upon their time. This has generally been at the sacrifice of the time and attention which should be devoted to the function of selling goods the consumer needs.

More Accounts But Orders Smaller

"To-day we have a larger number of accounts, but the orders are smaller," he continued. "A merchant buying one-tenth or less of his goods from us, leaves us in the dark as to his progress. We have no method of checking up how he is doing, and when an extension of credit is desired, we are not in a position to extend our confidence in that direction because such a merchant has denied us his confidence in the extent of his buying. The remedy lies in the retailers concentrating more intensely than ever upon selling.

"In order that they can do this effectively, a return to the former practice of buying from one wholesale house is recommended. Mind you, I do not say this house more than any other. But I would suggest carefully choosing my jobber and then carrying and selling those lines to the exclusion of others. Duplicate accounts mean duplicate lines from competitive sources, increased stock, larger space, extended accounting, in fact more overhead without any compensated increase in turnover. Reduce, rather than increase the number of lines carried. Standardize, where possible, on selected goods, and then concentrate on selling those lines. I could point to dozens of examples in this city who commenced business many years ago. With very few exceptions they followed the plan of doing the bulk of their buying from one wholesaler only; gave all the attention they possibly could to selling, and are to-day wealthy and successful merchants. Others, who divided their attention and accounts, have passed on in the fight for the survival of the fittest.

Avoid Duplicate Lines

"Of course, every retailer will have some accounts with certain manufacturers, but the main thing to avoid is duplicate lines and the consequent evils already outlined. We have salesmen on the road who pay far more attention to

(Continued on page 54)

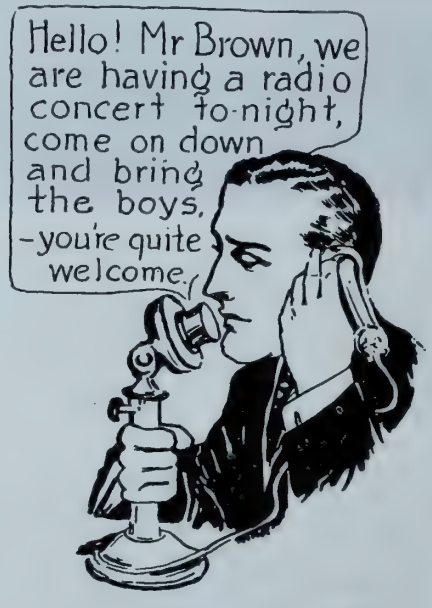
If We Could Hold All Our Customers

Except those removed by death and change of residence and could reach out and get a few more from time to time we would soon have a corking big business—Some ways retailers have of holding customers.

Written for Hardware and Metal by BRUCE F. RICHARDS

THE hardware dealer often asks himself in a leisurely and half-indifferent manner, "I wonder why the Boggs family doesn't trade here any more? They used to come quite often and suddenly they stopped." Or, his mental query may be after this fashion, "Wilkinson used to buy here right along. Gradually his business tapered off, and now he only comes in once in a long time. I wonder what's up!"

This is an excellent point of departure, and the trouble is that most business men let the matter rest right there and do not depart in a thorough-going, definite, I'll-find-out-and-remedy-it frame of mind.



It goes without saying that if we could hold all the customers who come to us except such as are removed by death and change of residence, and could reach out and get a few more from time to time—that we would soon have a corking big business. But a whole lot of business men do not realize the supreme importance of taking care of old customers, of keeping track of them, of learning when they are satisfied and dissatisfied, of following them up when they are indifferent. Of course, this takes time, but what of it? That is what time is for—to make it count in the biggest way possible!

There are three ways of discovering when people are dissatisfied. First, through their direct complaints; second, through sudden termination of patronage; third, through a gradual tapering off of their business.

Some merchants are frankly displeased when customers make complaints. This is the most foolish attitude in the world, and quite opposite from that of the man who put up a sign card which read:

WE'RE PERFECTLY DELIGHTED
When You Complain—That Is If
YOU'RE DISSATISFIED
Your Complaint Gives Us a Chance to
Fix the Matter Right
THAT'S WHAT WE WANT TO DO!

This sums the matter up in a nutshell. People who come in and say, "I ordered goods yesterday morning—they were to be delivered immediately, but they didn't reach us until we were all in bed at night"—should have our cordial thanks.

Invites customers whose accounts are tapering off, to come to radio concert.

A Prejudiced Customer

First, their complaint is well founded and if the ruffled feelings are not ironed out, it will mean a lost or prejudiced customer. We ought to be glad to fix the matter right up satisfactorily and make due apology and such restitution as is in our power.

Second, we should discover where that weak link is in our organization and who is to blame for such laxity, and remedy the trouble so it will not occur again. Of course, there are likely to be people who will complain on principle. What of it? If their complaints—even foolish ones, are fixed up satisfactorily, they will become the biggest boosters for the store, and loyal to the core. This is the cheapest advertising which can be done, and by actually winning the friendship of that individual, any disposition to take advantage will be eliminated in most cases. These are the easiest people to take care of, and if we address ourselves properly to the removal of causes of complaints, we will have no trouble on this score.

However, if the people who come and complain are not easily smoothed over, we should not shrug our shoulders and say, "I should worry! I've done the best I can and I shall not try any more."

The logical and sensible thing to do is to go right on making every effort to regain the good will of those individuals.

Writes Letter a Month

One retailer who lost the patronage of an excellent customer, wrote him a letter every month, at the beginning of the month when bills would ordinarily be rendered to these people. The letters were pen-written, short, and in some form expressed regrets that the books showed their account inactive.

At the end of the tenth or eleventh month, the people came back. The head of the family said:

"You win! We were talking about it at breakfast and my wife said, 'I'm going back to Blank's. I've never been satisfied anywhere else, and the kindly courtesy and interest of those people, in the face of our rather disagreeable conduct, makes me ashamed.' I said, 'Right-o, Mary, I'll go in myself and order that stuff this morning which you said you wanted.'"

The constant dripping of water will wear away a stone. The constant work of a tiny sunbeam will melt ice or soften a frost-bound spot of earth. Let's smile, physically and mentally, and keep on smiling, and people cannot remain grouchy.

Then there are the people to deal with who stop trading with us suddenly. Perhaps they are only trying to economize and are paying cash, and we have overlooked the fact that they really have been coming into the store.

The first thing to do is to get posted. Have these people stopped dealing with us? Are they still living where they have been accustomed to live or do business? And is it reasonable to suppose that their wants are constant? Have we any reason to believe that they are buying elsewhere?

When we are assured on these points, and satisfied that there must be a reason for their going elsewhere, it is up to us to find out what that reason is. Sometimes a personal call, sometimes a telephone message or a letter will locate the trouble. The personal call is by all odds the best, or, at least, a personal interview. You may meet Jones on the street and take occasion to say pleasantly:

"Hello, Mr. Jones, been away? Been missing you in the store lately, and we can't afford to lose old friends."

Possibly Jones will remain cold and formal. This gives you an opportunity to say pointedly but with earnest courtesy:

"Hope nothing has happened which has displeased you. No one would feel worse about it than I would, and, of course, you'll be square enough to let me know just what the trouble is so I can make it right."

It may take two or three approaches in various ways. One retailer was a year and a half finding out what the trouble was with one of his best families. He finally learned through a married sister of the lady in question. One of the clerks had made an uncomplimentary remark about her which she had overheard. She had been deeply offended, and this, coupled with a second experience about the same time, of being charged on her bill for something she declared she didn't get, capped the climax. The whole family left and traded elsewhere.

When the trouble was discovered, the business man went directly to the home of the people in question, made an apology, and said that he would either require that clerk who was still in his employ to apologize or he would discharge him. He also insisted on making right the over-charge which it was easily pointed out belonged on another bill of people of the same name, and only one initial letter different. Both this man and his wife were generous enough to call the matter closed, and to request that the clerk be reprimanded by his employer and nothing further done about it.

Gets Rid of Clerk

Soon after this, other complaints came in concerning the same clerk, and the business man took occasion to get rid of him. He then communicated with all the people who had been offended, saying:

"Mr. So-and-So is no longer in my employ. It seemed expedient for him to find a situation elsewhere. May we hope to see you in our store frequently, where every courtesy will be accorded you. And if at any time anything comes up which is displeasing, we want you to let us know."

Naturally it jolts people a little who have been in the habit of spending a good deal of money and who have thought that their custom was appreciated, to drop out and to find that no one even misses them. This deepens their determination not to go back.

The bookkeeper, the proprietor, or some one person in the establishment, should go over the accounts month by month, and see how many are inactive or only barely being kept open. This list should have prompt and intelligent attention. It will pay to spend some money to hold the old customer, in view of the fact that it costs considerable to get a new customer in, and, even at that, we cannot be sure he will stay. Old customers, like old friends, have been tested and should be held if possible.

The people who taper off their accounts gradually are the hardest to handle, for we have to use tact as to whether or not they are really finding little satisfaction in the service rendered, their wants are limited, or their buying capacity impaired.

Possibly these people are just plain indifferent and are drifting in to any store which may be the handiest. A dozen ways will readily come to mind of getting hold of these people.

Pay Special Attention

One is to pay them special attention when they come in, perhaps chatting with them pleasantly, or making an effort to show them something which will be of interest. One dealer, who had put in a radiophone, sent out notes of invitation to fifteen or twenty customers whose accounts were tapering off, asking them to come in and hear the concert at any time which might be convenient. In almost every case, the people responded and were seen in the store more frequently immediately after.

Giving them the best of attention seemed to renew their loyalty. But the head of the firm knows that he must keep an eye on these people, for, having wandered once, they are likely to wander again.

Another way of interesting the indifferent is to make an advance showing of some special lines of attractive goods, and to invite a favored few in to see these goods. The honor is nearly always appreciated.

Still another way used by one wide-awake man, was to send a postal card each week printed in colors and carrying a definite sales message to all wavering patrons. One of them read:

Making deliveries after customers are in bed at night is a good way to terminate friendly business relations.

> "We were glad to see you when you were in last. We will be glad to see you when you come again. If we are busy—don't mind that. We'll take care of you as soon as we can, and we've always time to say 'Howdy' and to help you solve your buying problems in our line. Watch the papers for the Special Sale we're going to stage next Saturday. Hope you'll come to it and bring a friend with you.
>
> "Yours for Real Thrift."

The cheery optimism of these little messages seems to serve as a personal touch which really brings people back. Many times the cards contain a quaint and wise saying—something which sticks in mind, but always there is that "You" and "I" spirit and the sales message of some kind.

Follow Up Customers

It pays to follow up old customers and to hold them. Repeatedly it happens that those who had gone elsewhere to trade are surprised and delighted that they have been missed, and they will come back joyfully and feel a special responsibility in being loyal ever after.

The storekeeper who makes the mistake of displaying an offended manner when he meets an old customer who is now trading elsewhere, does the very thing which will prevent these people coming back. They say to themselves:

"Well, if that's the way you feel about it, I am glad to know it. And I'll go and spend my money where I like. This is a free country!"

On the other hand, if there is no change in the storekeeper's manner, and he, figuratively speaking, reaches out the hand of good fellowship, the old customer will usually come half way, to the mutual advantage of both.

We are paying much attention to eliminating waste, to cutting down overhead expense, to speeding up turnover of stock —one of the surest ways to help do all this, is to hold old customers!

A Better Perspective on Business

A LUCID review of the fundamentals underlying present business movements, such as given in Toronto by Roger Babson, statistician, gives business men a better perspective on developments in business in general and their own line in particular. The dishonesty, indolence, extravagance and loose methods which invariably develop in the latter part of every period of inflation were shown to be responsible to some extent for the recent condition of business incident to deflation, but it was the opinion that we are approaching a normal stable era in business which will be accompanied by honesty, profitable activity and thrift, the concomitants of adherence to moral standards in business.

The chain store development in business was referred to by Mr. Babson as a necessity in the present system "but," he stated, "they are fraught with tremendous national dangers and before long the country will be rocked by a discussion of this problem." Some brief opinions on certain points were given which may prove of assistance to retail hardwaremen. Farmers, it was said, would have thirty per cent. more money to spend as result of this year's crop than at this time last year, and they are expected to be much larger purchasers of home equipment. Automobiles would reach their lowest price "sometime in the future," and more money would be spent on autos next year than on clothes. There would be a revolution in living conditions in the next ten years and suburban properties will be in demand. According to Mr. Babson there is said to be more oil in storage to-day than ever in the history of the world because the industry is in the hands of fewer men.

These remarks give business men something to think about. Obviously they are more or less general statements, but by a process of deduction every business man can establish the extent to which they apply to his own local business and then plan accordingly. There is no doubt that business is passing through a stage where the improvement which has already taken place has led to some price inflation. The dangers of another depression worse than the last one, following such a practice, cannot be overestimated.

Better Prospects for Steel

PREDICTIONS which have been made from time to time that steel prices would gradually be advanced to levels at which they will show a fair margin of profit to producers, were borne out in the semi-annual address of Elbert H. Gary, chairman of the United States Steel Corporation, before the convention of the American Iron and Steel Institute. Manufacturers of steel were said to be now producing at the rate of 75 per cent. of estimated capacity, a somewhat higher figure than was quoted a few weeks ago. This is more than double the total capacity of twenty years ago and a better grade of steel is being produced. This is evidence of the advancement being made in this industry. Indication that continued improvement could be expected was found in the great potential market for steel, the great need of steel which is beng ignored at present, and the fact that there is an abundance of ore, fuel and other such raw products within easy reach of mills and shops of highest efficiency. Order books were shown to be well filled and many thousand tons of finished steel stores awaiting shipment. Had the transportation and fuel strikes not developed Judge Gary stated that the steel industry would now be enjoying greater prosperity than at any time.

Prospects are that the automobile industry will enjoy greater production in the next few years than at any time in the past, agricultural implement producers are more optimistic over the crop outlook knowing that many farmers are in dire need of implements and the construction industry promises to run more to the building of industrial plants, institutions and such buildings where much structural steel is needed.

Canada's Position Improves

IN THESE days when nations are striving to develop foreign markets, realizing that only by taking part in world trade can their much extended industries be kept operating at full capacity, it is interesting to note that Canada's foreign trade is constantly improving. A review of statistics indicates that Canada in the month of August surpassed even the Mother Country in trade with the United States. Not only were more Canadian products sold in the United States during the month than those of any other country, but, in addition, Canada was the largest buyer of American goods. This is somewhat surprising to many business men in view of the emergency tariff legislation enforced by the United States. There were many predictions that the new tariff would greatly decrease Canadian exports to the United States. Yet in spite of this tariff and the recovery of the Canadian dollar to par, Canada increased her sales to the United States by eight million dollars in the month of August compared with last year.

Reader Interest is Essential

WHEN John Wanamaker, some years ago, withdrew his advertising from free-distribution mediums, it was mainly because these had no fundamental reader interest. This was the finding after a deep study of the subject. It was the conviction that the man who subscribed for a newspaper or other publication, expected to find advertising in it and valued that advertising as in the light of an investment, as something he had appreciated sufficiently to pay for.

The opposite was the effect of the free-distributed product. Here the receiver had no primary interest in the publication; it appeared in unexpected places, without request, and had somewhat the status of an unexpected guest.

Then, as now, free-circulation mediums were found to recognize no responsibilities toward the problems attending the business or industry, offered no constructive service through their columns, had no means of developing helpful discussion, offered no interchange of news or views, and in short had no interest beyond that contained in their advertising pages and the revenue they represented.

* * * *

FOLLOWING upon the marketing of the splendid grain crop in Western Canada, retail conditions in that part of the country are improving. No boom is expected but if many long standing liabilities to retailers are paid off it will materially improve the condition of the merchants as a whole. Retailers reflect a conservative business tendency with care in buying and less credit being granted.

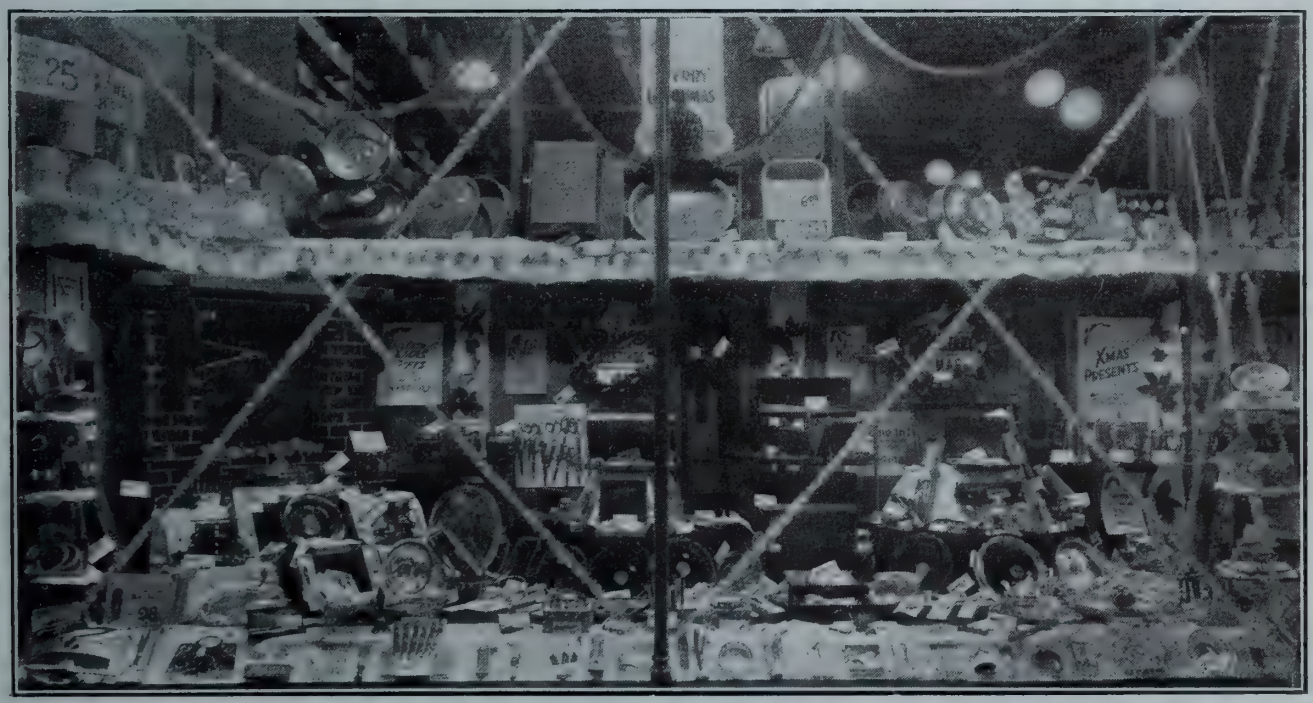
"More Efficient Distribution Needed

Before Cost of Living Can be Reduced" Says Authority on Business Situation—Government Should Give Retailers Benefit of Statistical Information—Chain Stores and Co-operative Associations Should Not Replace Independent Retailer

"ANY REDUCTION in the cost of living must come through better distribution rather than cheaper production," says Roger W. Babson, authority on business, in discussing the business outlook.

"It's strange how we concentrate on saving the pennies and let the dollars slip through our fingers. The officials of every manufacturing company in the country are hunting frantically for new ways to cut down the cost of production. They lie awake nights over a few cents an hour on labor, or an extra dollar or two on a ton of coal, or any other factor which may affect the cost of making this product. Once the goods are made and out of the factory their efforts cease. The job of getting their product to the ultimate consumer belongs to someone else.

"All of us have become so engrossed with the problem of cutting down the cost of production that we have let distribution take care of itself. We have saved millions at the bung but we are losing millions at the spigot. In the past fifty years the amount of goods produced has increased probably ten times over. The number of workers necessary to produce those goods have increased only about two and a half times. This means that owing to new machinery and better methods, the average worker to-day is able to turn out about four times as much goods in eight hours as the worker fifty years ago did in ten or twelve hours. Allow for the cost of the machinery, fuel, etc., and even then you find the average unit producing cost to-day is less than half of what it used to be. In production we have made wonderful progress, because we have given most of our thought and effort to it.



"Turn to distribution and we find no such progress. In fact, the percentage cost of distribution probably has not been reduced at all. With twice the production per worker we should expect that the wages for a day's work would buy twice as much goods as it used to. If distribution had been improved as much as production, a day's wages would buy four times as much as it did fifty years ago. We all know that no such increase has taken place. In fact, it is debatable if the average family to-day is even half again as well off as it used to be.

"This does not mean that the retailer or the jobber or the carrier are hogging the difference. It means to a large extent that we have not developed our tastes so as to get the most for our money. And we have not made the same progress in distributing goods as we have in actual production.

"We have been devoting our efforts

"The Early Bird" Gets Christmas Trade

No. 1 of series of Xmas window suggestions. (Keep the series intact.)

Electrical goods are featured prominently in connection with Christmas gift displays. This arrangement by Mills (Barton Street) Hardware, Hamilton, Ont., won first prize in the 1921 Hardware and Metal Christmas Window Contest in places over 5,000. The dominating idea is the showing of articles of utility, the grouping of a wide range of goods so as to appeal to the greatest number and the prominent showing of prices. The chimney on the left, of course, adds to the Christmas spirit of the display. Other suitable displays for Christmas goods will appear in each issue of Hardware and Metal between now and Christmas and these may be kept for reference.

to building better factories, to getting a greater output from labor, to putting out more and better goods.

"We have done very little toward the equally important problem of getting those goods to the ultimate consumer. The government is spending over $100,000,000 a year in research to help the manufacturers and farmers, but it has never even taken a census of the retailers. Hundreds of men are employed gathering information on the crops. Hundreds more are experimenting in chemical research for means of fighting pests and blights which destroy crops, and instructing the farmer in their use.

"Similar work is being done for the manufacturer to help him find more efficient methods of production. A complete census of manufacturers is taken every five years, which shows the numbers of firms in each industry, their production, costs and profits. These things, of course, cost money but they are worth it. Is there any reason why we should not spend at least as much to help the retail distributor on whom we must depend to get those goods to us?

Chain Stores

"So far most people have been content to point to the growth of the chain store and co-operative selling movements as indicating the short-comings of the individual retailer but the crying need of the hour is that we all get behind the retailer and help him. If his methods are wrong it is our misfortune and it is up to the rest of us to show him a better way. He sells at least 85 per cent. of all the consumers' goods bought.

"Many people thoughtlessly say, 'Do away with the individual retailer. Let the chain store or the co-operative association take his place.' Anyone who studies the problem, however, must realize the shortsightedness of such a plan. Both the chain store and the co-operative association are all right, but would we care to give any single organization a monopoly of our distribution?

"Then there is another phase of the retail situation for which you and I as consumers are to blame—the truth is we have grown lazy. We want our goods brought to the door, we want to run charge accounts, we want to have a wide variety of styles and grades of goods to pick from. When our wives select a pair of shoes they insist upon having twenty different lasts to choose from. When we buy sugar we prefer to have it come in a pasteboard box of the particular size which best suits our fancy; and so on throughout the line. But these things cost money. They are nice but are they essential? If we knew we could get good shoes for 25 per cent. less, would we not be willing to do with a smaller variety to choose from? Certainly we should not grumble over the high cost of living, while we continually demand service which is increasing the cost of the things we buy.

Cutting Down Costs

"The day is coming when this problem of distribution will be worked out. Just as the development of our producing machinery has taken years so the development of the best distributing methods must take years, to complete. Such changes come about gradually. Right now, however, there are three things we can do to help solve the problem and cut down retail price.

(1) Urge the government to extend its services to the retail field so that the retailer can have the same statistical information and the same assistance from scientific research as the producer now enjoys.

(2) When buying, select popular grades of goods and avoid freakish styles. Encourage simplification of merchandise. Pay cash for your goods and if possible carry them home

Steel Production Declined in September

Production of 35,787 Tons Compared With 59,160 in Previous Month—Pig Iron Production Shows Decline of 7.92 Per Cent.

THE PRODUCTION of steel in September declined by 23,373 long tons from the output of 59,160 tons in August to 35,787 tons in the month under review, according to the report issued by the Dominion Bureau of Statistics. The cumulative output during the first nine months of 1921 was 477,588 tons, as compared with a production of 334,835 tons in the corresponding period of the present year. The closing of the steel plant at Sault Ste. Marie accounted in large measure for the decrease in production during September.

The output of basic open hearth ingots for further use declined from 56,997 tons in August to 33,815 tons in September, a decrease of 23,182 tons, or 40.7 per cent. A small quantity of electric steel ingots for further use, amounting to 124 tons, was reported for September, while none was made for direct sale.

The total production of ingots was less than the output of the corresponding month of last year by 20,540 tons, or 37.7 per cent. The production in the first nine months of 1922 was 319,943 tons, while that of the corresponding period of the previous year was 459,960 tons, representing a decrease of 30.4 per cent. The production of steel castings also suffered a decline. The total output in August was 2,204 tons, which decreased to 1,848 tons in the month under review. The decline amounted to 356 tons, or 16.15 per cent. An opposing tendency developed in connection with basic open hearth castings of which the production increased from 208 tons to 837 tons. On the other hand, the output of Bessemer and electric grades declined considerably.

Ratio of Steel Production.

The production of pig iron in September declined 7.92 per cent. from the output of the previous month, the respective tonnages being 27,123 long tons in August, as compared with 24,974 tons in the month under review. The production was also less than that of September of last year 40.8 per cent. A comparison of the cumulative production during the first nine months of 1922 with that of the corresponding period last year shows a decrease from 457,157 tons to 275,989 tons, or 39.6 per cent.

One furnace was blown in at Hamilton and another at Sydney, while one of the furnaces at Sault Ste. Marie was banked. At the end of the month, then, the active furnaces numbered two at Sydney, one at Hamilton and one at Sault Ste. Marie, a net gain of one furnace over the previous month.

Another development was the slight increase in the several grades of iron produced for sale. The production of basic pig iron increased from 6.577 tons in August to 7,991 tons, or 21.5 per cent. The September production intended for this purpose was also higher than in September of last year by 58.14 per cent. The foundry pig iron produced for sale increased from 6,296 tons in August to 6,895 tons in September. The output of malleable iron for sale also rose from 281 tons in August to 1,096 tons in the month under review.

The production of ferro-alloys dropped slightly from 1,864 tons in August to 1,834 tons in the following month. The cumulative production during the first nine months of 1922 was 15.178 tons, as compared with 18,698 tons during the corresponding period of the previous year.

Events in the Trade

NEW FIRMS

S. & S. Higham Limited have commenced a hardware, painting and decorating business at the corner of Wellington St. and Huron Ave., Ottawa, Ont.

Evans Hardware Co. have commenced business at 1098 Wellington St., Ottawa, Ont.

Wingham, Ont.—Thompson-Buchanan Hardware Co., have opened a new hardware store here.

PERSONAL

F. J. Limroth, general manager of sales, Rubberoid Co., New York, visited Montreal last week.

The appointment of H. J. Stamhaugh, jr., as general sales manager, has been announced by the Burlington Steel Company, Limited, Hamilton, Ont. Mr. Stamhaugh was formerly vice-president and general manager of the Trussed Concrete Steel Company of Canada, at Walkerville, Ont.

ONTARIO INCORPORATIONS

Atlas Iron Wire and General Metal Works Ltd., head office Toronto, capital $40,000, to manufacture brass, copper, zinc, iron and other metal products.

Pendell Boiler Co., of Ontario Ltd., head office Toronto, capital $500,000 to manufacture boilers, piping, general heating apparatus, plumbing supplies, etc.

Victor Saw Works Inc., a corporation under the laws of the State of New York, is authorized to carry on business in Ontario, manufacturing saws.

SEYBOLD & WALKER LTD., FORMED IN MONTREAL

Montreal.—A new company under the firm name of Seybold & Walker Ltd., has been formed, with E. Leslie Seybold and Chas. J. Walker as the chief partners. They will carry on the business formerly conducted by the late John P. Seybold.

E. L. Seybold was a former partner with his father, and under the new arrangement he will continue to have charge of the rope and cordage end of the business. Other lines which the firm represent will be under the charge of Mr. Walker as formerly. They will represent the following manufacturers in the province of Quebec: Independent Cordage Co.; E. T. Wright Co.; Wentworth Mfg. Co.; Road Finder Ltd.; Schultz Mfg. Co.; Canadian Tungsten Lamp Co.; O. M. Edwards Co.; manufacturers of padlocks, and the Springer Lock Co., Belleville. The latter firm has just been added to the list, the agency having been secured on November 1st.

FARMERS' COMPANY QUITS RETAILING

The United Farmers' C o-operative Company has closed its Toronto store at 130 King street. As far as Toronto is concerned the farmers have gone out of the retail business. It is planned to carry on the jobbing trade at 109 George street, the new head office of the company.

WOULD PLACE LIGHTS ON ALL QUEBEC VEHICLES

Ottawa.—The placing of lights on all vehicles circulating in the Province of Quebec was unanimously endorsed at the weekly luncheon of the Hull Kiwanis Club at Windsor Hotel, Hull. A resolution calling for the enactment of legislation along these lines at the coming session of the Quebec Legislature was adopted by the gathering. A copy of the resolution will be forwarded to Premier Taschereau.

ST. CLAIR BUSINESS MEN ACTIVE

Toronto.—That the federation of business associations of Toronto was of great value in enabling the organizations of retailers to get close in touch, so that their common interests would be advanced was the contention of M. A. Brillinger of the St. Clair business men's association, at the federation's meeting.

Among those invited to future meetings are Mayor Maguire and two members of the city council to give both sides of the waterfront and radial question on November 15; F. H. Farley, of Dayton, Ohio, to speak on the question of increasing retail sales; Hon. Mr. Fielding to speak on federal taxation as it affects the retailer.

EDDY COMPANY OFFICIALS PLEASED WITH OUTLOOK

That Canada is about to enter a new era of prosperity in the immediate future is the opinion of J. T. Shirreff, vice-president and assistant manager of the E. B. Eddy Co., Limited, Hull, Canada. Mr. Shirreff's optimism is based upon first hand knowledge gleaned during his recent tour of Western Canada. Accompanied by J. F. Taylor, secretary and sales manager of the Eddy Company, Mr. Shirreff visited every important centre west of the Great Lakes, calling upon their selling agencies. Both executives were impressed with the spirit of optimism apparent in every quarter of the West and report that, consequent upon the excellent crops now harvested, there is every indication of a real boom in fall and winter business throughout the entire Dominion.

TO MODEL RECEIPT TAX ON BRITISH EXPERIENCE

Ottawa.—Officials of the Finance Department who are overseas with Hon. W. S. Fielding are understood to have made a study of the British receipt tax regulation during their stay in London, in order that the Canadian regulations, which are to come into effect at the first of the year, may be made workable.

The tax on receipts has been effective in Britain for many years, whereas Canada is about to try the experiment with the opening of the new year. In the meantime the drafting of regulations to govern the application of the proposed receipts tax are understood to be held in abeyance until the return of these officials from Europe.

ADD FURTHER TRIBUTE TO LATE JAMES HARDY

J. McD. Wilson, ass't. manager The Chinic Hardware Co., Quebec, and an executive committee member of the Canadian Wholesale Hardware Association pays the following tribute to the late James Hardy, secretary of the association, whose death was recently announced in Hardware and Metal:—

"The late Mr. Hardy was a worthy representative of the true type of the English gentleman. His genial manner, frank disposition, and hearty nature tended to at once win the friendship of those with whom he came in contact.

"His sound judgment which emanated from his thorough knowledge and grasp of conditions, and his kindly advice will be much missed by his former confreres of The Canadian Wholesale Hardware Association with which he was connected since its organization."

C. A. Whitwam, vice-president Hobbs Hardware Co., Ltd., London, Ont., states as follows:—

"I have known the late Mr Hardy for thirty years or more, and came in contact with him from a good many angles. He was one of the fairest, most generous, upright and yet strict business men that it has been my good fortune to meet. Knowing him as well as I did, in his death, I feel a distinct personal loss, and it leaves a vacancy which it will be extremely hard to fill. Words will not convey our sense of loss in the passing of this friend and gentleman."

Western Canada News

C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, is attending the travellers' convention of the Boston Varnish Co., held in Boston this week.

John Fraser, of the J. H. Ashdown Hardware Co., Winnipeg, and David Sutherland of Saskatoon, are attending the Boston Varnish Co. convention held in Boston this week.

At a meeting of the executive of the Winnipeg Retail Salesmen's Association, it was decided to adopt a policy of "watchful waiting" in connection with the enforcement of the early closing by-law. Arrangements were made for an educational campaign during the winter, when experts from all parts of the continent will lecture on subjects of prime importance to salesmen. John Drewe, president, stated that the proposal by the Retail Merchants' Association for the establishment of the college of commerce in connection with the University of Manitoba will be discussed at the next meeting of the salesmen's executive. He expressed himself personally as being in sympathy with the project, and said there was no doubt it would receive the strong support of the executive.

A meeting of the executive committee of the hardware section of the Manitoba Provincial Board of the Retail Merchants' Association was held recently when routine business was disposed of. A. E. Wyatt presided, and the others present were W. A. Templeton, A. G. Box, Souris; W. E. N. King, Neepawa, and W. C. Atkins, Morden.

Lougheed Hardware, Lougheed, Alta., has been burnt out.

J. A. Marshall, sales manager of Wood, Vallance & Adams Ltd., Calgary, spent the past week in Regina attending a conference of the sales managers and sporting goods men of the different Wood, Vallance centres of Western Canada.

J. B. Jenkins, sales manager of The Calgary branch of the J. H. Ashdown Hardware Co., Ltd., and T. R. Partridge, traveling paint salesman of the same firm, are on a trip to Boston to attend a sales convention of The Boston Varnish Co.

T. R. Stuart, retail hardware merchant of Calgary, is spending a week holidaying and shooting at Pigeon Lake.

Geo. M. Christie, manager of the Calgary branch of The G. F. Stephens Co., Ltd., is on a trip to his firm's head office at Winnipeg.

R. B. Wilkinson, proprietor of a chain of hardware stores in Alberta, has returned from a combined business and shooting trip.

A. W. Drinnan, sales manager of Metals Ltd., Calgary, has returned from a week's shooting trip to Buffalo Lake.

R. E. Doherty, manager of Crane Ltd., Calgary, was a visitor to Edmonton this week end.

Edmonton, Alta.—The Western Steel Products Ltd., are contemplating putting up a modern plant in the city to replace their present plant which is located near the exhibition grounds.

Vancouver.—The Mystic Heating Co., manufacturers of gas heaters, has started business in Vancouver.

Vancouver.—Harry C. Martin, of Finlayson and Mather, is again this season taking a keen interest in amateur hockey. President of the Towers Athletic Club, he announced the other day that his organization would have three teams in the various league divisions this winter. He is also prominent in golf circles and at various times has taken honors in the competitions of the Vancouver Club at Burquitlam.

The Vancouver branch of the Canada Cycle and Motor Company were the hosts this week to the local cycle dealers' association. B. B. Halliday, the sales manager, spoke optimistically of the business outlook and then told of world tour in 1919 and 1920.

Vancouver.—McLellan and McFeely, popularly known as "Mac and Mac," wholesale hardware dealers, have issued a new catalogue based on the decimal system instead of the old method of packing and pricing goods by the dozen and gross. They are now asking the trade for opinions as to whether the new system is an improvement.

WINNIPEG SAVE THE SURFACE ASS'N. MEETS

Winnipeg Save the Surface Association, held a meeting on Wednesday evening with John Drewe of the Winnipeg Paint & Glass Company in the chair. John A. Acheson, manager of the Dominion Linseed Oil Company, Limited, gave a very instructive address on the "History of the Manufacture of Linseed Oil and its Uses." Over fifty-nine retail hardware men were present and short addresses were given by A. G. Box, Souris, and W. E. N. King of Neepawa. This is the first of a series of meetings in the way of a dinner and it is proposed to hold several others during the winter.

PLACE STEEL RAIL ORDER

An order for twenty-five thousand tons of 100-lb. steel rails for delivery next spring has been placed by Grand Trunk Railway, it was announced at British Empire Steel headquarters. The order insures an uninterrupted winter's work for 3,000 men employed at the Sydney steel plant, because other orders in hand will keep the mills going until Christmas, and the spring delivery feature will enable the company to wait until the first of the year before rolling steel for the Grand Trunk.

SAYS BALDWIN FIRM WILL STAY IN CANADA

It was stated by Captain Hugh C. Poynter, president of the Baldwin Canadian Steel Corporation, that the mere fact that the Ashbridge Bay plant has been closed down for a long time does not indicate that they are going to move out of Canada. Rumor has insisted that the property will pass over to the Bethlehem Steel Corporation, and while the Captain declined to discuss the suggested transfer of interests, he insisted that they will remain in this country.

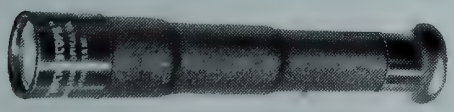
Would Distinctive Container for Gasoline and Coal Oil be an Advantage?

FOLLOWING upon the passing of a resolution by the Board of Trade of North Bay, Ont., favoring a distinctive container for gasoline and for coal oil, so as to eliminate danger of the two being confused, Hardware and Metal interviewed E. P. Heaton, Ontario Fire Marshal, on the subject. This was done because of the fact that heavy fire losses and some fatalities have occurred through the confusion of gasoline and coal oil. After pointing out that this suggestion was endorsed by the Associated Boards of Trade, Mr. Heaton stated:—

> "It would in our judgment be a very valuable safeguard if a provincial law was passed regulating the class and character of containers for gasoline and coal oil.
>
> "We have not yet reached the point when we feel we should ask for legislation on this point but resolutions from such bodies as the Boards of Trade should prepare the way for a later adoption of such Act."

Hardware and Metal welcomes expressions of opinion from those in the trade who think some change may be made in containers so as to render confusion of the two more unlikely. Write the Editor, Hardware and Metal, 143 University Avenue, Toronto.

New Hardware Goods



Offered to Canadian Hardwaremen

HOBBS SIDE WINGS

The Hobbs Manufacturing Co., London, Ont., are introducing to the market, Hobbs side wings for autos. These are plate glass wings that can be attached to the windshield of any open car. They are described as an aid to comfort, as the object is to deflect the wind and rain from the occupants of the car when driving. It is pointed out by the makers that these side wings have been decided upon as standard equipment for Durant cars in Canada. They can be quickly attached. The Hobbs Co. emphasize the fact that there are no holes in the glass to weaken it. The wings are made in two styles, either to clamp to the windshield post or to be attached by means of adjusting nuts. The metal attachments are of bronze, heavily nickelled.

THE POCKESCOPE

The Pockescope is a pocket telescope of five inches in length. It is the product of the Wollensak Optical Co., Rochester, N. Y., and is being introduced to the Canadian field. The magnification of the Pockescope is over four and one-half times. The maximum diameter is 11/16 inches. Five inches is the length when extended—when closed it is only

3½ inches long. It is finished with black lacquer and furnished in grey suede leather case. The manufacturers describe it as an ideal and attractive outing accessory. It is a product designed to appeal to the camper, tourist, hunter, motorist, picnicker, gift seeker, fisherman, boy scout, ball fan and sportsman generally.

VIKO COLONIAL PERCOLATOR

The makers of the Viko line of aluminum ware claim they have perfected machinery which considerably lowers the cost of production and thus will enable this Colonial design percolator to sell

at the same price level as the ordinary round types. It is pointed out that formerly this special design was more expensive than the round pattern owing to the involved process of manufacture. The Aluminum Specialty Co., Ltd., Toronto, are the distributors for this line. This new Colonial design percolator is of regular six-cup capacity, while it has the improved spreader on top of the insert.

SECURITY GLARE ELIMINATOR

The Security glare eliminator is a colored glass shield attached to the top of the windshield through which the glare of the passing car is neutralized. It is manufactured for either open or closed models and for any make of car. The one for open cars clamps on the top of the windshield, while that for closed cars screws on to the frame just over the windshield. These eliminators are furnished in various shades of glass. There are two joints on the lever between the bracket and the glass by which adjustments can be made to any convenient height. Made by the Security Mfg. Co, of Rochester, N. Y.

PELICAN PLIERS

The Pelican pliers are specially designed for battery work and combine several tools in one. The manufacturers point out that a wrench on the end of the handle will loosen the clamping nut; a screw-driver on the other handle will spread the terminal clamp, besides the plier jaws for removing corroded vertical, taper and straight terminal clamps. The pelican-shaped jaws will grip hexagon nuts and square and round headed terminal bolts. The opening in the wrench jaws is made for a five-sixteenths standard and hexagon nut. They are made by the Thompson Mfg. Co, of Meadville, Penn.

BETSY ROSS HOT PLATE

The Betsy Ross hot plate has been placed on the market by the Central Flatiron Manufacturing Co., Johnson City, N. Y. The construction of this hot

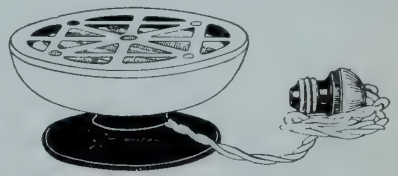


plate embodies a polished aluminum bowl, with mahogany base end and removable top. The heating element is of silchrome. The grille is of strong nickeled steel, to support the weight of articles put on it. The top may be removed so as to clean heating element.

Should the Man on the Street Pay $125 For Device Costing Factory But $50?

This big spread in prices has brought about much discussion of the advisability of "eliminating the middlemen" who are alleged to be requiring too big a margin for distribution.

The trend of the times is toward more efficient merchandising and only those middlemen who justify their function will continue in business, according to an authority who discusses the subject in detail in next week's issue of HARDWARE and METAL.

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

ENQUIRIES FOR CANADIAN MANUFACTURERS OF HARDWARE

Hardware and Metal has received the following letter in connection with the subject of Canadian manufacturers desirous of opening up export trade relations with Great Britain. Those interested in this connection have this opportunity of communicating direct with the concern named below:

Messrs. The MacLean Publishing Co., Ltd., Toronto, Canada.

We are desirous of getting into touch with reliable Canadian manufacturers of the following:—

(a) White Pine Doors, Mouldings, etc.
(b) Malleable Iron Tube Fittings for Gas, Steam and Water.
(c) Iron Bars, etc., for reinforced concrete.
(d) Cast Iron Soil Pipes and Fittings for Gas and Water.
(e) Heating Stoves for Central Heating Purposes.
(f) Roller Door Hangers and Track.

We believe there are quite a number of Canadian manufacturers desirous of opening up relations with this country, their difficulty being to get into touch with thoroughly reliable and fully experienced people on this side, who are in a position to adequately protect their interests, and in view of the present changed conditions on your side our opinion is there is no doubt that many Canadian works may find it to their interests to open up and further extend their relations in this country, particularly having regard to what is happening in the U. S.

We should, therefore, feel extremely obliged to you if you would kindly favor us with the names and addresses of a few enterprising manufacturers of the above lines, when we would ourselves get into touch with them and submit our proposals.

(Signed) E. HILL ALDAM & CO., LTD.
Manor House, 93, Stamford St.,
London, S. E. 1.
England.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

COMFORT GASOLINE IRON

Messrs. Brown & Newell, Aylmer, Ont.—Kindly advise where we can secure repairs for the Comfort gasoline iron.

Answer.—The National Stamping & Electric Works, Chicago, Ill.

CAPITOL WASHING MACHINE

Ingram & McMaster, Welland, Ont.—Will you kindly advise us the name of the manufacturer of the American Capitol water motor washing machine?

Answer.—The Blackstone Mfg. Co., Jamestown, N.Y.

HARDWARE AND CUTLERY CO., LTD.

R. T. Holman, Ltd., Summerside, P.E.I.—Kindly advise us the address of the Hardware and Cutlery Co., Ltd.

Answer.—This firm is located at 30 St. Francis Xavier St., Montreal, Que.

DANGLER FIRE POT

Millers & Hoelke Co., Haliburton, Ont.—Please advise where we can secure the Dangler fire pot.

Answer.—The Dangler Stove Co., Cleveland, Ohio.—This is handled by the McClary Mfg. Co., Toronto and London.

DO YOU REMEMBER?

To recall to mind the doings in the hardware trade thirty years ago, and the nature of merchandise handled at that time, Hardware and Metal plans to start with next week's issue, a page entitled "Do you Remember?" on which editorial matter and illustrations will appear as outlined. This will be a highly interesting feature to all readers. Watch for it.

ONE MINUTE WASHER

Wm. Lawrie, Forest, Ont.—Where can I get repairs for the One Minute washer?

Answer.—The One Minute Mfg. Co., Newton, Ohio.

VICTORY SELF-PROPELLING NOZZLE

The Beaver Wood Fibre Co., Ltd., Thorold, Ont.—Kindly advise the name of the company which makes the Victory self-propelling nozzle.

Answer.—Mussens, Ltd., Confederation Life Bldg., Toronto.

CEMENT WORKERS' TOOLS

The Smith Hardware Co., Cornwall, Ont.—Please give us the names and addresses of manufacturers of cement workers' tools.

Answer.—The Abram Cement Tool Co., Windsor, Ont.; The Cummings Brass, Iron & Wire Co., Winnipeg, Man.; The London Concrete Machinery Co., Ltd., London, Ont.; Wettlaufer Bros., Ltd., Toronto.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

CHICAGO SPRING HINGES

Catalog No. 39 has been issued by the Chicago Spring Butt Co., of Chicago, Ill. This book includes descriptions of Triplex spring butt hinges, springless butt hinges, Relax, Non-Release, Premier and Ajax lines of spring pivot-hinges, floor mortise pivot hinges, various styles of gate hinges, screen door spring hinges, door stops, door bolts and accessories. A schedule of parts for these different products, as well as table of weights and private telegraph code for ordering are also included. The book comprises forty-four pages with several illustrations of the various special lines. Drawings showing the action of spring-pivot hinges and gate and lavatory spring hinges are found on the concluding pages.

FINDLAY STOVES AND RANGES

Findlay Bros. Co., Ltd., Carleton Place, Ont., are distributing a new catalog covering stoves, ranges, pipe and pipeless furnaces. The major portion of this book is devoted to illustrations and descriptions of various types of Findlay ranges. The introductory page deals with the creed of the manufacturers, and offers the suggestion that business is primarily a relation between men for their mutual advancement. Many styles of stoves are also illustrated, full specifications, sizes and numbers being given in each case. Parlor heaters and cook stoves are also listed. Capacities and dimensions regarding Findlay's pipless furnace are given in detail. A page giving a number of hints for setting up and operating stoves and dealing with complaints is a useful addition. Numbers and names for repair parts conclude this catalog.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of November 1, 1902:

"The Taylor-Forbes Co. has just taken over the plants of Woodyatt & Co., manufacturers of general hardware, and The Guelph Malleable Iron Works in Guelph. They purpose enlarging their plants and have since the first of April increased the number of their employees nearly 40 per cent. The officers of the new company are Jno. M. Taylor, president and general manager; Geo. D. Forbes, vice-president; Adam Taylor, secretary-treasurer; Joseph A. Hewett, assistant secretary; Harry F. Moulden, general sales agent."

"The regular monthly meeting of the Hardware Section of the Retail Merchants Association of Canada was held on Thursday evening, John Caslor presiding in the absence of E. R. Rogers. Over 50 communications were read from hardware merchants all agreeing that the price on certain lines of goods will have to be changed. Thirty-five new members were added."

"The Kemp Mfg. Co. (now Sheet Metal Products Co.) offer to purchase from Toronto City Council land to the east of their factory on Bell St. and some other small parcels in the neighborhood to extend their factory and to establish direct communications with the railway sidings."

"The Toronto Junction Council held a meeting and awarded the contract for the new electric light system to the Canadian General Electric Co. for $3,580. The Western Electric Co. of Chicago, tendered also; their price was $150 lower than that of the Canadian company."

"Friends of Charles Donald will regret to learn of his death at Sylvania, Ohio. Deceased was a brother of Alexander Donald of the B. Greening Wire Co., Hamilton, and at one time represented the Ontario Lead and Wire Co., of Toronto."

"George E. Sharpe, manager of the Calgary branch The Hudson's Bay Co. has been appointed assistant general manager and J. G. Edgar has been appointed manager of the Calgary branch."

"The Toronto Hardware Mfg. Co., which has been in business for 21 years on Queen Street West, Toronto, is erecting new premises on Dufferin Street."

"C. M. Robertson, of the James Robertson Co. Ltd., Toronto, and A. McMichael, general manager of the company, have left for a trip through England, Ireland and Scotland."

"To manufacture refrigerators, screen doors and windows, pails, buckets, etc., Brantford capitalists have organized the Harold-Sanderson Co., Ltd., capitalized at $40,000."

"J. G. Manseau, of the office staff of the Canada Hardware Co., was married to Miss Anna Nantel, of Ste. Rose, Quebec."

"Carscallen Bros., of Dresden, Ont., have dissolved. J. B. Carscallen continues."

"Coulter & Campbell, brass and copper works, Toronto, had a fire in their copper shop."

ONE of the features of the current hardware market developments is the announcement of prices for next season on such lines as screen doors and windows, harvest tools, hay rakes, scythe snaths, reaping hooks, hay knives, snaths and screen wire cloth. Another premier change is the reduction in rope prices, manufacturers stating that this development indicates an effort to place quotations for next season on a timely basis. Gasoline also records the fourth decline in as many weeks. Other current reductions include screen wire cloth and oakum, while revised discounts on drills bring easier prices into effect in some quarters. Here the price reductions cease and advances again occupy the forward position on the current market stage. Solders record a second increase, while boiler tubes, both lapweld and seamless, appear with new higher prices on practically all sizes. Lock stove pipes have advanced five per cent., and new price lists are now in effect on leather soles and heels, showing varying increases. Cotton wrapping twines are also on a higher level. Game trap quotations have been advanced owing to the rising cost of materials. A possible higher list is also foreshadowed on wrought piping, following upon the recent upward development in other primary centres. Higher tin prices feature the ingot metal group, while lead and spelter retain an unusual degree of strength due to marked advances in outside markets. October is reported a good month for the iron and steel trade when compared with the record for the previous season. Zinc sheets are now very firm in price. Where current price adjustments are on a lower basis, this trend is mainly attributed to economies which have been effected at the sources of production rather than a lessening in material costs. Pre-holiday retail buying is commencing in general. Particular interest is shown in such lines as electrical household appliances, glass ovenware, cutlery, sporting goods, toys, chinaware and tools. Prices are firm and the general price tendency in the hardware market is mainly upward. Stoves and furnaces, auto accessories and hunting equipment are in good demand. Collections in some districts are easier, but are generally not as good as had been expected because of the scale of prices that prevails for farm crops, the fact that in many cases disposition of crops has still to be made, while fair weather conditions have held the interest of the farmer on the land.

Montreal, Que.

MONTREAL, November 2.—One of the chief developments on the hardware markets is the revision in rope prices. Base prices on manila, Beaver or New Zealand hemp, sisal and lathyarns are reduced one cent per pound, while differentials on certain manila ropes are increased. Another interesting change is the new season's price on wire cloth which is thirty-five cents lower than last year. Gasoline is again reduced, this being the fourth decline in as many weeks. Increased quotations are noted on game traps, boiler tubes, stove pipes and certain sizes and qualities of leather soles and heels. Ingot metals, tin, spelter and lead still display a very firm tendency, with slightly higher prices again appearing on the local market. The galvanized sheet market is placed in a firm position, higher spelter prices now reflecting in these products through increasing the cost of galvanizing. The feeling is apparent that higher price levels on wrought piping are under consideration.

REVISED QUOTATIONS ANNOUNCED ON ROPE

Montreal.

Revised prices, effective from November 1, are given on rope, and base quotations on pure Manila, Beaver or New Zealand manila, sisal and lathyarns are reduced one cent per pound. Through increasing differentials, however, higher prices are quoted on such lines of manila rope as transmission, manila lobster marline and fine yacht rope. On transmission rope the differential was advanced from 5 to 6 cents over base while on manila lobster marline and fine yacht there is an increase of 5 cents over base.

Following are new base prices; Pure manila 20 cts.; Beaver or New Zealand 18 cts.; sisal 16 cts.; single lathyarn 16 cts.; double lathyarn 16½ cts.; lobster rope 16½ cts.

REDUCTION IN SCREEN CLOTH FOR NEXT SEASON

Montreal.

New season's prices on screen cloth are now issued, showing a reduction of 35 cents per 100 square feet. New quotation is $2.65 per 100 sq. ft.

HARVEST TOOL QUOTATIONS SHOW NO CHANGE

Montreal.

In issuing prices for next season on harvest tools no change is made in quotations, and these are again quoted at less 60 per cent. Scythes and snaths also remain practically unchanged.

TEN PER CENT INCREASE IN GAME TRAP PRICES

Montreal.

Advanced quotations are now given on game traps, showing an increase of approximately ten per cent. over former levels. Present net quotations were not available at time of going to press.

STOVE PIPE QUOTATIONS NOW HIGHER IN PRICE

Montreal.

An increase of approximately five per cent is made in quotations on most lines of lock stove pipes. These are now quoted as follows: 6 inch, $12.73; 7 inch, $13.64 per hundred.

ZINC SHEETS DISPLAY MARKED STRENGTH

Montreal.

The continued upward tendency in spelter on primary metal markets is causing a decidedly firmer tone in such finished products as zinc sheets. Local quotations on these are unchanged up to the present, but certain distributors look for a change upward in the very near future. Other lines of lead products are also unchanged since the revision in solders and lead sheets last week, but there is still a very strong tone in the market generally. While ingot tin and lead prices have not shown the rapid rise during the week that was formerly evident there is said to be no signs of weakness in either metal. Following are firm prices:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	**0 13½**
Lead sheets, 2½ lbs. sq. ft., lb.	0 11
Load sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs. sq. ft., lb.	0 10
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26
Do., strictly, lb.	0 23
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

LEATHER SOLES AND HEELS ARE REVISED IN PRICE

Montreal.

New price lists are now issued by manufacturers of leather soles and heels. Many sizes and qualities of both tap soles and top lifts are from five to ten per cent. higher in price, while certain lines remain unchanged. Following are new net quotations on some well known numbers:

TAP SOLES—

Per dozen—No. 12, $6.60; No. 13, $5.30; No. 14, $3.30; No. 15, $2.70; No. 120, $4.25; No. 121, $3.80; No. 122, $3.40; No. 123, $3.10; No. 129, $1.65; No. 130, $1.50; No. 131, $1.35; No. 37½, $1.85.

TOP LIFTS—

Per dozen—No. 51, $1.25; No. 52, $1.05; No. 53, $0.85.

DULL MARKET TONE IN WASTE MATERIALS

Montreal.

A dull market continues in waste materials generally, and notwithstanding a fairly active period in steel production circles dealers report a slow movement to these quarters. Non-ferrous metals display a slightly better market tone, although business in these also is limited. The spurt in zinc prices on virgin metal markets has as yet failed to reflect to any extent on scrap. Rubber scrap remains very dull.

Quotations are nominally unchanged and following are average dealers' buying prices:

SCRAP—

Automobile Tires	**0 50**
Rubber Shoes	0 02
Yellow brass	0 05 to 0 06
Red brass	**0 08¾**
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11½
Wrought iron, R. Rd., No. 1 per gr. ton.	**10 00**
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 10 00
No. 2 busheling	**8 00**
Boiler plate	8 00 to 9 00
No 1 machinery cast	20 00 22 00

FAIR MOVEMENT REPORTED IN CORRUGATED SHEETS

Montreal.

Current business in corrugated sheets is described as continuing in fair seasonal proportions. Although a little quieter in previous weeks the recent fine weather has stimulated sales to a degree. The undertone of the market is little changed, following the trend of flat galvanized sheets, and the somewhat stronger tone in the latter at the present time owing to extra cost of galvanizing, is said to have a tendency to firm the market tone for corrugated. Unchanged list prices and discounts are:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

FURTHER DROP OF ONE CENT IN GASOLINE

Montreal.

For the fourth time in as many weeks gasoline prices are again reduced one cent per gallon bringing present quotation to 30 cents per gallon. Reasons for the continued decline are again given as the weakness in primary markets and the usual falling off in consumption at this season of the year. Coal oil price still remains unchanged at 21 cents.

GOOD FALL TRADE IN SOIL PIPE AND FITTINGS

Montreal.

The movement of soil pipe and fittings is again stated to be remarkably good for the season of the year, building construction continuing in an encouraging manner. There is no change made in quotations, and it is still noted that the undertone of the market continues on a steady to firm basis. Prevailing discounts are:

SOIL PIPE—

2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net

Fittings—

2 and 6 inch	45%
8 inch	net

HIGHER ZINC PRICES MAY AFFECT GALVANIZED SHEETS

Montreal.

As pointed out in recent issues of Hardware and Metal that notwithstanding an easier tendency on local galvanized sheet markets, there has been a firm tone everpresent from a production standpoint. Now further assisting in this direction is the rise in spelter on metal markets which will naturally increase the cost of galvarizing. According to local importers and distributors this factor is liable to have a more direct bearing on the market than other conditions which have recently come to light. One large importer of English sheets stated that while up to the present they have had no advice of advanced prices on the overseas market there is every likelihood of such a change in the near future if zinc maintains its present higher market position. Just to what extent this tendency will reflect locally is considered problematic, the fact that stocks are now much heavier than in earlier months being a condition not to be overlooked.

Tin plate and Canada plate appear to be on a steady price basis with ample shipments arriving to take care of immediate requirements. Average price levels are as follows:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 75
26 gauge	6 75	7 50
24 gauge	6 15	6 90
22 gauge	5 80	6 55
18—20 gauge	5 10	5 85
Other Brands—		
10¾ oz	6 75	7 50
28 U. S. gauge	6 35	7 10
26 U. S. gauge	6 05	6 80
24 gauge	5 90	6 65
2 gauge	5 90	6 65
18—20 gauge	5 75	6 50
16 gauge	5 60	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25
20 x 28 IC, 112s	12 75
20 x 28 IC, 112s	15 00
20 x 28 IXX, 56s	8 50
20 x 28 IXXX, 56s	10 00
TERNE PLATE—	
20 x 28 IC, 112s	12 50
CANADA PLATE—	
Half bright 52s	4 85
Half bright 60s	4 90
Blued, 52s	5 10
Blued, 60s	5 15
Welsh, polished, 52s	6 50
Welsh, polished, 60s	6 75
Galvanized, 52s	7 25
Galvanized, 60s	7 75

HIGHER QUOTATIONS ON BOILER TUBES

Montreal.

An increase of from three-quarters to two cents per foot is announced on the various sizes of boiler tubes, both on seamless and lapweld. A somewhat improved movement is now in evidence on these products, and it is noted that delivery from the mills has tightened up considerably in recent weeks. This improvement in demand naturally has assisted towards a firmer undertone, and with continued activity during the remainder of this month a steady to firm outlook is presented. Following are new average quotations :

BOILER TUBES—

	Seamless	Lapweld
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	21 00	.....
1¾ inch	24 50	24 00
2 inch	21 00	19 75
2¼ inch	24 00	22 25
2½ inch	27 00	23 25
3 inch	33 00	29 50
3½ inch	38 00	34 25
4 inch	49 00	43 50

Prices per 100 ft. f.o.b. Montreal.

BUSINESS IN STEEL SHOWS IMPROVEMENT

Montreal.

It is stated among local distributing circles that current trade in bar iron and steel products is showing a considerable improvement over previous weeks, and is now well up to expectations. More staple lines are selling in fairly good volume to the dealer trade, reflecting the heavier consumptive demand usual at this season. This improved call has slowed up deliveries from the mills to an extent, although this condition is not felt on these products to the same degree as on other iron and steel goods at the present time. Quotations remain at former levels, with the undertone described as steady rather than the decidedly firm tone which was evident some few weeks ago. Unchanged local quotations are as follows:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50 3 65
Spring steel	4 75 8 50
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

FIRM UNDERTONE CONTINUES IN PIPE FITTINGS

Montreal.

A firm tone continues in the market for pipe fittings with trade still said to be in good volume. No change is made in quotations, although there is a tendency towards firmer prices, especially on such lines as wrought nipples and couplings, which are usually included with pipe quotations. Present discounts are the following:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2¼ in. and larger	23%
Do., galv., add to black	30%
Nipples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ⅛ in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

STILL HIGHER PRICES ON TIN, LEAD AND SPELTER

Montreal.

The ingot metal markets continue firm, and although a little quieter with advances not as rapid as last week slightly higher quotations again appear on the local market for tin, lead and spelter.

TIN.—This metal continued to advance earlier in the week, but has shown a slight reaction during the past few days. This is considered only temporary however and higher prices may yet develop. Local market is one cent higher at 41 cents.

COPPER.—The copper market is still a quiet one, with little or no new developments. Prices are unchanged at 17½ cts. for casting and 17¾ cts. for electro.

LEAD.—Lead is a little easier in London although the American market is rather firmer. The set-back in England is considered temporary and the undertone of this metal is still strong. Local price slightly higher at 8 cents.

SPELTER.—Spelter has had a rapid advance, but considering the export from the U. S. A. to England this is not surprising. With more and more of this even higher levels might be expected. East St. Louis touched a new high point since 1920 at $7.10. Locally the market is also higher at 9¾ cents.

Toronto, Ont.

TORONTO, November 2.—Another heavy budget of price revisions again emphasizes the importance of the weekly hardware markets. Several reductions appear this week, while the announcement of next season's price levels on a number of lines also attracts attention. Screen wire cloth is reduced, while gasoline also records another decline, the downward movement of prices on this product having become almost a habit during the past four weeks. Rope and cordage, oakum, and drills appear with lower quotations. In addition to screen wire cloth prices for 1923, screen doors and windows, harvest tools, hay rakes, scythe snaths, reaping hooks, snaths, and hay knives, are all treated in a similar manner. Several price advances serve to indicate that the upward trend has not ended, solders appearing with another increase following the rise recorded last week. Game traps are also advanced ten per cent., while a possible higher price list is foreshadowed on wrought piping. Some variation is now evident in local sheet prices, especially on black and galvanized. Both higher and lower quotations have been recorded. The situation regarding supplies is now much easier.

NEW QUOTATIONS ON SCREEN WIRE CLOTH

Toronto

Screen wire cloth prices for the season of 1923 show a slight reduction from former levels. The new base quotations follow:

Black, 12 mesh, $2.65 per 100 square feet.

Galvanized, 14 mesh, $3.75 per 100 square feet.

Bronze, 14 mesh, $9.50 per 100 square feet.

There is the usual additional five cents for 50 ft. rolls.

GAME TRAP PRICES ADVANCED TEN PER CENT

Toronto.

Owing to recent increases in the cost of raw materials, manufacturers of game traps announce a general advance of ten per cent. in quotations on these products.

PRICES REDUCED ON ROPE AND CORDAGE

Toronto.

Manufacturers of rope and cordage announce lower prices this week, a reduction of one cent per pound being in effect on pure Manila, Beaver and British manila, New Zealand hemp, sisal, and single and double lath yarn. The new levels are effective from November 1. In making this recession, it is pointed out that an effort has been made to place quotations on these products at as low a basis as possible for next season. Hemp products are also reduced, the decline being four cents per pound on Marline, halyards and tarred ratline. Following are the revised prices:

ROPE—	
Pure Manila basis	0 20
Beaver manila, basis	0 18
British manila, basis	0 18
New Zealand hemp, basis	0 18
Sisal	0 16
Single lath yarn basis	0 16
Double lath yarn	0 16½

Above quotations are basis prices. ¾ in. and large rdiameter. The following advances over basis are made for smaller sizes:—⅝ in., 6c.; 7-16 to 9-16 in.. 1c.; ⅜ in., 1½c.; ¼ in. and 5-16 ins. 2c.; 3-16 in., 2½c. extra.

Yacht marline, tarred	0 49
Halyards. (basis)	0 42
Beaver Halyards, wht. pol. ¾ in. basis	0 26
Hemp, deep sea line, basis	0 42
Hemp, tarred ratline, basis	0 35
Hemp, tarred bolt rope basis	0 37
Marline and Houseline	0 37

QUOTATIONS ON HAY KNIVES FOR NEXT SEASON

Toronto.

No change has been made in quotations on hay knives for the 1923 season, the current levels announced being: Lightning, $14.00; Heaths, $14.00; Spear Point, $15.00.

REVISED DISCOUNTS APPEAR ON DRILLS

Toronto.

The announcement of new discounts brings lower quotations on drills this week. Big stock drills are now quoted at less 52½ per cent., compared with the former level of fifty per cent. Straight shank drills appear with a discount of 57½ per cent., and wood drills are now shown at less 52½ per cent.

HARVEST TOOL PRICES FOR 1923 SEASON

Toronto.

Harvest tool prices for the 1923 season are also announced this week. The discount is 60 per cent. The only difference from former levels is that there is no five per cent. for early booking this year, as was the case last season, this having been withdrawn.

HAY RAKES APPEAR WITH REVISED PRICE LEVELS

Toronto.

New prices on hay rakes are now in effect, the revised quotations being as fellows: iron bow bent No. 1, $6.30, wood bow bent, $6.80.

NEW LOWER QUOTATIONS ON SCYTHE SNATHS

Toronto.

Revised quotations on scythe snaths announced this week show slight reductions as follows:

SCYTHE SNATHS—

Loop and bolt No. 1 $16.25; No. 2, $15.60; No. 3, $14.20.

Ring and wedge, No. 1, $14.85; No. 2, $14.20; No. 3, $12.85.

Patent loop and bolt, No. 00, $17.00.

SNATH PRICES ANNOUNCED FOR NEXT SEASON

Toronto.

Quotations on snaths are now given as follows: cast steel, $15.00 per dozen. Other higher grades, such as Golden Clipper and Little Giant, at $16.00 and $17.00 respectively.

1923 PRICE LEVELS ON REAPING TOOLS

Toronto.

Price levels on reaping hooks for 1923 season are announced this week, the quotations being as follows:

REAPING HOOKS—

No. 2, $3.90; No. 3, $4.00; No. 4, $4.10; Barden, $6.50; Little Giant, $6.50.

BECOMING A HABIT TO LOWER GASOLINE PRICE

Toronto.

The fourth reduction in as many weeks is now made on gasoline prices, the current decline being two cents per gallon. This downward change brings the prevailing quotation to $0.29, thus indicating a recession of five cents per gallon since the first of the recent reductions was announced. For the past three or four weeks the tone of the gasoline market has been decidedly easier, consumption having declined in volume, while stocks are described as correspondingly adequate.

Coal oil still exhibits a firm tendency, although no price changes have taken place. It is stated, however, that the trend is upward rather than downward at present under the influence of a brisk seasonal demand. The Palacine grade of coal oil has been withdrawn from the market.

EASIER PRICE LEVEL ON PLUMBERS' OAKUM

Toronto.

A reduction of thirty cents per cwt. has been made in quotations on plumbers' oakum, the local price level now being $6.00 per 100 lbs., or $3.00 in fifty pound bales. Navy special No. 1, is quoted at $13.00 per cwt.

Active Demand Tests Supply of Furnaces

Unusually Brisk Demand Reduces Stocks to Minimum With Seasonal Movement at its Height—Price Situation Undoubtedly Very Firm—Electric Ranges in Marked Activity

THE MOVEMENT of furnaces has been especially active during the past few weeks, and in certain quarters it is noted that a shortage now exists in some sizes. One manufacturer stated to Hardware and Metal, that the movement had been exceptionally brisk for several weeks past with no signs of the demand letting up. Already a shortage was evident, as furnaces were being shipped out to meet prevailing requirements just as fast as they were received from the foundry. At the present time, no pipeless furnaces were on hand, although a shipment was on the way.

"This condition indicates the trend of business which is undoubtedly very good in this line and in many cases generally beyond our expectations. If the orders keep coming in—and there is no signs of the demand slackening—we look for the supply situation to become accentuated during the months of November and December, as stocks are already reduced to a minimum, with the seasonal demand at its height and several weeks of marked activity still ahead.

"The market tone is very firm, due to the trend of raw materials which, as recently noted, are generally on a higher plane. While no price changes have been announced, it is felt that should any movement in this direction develop during the ensuing weeks, such a revision would undoubtedly be in the nature of of an advance."

In supporting this, it was pointed out that when certain reductions were last made in quotations, manufacturers stated at that time, that conditions hardly warranted a decline. It was admitted that a movement toward higher price levels might possibly develop in view of the trend of manufacturing costs combined with continued activity in the volume of orders. The general activity recorded was evidently well spread out, optimistic reports being received from most centres. Compared with the records of trade in this line last year, business in the west is well ahead.

Electric ranges are selling as fast as ever, according to the current reports of local manufacturers and distributors, while gas stoves and coal and wood ranges are also experiencing an unusual volume of seasonable trade. The viewpoint is expressed that these products remain the centre of attraction for several weeks, with the trend of prices undoubtedly very firm.

ANOTHER ADVANCE IN QUOTATIONS IN SOLDERS

Toronto.

Following on the advance of one cent per pound in solder prices recorded last week, a further increase of one and a half cents on all grades is now announced. In addition, wire solder is advanced one cent per pound, this change bringing the revised level to 31 cents. This upward trend reflects the climb of primary metals, it being pointed out that tin and spelter were showing unusual strength, with correspondingly higher prices. There has been no further change on other lead products, sheets and pipe remaining steady to firm. Following are the new quotations:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 31
Do., strictly, lb.	0 25
Do., wiping, lb.	0 23½
Do., guaranteed, lb.	0 26½
Do., commercial, lb,	0 23½
Zinc sheets, per lb. 0 11	0 12

SCREEN DOOR AND WINDOW PRICES FOR 1923

Toronto.

Quotations on screen doors and windows for the season of 1923 are now announced, but no appreciable change is noted from this year's prices. Following is list No. W 10, giving prices in the Sanderson-Harold line:

SCREEN DOORS—

(⅞" Thick, Dowelled.)

No.	Stiles.	Description	Per doz.
1	4"	Grained Only	$18.60
2	4"	Grained Only	22.40
21	4"	Grained, Filled and Varnished..	28.00
21½	4"	Grained, Filled and Varnished..	29.20
24	4"	Grained, Filled and Varnished..	29.20
8	4"	Grained, Filled and Varnished..	32.80
9	4"	Grained, Filled and Varnished..	36.90
		(1⅛" Thick, Mortised Frame)	
28	3"	Grained, Filled and Varnished..	32.50

COMBINATION STORM AND SCREEN DOORS—

No. 80—4" Stiles, 1⅛" thick, Mortised, Interchangeable Panels. Grained, Filled and Varnished, per doz. 64.00

PERFECTION WINDOW SCREENS—

7	22"	24"	40½"	6.70
8	22"	26"	44½"	7.30
9	24"	26"	44½"	7.90
10	24"	34"	60"	9.80

POSSIBLE ADVANCE IN WROUGHT STEEL PIPING

Toronto.

While list No. 54, still governs domestic pipe markets, the advance recorded in the last issue by American makers of wrought steel pipe amounted to approximately $4 per net ton. Eighth-inch merchant pipe is advanced 2½ points, or $5 the ton. This is said to be the first important price advance that the Steel Corporation has made in six years that had not first been made by independent producers. While no announcement has yet been made by Canadian pipe mills, there is some likelihood that domestic prices will be revised. Advances made some weeks ago, it is said, were overdue. Material has increased in price since then, and it has been an expensive process to obtain supplies of skelp. Manufacturers point to the fact that the United States has differences in climate by which building operations may be continued in some sections all year round, and consequently the demand there has more stability, while in Canada, winter enforces a slowing-up process.

COPPER PRODUCTS MOVING IN MODERATE VOLUME

Toronto.

Copper and brass products are moving in fair volume for this season of the year, there having been moderate activity reported in rods, sheets and tubing. Quotations remain on a steady basis, no further revision having been recorded since the general upward change of a few weeks ago. The undertone of primary virgin metal has fluctuated more or less, but these movements are not considered of sufficient duration by manufacturers to be immediately reflected in current price levels on the semi-finished products. Unchanged local quotations follow:

BRASS—	
Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22
COPPER—	
Rods, base, per lb.	0 30
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

VARIATION IN LOCAL BLACK SHEET PRICES

Toronto.

Some variation is noted in current quotations on the local sheet market. In black sheets the base of $5.10 has appeared in certain quarters, while other distributors are maintaining higher levels, extending from $5.25 to $5.40, with the former price as the lower prevailing mark. That this figure is even being shaded, however, is the general conclusion, but the $5.10 quotation is not yet adopted in all quarters. A spread in quotations on galvanized is also noticeable, some distributors maintaining a base of $6.35, while others adhere to easier marks, indicating that the current trend is towards the level of $6.25 shown below. A slight range was also reported in blue annealed sheets, but prices on these are now more uniform. The situation regarding supplies is now much easier than it was during the summer period, and the current market condition has been influenced by a softening in the demand as the winter season approaches. Current average levels follow:

	Premier and Apollo
GALVANIZED SHEETS—	
10¾ oz.	6 65
U. S. 28 base	6 25
U. S. 26 base	5 95
22 and 24	5 80
18 and 20	5 65
16	5 50
12 and 14	5 35
	Queen's Head
28 gauge, base	7 15
26	6 75
24	6 45
22	6 30
	Fleur de Lis
28 gauge, base	6 90
26	6 50
24	6 20
22	6 05

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

BLUE ANNEALED SHEETS—	
10 gauge, base	4 25
12 gauge	4 30
14 gauge	4 35
16 gauge	4 40
BLACK SHEETS—	
18-20 gauge	5 05
22-24 gauge	5 10
26 gauge	5 15
28 gauge	5 25

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

PRICES ON WRAPPING TWINES AGAIN RISE

Just as Hardware and Metal goes to press a further advance of two cents per pound is announced on cotton wrapping twines. This development follows the increase recorded two weeks ago and is attributed to the strength of raw cotton markets.

SOIL PIPE QUIETER WITH WINTER'S APPROACH

Toronto.

The big demand for soil pipe and fittings which was apparent with the marked activity in building circles during the past few months has now receded somewhat as the winter season approaches. Conditions are mainly described as on a steady to firm basis, however, with quotations unchanged at the last general revision. Current discounts follow:

SOIL PIPE—	
2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net
FITTINGS—	
2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

OCTOBER GOOD MONTH FOR IRON AND STEEL

Toronto.

Distributors report that the month of October has made a good showing in the local bar iron and steel trade, when compared with the records of the past two years. Any slowing up now apparent in certain seasonal work is not viewed with any sense of alarm, as it is pointed out that this development is more or less expected at this period of the year. In many lines, however, an average trade is looked for during the winter months, although business is on a relatively moderate scale due to the lack of construction activities. No changes have occurred in existing price levels, the market remaining steady in both primary and domestic circles. Following are prevailing quotations:

IRON AND STEEL—		
Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	8 00
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel		4 75
Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

TIN PLATE TRADE NOW SOMEWHAT EASIER

Toronto.

Trade in tin plate is described as fairly moderate for this season of the year. While the general demand has been easier, prices have held up in most quarters. The report that tin plate prices would be advanced for the first half of next year resulted in securing a little improvement in buying, but no general expectation of higher levels is looked for on domestic markets. It is stated that if iron and steel prices generally were lined up for further increases in the near future, a similar advance in tin plate might then be expected. But there is no such trend apparent. The price of coke has dropped, and pig iron quotations are also easier. The markets have been relatively dull, and while no declines are yet in sight, quotations on tin plate are hardly expected to register immediate upward revisions. Current prices follow:

PLATES, CANADA—	
Ordinary, 52 sheets	4 90
Do., 60 sheets	5 00
Blued and oiled, boxes 52s	5 50
Do., Do., 60's	5 60
WELSH CANADA PLATES—

Do., do., 60's	6 50
PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	12 75
IX, 20 x 28, 112 sheets	15 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC. 14 x 20. 112 sheets	12 00

SCRAP MATERIAL PRICES AT UNCHANGED LEVELS

Toronto.

Scrap metals have remained firm on domestic markets, but consumers are still buying in small lots for immediate requirements only, although orders are more frequent than formerly. The scrap iron markets have failed to shed the quietness recently apparent. Prices, however, are firm and unchanged. The current demand for scrap rubber is reported as slightly improving. There has been no variation in quotations. The following are the usual average of deal-

ers' buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings, (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	20 00	21 00
Stove plate	16 00	17 00
Grate bars	12 00	13 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper wire	11 00	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 25	5 75
Tea Lead	3 25	3 75
Scrap zinc	4 50	4 75
Scrap Rubber		
Boots and shoes	2 00	2 25
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	0 60	1 00

STEADY TREND TO COTTON WASTE PRICES

Toronto.

As has been the case for the past two or three months, the raw cotton markets continue to fluctuate and these changes only affect the tone of the cotton waste markets to a minor degree. The general undertone, however, is described as firm, and while there has been no change in quotations, wastes, as a cotton by-product are said to be experiencing a fair demand. The movement is steady and generally up to expectations. Following are unchanged prevailing price levels:

Cream, polishing	0 18
White, XXX	0 18
XX	0 16
X	0 15
XC	0 14
XXX, extra	0 16
XX, grand	0 15

Lion	0 12
Standard	0 10½
Popular	0 09
Keen	0 07½

HIGHER TIN PRICES FEATURE INGOT METALS

Toronto.

The rising tendency of prices on the ingot metals is still evident, with another marked increase in tin quotations featuring the current markets. This rise is attributed to the influence of the sharp spurt recorded in London, where gains continued during the week. Trading, however, is not so active. Zinc quotations are also higher abroad and this trend is reflected on domestic centres. Copper remains the weak member of the group.

COPPER.—Copper remains in a weak condition at present, and is the only dull member of the ingot metal group. Trading is quiet, with primary market levels being weakened by importations The local level is around 17¼ cents.

TIN.—A continued marked advance in tin prices offers the feature of the non-ferrous metals. The average local quotation has reached the higher level of 41 cents, which is in direct contrast to the tone of this metal a short time ago. The London market continues to advance rapidly, and this unexpected sharp rise has been reflected in domestic circles.

LEAD.—This market is also firmer, a lack of supplies in certain primary centres contributing to the present strength. No price revisions have been made, however, in either primary or domestic markets. The current local level remains at $7.50.

SPELTER.—Firmness is also apparent in this metal, and while the local volume of trading is reported as disappointingly small, inquiries in primary centres have been more numerous, with the London market much stronger. Local prices are now advanced to $9.00 owing to the big rise in spelter quotations abroad.

ANTIMONY.—Prices on antimony locally remain at the level quoted last week of eight cents. The market generally is quiet and unchanged at previous levels.

ALUMINUM.—Aluminum prices also remain between 21 and 22 cents on the local market, there having been no variation recorded in this metal. Consumers in primary centres are making commitments for the first half of 1923.

London, Ont.

LONDON, November 2.—Improvement in trade continues in this district and business may be described as good at present. Seasonable lines are moving well and merchants anticipate an excellent sale of silverware, cutlery and various other Christmas lines.

Price quotations are very firm. Turpentine advanced again and higher prices are now generally in effect in building papers. Collections are reported as good.

ANOTHER FIVE CENT RISE IN TURPENTINE

London, Ont.

The price of turpentine advanced another five cents per gallon during the week, this change bringing into effect a new high mark for the season of $2.35 per gallon in one barrel lots. Continued strength at producing centres owing to a restricted supply contribute towards the current market conditions.

TURPENTINE—

	Imperial Gallon
1 bbl. lots	2 35
2 to 4 barrel lots	2 34
5 gal. lots	2 50

CONTINUED ACTIVITY EVIDENT IN NAILS

London, Ont.

There is still a good demand for nails, and prices on wire nails have been reduced ten cents. Wire nails are quoted at $3.65 base, and cut nails at $4.60.

SEASONAL MOVEMENT IN BUILDING PAPERS

London, Ont.

There is a good sale at present for building papers at the new higher price levels recently made effective. Plain fibre No. 2 is now quoted at $0.75 per roll, and tarred fibre No. 2, at $0.95 per roll.

SLIGHTLY HIGHER PRICE ON LOGGING CHAINS

London, Ont.

Quotations for this season on made-up electric weld logging chains are slightly higher than formerly. Following are the revised prices quoted locally:

LOGGING CHAINS—

5-16x12 ft., $2.30 each. 5-16 x 14 ft., $2.55 ea. 5-16 x 16 ft., $2.95 each. 5-16 x 18 ft., $3.35 ea. ⅜ x 12 ft., $2.85 each. ⅜ x 14 ft., $3.35 ea. ⅜ x 16 ft., $3.60 each. ⅜ x 18 ft., $4.00 each. 7-16 x 14 ft., $4.50 each. 7-16 x 16 ft., $4.90 each. 7-16 x 18 ft., $5.40 each.

NEXT SEASON'S HARVEST TOOL BOOKING PRICES

London, Ont.

Booking prices for harvest tools for spring of 1923 are the same as present, the quotation being, list less 60 per cent.

Scythes and reaping hooks are also priced the same as in 1922.

The list in harvest tools is unchanged with the exception of hand cultivators. These are revised as follows:

5-prong adjustable tooth cultivators, new list $27.50.

PRICES ON CROSS CUT SAW HANDLES

London, Ont.

Prices on cross cut saw handles show very little change this season. Following are current quotations on the T. F. Shurley Co., make:

X-CUT SAW HANDLES—

No. 480, $6.60 doz. pair. No. 482, $5.05 doz. pair. No. 481, $8.00 doz. pair. No. 482½, $5.05 doz. pair. Lion One Man, $6.00 Single doz.

LINSEED OIL PRICES SLIGHTLY FIRMER

London, Ont.

Local quotations on linseed oil are slightly firmer this week, although no change has been made in the average level in effect during the past couple of weeks.

LINSEED OIL—

	Raw	Boiled
1 to 2 barrels	1 10	1 13
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, add 15c gallon.

GOOD SALE NOTED IN THUMB LATCHES

London, Ont.

Dealers generally report a good sale of japanned thumb latches at present. Prices on these lines remain at the following levels: No. 2, steel, $2.00 per doz.; No. 3, $2.50 per dozen.

SEASONAL ACTIVITY IN WEATHER STRIP

London, Ont.

A good seasonal sale of weather strip is generally expected this fall, and the movement up to the present is reported as containing signs of brisk activity. Current quotations follow:

WEATHER STRIP—
Frost King, $5.00 dozen pkgs.
Wood and Felt, List—No. 60, 5c. ft.; No. 61, 5c. ft.; No. 61½, 7c. ft.; No. 64, 10c. ft.; Less 50/5 per cent.

REPORT ACTIVE SALE FOR ROOFING NAILS

London, Ont.

Roofing nails are numbered among those products enjoying a brisk seasonal movement. Current prices on this line follow:

ROOFING NAILS—
1 x 10 Canadian Large Head, $5.75 per 100 lbs.; 1 x 12 American Large Head, $10.50 per 100 lbs. F.O.B. London.

BRISK DEMAND FOR WHITE LEAD IN OIL

London, Ont.

An excellent sale for white lead in oil is reported this fall, with prices on a very firm basis owing to the trend of pig lead. Following are current unchanged levels:

WHITE LEAD IN OIL—

	Tons	LessTons
	Per 100 lbs.	
Pure	13 55	13 90
Elephant	14 05	14 40

SNOW AND STABLE SHOVELS NOW MOVING

London, Ont.

General reports indicate that snow and stable shovels are now recording a seasonably brisk movement. Current prices on these products are as follows:

SHOVELS—
No. 20, or Prince Long Handle, $5.50 doz.; No. 20 Prince, D Handle, $6.75 doz. No. 40 or King, D Handle, $7.50 doz. No. 50 or Moose, D Handle, $9.35 doz. Common Japanned, $3.75 doz.

WINDOW GLASS SALES IN BRISK VOLUME

London, Ont.

A fairly good demand for window glass is now generally recorded, seasonal activity being in full swing. This degree of improvement in current sales has served to steady the domestic markets to some extent.

WINDOW GLASS—
Domestic Glass, less than 25 cases, list less 5 per cent. 25 cases and over, list less 10 per cent. Belgian glass, less than 25 cases, list less 15 per cent.; 25 cases and over, list less 20 per cent.

SPLITTING WEDGES NOW IN POPULAR ACTIVITY

London, Ont.

Splitting wedges are selling now in fair volume. Prices are a little easier this fall, the following quotations being in effect:

Square head ..... ten cents per lb.
Truckee pattern .....eleven cents per lb.

COMBINATION STORM DOORS NOW MOVING

London, Ont.

A good sale is now commencing for combination storm doors. These products are receiving seasonal attention. Prices on the Sanderson-Harold make are; No. 80, $64.00 per dozen.

ASH SIFTERS AMONG GOOD SELLING LINES

London, Ont.

Ash sifters are numbered among the good selling lines at present. Quotations remain firm and unchanged at the following levels:

Common Wood Sides .....Dozen 2 75

ACTIVE MOVEMENT NOW RECORDED IN PUTTY

London, Ont.

An active movement is now generally recorded in putty, the seasonal fall trade in this commodity now being in full swing, according to reports received this week from local distributors. Prices are unchanged at the following levels.

PUTTY—

Standard, 100 lb. drums	4 80
Do., 25 lb. drums	5 05
Pure, 100 lb. drums	6 05
Do., 25 lb. drums	6 30

SEASONAL MOVEMENT NOTED IN BUCK SAWS

London, Ont.

A good sale for buck saws is still being generally recorded, the movement of these goods being described as seasonably satisfactory. Prices are unchanged as follows:

BUCK SAWS—
Happy Medium, $12.30 doz. Arrow Lance Tooth, $16.65 doz.; Disston Lance Tooth, $16.65 doz.; Prince Rupert Lance Tooth, $16.65 doz.

Winnipeg, Man.

WINNIPEG, Nov. 2.—There are few changes in hardware commodities this week. All lines of cotton goods, such as clothes lines, sash cord, cotton rope and wrapping twine, have shown a slight advance. Agricultural wrenches have moved to higher levels. Buying continues in a conservative manner and although collections have been disappointing up to the present time an improvement is expected just as soon as farmers get off the land. There is a seasonable demand for Christmas specialties and winter sporting goods.

CLOTHES LINES SHOW UPWARD PRICE TREND

Winnipeg.

There has been a slight advance in quotations on cotton clothes lines. Cotton clothes lines of 48 ft. long are quoted at $3.55 with 60 ft. at $4.55. There is no change in quotations on wire clothes lines.

SASH CORD ALSO SHOWS AN ADVANCE

Winnipeg.

There has been a slight advance in the price of sash cord, and following quotations now prevail for hanks:—Number 6 is quoted at 65c; Number 7 64c; Number 8 and 9 63c. New quotations on coils Number 8, 9 and 10 are 63c.

STRONG TONE TO TURPENTINE MARKET

Winnipeg.

Turpentine on southern markets is showing a firmer tone and further advances have been reported on the local market. Quotations are now $2.25 per gallon.

COTTON WRAPPING TWINE SHOWS AN ADVANCE

Winnipeg.

Cotton wrapping twine in balls and cones has been advanced to two cents per lb. Revised quotations are as follows:

TWINE (Wrapping)—	Per lb.
Cotton, 3 ply cones	0 52
Cotton, 3 ply balls	0 56
Cotton, 4 ply cones	0 56
Cotton, 4 ply balls	0 60

AGRICULTURAL WRENCHES AT INCREASED PRICES

Winnipeg.

Agricultural wrenches have advanced to higher levels and new quotations are as follows:

WRENCHES—Agricultural
6 inch, $5.50; 8 inch, $6.60; 10 inch, $7.70; 12 inch, $9.90; 15 inch, $13.20.

HIGHER PRICE LEVELS ON COTTON ROPE

Winnipeg.

Cotton rope has also shown a slight advance. Three sixteenths inch is quoted at 67c and a quarter inch and up 55c.

PRESENT DEMAND FOR GAME TRAPS HEAVY

Winnipeg.

Wholesalers report that there is a heavy demand for all lines of game traps. Prices show no change.

TRAPS—Game

Victor No. 0	1 95
Victor No. 1	2 30
Victor, No. 1½	3 50
Victor, No. 2	4 80
Victor No. 3	8 15

H. & N. TRAPS—
No. 1, $4.35; No. 1½, $6.65; No. 2, $9.25; No. 3, $12.35.

JUMP TRAPS—
No. 1, $2.95; No. 1½, $4.25; No. 2, $6.50; No. 3, $8.80.

WINTER SPORTING GOODS IN SEASONABLE DEMAND

Winnipeg.

The trade report that bookings for skates, sleighs, toboggans and all other lines of winter sporting goods are very satisfactory. With the approach of colder weather a decided improvement will be shown for these lines.

STRONG TONE EVIDENT IN LINSEED OIL

Winnipeg.

Linseed oil is firmer on primary markets and stocks are reported light. Quotations locally are $1.25 for raw and $1 28 for boiled.

GASOLINE PRICES LOWER

Winnipeg.

There has been a decline in the price of gasoline. Quotations are now 33c and 36c for the higher grades.

Calgary, Alta.

Persistent Efforts in Merchandising Service Bringing Noticeable Returns

CALGARY, November 2.—Grain inspection reports show October to have been a record month for grain shipments through Calgary, and the gain over any previous month will be a substantial one. One day recently 212 cars were inspected, representing about 275,000 bushels. One result of the heavy movement of all farm products has been a big jump in the bank clearings for the past week, putting Calgary in fifth position in Canada; a position often held in the days of rapid growth, but only occasionally so during the past couple of years. Reports from the Drumheller coal fields also show very heavy shipments. This week over 1.700 cars were loaded and shipped from this field, which would not be far short of a record.

The refinery site is the centre of activity. Close to a thousand men and a couple of hundred teams are at work, excavating, leveling, and track laying, and assembling material, and it is reported the first gang of tank erectors are expected this week.

The above activities are all having their effect on the retail trade of the city which is showing improvement. Buyers are careful and are spending only for current needs and keeping a watchful eye on the domestic purse strings, but the general volume of sales over the week have been very fair and persistent effort in merchandising service is not without noticeable return. The settlement of the gas question and the expectation of an adequate supply has enlivened the gas heater business and this line is very much to the fore in all the hardware stores.

The slight improvement in collections of last week has been more than sustained this week, and the feeling is that the movement will continue and probably reach the peak in about a month's time. Those responsible for the sales end of the business houses are inclined to judge conditions by the activity of the sales register, overlooking the necessity of a general liquidation, now, either in process or in prospect.

Among the week's market changes is an abrupt advance of 10 cents a gallon on linseed oil. This together with the advance of last week puts the current price on a level 15 cents higher than that of ten days ago and higher than since July. Present price at Calgary, Edmonton, and Lethbridge is 1.31 for raw and 1.34 for boiled with 10 cents added for less than barrels.

Turpentine also shows an advance of 10 cents a gallon in sympathy with the high levels reached lately in primary markets. Local quotations are still under the eastern market with freight added and higher levels can be expected here unless quotations from supply centres ease off a bit. Present prices at Calgary, Edmonton, and Lethbridge 2.35 in barrels and 2.45 in less than barrels.

New prices are issued on Sandpaper representing a decline of between five and ten per cent. Present prices on first quality by ream and quire follow: 00, 7.00, .37; 0, 7.05, .37; ½. 7.45, 40; 1, 8.50, .44; 1, ½, 9.90, .53; 2, 11.55, .61; 2, ½, 13.25, .69; 3, .69; 3, 15.10, .80.

New prices issued on certain lines of fittings represent an adjustment downwards; the most important item being malleable iron fittings, Class B and C which are reduced from 60 off to 63 off. The following items only are affected and prices are in effect at Calgary, Edmonton and Lethbridge.

Wrot Iron Nipples 4½ and over 35 off.
Cast Iron Floor Flanges, 20 off.
Cast Iron and Mall Bushings, 15 off.
Steel Pipe Hangers, 50 off.
Mall Iron Fittings Class B & C 63 off.
Boiler Elbows and Couplings, 45 off.
Railing Fittings, 40 off.

A revision downward on standard pattern valves is also noted, the reduction being from three to eight points.

The new prices ruling at Calgary, Edmonton and Lethbridge follow: globe and angle valves 25 off; horizontal check valves 20 off: swing check vales 30 off; gate valves 40 off.

Pet cocks and steam gauge cocks register higher levels, the change made being from 42 off to 37½ off. Low pressure steam gauges 4½ in. are reduced from 4.10 to 3.25. Asbestos cement is reduced from 3.50 to 3.00 per 100 lbs. Quite a substantial reduction is in effect on expansion tanks. The following prices are for extra heavy closed type and average about 20 per cent. under recent levels: 8 gal., 12 x 20, 8.50; 10 gal., 12 x 22, $8.75; 12 gal., 12 x 24, 9.00; 15 gal., 12 x 30, 9.50; 20 gal. 14 x 30, 11.00.

St. John, N. B.

Cold Weather Brings Call for Winter Auto Accessories, Furnaces and Stoves

ST. JOHN, N. B., November 2.—St. John has just had two weeks of winter weather, with no sign of a let up yet. Although there has been no snow nor rains to speak of, there have been high cold winds, causing the citizens to have to start furnaces and heating stoves. This sudden snap of winter weather has had its effect in all lines of goods connected with the winter season. Motorists are now running with hood covers on and anti-freezing mixtures in their radiators, and dealers report a good sale of this class of goods, including side curtains, rugs, foot-warmers and gloves. The roads are still in very good motoring condition, owing to the fine weather, and as a result the sale of non-skid chains is not yet affected. Automobile painters are now circularizing the city, offering to store and paint cars ready for the spring, and advising car owners who do not use their cars during the winter months that it is possible for them to have their car stored and painted at the same time, with no extra charge for the storing. This is a new move on the part of automobile painters, and there is no doubt but that it will have the effect of inducing a good deal of car painting, owing to the fact that the winter's storage of a car amounts to more than half the cost of painting in nearly all cases. It is profitable, too, from the painter's standpoint, as many of the carriage painters have large storerooms and paint shops, and by filling up with cars waiting to be painted, it means a full supply of work for the whole winter, keeping painters busy, and also keeping up the sale of paints from the dealer's standpoint.

The majority of hunters have had good luck with big game hunting, and a large number of moose have been shot. Hunters report that deer are very plentiful. These animals are very numerous on the edges of the woods, and in the clearings of the fields, and sportsmen do not have to go far into the woods as in the case when after the monarchs of the forest. At the present time there are large numbers of United States residents in the province in quest of big game.

T. P. Regan, K. C., president of the New Brunswick Automobile Association, has returned to St. John after attending the Canadian Good Roads Convention held in Montreal last week. He states that several matters of importance were discussed at the meeting, and among them cars travelling with only one headlight. It was decided to press for new legislation in this matter to force cars to carry three lights, two in front and one in the rear. The "turn to the right" rule in New Brunswick met with hearty approval of the meeting, and the Nova Scotia and Prince Edward Island members spoke of the possibility of its enforcement there. The New Brunswick delegates present were: Hon. P. J. Veniot, Minister of Public Works, B. M. Hill, provincial road engineer, and Mr. Regan.

The St. John Dry Dock and Ship-

building Company has had in contemplation for some time the construction of a marine railway in connection with their ship repair operations at East St. John, and they have now made arrangements for the erection of the same on the north side of their dry dock. The foundation work will be started immediately. The railway will be capable of hauling all smaller vessels, tugs and scows, not exceeding 2,000 tons, out of the water, which will enable repair work to be carried on continuously and not be dependent on tide work.

W. N. Maxwell, representative on the Northern Aluminum Company Ltd., of Toronto, which has the contract for the supplying of wires for the hydro transmission lines from St. John to Westfield and Moncton, N. B., is in St. John and will superintend the installation of these lines. This company sends out a man to look after the erection of lines supplied by them, the intention being to see that the wires are properly strung so that there will be a minimum of failure.

Two timber berths were sold at the Department of Lands and Mines last week. There was no competition and the applicants bought the berths at upset prices of $20,000 a square mile. Pinder Lumber and Milling Co. bought ten square miles in the parish of Southampton, York County, and W. R. Walsh bought two square miles on Richibucto Road, N. B.

A. W. Campbell, Chief Federal Highway Commissioner, is in St. John this week to make a tour of inspection of some hundreds of miles of federally aided highways in New Brunswick. Arthur Dick, of Ottawa, Federal Inspecting Engineer, recently completed a tour of inspection with Chief Highway Engineer B. M. Hill which covered all the trunk roads. Mr. Dick said that the improvement shown in the roads since 1919, when he first inspected New Brunswick highways, was sufficient to silence any criticism of federal highway aid. The inspection is being made by Mr. Campbell in the autumn in order to get some idea of the way the roads are standing up under the autumn rains.

Citizens of Moncton, N. B., are proposing that this city should in 1923 have an exhibition, as it would better trade conditions very materially, and have suggested that a tract of land be secured for the purpose on which exhibition buildings might be constructed, beginning early in the new year. By this means, citizens claim, employment would be given to many who might be out of work at that time. As to financing the scheme, it is proposed that bonds might be issued, amounting to a sum sufficient to cover the expenditure which might be incurred, and a voluntary subscription in the city.

Ground was broken last week for the erection of a skating rink in St. Stephen, N. B. The building will be regulation hockey size, and the cost to be in the vicinity of $18,000. It is expected that the rink will be completed before Christmas, and that St. Stephen will be on the map as a hockey town once more. The St. John rink is about completed, and it is believed by followers of the sport that the province of New Brunswick is in for a big season in skating and hockey.

According to the federal provincial office, the unemployment situation is being considerably remedied. In September of the 1,288 emplacements in the Maritime Provinces, Moncton office placed 470, St. John 343 and 261 in Halifax, N. S. These figures show that there are less than one hundred citizens out of work in the maritimes, which is indeed a good record. This is accounted for by the activity of the various lumber companies now operating on a large scale.

Some of the latest prices quoted to the hardware trade are as follows:

Turpentine, bbls. 2.40; linseed oil, bbls., raw, 1.20; boiled, 1.50; skates, Acme No. 100 1.23; plain hockey, No. 153, 1.12; N. P. hockey No. 150, 1.26; Climax, plain, 2.10; Climax, N. P., 2.28; Regis, 2.10; Mic Mac, 3.15; tube plated, 4.20; Velox, 4.20; Regal, 3.15; tube hockey, 3.50; tube racer, 4.90: Cotton waste, 14 to 17½ cents, bale price less than bales 2 cents advance: sash cord, 60c lb. base; wrenches, Stillson 6—1.10; 8—1.24; 10—1.38; 14—1.93;—18—2.75; 24—4.00; 36—7.43. Knife handled, railroad 6—9.40; 8—11.25; 10—13.75; 12—17.50; 15—23.75. Regular 6—5.50; 8—6.50; 10—7.70; 12—9.90; 15—13.20.

Vancouver, B. C.

General Feeling of Conservative Optimism in Coast Hardware Circles

VANCOUVER, November 2.—Despite the fact that the coast district reports one or two assignments this week in addition to an extension or two, conditions in the hardware trade in British Columbia are generally satisfactory although the fruit district of the Okanagan is still very backward and dealers in that portion of the province are said to be slower than in other centres in meeting due payments. Collections are on the mend. The mining centres are ordering well, although only for immediate requirements. Some lines of Christmas goods are coming in but it is generally believed, purchases are less than normal at this time.

There is a general feeling of conservative optimism in Vancouver brought about largely by the marketing of grain from the prairie especially through this port. It is stated officially that export shipments will easily double those of last year. The exodus of prairie farmers is expected shortly which will mean more money in circulation on the coast, a portion of which is expected to reach the hardwareman. Many prairie farmers own property in Vancouver and in many instances, they leave repair work until they are personally able to supervise it.

Price changes this week, where made, were mainly on a higher basis although lower adjustments on some lines which have not been changed for a considerable time. Lower prices are due, it is said here, to economies effected at the source of production rather than a lessening in material costs.

Of the articles to be advanced are annealed and oiled wire which is up fifteen cents a hundred; Nicholson files between five and ten per cent.; enamelware and tinware eight per cent.; clay and rock picks fifty cents per dozen; mattocks sixty cents a dozen higher; and wire nails ten cents.

Several lines of aluminumware are on a lower basis which are being featured by many of the retail stores. Window glass is easier, it is said, on account of the low value of the Belgian franc. Stanley rules are down from five to ten per cent. and with the demand for lawn mowers gone, prices are easier and buyers are guaranteed against any further reductions before next summer.

Hamilton, Ont.

Active Business Now Evident in All Departments of the Hardware Trade

HAMILTON, November 2.—A gradually growing optimistic tone seems to be evident among the hardware trade, particularly the distributing end and more closely again to that branch dealing with heating equipment. One of the leading distributors told Hardware and Metal that it was evident from sales made already, that the volume would be well ahead of last October. This is easily accounted for in the increased building, all of which is requiring more appliances. Repair parts form a good share of the trade and distributors are keeping well up with the demand.

Collections are said to be gradually improving, complaints of slow accounts not being nearly as frequent as they were a little while ago. Local bankers

say they are not faced with as many requests for extensions as a year ago at this time. They regard the situation as reasonably satisfactory.

Wholesalers report active pick-up business in all departments. Regular city trade or store business is very healthy. The trade generally is busy, and the consensus of opinion seems to express satisfaction in current conditions and full confidence for the winter season. October is said to have been a good business month, and the jobbers say that from now on better results should be evident. Dealers are continuing to order snow shovels, sleds and other winter specialties.

With the price tendency still upward, jobbers are placing large stock orders and retail merchants are also buying in more liberal quantities. Retailers generally, have apparently come to the conclusion that they are taking no chances in buying quite freely now, for even if prices on some items go no higher, they feel that there is no general downward tendency. It is pointed out that there are many items on which advances have not yet been made but on which higher prices could possibly be expected because of advances in raw material, the full effect of which has not yet been felt by some manufacturers. Buying by retailers is well distributed among staple lines and a fair volume of orders is being booked for seasonal merchandise for next spring's delivery. Local retailers report a fair volume of fall buying.

In the steel situation it is noted that consumers are generally doing little buying except for prompt delivery. The effect of this changed policy is becoming marked, prices and supplies of finished steel in primary centres working towards easier conditions during the last few weeks. Transportation difficulties in some quarters promise to continue, but the fuel situation is steadily more favorable to buyers. The domestic bar product market is steady, with steel lines in general responding to the raw material trend.

In certain quarters it is pointed out that the seasonably mild weather that has prevailed has retarded to some extent the movement of winter lines. Reports from wholesale centres indicate that buying of fall needs has been fair, the volume of trade, however, recently showing steady improvement. More activity is looked for with the arrival of colder weather, combined with the stimulus of holiday anticipations. Booking of Christmas lines including plated ware, carvers, cutlery, safety razors, clocks and companion articles, is generally good and shows a decided improvement over this period of last year.

Pittsburg, U. S A.

Premiums on Early Deliveries of Steel Have Now Almost Entirely Disappeared

PITTSBURGH, November 2.—Car supplies for shipping steel products from mill have increased somewhat more, and shipments on the whole are at least fully equal to current production, while a portion of the steel previously accumulated at mill has been moved. In individual cases a mill may be unable to ship all its product, but in the industry as a whole the shipments have been running a trifle above the production. There are still some embargoes against shipments to certain points, but the embargoes are now relatively unimportant.

Mill operations have undergone no material change since late in September. Ingot production is about 36,000,000 or 37,000,000 tons a year, representing approximately a 70 per cent. operating rate in the steel industry as a whole. Supplies of coal and coke are no longer the dominant factor in regulating the production, and have not been for several weeks. In the majority of cases the state of order books is the controlling factor in operations, there being several important exceptions. One is in pipe, for practically all the pipe mills have demands upon them, chiefly for shipment against orders placed at various times in the past, in excess of what they can meet, and some of the mills are definitely allocating their shipments, in accordance with the quantities of steel the respective customers have previously received from them. Another exception is the sheet operations of the American Sheet & Tin Plate Company (Steel Corporation) which have been below the order book requirements for a long time. In this case the chief factor is shortage of steel, although there is also some shortage of labor.

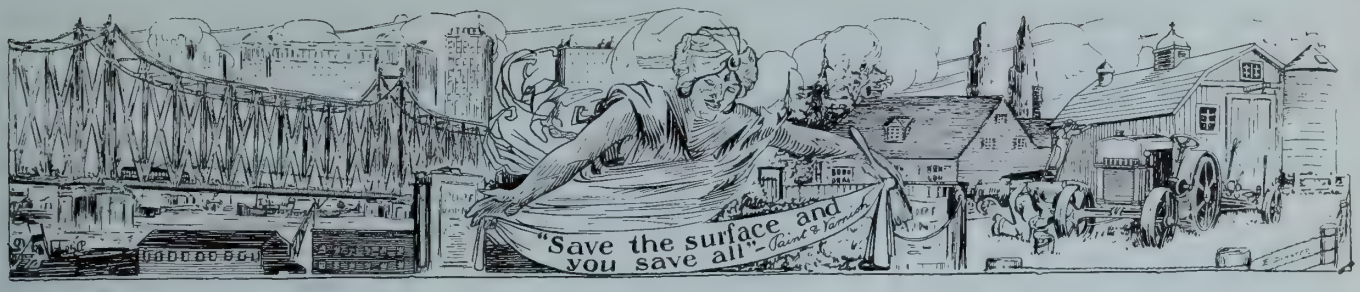
Another Wage Advance?

There are, in fact, labor shortages at many of the mills, not enough usually to restrict production, but enough to cause much inconvenience. The chief cause is the high rates bid by contractors having buildings they wish to complete within contract time or before the weather gets bad. The matter of making another wage advance, following the 20 per cent. advance that became effective September 1, has been canvassed by some producers, particularly the Steel Corporation. Action has been held in abeyance on account of the possibility that the approach of winter would cause men to leave outside employment and seek mill and furnace employment. It is commonly recognized that another wage advance at this time would be economically unsound.

The majority of the rail mills are now rolling and shipping rails against the large contracts recently booked. This business was secured by the medium of announcing that an advance in price from $40 to $43 would be made at the beginning of October, and that meanwhile contracts would be accepted at the old price, for delivery up to July 1, 1923. Previous reports as to this business did not bring out very clearly the important fact that it was stipulated in the contracts that the deliveries should be at a practically uniform rate from date of contract to the middle of next year. Thus the object of the maneuver, to obtain winter rollings, was fully accomplished. It is obvious that the idea of there being an acute shortage of steel, in general, is quite out of date, as the railroads were not anxious to begin receiving and paying for rails so soon.

Prices Unchanged

Basis prices for steel products, i.e., prices that include no delivery premium, are unchanged, and indeed there has been no particular change in them since early in September with the exception of the advance in welded tubular goods of about $4 a ton, made under date of October 19, as noted in last week's report.



Premiums on early deliveries of bars, shapes and plates have been diminishing for a month or more and in the past week have almost disappeared, for now it is only on quite small lots or very prompt shipment that any premium needs to be paid. Fairly good deliveries can be secured at the basis price of 2.00c. It is reported that, in one case, 1.95c has been done on bars.

In the matter of sheet prices there is a curious condition. Until a week or so ago all independents were on the basis of 3.50c for common black, or higher, 3.60c being obtainable on fairly early delivery, while there were instances of 3.75c being done. The week's developments include the divergent reports that one or two mills are now seeking attractive orders at 3.35c, which was the price of the Steel Corporation until it became sold out for the year several weeks ago, and that one large tonnage order has been placed at the extreme price of 3.75c, shipment in ten days. Just where the sheet market is going to land is a question.

MILEAGE CALCULATING CONTEST

Some very interesting facts have been adduced from the mileage contest, held under the auspices of the Dunlop Tire & Rubber Goods Co., Limited, at the Canadian National Exhibition this year.

The idea was to guess the number of miles the tires on the machine would run in 143 hours. Some five hundred dollars in money was distributed in prizes. The actual mileage registered on the two sealed hubodometers was 2,935, and only one contestant guessed the actual mileage, although several were close to it, including the winner of the 2nd prize, whose guess was 2,934½. The lowest estimate was 3.11 miles and the highest 1,716,000 miles. The number of guesses under 2,000 was 2,942. The number of guesses over 2,000 and under 5,000 was 7,840. The guesses received from women approximated 3,000.

Freezing Less Harmful Than Scorching

Many Splendid Arguments to be Emphasized in Favor of Painting in the Fall—Much Interior Work to be Undertaken—Some Ideas for Selling Stove Black, Silver and Gold Specialties—Linoleum Varnish, etc.—Hardwareman Gets Prospect List From City Records

A NUMBER of Canadian retail hardwaremen cash in very profitably on fall paint trade. Much effort has been expended to make this an all-year business and there are many outstanding reasons why painting should be undertaken at this time of year. Let us take a look at the ads in the layout in this section and see what arguments are being put forward by hardwaremen. McAvity's, of St. John, under the heading "Paint in the Fall," state "If you have any building that needs painting, now is the best time to do it because at no other time of the year are wood surfaces in better condition to receive paint, for the summer sun has dried it thoroughly; and another thing, rough winter weather is coming along and your property should be protected with a good coat of paint. A small investment now will save expensive repairs and deterioration that is sure to result if your buildings are left to the mercies of the elements."

With the idea of starting a "Prosperity Boom" in the local town, C. H. Horsley, hardware merchant of Castor, Alta., advertises "Help start a Prosperity Boom by making your own home show prosperity. Prosperity in any town is better shown by the conditions in which the buildings are kept than in any other way. Many beautiful homes are allowed to become old and worn looking when a coat of good paint would keep them in first-class condition and make the appearance of the town and country one of prosperity." Something is to be said for this plan because of the fact that example is a very big element in paint selling.

The illustration used in the ad by Manville Hardware Co., Ltd., Prince Albert, Sask., is for the purpose of illustrating an attitude of mind among prospects which is much to the disadvantage of the property.

Labor Largest Item in Painting

Under the heading "Now is the Time to Paint," the ad by D. W. Stothart, St. Catharines, Ont., says "The surface is now in good shape to receive the paint, the weather is settled and uniform. A coat of paint now will protect the surface from the winter weather, consequently more will be saved now than by waiting till spring. Use good paint. Labor is the largest item in cost of painting and it costs as much to apply poor paint as good paint. Therefore it is more economical to use good paint."

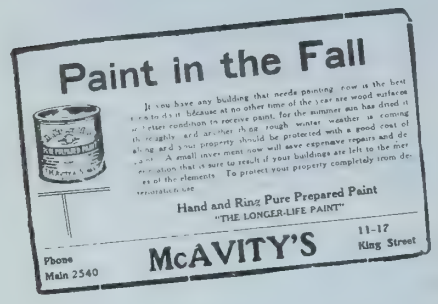
Driving home these arguments the ad by J. B. Kernaghan, Prince Albert, Sask., says "There are many distinct advantages in fall painting. First, it is as a rule excellent painting weather. There is no frost in the wood, no dampness and surface is in splendid condition to receive a coat of good paint. Once applied the paint is not subject to such blistering heat from the sun as is the case in midsummer. Remember that unpainted property that has been neglected all through the summer months is now about to face the severe test of a Canadian winter."

Advocating the buying of paint for interior work in the colder weather, J. A. Brownlee, London, Ont., says "New rooms for old. A transformation can be made in old rooms by finishing the walls and ceilings with our ready to use flat wall paint which gives a rich, harmonious effect."

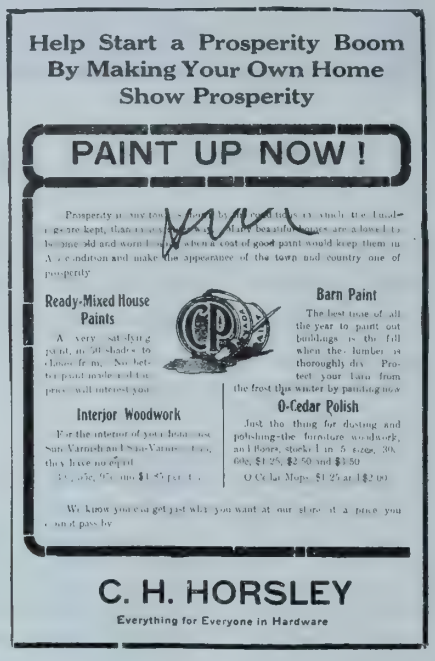
The value of using good brushes for the fall paint job is emphasized in the ad by Devine & Legree, Renfrew, Ont.

Every opportunity should be taken of driving home these ideas for exterior painting at this time of year and also of preparing for the interior painting months.

When it comes to exterior painting the dealer must convince his customer that the time to paint is now. The building of one of your customers needs painting. Perhaps you saw it as you walked to your office this morning. The thing to do is to get in touch with the owner of the building at once and point out to him the necessity of having the work done this fall.



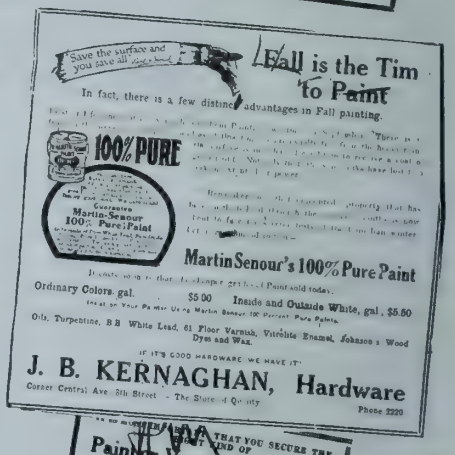
Advantages of Fall Painting



Members of the paint trade know that paint may be applied, especially to exteriors, with greater degree of satisfaction during the fall and early winter months than in the spring. The danger of putting paint on damp surfaces is well known. When this is done blistering and peeling are almost inevitable, sooner or later. Even in well-seasoned lumber, dampness is very readily absorbed, and conditions which produce dampness are far more general in the spring and early summer than in the fall. Leaks along the eaves and gutters, often caused by freezing, may not be discovered in early spring or may not be repaired then, and the moisture getting in behind the siding will lurk there for weeks. The heavy, wet atmosphere of the spring months keeps the ground damp for a long while and the building absorbs its share of moisture, and painting under such conditions is not successful.

The paint trade knows these truths, but the customer in many instances is unacquainted with them, and finds it easy to put off painting until spring. Get these facts to the customer. Teach him that freezing is much less harmful than scorching. Point out to him that gnats, moths and other troublesome insects are not so numerous in the fall, and cinch the fall business argument by pointing out the fact that no building which needs painting now should be permitted to pass through a hard winter of exposure, and a wet spring without the new paint.

Let every dealer study his own business carefully. Let him compile a list of all the fall painting ideas he can think of, and give them to his customers. If he will do this he will



Ads Deal With Painting in the Fall Months

There are a number of splendid arguments for painting in the Fall months, some of which are outlined in these ads by retail hardwaremen. The subject matter in these ads is dealt with in the article in this section.

not give another thought to "holing-in" for the fall and winter.

Paints Length of Stove Pipe

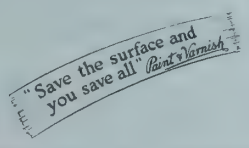
A hardwareman recently interviewed by Hardware and Metal gave some brief but timely pointers on ideas which had brought business to his store as follows:

A length of stove pipe displayed in your window, with a third of it japanned with stove black; another third with radiator silver, and the upper half with gold, suggests how these different new and attractive treatments can be given to old coal and gas stove pipes to meet various tastes. And you"ll be surprised to find the calls that will result, because most people have to be reminded of things that ought to be brightened up at home by just such forcible displays.

Notion Showcase

A show case having a "notion" interior is becoming very popular with paint stores for the sale of all sorts and sizes of brushes. A case of this character is equipped with five rows of drawers, which are removable from the rear. The contents of each drawer are entirely visible to the customer. Each drawer is labeled at the rear. The smaller drawers at the top are suitable for showing the smaller brushes, putty knives, etc., while the bottom row is supplied with removable divisions which can be taken out for the display and close inspection of whitewash "heads," etc. A case of this description is a labor-saver in any paint store for the handling of innumerable small wares.

Getting a Mailing List



"A short time ago," said a merchant, "I moved to a large city, and I had no more than got half settled before I received a letter of welcome from a paint establishment. The message told what a fine city I had selected for my future home, and extended an invitation to visit their store at the first opportunity. The house I had purchased needed a fresh coat of paint, so I looked this paint store up and, incidentally, I wanted to know how my name got on their mailing list. The clerk said: 'We get the names of newcomers to the city at the police station. Every moving concern is required to report the name of all new families whose goods they handle.'" Any paint store can send out such letters. Your police station is a public institution and you can obtain names of newcomers there.

Linoleum Varnish

The linoleum in the kitchen of hundreds of homes needs some of that linoleum varnish. Perhaps the demand for it has not been as good as you anticipated. Linoleum is mighty expensive these days. There never was a better time to move it. Advertise it at once.

PRATT & LAMBERT advertising automatically seeks out the very people who are the logical buyers of quality finishes. These reader-buyers, impressed by the advertisements now appearing in MacLean's, The Saturday Evening Post, Good Housekeeping, American and House Beautiful will feel the urge to use the brush themselves. Be stocked and ready to provide them with the products they ask for.

Weekly Paint Markets

Montreal

MONTREAL, November 4.— With turpentine quotations remaining unchanged for the first time for some weeks past, linseed oil offers the feature of the paint markets this week. Oil prices are advanced six cents on the local market in sympathy with the continued upward tendency in the flax seed market. While transportation is still admitted to be the chief factor in maintaining a firm market tone in seed here, it is noted that outside markets are also advancing, with oil, cake and meal all showing gains. Active trading in turpentine in the south is still one of the features of this market, although it is noted that buying is now restricted to smaller lots, consumers apparently looking for lower prices. Whether these will develop in the near future is considered very problematic. Present price levels may be considered high for this season, but there is no further indication of a lowering at the present time. Much of course will depend on demand and if larger consumers restrict their purchases to any great extent the looked-for recession may develop. There is still a strong tendency in resin although the market at primary centres is fluctuating a little and prices were slightly lower at the close of this week. This is thought to be only a temporary condition and any easing of prices will only be slight. White lead in oil prices are very firm due to the marked strength of pig lead and the strengthening tendency in linseed oil. Importers and distributors of window glass report a heavy call for this product at the present time. The market is in a firm position because of low stocks and only limited supplies arriving, although the Belgian market displays little strength owing to the low level of the franc.

SUBSTANTIAL ADVANCE IN LINSEED OIL PRICES

Montreal.

Local quotations on linseed oil record the substantial advance of six cents per gallon, with the flax market still displaying a firm undertone. This upward revision in oil is not at the present time quoted by all firms, but it is here stated that price levels will in all probability register a rise within the next day or so. The question of seed transportation is still an important one in this market, and owing to continued difficulties in transporting supplies from the North West, flaxseed is scarce here with little or no available stocks. Reports from other outside markets state that there is also a strong tendency ever present, with gains made during the past week. Linseed oil, meal and cake all advanced and a firm outlook is presented at the present time. Larger buyers appear interested at to-day's prices, but it is noted that their purchases are principally for meeting immediate requirements, and with a large amount of flax seed in sight in the country, and Argentine, it would seem that they prefer to await future developments before stocking up. Quotations at the revision are as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per gal.....	1 08	1 10
5 to 8 bbl. lots, per gal.	1 06	1 08

Less quantities, add ten cents per gallon.

HIGH LEVEL OF TURPENTINE RESTRICTS TRADE

Montreal.

With turpentine now at its present high level, trade locally is described as a little quieter. Quotations are for the present unchanged, with a range still noted among distributors. Although present price levels may be considered high for this season of the year, from present indications there is little or no sign of any easing in the market. The same conditions prevail at primary centres where during the week a very firm and advancing market is reported. It is noted, however, that trading in the south, while still active, is restricted to smaller lots, and consumers are now said to be looking for lower figures. Whether a turn in the market will develop depends almost entirely on demand, but any recession is expected to be of a light nature, for some weeks at least, as the market remains in a strong position. Average quotations locally are the following:

TURPENTINE—		
1 barrel lots	2 00	2 10
2 to 4 barrel lots, per gal.....	1 98	2 08
Broken lots	2 10	2 15

NO ABATEMENT IN STRENGTH OF WHITE LEAD MARKET

Montreal.

The market strength of pig lead on primary markets, and the firm position of linseed oil still reflects on the white-lead-in-oil market. This metal has been very firm for some weeks, but during the past few days substantial gains were made in prices on practically all markets. It is noted that linseed oil also records an advance of considerable extent during recent weeks. While the tendency in both these products may not affect prices on the finished product in the immediate future because of the off-season, corroders state that levels now reached give them serious thought when entering business for next year. Local quotations are $12.25 in five ton lots, $13.00 in one ton lots, and $13.35 for less quantities.

RESIN MARKET FLUCTUATES IN THE SOUTH

Montreal.

The resin market remains in a firm position, although it was noted at the close of last week that prices in the south fluctuated to an extent, and at the close a little easier tone was evident. It is thought that any easing at the present time will be only temporary, and prices will not show a recession of any great extent. Local prices are the following:

RESIN— Per 100 lbs.		
C., medium grade	3 75	4 00
Water white	4 50	5 00

ONLY LIMITED STOCKS OF WINDOW GLASS

Montreal.

With trade in window glass now reaching satisfactory seasonal proportions, the undertone of the market is strengthened by the low level of local stocks, particularly in the best selling sized cuts. Imports from overseas are limited, and have not been sufficient to meet the active demand for the past few weeks. The shortage is said to be more evident on single cuts than on double diamond, shipments which have arrived being principally of the latter. Between now and the close of navigation further arrivals are expected, but in some quarters a shortage of popular sizes is looked for during the remainder of the fall months. As stated, there is a fairly strong undertone in the market, and this is in the face of an easier tendency in Belgium owing to the failure of the franc to make any gain on exchange value.

Toronto

TORONTO, November 2.—The only price change on this week's paint market is an increase of three cents per gallon in linseed oil quotations. This rising tendency is mainly attributed to the tone of the flax seed markets. There is still a spread recorded in local prices on linseed oil, and the same thing has again developed in current turpentine quotatitons. No direct change is announced on turpentine, although primary centres are slightly

(Continued on page 54)

Are You Satisfied?

—that you are getting your share of the paint money in your town—
—that your mixed paint department is showing sufficient profit—
—that your paint business is growing from year to year.

We can offer you a full line of paints and varnishes that will satisfy you and everybody else.

We can back it with intelligent sales co-operation. We can give you a very satisfactory margin of profit. Write to Ottawa, Montreal or Toronto, or have one of our travellers tell you all about it.

Have you read G. B. Heckel on "Why Paint Peels?" It's good stuff for the paint man. We will gladly send the book to you if you will write us. Part of our plan of co-operation is to have the O.P.W. dealers know the inside history of paint and our own particular products as well as we know it ourselves.

WEEKLY PAINT MARKETS

(Continued from page 52)

easier this week, the rapid climb to higher price levels having rseulted in a restricted buying movement.

LINSEED OIL PRICES CLIMB UP THREE CENTS

Toronto.

Linseed oil prices are again higher this week on the local market, this tendency being attributed to the current flax seed movement. There is still a spread of around seven cents per gallon noted in local quotations, however, although all distributors have generally advanced figures three cents on both raw and boiled. Linseed prices on other domestic markets are also higher this week through the current strength of the flax market. The opinion has been expressed that the transportation of seed is still somewhat restricted and that slightly easier oil price levels may develop in the future as both the domestic and Argentine crop is up to expectations. Revised oil quotations this week are as follows:

LINSEED OIL—

	Per Gallon	
	Per gallon Raw	Boiled
1 to 2 barrels	1 10—1 17	1 13—1 20
3 to 4 barrels	1 09—1 16	1 12—1 19
6 to 9 barrels	1 07—1 14	1 10—1 17

Less barrels, 15 cents per gallon.

FIRMER UNDERTONE IN WHITE LEAD IN OIL

Toronto.

With pig lead continuing to record strength in primary metal markets and linseed oil also developing a tendency to climb to higher price levels, the undertone of white lead in oil is correspondingly firmer. While the period for brisk activity in this product is now drawing to a close and the current movement is consequently quieter than has been the case during recent weeks, the contribution of these factors in the current market situation cannot be overlooked. Manufacturers point out that these elements inject a very firm basis on white lead in oil, especially from the viewpoint of future production levels. Prevailing quotations are unchanged as follows:

WHITE LEAD IN OIL—
In five gallon lots $12.70 per cwt.
In one ton lots, $13.45 per cwt.
In less quantities, $1.380 per cwt.

TURPENTINE EASIER OWING TO RESTRICTED BUYING

Toronto.

Turpentine quotations are still hovering around the high mark recorded last week, but there has now developed a spread between prices quoted by certain local distributors owing to the arrival of further supplies from the south. Stocks are still described as restricted, however, and while fluctuations have occurred in southern production centres, these conditions are looked upon as temporary and the general strength of the markets, both primary and domestic, remains unimpaired.

The quieter tone which has developed during the week in the south, is primarily attributed to the disposition of large consumers to postpone buying in the hope that prices would ease from the season's high level established. The rise to prevailing figures was rapid and the cessation in the demand is generally looked upon as the natural result of the very pronounced upward movement recently in evidence. A range of around ten cents per gallon is recorded locally as follows:

TURPENTINE—

1 barrel lots	2 25	2 45
2 to 4 barrel lots	2 24	2 34
5 gallon lots	2 40	2 50

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

CALL FOR BRUSHES IS WELL SUSTAINED

Toronto.

Conditions in the brush markets remain on a firm basis, with the prevailing volume of trade described as good for this time of the year. The bristle supply centres continue to maintain the strength recently recorded, while the steady call for paint and household brushes during the season has kept stocks continually on the move.

FLINT VARNISH AND COLOR LACQUER AND ENAMEL PLANT AT TORONTO

J. J. Riley, general manager, Flint Varnish & Color Works of Canada, West Toronto, announces that in order to cater to the increasing demand for lacquers and Pyroxylin products in general, the Flint Varnish and Color Works of Canada, Ltd., have erected at West Toronto, Ont., a modern plant fully equipped with the latest machinery and devices for the manufacture of their products from the basic raw materials. Mr. Riley states that this plant will fill a long felt want of the Canadian trade who, in many instances heretofore, have had to import their lacquers from other lands. The Flint line embraces such products as Metal Lacquers, Wood Lacquers, Bronzing Liquids, Split Leather Solutions, Waterproof Belting Cements, etc. The plant has in addition, technical laboratories which are equipped to render such service to their Service Department as is necessary to demonstrate their products in a practical way, in operation, to the Canadian manufacturer.

KYANIZE SALESMEN IN CONVENTION

All members of the Kyanize sales organization were assembled at the factory of the Boston Varnish Co., in Boston this week for a three-day convention. Elaborate plans were carried out to acquaint the men by personal application sessions, with the important points of merit of Kyanize products. One floor in the recently erected factory building was devoted to convention proceedings, a part of which was equipped with individual benches for each salesman's use on which to test these products. The advertising campaign of the company for 1923 was also displayed.

TOO MANY RETAIL HARDWARE STORES

(Continued from page 29)

protecting the buying interests of their customers than they do to the selling interests of this house. In such cases, there exists a mutual confidence which is the foundation of success for both the wholesaler and retailer. The retail merchant relies upon the advice of the jobbing salesman as to when and what to buy, and can then devote his energy and time to selling. Where confidence of this kind has been established, the jobber will perform the function of buyer, that being one of the primary reasons for their existence.

"Newcomers in the retail trade in this city, or elsewhere, should get back to these firmly established principles of business relationship, for then, with the confidence and support of the jobber behind them, local competition will inspire rather than overwhelm, for the venture would be founded upon a sound credit basis with the experience of the jobbing house as a guide."

"MORE EFFICIENT DISTRIBUTION NEEDED"

(Continued from page 34)

yourself. Don't insist upon ridiculous exchange privileges.

(3) Select one good retail store which will give you reliable service and stick to it. As long as the store you select gives you good service stay with it. If consumers follow this policy they will automatically build up the desirable stores and eliminate the inferior retailers who now are sustained only by a careless, transient trade.

"I know that many people are saying hard things about the retailer just now. Much of the criticism, however, comes from those who do not understand the facts. Many retailers have been short-sighted in this period of readjustment. They have hesitated to take losses in order to keep pace with lower replacement costs. We, however, only do ourselves injury by careless and destructive criticism.

"The retailer has had tremendous problems, not the least of which have been the knocks we have given him. Most retailers are stumbling along, dazed by the rapid changes in conditions and blindly fearful of what the next season will bring forth. At present, we are on the very eve of a general business improvement, but the retailer is not in a mental attitude to prepare for it. He should be going into the fall business like a fighting cock, but instead his attitude is fearful and defensive. He should be laying in a good stock of goods to meet the increased demand and guard against a shortage later this fall. It is up to us to get behind him and encourage him. Let us cease destructive criticism and turn our efforts toward building up the retailers who are giving us the most efficient service. Quit roasting and try boosting."

Just What You Need

Sundry Cabinets

Every hardwareman in his business could profitably use one of these sundry cabinets.

For filing small parts, accessories, etc., or to contain the whole stock of screws compactly and completely, they are simply great.

They are made in any height, width or breadth you require, and the sturdy metal bodies with handsome hardwood fronts are practically indestructible. They are inexpensive too.

Write for our Catalogue.

CAMERON & COMPANY
74 LOGAN AVE., TORONTO

This skater needs C.C.M. Steel Ankle Supports

A Brisk Demand

Last season there was a good demand for C.C.M. Steel Ankle Supports. This season dealers have ordered much larger quantities, realizing the splendid selling qualities of these supports. Almost every skater needs a pair of

C·C·M· Improved Steel Ankle Supports

They support weak ankles without any binding strap across the ankle or without tight lacing to interfere with the circulation.
They relieve the strain on the foot muscles.
They improve the skating.
Even the best skaters skate better when wearing C.C.M. Steel Supports.
Easily and quickly attached to the shoe. "Blued" finish—they do not attract attention.
Many skaters will be wanting them. Have you sent in your order?

Made by the makers of C.C.M. Automobile Skates and C.C.M. Bob Skates.

TINKER TOM'S TALKS

No. 383

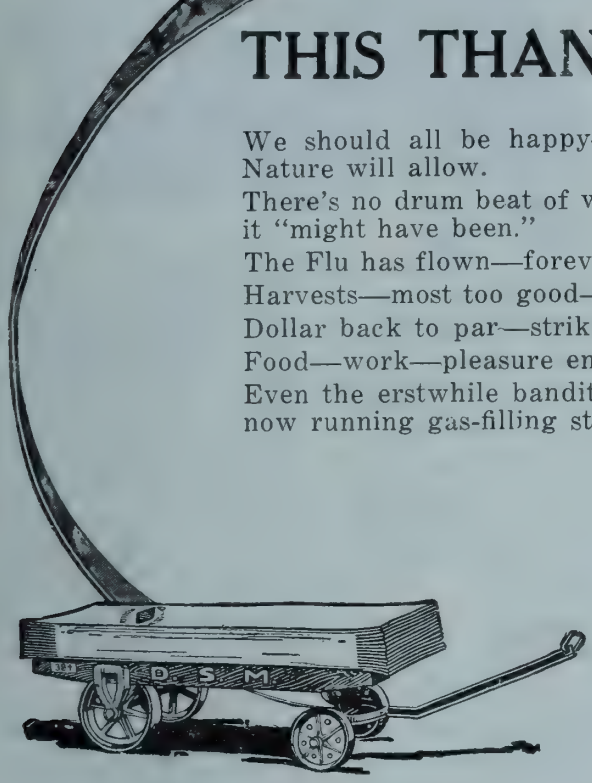
THIS THANKSGIVING

We should all be happy—or, as happy as our Nature will allow.

There's no drum beat of war in the land, and yet it "might have been."

The Flu has flown—forever we hope!

Harvests—most too good—



Dollar back to par—strikes forgotten.

Food—work—pleasure enough for all.

Even the erstwhile bandits mostly reformed, and now running gas-filling stations!

Long live Canada!

TINKER TOM

DOMINION SHEET METAL CORP. LTD

HAMILTON, CANADA.

MONITOR

Spirit Blow Lamp

British Made Throughout

Parkinson's distinguishing trade name for their blow torches, gas generating oil stoves, brazing lamps and furnaces, is

"MONITOR"

and if you wish to be assured of giving your customer the very best British Made apparatus, be sure and see that it bears the Parkinson Trade Name "Monitor" — the No. 115 "Monitor" Spirit Blow Lamp illustrated, is one of the most useful tools you could stock, for small soldering, burning off paint, thawing pipes, etc., it is almost a necessity. Write your nearest agent or your jobber for Catalog and prices.

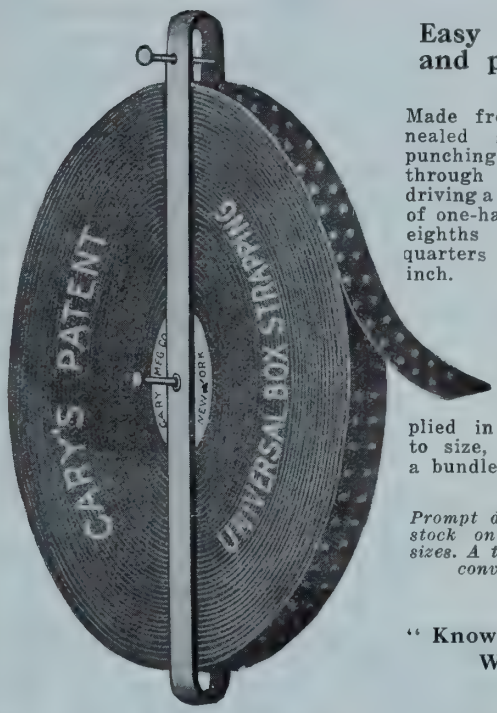
Boys' Tool Boxes
A Real Gift For A Real Boy



These are real tools for real work, built for service—not toys. These tool boxes to be had with or without tools can be displayed, with profit, in your gift section.
Our holiday lines include tea trays, smoker's trays and stands, children's desks, kindergarten sets and blackboards. These articles are not children's playthings but sturdy, serviceable things for boys and girls of "teen" ages and ideal Christmas gifts.

Write for Catalogue "D."

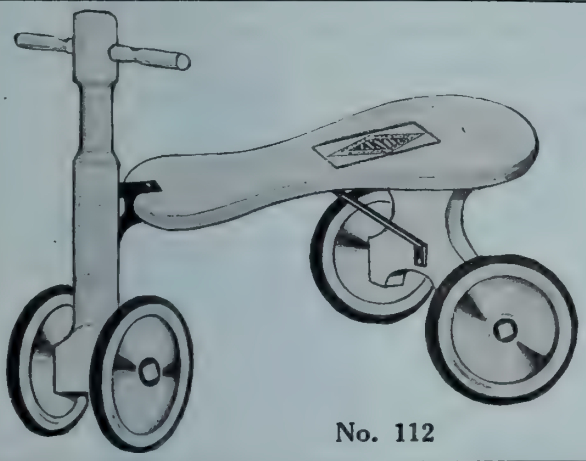
CARY

"Universal" Box Strapping

Easy to stock and profitable



Made from soft annealed steel; no punching of holes through strap before driving a nail. Widths of one-half inch, five-eighths inch, three-quarters inch and one inch.

Put up in reels of 300 feet each; packed 20 reels to case. Also supplied in lengths cut to size, 100 pairs in a bundle.

Prompt delivery. Large stock on hand of all sizes. A trial order will convince you.

"Known the World Over."

CARY MFG. CO.,
Manhattan Bridge Plaza, ***BROOKLYN, NEW YORK***

No. 112

Where the name "Wakyte" appears there is Perfection of Workmanship

We manufacture Buster Cars, Pony Cars, Shoofly Rockers, Wheelbarrows, etc., and have made it our business to see that the best possible service is given for the money expended.

The Wakyte Buster Car illustrated, is equipped with four pressed steel disc wheels and rubber tires. The body is artistically finished in Canary Yellow-Enamel, wheels in Vermillion Enamel. Shipped three to a crate.

When writing us ask about the "Comfort" Weather strip made in Quarter Cut Oak. Set consists of two pieces 7 ft. and two pieces 3 ft. long.

Where Quality and Price count the "Comfort" Weather Strip must appeal to all Buyers.

S. H. Whyte Mfg. Co., Limited
Winnipeg Manitoba

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Subscription price for HARDWARE and METAL is $4.00 per year or less than eight cents per issue.

Why Hardware and Metal Dominates Western Canada

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg, Calgary and Vancouver.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London, St. John, Hamilton and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing." Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Member A.B.C. **HARDWARE & METAL** *Member A.B.P.*

Canada's National Hardware Weekly Since 1888

143-153 University Avenue, Toronto, Canada

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Montreal Branch, Southam Building **Winnipeg Branch, Federation Life Building**

UNITED STATES OFFICES—New York, Room 1606, St. James Building, 1133 Broadway, (corner 26th Street; Boston, Room 734, Old South Building, Telephone Main 1024; Chicago, 406-6 Transportation Bldg., 608 South Dearborn St., Phone, Wabash 9430.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

A wonderful product that is part of Canada's own history

Brandram's Genuine B. B. White Lead has been the standard for almost 200 years. In the eighteenth century it was first introduced into Canada by the early English Colonists and it has survived through succeeding generations, who saw the growth of Canada's towns and cities and the establishment of our wonderful farming territory.

To-day this world famous White Lead is manufactured in our own modern factory from the same formula employed by the original Brandram in 1729.

Buying Power!

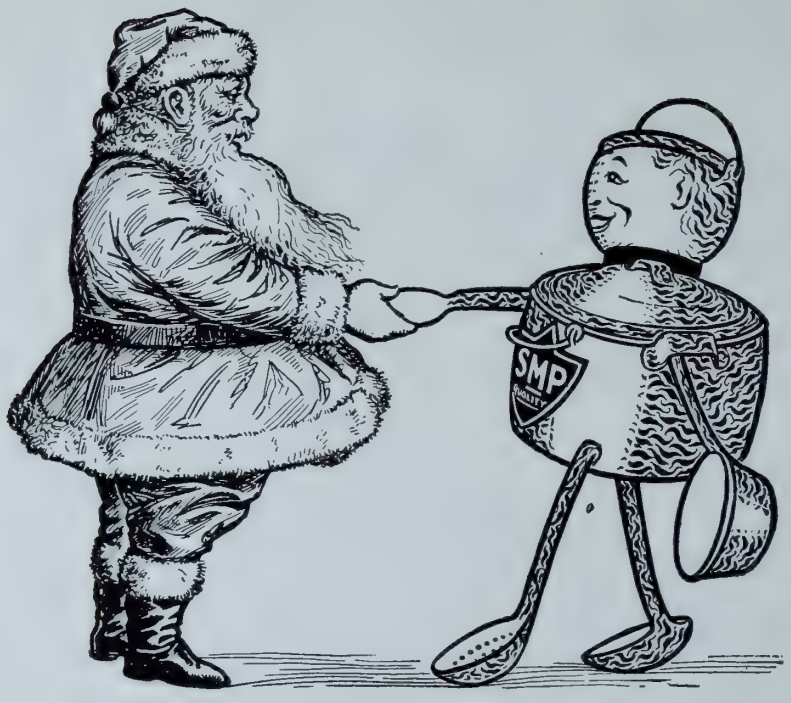
THE farmer has his face turned toward brighter, better times. Up goes his buying power.

Those fence renewals of his have been postponed many a month now. The old fences are getting pretty bad—can't be put off much longer.

Many a man is going to congratulate himself upon being a Frost dealer! There's a harvest of sales awaiting the "go getters."

Big business ahead! But don't leave it to the farmer to cultivate your market.

Now is the time to prepare him for the fine new Frost fence you are going to sell him in the spring—**NOW!**



Keep on emphasizing the unequalled Frost advantages—the famous hold-tight lock—the extra heavily galvanized wire—waved laterals—easy erection—low cost up-keep—the most economical, tightest, tidiest, handsomest fence to be seen on any countryside, anywhere!

"Let's Get Together"

Mr. Hardware Merchant, have you realized the big Christmas selling possibilities of the **SMP** line?

In thousands of Canadian homes husbands and wives will be exchanging gifts of practical household value at Christmas time this year. You are in a position to reap profits from this business if you will introduce the Santa Claus of your district to your display of **SMP** wares.

Suggest to the older couples that they replace and replenish their old set of cooking utensils by purchasing a set of cheery new **SMP** Pearl or Diamond Ware pots and pans.

Ask the newlyweds if the utensils received as presents at "showers" make a complete set, and offer to fill in the missing lines with Pearl, Diamond or Crystal Ware utensils.

We are behind this plan with strong Fall and Christmas advertising in newspapers all over Canada. The idea is there. It is just up to you to develop and make a real thing out of it.

Let's get together and put it over in thorough fashion. Use your windows to display Diamond, Pearl and Crystal, give it a good show in the store and talk it to your customers.

Straight Talk to the Dealer!

Here's a new kind of gun advertising—Advertising that tells the consumer the many advantageous features found in Marlin guns.

Advertising that makes gun sales for the dealer. Advertising that in a good, clear, concise way gives your prospective customer information which enables him to intelligently decide just the gun he desires.

This means more sales for you—We are telling millions of shooters through our advertising of the superiority of Marlin guns. They will know we make the best guns in the world; that Marlin guns are sold by live dealers at prices they are glad to pay.

The Marlin is the complete line of modern, practical firearms—made in the popular sizes.

The Marlin line has no old-style top-ejecting firearms—Marlin invented side-ejection. The **superior design** and the **highest quality of workmanship** always found in Marlin arms, speak for themselves.

The wonderful accuracy of Marlin rifles has been recognized for years, and Marlin shotguns have won State, National and International Championships.

All Marlin guns are fast-handling, hard-hitting, long-range guns.

Over 50,000 prospective purchasers of Marlin guns have written us for information on the Marlin line.

Every one of these inquiries has been referred to a dealer in the locality in which the inquiry originated. This has resulted in the sale of thousands of guns—but it is only one feature of Marlin sales co-operation.

Write us today for full information on Marlin dealer helps. Get your firm name on our mailing list to get the latest on Marlin guns.

Model 20 Model 38 Model 39

Buy a Gun You Will be Proud to Own!

The men who know guns are buying the **new** Marlin guns—because we have used our years of service and knowledge of shooting requirements to develop the most up-to-date guns in the world!

Marlin

.22 Repeating Rifles

There are 50 years of tradition behind these Marlin rifles—50 years' experience in making the best in sporting firearms.

50 years of development—consequently there is not an old-style gun in the entire Marlin line. **Marlin invented side ejection in firearms**—Marlin discarded all old-style top-ejecting guns 30 years ago.

The fundamental requirements in a .22 repeater are: Accuracy—the Ballard rifling has made Marlin accuracy famous; **good sights, to get full benefit of accuracy**—Marlin .22's are the only repeaters regularly furnished with the superior Ivory Bead sights; **side ejection,** the modern construction—all Marlin rifles and shotguns have side ejection; **standard 24-inch barrels**—we make no guns with stubby, sawed-off barrels.

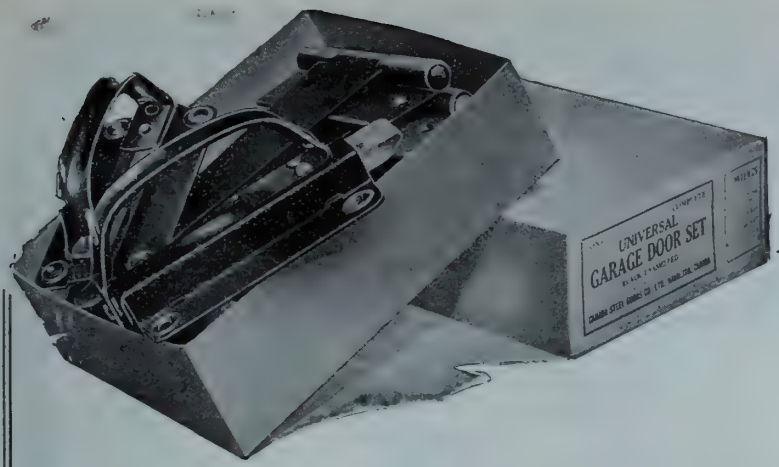
You need standard length buttstocks—no short length, cheap-looking buttstocks are used on any Marlin guns; **the rifle must be a take-down,** for convenience in carrying and cleaning—these Marlin repeaters have the quickest take-down constructions, action parts remove instantly without using tools, the barrels can be cleaned from both ends.

You will want to use .22 short cartridges up to 50 yards; .22 long-rifle up to 200 yards—all Marlin .22 repeaters use, interchangeably, .22 short, long and long-rifle cartridges.

Model No. 20—a man's size repeating rifle with full 24-inch octagon barrel, full length buttstock, Ivory Bead Sight, 25 shots. **Slide action and visible hammer.** Retails at a reasonable price.

Model No. 38—The wonderful new slide action repeater; **Hammerless; Instantaneous Take-Down, Ivory Bead Sight, Full Pistol Grip Buttstock. Perfect build and balance.** Retails at reasonable prices.

Model No. 39—**The only .22 Caliber Lever Action Repeater made.** The choice of expert and professional shooters. **The best .22 Rifle in the world.** Retails at a reasonable price.



Any dealer can supply you—give us your dealer's name. Send now for new illustrated catalogue of all Marlin repeating rifles and shotguns—free.

Westinghouse

Electric Ranges

Westinghouse Type MH Electric Range

An Idea that has met with success

A certain dealer hit upon a real idea for boosting the sale of Westinghouse Ranges.

He went to the high school, normal school and university in his town and succeeded in placing a Westinghouse Electric Range in each. As the domestic science courses in these institutions taught the latest ideas in cooking, these sales were not difficult.

Each girl who used the electric range soon found that the Westinghouse way was the only way to cook. She naturally told her parents about it.

In a few years when she has a home of her own, she will, of course, want a Westinghouse Range for herself.

Why not use this same idea to stimulate your sales of Westinghouse Ranges?

PLYMOUTH ROPE ECONOMIES

PLYMOUTH Rope can be purchased at prices that insure unequaled economies in rope expense as compared with inferior grades of rope which are being offered on the market at lower prices.

For nearly 100 years Plymouth has been the recognized quality rope. No rope has ever surpassed it in these three essentials:

Quality of Raw Material
Expert Workmanship
Knowledge of Rope Construction

Place your Plymouth Rope order for Spring shipment with your jobber now.

ALLIGATOR

TRADE MARK REG. U.S. PAT. OFFICE

STEEL BELT LACING

Why Men Change to ALLIGATOR

Strength comes first in belt lacing. Then follow: durability, ease and speed of application, efficiency in service, range and cost.

Alligator is the Strongest Belt Lacing on Earth—and the most permanent. It is applied with a hammer in an average time of only three minutes.

Mechanically perfect because it binds the long burden bearing belt fibres in equal service. "Every Tooth A Vise." Rocker steel hinge pin endures in any service where the belt will run. The finished joint is flexible, separable and smooth on both sides.

There is a size for every thickness of belting and the price is so reasonable that **its use immediately becomes an economy.**

If you are not using Alligator now, write us for sample and our interesting book "Short Cuts to Power Transmission." A trial of Alligator will be no less convincing than an analysis of its points.

Sold through "Jobber-Dealer" trade channels the world over.

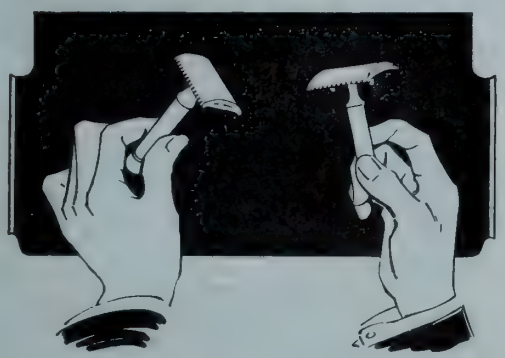
MAKE Your Happy Christmas



Says the Wise Old Owl

Each sale of a Gillette Safety Razor starts a whole cycle of constant repeat orders, with a minimum of selling expense—

first, the periodic and profitable sale of Gillette blades—

at intervals, a shaving brush—

and the thousand and one different articles on which the customer's eye may light when in your store.

On Christmas morning thousands of men will awaken to the ownership of a New Improved or Gillette Brownie Safety Razor—

There will be thousands more Gillette enthusiasts—boosters of the razor—future buyers of the blades.

Will you wake up to the comforting assurance that you have gathered in your share of the Christmas profits—got them tucked away in the bank—

That you are in the swim for the 1923 business on blades and other shaving kit.

Now is the time to make your happy Christmas—to tie up with the big Christmas advertising campaign that is starting, to stock up on Gillette razors, boost them at every opportunity and give razors and blades a prominent place in your window display.

We quote again from the reply of a Gillette dealer, when asked several months ago, when ordinary business was at its worst, about his Gillette sales: "100% *better, I pushed harder.*"

When Father Carves That Holiday Turkey

DON'T let him go at the job with a dull knife that will mess up the bird and cause him to swear like a golfer.

Sell him a Carborundum Knife Sharpener.

Two or three strokes and his knife will be keen—off will come the clean, nicely cut, savory slices and carving will become a pleasure.

And right now is the time to get in your stock of these sharpeners. The big jobbers have thousands of them all put up in the handy display boxes—and so have we.

There is a chance for you to put one of these sharpeners in every home in your community because it makes every household knife a sharp knife.

Holiday cutlery displays will soon be attracting buyers to your windows.

Be sure that you show Carborundum Knife Sharpeners along with Carving Sets and Household Knives.

A Library on Investing That Cannot be Duplicated

Announcing a Series that Every Canadian Investor will want to Read.

There are books for the American investor and books for the British investor. But none of them answer the problems of the Canadian investor—problems that you meet with.

Realizing the need of investment literature that gets down to Canadian fundamentals THE FINANCIAL POST is starting a weekly series of articles on investment. The articles will be fundamental rather than elementary. You will be told what you want to know about bonds, stocks, mortgages, insurance. Reading these articles you can avoid loss on unsound investments; and get the largest income from your savings. You can adjust your personal finances to give yourself the sense of security that comes from prosperity and lack of worry.

These studies will be a valuable contribution to the financial and investment literature of Canada. Read them weekly in THE FINANCIAL POST.

They are just one additional reason why you should subscribe to-day for THE FINANCIAL POST. Already it is the dominant investment paper in Canada with over 9,000 paid subscribers, including leading retail merchants from coast to coast.

Fill in the coupon to-day and get the first of this valuable series of investment articles on the A. B. C. of Investing. You want facts, truth, guidance. THE FINANCIAL POST gives them to you.

An Organization that helps you Build

Firestone

Permanent and Satisfactory Business

With the opening of the new Firestone plant at Hamilton, Ontario, the Firestone product and policy become an even greater asset to the tire dealer who is planning both for immediate growth and permanent business.

The name Firestone has always been an asset in selling tires, for it is more than a mere name; it stands as the signature of a man at the head of the great Firestone organization. So, for more than twenty years, the name Firestone and "Most Miles per Dollar" has been synonymous with the utmost in tire values.

The Canadian Firestone organization is building, to-day, a complete and balanced line of cord tires, fabric tires and inner tubes.

Firestone dealers are in the unique position of being able to supply their customers' needs for 3½" tires by carrying three types of tires only, and the increased production made available by the new plant places Firestone prices on a level no higher than that of ordinary tires. This gives the Firestone dealer the advantage of being able to offer both quality and price.

The sooner you start building your business the Firestone way, the sooner you will find your business profitable. Ask your Firestone distributor about our spring dating plan, or write us direct.

Opportunity!—

It knocks at your door not once but every two weeks. Are you missing it—or is your plumbing department reaping the benefits from the bi-monthly copies of Sanitary Engineer?

A number of Special Features, commencing with the November issues, will make Sanitary Engineer this Fall even of more assistance to sanitary and heating engineers. Some of the articles will be:

"Selling the Farmer on a Pressure System"

An illustrated article will appear in November 1 issue giving all details as to how a London, Ont., plumber is building up a large and profitable trade in pressure water systems for rural use and also in the kitchen, laundry and bathroom fittings which go with such installations. The farmers have gathered one of the biggest crops in history and will be in a more receptive frame of mind for such valuable installations as this.

"House Drainage and Sewage Disposal"

A number of installments of this much talked of series written exclusively for Sanitary Engineer by Major Johnstone-Taylor, a thoroughly qualified British engineer. He deals with latest developments in these fields in the old country and there are many ideas which Canadian operators can employ to advantage.

"Developments in Heating Practice"

A new series of articles is being arranged for by an outstanding authority on the latest developments in heating practice. He will also undertake to answer any problems which readers may raise in connection with heating installation troubles.

"Cashing in on Opportunities in Gas Field"

A series of articles will be commenced this fall written by an authority on gas heaters, dealing with their installation, maintenance and answering problems arising in connection with their maintenance.

And Most Important of all—"Markets"!

Do you follow the market price fluctuations of your staple supplies? Do you take advantage of a favorable market to buy in? Do you know what the saving is between haphazard buying and buying at the right time?

SANITARY ENGINEER Price Quotation Section will inform you twice monthly of market conditions and will place before you quotations on all your supplies.

Sell this Better Range

This new range is different from any range you ever saw. It's new—it's better—it has features never shown before in any range. The two fine big ovens are 16x18x12. The one to the left is heated by the fire; the other by gas. The gas top has four burners; a perfect cooker and baker.

Put this Range on Your Floor

Put this range where your customers can see it—it has so many points of merit that it practically sells itself. The top size is 50x24 — no larger than an ordinary coal range fitted with a reservoir. The fire box is of standard size.

This is the only combination of its kind on the market—and it sells for little more than a good coal range.

Your nearest branch will quote you prices and give you all other particulars.

And the same quality is maintained that has made our Stoves, Ranges and Furnaces famous from one end of Canada to the other.

None Sheds Its Bristles

The most annoying thing that can happen with any bristle brush is to have the bristles come out. When the Rubberset Company invented and perfected the method of setting bristles in vulcanized rubber this brought about the greatest step forward in the art of brush-making.

No matter for what purpose a Rubberset brush is designed—none sheds its bristles.

This knowledge spread, and now brush-buyers the world over know that the trade mark "Rubberset" is a guarantee of economy—service—and satisfaction. That is why Rubberset Brushes sell quickly and give your customers the service that brings them back to your store **again.**

"Retailing Not Our Function"

Says Head of Co-operative Store Chain

THE CLOSING of the retail store of the United Farmers' Co-operative Company on King Street, Toronto, following immediately upon the closing of stores at Harrowsmith, St. Thomas, Dorchester and Plattsville, Ontario, marks further progress in the policy which H. B. Clemes, general manager of the organization is following, viz., the closing out of all unprofitable retail businesses with the probability of all retail stores being dispensed with in the future.

Discussing this subject with Hardware and Metal, Mr. Clemes pointed out that out of the thirty-eight retail stores which were being operated by this organization, eight of them have now been closed. Up until the time Mr. Clemes took charge of the organization no accurate records had been kept. Since that time quarterly reports have been made by each store comprising record of business done and an inventory of stock on hand. With such information in hand it has been an easy matter to note what stores were on a profitable basis and those which were not. On the basis of information supplied by these records the stores which have been consistently unprofitable have been closed. Another of such records is now in course of preparation and further stores are expected to be closed as result of the information set forth in it.

Retailing Not Their Function

Mr. Clemes did not hesitate to state that retailing is not the proper function of the United Farmers' Co-operative Company and that this end of the business will gradually be closed out. The function of the organization was to market the farmers' produce. In the case of binder twine this will continue to be sold by carload lots distributed through farmers' clubs. Many of these stores have handled hardware and practically all carry stocks of leather gloves and mitts. With the closing out of the retail stores an attempt is being made to supply the farmers' wants to some extent through the medium of a catalog and through the use of the C.O.D. parcel post system recently inaugurated. Mr. Clemes stated that it was not to be expected that the business formerly done by the retail stores would now be done by parcel post, but this was a service extended to those who desired to take advantage of it.

Advantage in Buying

The reasons underlying the failure of a number of the U.F.O. stores could not be definitely stated by Mr. Clemes. Each store was under the direction of its own manager who did certain buying locally, particularly in perishable goods. The bulk of the stock was secured through the head office of the organization in Toronto where the buying was controlled. Mr. Clemes states that his organization were accorded jobbers' terms by the great majority of manufacturers and that such goods were invoiced out to the retail stores of the organization at 5 per cent. advance on cost. By this method these stores were given a considerable advantage in buying over competitors who bought from wholesalers and who were forced to pay the added margin representing the wholesalers' cost of doing business and margin of profit. Buying at such prices enabled the U.F.O. stores to undersell their competitors in most cases, yet despite this fact many of them have been shown to be unprofitable. Steps had been taken to establish "standardized" stores so that the advantages of uniform stock location, accounting, display, etc., would be secured as is the case with other chains of retail stores. Despite this some of the stores were unprofitable.

Why Stores Failed

An investigation of the reasons underlying this condition in some centres where U.F.O. stores have been closed indicates that in certain cases the stores were poorly located, in others the shareholders themselves would not support the co-operative store, in still other cases the manager of the store may not have been altogether popular due to his personality or manner of conducting business. The story is told that in some cases a farmer member of the U.F.O. would come to town and take a quantity of perishable produce from his farm and sell it to the U.F.O. store, then go to the other established retail stores in the town to purchase his requirements. Old established connections with other retailers was responsible for this condition.

"No, our chain store system could not be operated satisfactorily," said Mr. Clemes.

The store in Toronto which has just been closed has been in operation since 1918. This was the first and, as Mr. Clemes plans, the last U.F.O. retail store to be operated in that city and in most other centres. The mail order business and other work of the organization is being done at new quarters on George Street, Toronto.

Outgrowth of Farmers' Clubs

The U.F.O. stores were really an outgrowth of the farmers' clubs which were commenced many years ago to pool buying of merchandise in order to secure lower prices. This was particularly successful in centres served by railways where a carload of certain supplies could be brought in and opened up and each farmer take his share. The effort to extend this plan to all lines of merchandise and to undersell competitive retailers in a general retail business, has evidently met with failure in many cases and is distinctly in the disfavor of the present directing head of the organization.

Mr. Clemes stated it was a little early to discuss the binder twine situation for next year, but that the exchange would not be as much in their favor in the purchase of twine from Ireland as it was for the past year's trade. It will be recalled that full details of the purchase of these supplies from Ireland were given in Hardware and Metal last Spring. It is understood that this trade was highly satisfactory both from

Big Problems Facing Distributors

Wide "Spread" Between Manufactured Cost and Price to Consumer Hindering Development of Business—What Happened Where There Was Too Much Competition Between Stove Manufacturers—Says Chain Store Idea is Sound

By O. D. STREET, General Manager of Distribution, Western Electric Co., New York

EDITOR'S NOTE: There are many and varied problems facing the distributors of hardware and other merchandise today. A great deal of attention has been paid to production and too little to distribution. Now that restricted immigration and curtailed buying power makes it difficult for the machinery of distribution to function in proper relation to production, many difficulties in doing business have arisen. The retailer is faced with the problem of having to secure a price representing a large "spread" between manufactured cost and price to consumer; chain stores and other mediums of distribution are developing along lines designed to meet the situation. All engaged in the distribution of merchandise cannot survive as only a limited number will meet the demands for increased efficiency. This is why the situation should be studied thoroughly. These are but a few of the points dealt with in the following article by O. D. Street, General Manager of Distribution, Western Electric Co., New York.

OF THE many complex problems confronting our business men to-day, there is none, if we may judge by current literature, which is more baffling than this question of distribution.

Publishers tell us that approximately 80 per cent. of the books and pamphlets which have been written on business questions during the past three years have dealt altogether, or in the main, with the distribution problem.

Let me say at the outset that I propose to take no time arguing the question as to whether or not there is a place in our business for the middleman. I am aware that volumes have been written on that subject, but I assume that we are of but one mind in recognizing that in a country such as ours —a country dotted as this is with thriving, growing cities and towns throughout its length and breadth, and with all these growing trade centers connected by that most highly developed system of communication and transportation possessed anywhere in the world, under such conditions, there can be no doubt as to the need of middlemen.

Millions of our consumers derive their sustenance from agriculture and mining — the sources of our basic raw materials. It is inconceivable that the necessities and luxuries of life, which are purchased by these millions of consumers — workers in the basic industries — can be moved economically from the industrial centers, where the finished product is made, to the small cities, country towns, farms and ranches without employing, in the process, distributing facilities offered by middlemen.

Not Essential to all Activities

However, to say that the middleman is a necessity in our economic life is something very different from saying that the middleman is a necessary link in the distribution of every commodity or is a necessary agency for disposing of the output of every factory. The middleman is not essential to all these, and middlemen as a class hurt not only their just claims for recognition, but they place themselves squarely across the path of industrial progress by contending that they are an essential link in the distribution of all things. The sooner middlemen perceive what their true functions are, and then devote all their skill in performing these functions well, the better it will be for them and for all of us.

Contrary to what some seem to think, there is no social movement developing which, by its momentum, will eliminate the middleman. But there is, and rightly so, a rapidly growing demand that the waste incident to present methods of distribution shall be eliminated. Any established trade channel which can prove its efficiency will survive, otherwise it should and will fail.

Distribution is too often thought of, not only by the public at large but sometimes by the distributors and producers as well, as being a standardized method available for use in the process of transferring commodities from the factory to the consumer. As a matter of fact there is no such thing as a standard plan by means of which commodities may be distributed most economically. Instead of there being one right way of marketing, there are many ways. What the right way is for one producer can and must be determined by the producer — not by chance, not by rule of thumb, but as the result of a comprehensive, intelligent analysis of his own problems and products.

Such an analysis may not prove that it is wise for a given

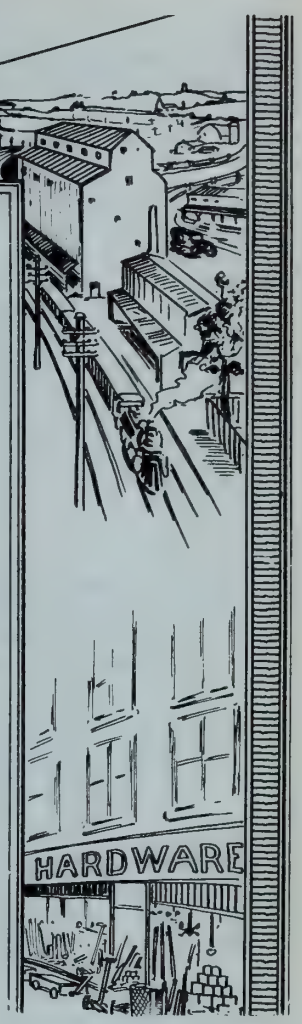
manufacturer to sell all his products direct to the consumer, nor will it of necessity prove that he should work through wholesalers in marketing all his lines. Instead, it may prove that, for a manufacturer who is not making just one thing but many things, the best plan would be to work directly with the consumer on one or more of his commodities, to go direct to retailers on others of his commodities, and to work exclusively through wholesalers on still another group of his commodities.

I have heard it said that about 80 per cent. of our merchandise is sold by the makers to wholesalers who in turn supply the retailers. A smaller percentage is sold direct by the makers to the consumers. All these methods are good and will continue to be employed. Which method to use is the problem each producer must decide for himself, and the problem will be solved first by those concerns which possess a type of a management wherein is to be found the searching mind, and wherein lies the will to find the correct answer. What we want is the right answer, and to get that answer with the least possible expenditure of time and money. I have not the whole answer — no one has — but we do know certain necessary vehicles which must be provided, necessary tools which must be employed, by him who has the will to search out the right distributing principle to be applied in the conduct of his individual business.

Among the more controlling factors which must be considered by each producer who would get the right answer are these:

1. THE NATURE OF THE PRODUCT:—A large steam engine should be sold direct to the user, whereas hair pins, to be marketed economically, must be sold to wholesalers and possibly to large retailers.

2. THE NUMBER OF CUSTOMERS SERVED:—A few users, even though these may be widely scattered, can usually be served best by dealing directly with the factory, provided the money value in each sale is large. A great many customers scattered all over the country can, as a rule, be served best through jobbers, particularly if the value of each sale is relatively small.



3. THE APTITUDE OF THE MANAGEMENT:—Some executive families are experts at production, but ought never to try distribution. The two require quite different commercial characteristics, and management should know its weaknesses as well as its strength.

4. THE FINANCIAL RESOURCES:—Where capital is limited, it is often preferable to use all that is available in production rather than to skimp on plant, tools and other instruments of economical productions in order to carry the capital obligations involved in distribution.

Too Many Sell Direct

At the present time too many concerns are selling their own products direct which would be better off if they worked with jobbers. There are also too many of another class which would be better off if they cut out the jobber and dealt direct with the retailers and consumers. By the same token, there are jobbers who would be better off if they limited themselves to those items which they can handle better and more cheaply than the factory, and not try to be all things to all men.

The reason why so many uneconomical methods of distributing are employed today is because so little is known, even by the most expert, of what it costs to sell and distribute merchandise. The monthly or annual costs of distributing all the products of a mill, or all the lines of a jobber, are known, but while these figures tell us how much money is made or lost on the entire business they do not tell us how this money is made or lost. How antiquated is such a condition in production activities! Methods are available today, as a result of the development of the accounting art, which will show us almost exactly what it costs to manufacture each item and each piece part in an item, but there is scarcely a concern in the country which knows what it costs to sell any one of its articles, unless it makes only one article, nor a concern which knows what it costs to sell to any one of its customers. A knowledge of what it costs us to sell each article we make, and what it costs us to do business with each customer we serve, is a prerequisite for determining whether we can distribute those articles and serve these customers cheaper and better than we can hire the work done for us. The facts must be determined by the producer — by each producer for himself — as he alone can get at the facts.

It must be clear to all of us that he who would go further into his distributing problems must first of all find out what his present methods of distribution cost him. I venture the prediction that a study of this sort will prove to many executives that many commodities which they have thought were highly profitable will be found, at least under the methods of distribution now employed, to be money-losers rather than maney-makers. It may well be that even after that knowledge is secured, management will still feel that it must continue to sell these articles because they are necessary to complete the line. However, the chances are that the method of selling these things will be changed, else less money will be spent in attempting to sell them.

Little Science Applied to Distribution

Business is far from being a pure science. It is a science, nevertheless, but the trouble with business men is that they have confined their scientific research largely to the field of production, and have applied little or none of it to the problems of distribution. As an inevitable result, the superior skill which has been applied to production problems has caused production efficiency to get far ahead of distribution. The production skill which industry has developed has gone out and started competing factories until today we find ourselves confronted with a situation where the capacity to produce, and to produce skilfully, in most industries, vastly exceeds the country's capacity to absorb — at least to absorb at the prices now quoted to the consumer.

Why is it that the price is so high that more commodities cannot be sold? It is not because the maker, the middleman, the retailer or anyone else, except in isolated instances, are profiteering. The answer is twofold: In the first place, it is because the new competing factories turn out no more or as many units than did the original factories hence, as a rule, they do not produce at a lower cost; in fact, too often the tendency is to make production costs rise, since the new competition, rather than to dispose of its products by creating new markets, usually cuts into the business held by the older factories. In the second place, new producers, in order to

market their products, often appoint a separate group of wholesalers and dealers, and these in turn cut into the business done by the old established distributors. At first, competition—one maker with his distributors fighting to hold their business, another group fighting to get this business away from them — may and often does tend to reduce the price to the public. Soon however, the heat of contest cools. Each organization decides to add the increased overhead cost incident to a lower volume of sales into its selling price, so it is passed along to the public. As time passes, still more producers enter the field to share the new business and divide the old, and these, in turn, create new distributors whose competition tends still further to complicate the situation and add to the ultimate cost of the product.

This sort of thing, in its effect on prices, is bad enough as it is, but what would have happened long ago if the rapid growth of our population had not caused consumption to increase tremendously?

Buying is Restricted

Just at present the domestic consumer is not buying as much as he did, for his income is less; then again, we are restricting immigration; and furthermore, due to conditions abroad, our exports, which we have been accustomed to look to for absorbing our surplus production, are relatively low.

Producing and production capacity, distribution and distribution facilities, have all multiplied during the last ten years, and now in spite of the reduced demand, all are trying to make a living, and nearly all are finding the going pretty slow. All cannot survive, and it is not to the interest of the public at large that all should survive. The early "forty-niners" made a go of it by panning for gold by hand; today the picking is thinner, and more efficient methods are employed.

This situation we are in would indicate that, for the good of the public at large, too much competition may well be as bad as too much monopoly, for it is a recognized fact that mass production, up to a certain point at least, is required in order to effect low production costs. Too much distribution, that is too many middlemen, is just as bad, for a low volume of sales increases the distributing expenses per unit sold just the same as at the factory, a small output increases the costs per unit produced, and in both instances there is the natural tendency to pass the increases on to the consumer.

There can be no doubt as to what all this hue and cry we hear today about distribution and present distributing methods means. It means that public opinion — that same sort of public opinion which when aroused says what shall be our political life — is today, in our commercial life, becoming synchronized. Our people in general do not readily get excited over either political or commercial questions. But if the time comes when failure to act on the part of those whose duty it is to act stirs the patriotic conscience or drains the pocket-books of an appreciable percentage of the people, then it behooves the politicians or the merchants to act, and act rightly.

What of the Man in the Street

The man in the street is not a statesman nor is he an expert on business problems, nevertheless he does love his country and he loves his home and kin. Because of these twin loves, he is bound to demand and sure to fight for that which promotes their interest and welfare. He does not know what is wrong in the business organism, and not being an expert, he cannot find the answer, but composite public opinion, of which his thinking is a part, is going to insist that management find the answer.

All he knows is that he has gone to a retailer to see if he can buy a certain labor-saving device for the home, which he had wished to procure for his wife in order to relieve her of some of her drudgery. The price quoted was $125, and in spite of his good intentions, he has decided he cannot make the purchase, as he is unable to afford so great an expenditure.

Upon getting home that night, he is told by his son, who works in the cost department of the factory where the device is made, that the factory cost of that device, including labor, raw material, and all overhead, was but $50. "Why," he asks, "must I pay $125 for an article which can be made for $50?"

Because he is not familiar with the ramifications of commercial transactions, he assumes someone is profiteering. The retailer assures him that it is not he who is profiteering, but agrees with him that the price is too high, and insinuates that the trouble lies with the middleman and the producer. The middleman in turn admits that the price is too high, yet tells him, and as a rule truthfully, that he has made no net profit out of the transaction and that if anybody is profiteering, it is the producer or the retailer. So he gets no satisfaction, but he does not forget that somewhere between production and consumption $75 is being spent on an article which it costs but $50 to produce.

While he is no expert, he has a hunch that such a condition is all wrong, and, gentlemen, I agree with him; furthermore, as business men, I am sure you likewise agree with him. Yet at this moment there are probably fifty men, engaged in production and distribution, who are saying that the answer is to still further raise the retail price and make allowance to the distributors greater, to every man who says "No, that is not the answer — the answer is to change production and distribution methods so as to permit of a reduction in the price charged to the consumer."

The example cited is typical, you know, of a thousand more just like it, and all the explanation in the world, not even the combined efforts of all the newspapers and trade papers in the country, can make this sort of thing seem right in the minds of the buying public. The only thing with which the public will be satisfied is a different sort of set-up, and it is up to managements to find the answer and lead the way. The theory that such expenditures are necessary to a proper system of marketing is absolutely baseless, and, in all earnestness, I plead with you, the editors of the business papers of the country, to use your heads and your pens to bring about a changed condition.

Please understand me. In the main, there is no profiteering anywhere along

(Continued on Page 41)

"Who is Taking Advantage of the New C. O. D. Parcel Post Regulations?"

AN analysis by Hardware and Metal of the parcel post matter going through Toronto's chief station for handling such matter reveals some very interesting facts concerning the growth in the business of mail order firms, the general attitude toward the new C. O. D. regulations and a startling discovery concerning those who are taking chief advantage of this new system.

Do not fail to read this article in next week's issue of Hardware and Metal.

Motorist with Numb Hands a Prospect

Hardwareman Tells What Signs He Looks for to Locate Prospects for Motor Accessories in the Cold Weather—Preparing Plans for Pushing Accessories in the Christmas Trade—Gifts of Utility to be Given—Sends Letters to Car Owners' Wives

WITH GIFTS of utility predominating this year for Christmas trade, the merchant has a splendid opportunity to push the sale of automobile accessories. After discussing this subject with some hardware merchants, Hardware and Metal has secured a few original ideas which may be put into play by other merchants in connection with such business.

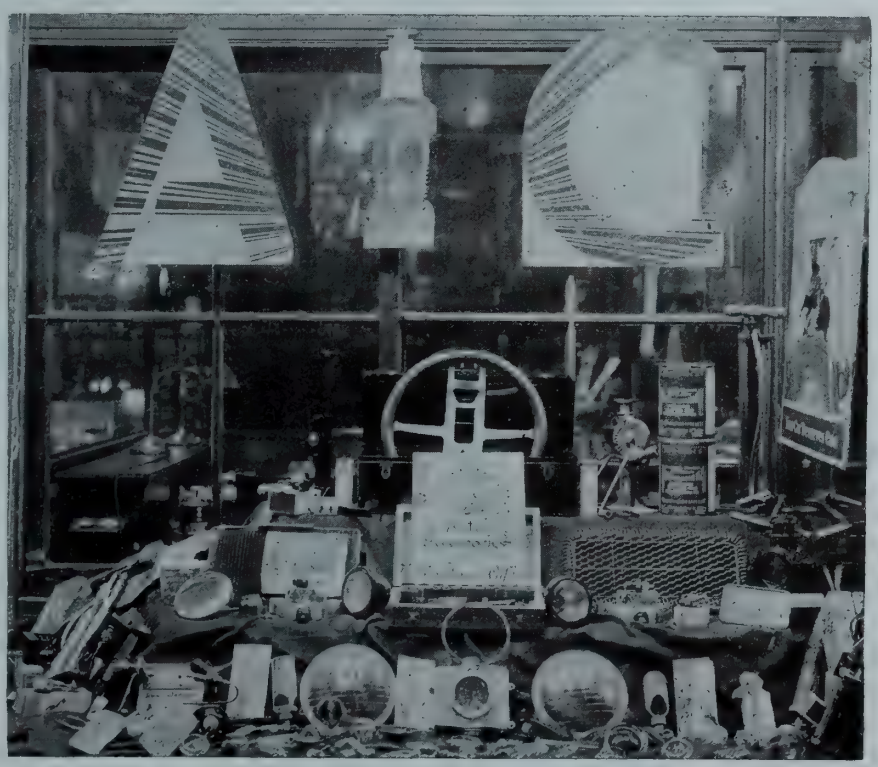
One hardwareman says that many accessories are not appreciated until weather conditions make it imperative that they be used. This is the case with chains, windshield cleaners, robes, heaters, etc. He, therefore, finds quick response to window displays and other suggestions. The way in which he looks for prospects everywhere is seen in the following statement which he makes. "Those motorists who drive up to the store for gas and blow upon their numbed fingers while we fill the tank are just asking us to 'Ask 'em to buy.' We take this as an invitation to sell him a car heater or hand warmer. Sometimes he will wipe off the windshield by hand when waiting for gas. This is an opportunity to sell him a windshield cleaner. If he goes around kicking the tires to test their inflation before making use of our 'free air' service, it is an opportunity to sell him a tire gauge. The wheezy motor, slow to start, gives an opportunity for talking up radiator visors, bonnet covers. Sometimes the wife or son or daughter of the car owner drives up with father's car. That is the time to sell them on the idea of a useful accessory gift for Christmas. The car is right before us and we can make practical gift suggestions. A radiator thermometer, a pair of tire chains, heater, electric horn, robe, etc., offer a splendid range of suitable lines."

Many articles of automotive equipment make a strong appeal to the Christmas trade. If Uncle Henry has just purchased a new super-four, what more appropriate gift could be given him than a pair of bumpers, a spotlight, an automatic windshield cleaner, an electric cigar lighter or any one of a hundred articles of automotive equipment which can be purchased at a reasonable price, will be a useful remembrance while he has his car and will add to its value when he wishes to dispose of it.

It is not necessary for the merchant to make a big investment or go to a lot of expense in order to participate in this business and secure very satisfactory profit as his own Christmas present. It is, however, necessary to prepare as soon as possible to show car owners and their families the many articles of automotive equipment that make very suitable Christmas gifts.

Appropriate Window Display Important

Well-trimmed windows are a very important factor in creating a Christmas atmosphere and impressing upon the mind of the passer-by the appropriateness of automotive gifts for Christmas.



A Christmas window is very easily set up and need not be at all expensive. A very satisfactory effect can be obtained by setting up a Christmas tree in the centre of the window, covering the floor with white or red paper upon which can be laid those articles which the dealer believes to be most suitable and the whole display can be decorated with tinsel and dusted with imitation snow that can be secured for decoration purposes.

Stop signals, visors, and other highly colored articles lend themselves readily to such displays. A large sign bearing the words "Give Automotive Gifts for Christmas" should be prominently displayed in the windows and throughout the store.

Small articles that are carried away can be made more attractive and will radiate more of a holiday spirit if wrapped in Christmas paper and tied with red cord. Articles that have to be applied should, whenever possible, be sold at a price which includes their application. When this is done a card can be attached to the package stating: "This article will be attached free of charge."

A small sticker bearing the words: "Give Automotive Gifts for Christmas" in red letters can be obtained at small cost and attached to all outgoing correspondence.

Christmas Window of Auto Accessories

Here is shown a wide range of automobile accessories such as are suitable in the Christmas trade. A neatly written showcard in the centre of the display links up the connection with Christmas. Prices should be shown prominently.

Unique Method Which Sold 25 Stoves

How National Hardware Co., of Ottawa, by Keeping in Close Personal Touch With Prospects Throughout Summer, Put on Big Campaign in the Fall With Good Returns—Well Equipped, Cosy Kitchen Makes the Best Display

Window displays form no small part of the method used by National Hardware, Ottawa, Ont., to sell stoves, ranges, heaters, along with kitchen utensils and stove and furnace accessories at this time of year. Also included in the window are oil heaters, electric heaters, stove boards, ash sifters, stove pipe and elbows, etc. Read the article how the windows are linked up with other sales effort.

THE PLAN of keeping in personal touch with prospective purchasers has worked out to considerable advantage in the case of the National Hardware Company of Ottawa. Applying it to the sale of stoves this fall, the management has had every reason to feel gratified with the result.

Discussing the matter with Hardware and Metal, L. LeBlanc, a member of the firm, said: "To begin with, we commenced early in the summer to keep on record the names of people who we knew would be requiring stoves in the fall. Well on towards the end of the summer we seized upon every possible opportunity to broach the subject of stoves to these prospective customers whenever they entered the store. About this time also, we commenced to display our stoves both in the window and in the shop, placing them where they were bound to attract the most attention.

Applying Personal Touch

"Then came the time to apply the personal touch. This was accomplished by calling upon the prospective buyers in their homes in the evenings, where we had ample opportunity to discuss stoves to our heart's content without fear of interruption. The method we pursued was that of obtaining information regarding the number of rooms in the house, the size of the kitchen and other details which are essential before determining what kind and size of stove should be used in each individual home. With this information in hand we were readily able to hand out reliable advice. The result was that many of the people whom we called upon in this way not only expressed their appreciation of our counsel, but they bought stoves. With the aid of this method of getting business we were enabled to dispose of more than twenty-five stoves in less than two months, which was good considering that we have been in business only a short time and that we are located in a section of the city where money is none too plentiful."

A visit to the National Hardware Company's store at this season at once impresses one with the thought that every effort is being made to concentrate on the sale of stoves and stove accessories. The full length of one side of the store is devoted to a display of stoves and ranges of all sorts and sizes, including coal-oil heaters. Then also a considerable portion of floor space at the main entrance is taken up with stoves, coal scuttles, coal shovels and other accessories. These are arranged in such a manner as to attract the attention of all persons leaving the store.

Let Customer Select Stove

"I very seldom try to sell a customer something he does not want unless I am certain that it is to his advantage and that he will be satisfied with it," said Mr. LeBlanc. "This is especially true of stoves. When a person comes in to buy a stove I usually let him pick out the one he thinks will be best suited to his needs. Then after making thorough enquiries, if I find the stove he has selected is not suited to his needs, I proceed to point out the advantages of some other make or kind.

"I think an effective window display is most helpful in the merchandising of stoves. If one has the space to put in a fully-equipped, cosy-appearing kitchen, with a stove as the central figure, it will go a long way toward putting across sales.

Wants a Guarantee

"Another important point which I think should be borne in mind is that every dealer should take the utmost care not to handle a stove which he cannot sell without a reasonable guarantee. The

Ads Stimulate Sale of Hunting Equipment

Some very effective advertising of hunting equipment for Fall is seen herewith, as prepared by Sommerville Hardware Co., Ltd., Edmonton; Cochrane Hardware Ltd., Sault Ste. Marie, Ont., Davey Hardware Co., Ltd., St. Thomas; Wm. Beatty Co., Ltd., of Parry Sound, Ont., and Ashdown's in Calgary, Alta. Generous use of illustrations of hunting scenes and of hunting equipment are accompanied with brief descriptions and prices plainly shown. A wide range of lines necessary for the hunting trip are dealt with and other Fall sporting events are also mentioned.

average customer expects a guarantee of some kind, and if you can produce it you have gone a long way towards establishing the customer's confidence in you and in your business principles. I always make it a point to tell those who buy stoves from me that if they are not satisfied I want them to tell me first. I think the dealer should spare no pains or expense to make right any deficiencies the customer may unearth after he has received his purchase. Interest of this kind not only makes a lasting friend of the customer, but helps to build up a good reputation for your establishment."

"RETAILING NOT OUR FUNCTION"

(Continued from page 31)

the standpoint of quality and margin of profit. With the exchange situation less favorable it is understood other producers are making an endeavor to keep this trade on this side of the Atlantic for next year's requirements.

Montreal Export Club to Enlarge Sphere of Activities

ALTHOUGH the Export Club of Montreal and district is but a year old, having been organized last fall, it is announced that preparations are now being made to separate itself from its parent organization, The Canadian Manufacturers' Association. In reaching this decision the Export Club has also decided to greatly increase its sphere of activities by including within its membership a number of other interests, allied to its work, but ineligible for membership with the Canadian Manufacturers' Association.

In its origin the Export Club included only manufacturers, members of the C. M. A., but a series of meetings have been recently held, in the course of which the executive have decided to re-organize the basis of membership. In doing this it is stated that while the Export Club will start to function separately it will still continue to work in close harmoney and co-operate with the C. M. A. in every way. Under the new arrangement not only will exporting manufacturers be eligible for membership in the club, but indent and commission houses, representatives of transportation companies, both rail and water, banking institutions, marine underwriters, and all others whose primary or secondary interests lie in the furtherance of export trade in Canada will be admitted to membership.

Among other plans it is intended that the Export Club itself shall be divided into sections, representing the banking, manufacturing, commission houses, insurance, transportation, etc., groups. Representatives from these various sections will form the executive board, for the conduct of the affairs of the club.

The matter of securing new permanent quarters for the re-organized club and the election of officers will be dealt with at a general meeting of the members held at a little later date.

What You've Been Waiting For

Announcing the 1922 Hardware and Metal Xmas Window Contest

Bigger and Better Than Ever Before

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

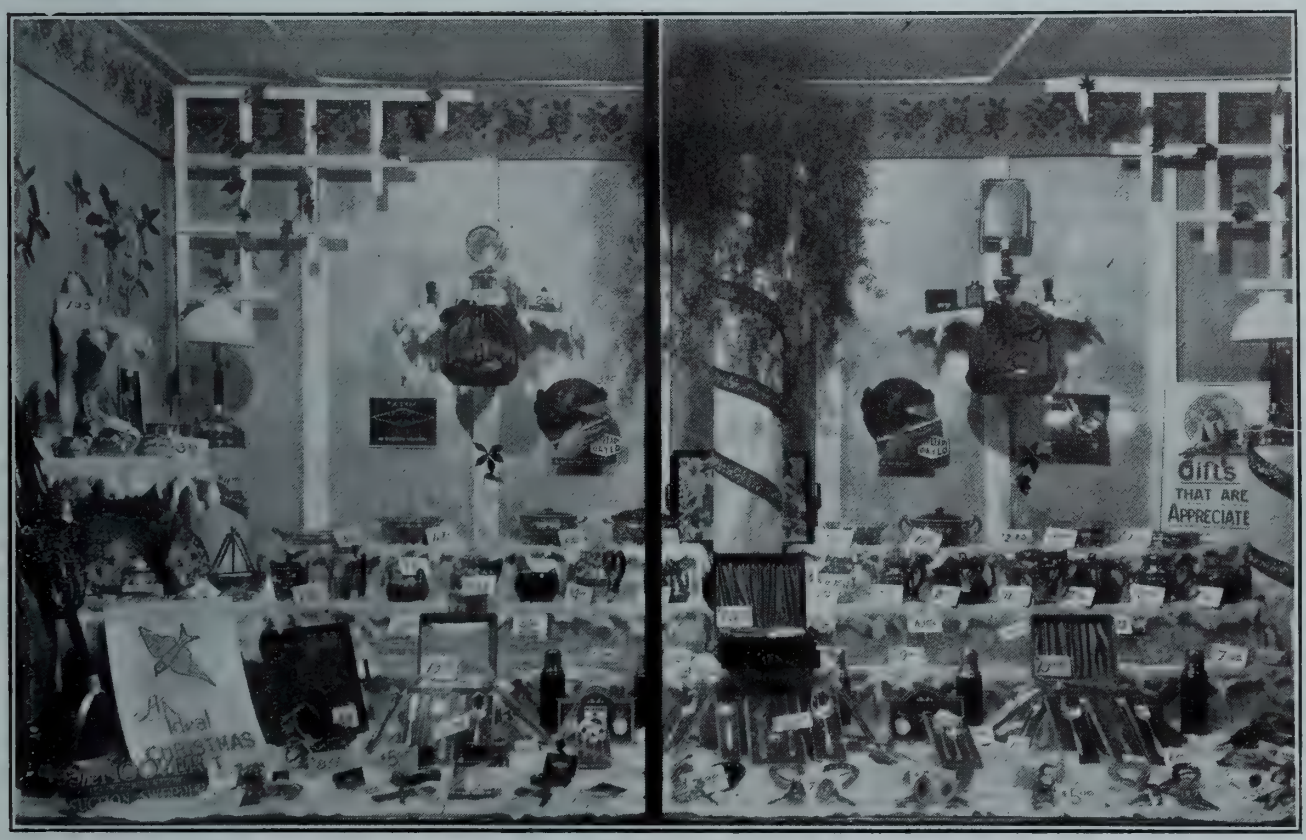
THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

The contest closes on Monday, January 1, 1923. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."



Don't overlook the prizes and the honor of winning one.

Can You Dress a Better Xmas Window Than This?

HERE is a sample window for reference for those located in centres of under 5,000 population. It was good enough to win first prize in that class in last year's contest but it can still be greatly improved upon. It offers a good basis for the window dresser to start with in the exercise of his art.

It is recognized as a distinct honor throughout the trade in this country to be a prize winner or runner-up in this contest so decide NOW to have a photo taken of the best window YOU dress between now and Christmas.

This window of Christmas gift suggestions won first prize in places under 5,000 population in the 1921 Hardware and Metal Christmas Window Contest. It is a fair sample of what a window should be as representing the stock of a store located in such centres. The first prize winning window in places over 5,000 appeared in last week's issue of Hardware and Metal and should be referred to by those located in such centres. The strong points of this display are—pleasing appearance, wide selection of gifts for various members of the family and wide price range with prices shown prominently throughout. It is by Gibb, Brown & Odell Limited, of Hanna, Alta. Gift suggestion No. 2 (Keep the series)

Smuggling Across The Border

THERE is little doubt but that considerable merchandise is smuggled into Canada from the United States. This condition as applying to certain lines of hardware was dealt with in a recent issue of Hardware and Metal, it being pointed out that automobile owners when approached by hardware merchants in Toronto in connection with the purchase of accessories made no secret of the fact that they bought their accessories in some city across the line when on a visit there. It is significant that following upon this exposure in Hardware and Metal, more rigid enforcement of Customs regulations has been made at border points. This resulted in the confiscation in one day of enough merchandise at the Niagara boundary to make the Customs warehouse look like a department store. Among this merchandise was paint and other lines sold in the hardware trade. This is a practice which Customs authorities should make every effort to stamp out.

A Lesson For Other Retailers

IN CONNECTION with the decision of the general manager of the United Farmers Co-operative Company to gradually go out of the retail business, some interesting facts are given in this issue concerning the attempts of this organization to conduct retail stores. It is significant to note that even though this company was enabled to purchase on jobbers' terms a great deal of its merchandise and that it invoiced such goods to its retail stores at 5 per cent. over cost, that a number of the stores have proved to be unprofitable. Examination indicates that failure to keep accurate records, unpopularity of the store manager, poor location, and old established connections of shareholders with independent retailers in the same town, were some of the reasons for failure.

In studying out these facts there are some lessons for other retailers who in many cases have not the advantages in buying which the stores in this co-operative chain were provided with. The underlying idea of the chain store system is increased efficiency in administration and curtailing of costs of doing business by standardizing its practice and centering its buying in one organization. These are but some of the means which can be taken by retailers to stimulate turnover and reduce overhead costs, and many of them can be used to advantage by retailers independent of any such organization. As a matter of fact there is a strong note of warning to other retailers in the action which the U.F.O. has been forced to take in connection with retail stores. Signs abound on every hand that unless measures are taken along this line, distributors of merchandise will not survive the period of keen competition which is now taking place for business. In this connection an article appearing in this issue dealing with distribution problems should be studied closely by every retailer. It points to the psychology of the present situation, showing that the man on the street who does not understand much about production or the way business is conducted, figures something is the matter when he must pay $125 for a labor-saving device at the hardware store, on which the factory cost is known to be $50. It is this big "spread" in prices which is holding up big volume purchasing, and it is only by taking steps to encourage the big turnover that the spread can be reduced without the merchant having to sacrifice anything in his total net profit. This is the problem which chain stores, department stores and other distributors are working hard to solve, and any other retailer who hopes to survive will have to give it immediate attention.

Aggressive Policy Required

"BUSINESS runs in cycles; business men run in ruts." This observation was given expression by an economist of international repute who recently addressed a gathering of business men. Inclinations were too strongly in the direction of moving, aggressively or otherwise, with the tide, and of assuming too passive an attitude when business went into reverse gear. This made for high peaks and low valleys.

One point was stressed particularly—that the time to advertise, the time for forceful selling, was in periods of depression such as the present. When the cycle was moving above the normal line, when money was plentiful, when production was high, when there was evidence of extravagance on every hand, selling was not the problem that it was when the opposite condition existed. It was then that the most active co-operation of sales forces should be enlisted toward obtaining distribution, when the advertising appeal should be the most convincing. There was a depressed area that must be filled, representing activity rather than stagnation. Though this applied to basic commodities rather than specialties, nevertheless good business in one developed the same condition in the other.

Business men are of opinion that it will require two years to fill the present depressed area to normal level; that considerable re-adjustment in values and prices is still to be done.

* * * *

"THERE never was a time when business newspapers could do a better stroke for the world than they can to-day by bringing it home to their readers and the great public that all the peoples profit by the peace and prosperity of each other. They are the most practical of internationalists and through the sensitive machinery of the market can estimate from day to day the reactions of policy and the supreme value of a settled order in the relations of states. They, better than anyone else, can realize the fallacy of the view on which nations have too often acted that what is one nation's gain must be another's loss. The world as we see it to-day is largely what politicians and statesmen have made it. Is it not time for the business man to take a hand?"—C. P. Scott, Editor, "Manchester Guardian."

* * * *

"EVERYTHING that increases mutual knowledge of the achievements and possibilities of industry and commerce increases the welfare of the people and acts as a stimulus to further progress. In this respect business newspapers perform functions which no general newspaper can undertake, and a limit can be set to their useful development only when a limit has been set to the march of knowledge or science, whichever you prefer to call it, as applied to production, commerce and finance."—Lord Burnham, Proprietor "Daily Telegraph," London.

BIG PROBLEMS FACING DISTRIBUTOR

(Continued From Page 34)

the line either on the part of the producer, the wholesaler, or the retailer in connection with the sort of commodity above referred to. At best, only a modest net profit was left to any party in the process. The trouble is not that those who are engaged in production and distribution today are profiteering. The trouble lies with the system employed, with the methods followed. It is these which must be changed. Present methods are wasteful. Ways and means must be devised for eliminating this waste.

I have just referred to a semi-luxury which as made costs $50 and as marketed sells for $125. The statement that neither the jobber nor the retailer made much, if any, net profit on the transaction will, of course to the layman, sound absurd, yet it is the truth. However, the identical article — and there are a thousand others of which the same can be said — could be so made and so marketed as to enable the public to buy it for $75 and still allow ample net profit for the maker, for the jobber and for the retailer. The trouble is due to the excessive competition that exists. Factory costs are too high because too few units are turned out; the wholesalers' and retailers' expenses are too high because too few units are sold.

A few years ago, dealers were well satisfied if they could buy at a discount of 25 per cent, but today dealer discounts of 40 to 50 per cent., and occasionally 60 per cent., are more or less standard for furniture, rugs, carpets, refrigerators, stoves, pianos, victrolas, etc. Goodness knows what discounts the dealers of tomorrow will ask for, and possibly require, unless production and marketing methods are changed.

One thing we need is more men who, like Henry Ford, can visualize a possibility for trade development, and who will, by mass production, and by rapid turnovers in distribution, produce and market a product which will make the public feel, when they buy it, that they have secured their money's worth and then some. More men with brains and capital who will "Fordize" in the production and distribution of a certain class of commodity is, I believe, the answer to a part of the question. The inspiration that would result from a few more successes like that of the Detroit manufacturer should be most beneficial.

Two Stove Manufacturers

Simply as a thought to indicate the direction towards which I feel we should be working, let us assume that in each trade territory there were but two stove dealers in each town in the territory. Who of us here believes he could not find dealers who would gladly take on one of those agencies and be satisfied with far less than a 40 per cent. commission? Under such conditions a commission of 20 per cent. would result in the dealer's earning a higher net return on his investment than a 40 per cent. commission allows him under existing conditions of excessive competition. You recognize, of course, I am simply saying that a small margin of profit on many sales can be made far more profitable than a larger margin of profit on a few sales. Too much competition on production and in distribution tends to make the production cost high and distribution expenses high; the combination inevitably results in a high price to the public, for neither the maker nor the seller is running a charitable institution.

There are too many commodities which are being produced in too many factories, and are being distributed by too many agencies, for the best interest of the public. I feel many of these could be made and marketed more economically if some advantageous mergers were effected, or some failure took place. This would by no means solve all our troubles nor eliminate all the waste in merchandising, however, it would help considerably, for production is not done at low cost unless the output is reasonably large, nor can a jobbing business be conducted cheaply unless the units of sale are relatively large and frequent. Retailing can be done cheaply if the units of sale are small, provided enough units are sold.

Another major experiment in marketing which is receiving much attention, but not as much as it deserves, is the chain-store idea. Here again, mass production and rapid turnover in distribution is counted on to reduce prices to the consumer and yet leave adequate margins for dividends. The idea is perfectly sound. Good judgment, in selecting the products, and sound management will produce success. I am not among those who worry lest the chain-store will wreck the local merchant for, in marketing, I believe in the survival of the fittest, provided the test of fitness is that agency which serves the public well and at the lowest cost. We must not forget that we are confronted with a changed economic condition, and management will do well if it falls in line, for that business which falls in line with an economic purpose bigger than itself has far and away the best chance of remaining permanently in business and of making steady profits.

I am sure you will not interpret my remarks to mean that I feel we should do away with competition in production and in distribution, for that is very far from my thought. It is competition and the will to excel among competitors which develops skill in a football team, so likewise it is the stimulating effect of competition which, more than any factor, has and will continue to develop efficiency in our business enterprises. Competition we need, but more of the efficient, waste-saving, cost-reducing competition is the sort we need. It is more businesses intelligently planned, adequately financed, and capably managed in each line of industry that are needed before management can hope to convince the great mass of our people that the waste incident to present methods of production and distribution has been eliminated. Unless and until this waste is eliminated — at least until it is greatly reduced — the business man cannot rightly be called "efficient" no more than you could be, should you, when spading up a plot of ground for a flower garden, accidently turn up a chest of hidden gold. You might be rich, but not as a result of your efficiency.

Opportunity knocks at management's door. By opening it, management can still further enrich itself and in doing so, do that bigger, finer thing—add to the comfort and contentment of man.

Taking Steps to Stop Smuggling Across Border—Customs Men Find Cans of Paint

IT IS noteworthy that following upon charges of smuggling of automobile accessories and other hardware, as appearing in a recent issue of Hardware and Metal, that steps now being taken by Customs officers at border points between Canada and the United States have resulted in the bringing to light of a great deal of merchandise, included among which was some paint.

On two days of this week eight large automobiles were seized by Customs officers at Niagara Falls, Ont. In each case the occupants had goods concealed somewhere about the car. Seven of the cars were from Toronto. Reports from Niagara Falls are to the effect that more careful scrutiny on the part of such Customs officers has resulted in a blockade of automobiles almost across the bridges. No part of the cars is being overlooked, much in contrast to the former practice, and all kinds of things have been confiscated. They will be returned upon payment of duty on their assessed value in Canada. The Customs sheds are said to have the appearance of a departmental store. Some cans of paint were among the seizures, the owner claiming that this was a present to him from someone he was visiting in the United States.

WINDSOR TOOL MACHINE CO. NEW FACTORY

Tillsonburg, Ont.—Erection of factory at cost of $40,000 is contemplated by Windsor Tool & Machine Co., Ltd., Windsor.

Events in the Trade

NEW HARDWARE STORE TO BE BUILT

Windsor, Ont.—Plans are being prepared for business block for Baxter Hardware Co., Pitt St., E.

PERSONAL

Ross H. McMaster, vice-president, Steel Co. of Canada, and F. B. Leslie, sales-manager, A. C. Leslie & Co., Montreal, returned this week from Philadelphia and New York, where they attended the annual gathering of the American Iron and Steel Institute.

Frank H. Butcher, 13 Cathcart St., London, Ont., has been appointed sales representative for the following manufacturers: Geo. W. Reed & Co., Montreal, manufacturers of roofing cement, super ash sifters and cans; Lamarre & Co., St. Remi, P. Q., makers of stoves and ranges.

OBITUARY

The sympathy of the trade is extended to A. E. Warren, purchasing agent, Frothingham & Workman Ltd., Montreal, on acount of the sudden death of his wife in that city on November 6th. Mrs. Warren's funeral was held on Wednesday afternoon.

NEXT MEETING OF TORONTO HARDWARE AND PAINT CLUB

The next meeting of the Toronto Hardware and Paint Club will be held in the Tudor Room, Prince George Hotel, on Tuesday, November 14 at 8 p. m. The subject of too many hardware stores operating in the city as discussed at the last meeting of the club will be the theme of the meeting and it is expected that representatives of the local wholesale firms will be on hand to discuss various phases of the subject.

NEW FIRM KNOWN AS HARDY & BADDEN

A new partnership has been formed in the firm formerly known as James Hardy & Son, Toronto, Secretaries of the Canadian Wholesale Hardware Ass'n., since the death of James Hardy as recently announced in Hardware and Metal. The firm will be continued under the name of Hardy & Badden, Arthur J. Hardy having associated with him Harold J. Badden, who has been connected with the firm for seventeen years.

MONTREAL INDUSTRIAL FAIR

Further organization with regard to the annual fair in Montreal was completed at the meeting of the Montreal Industrial Exhibition Association when the board of directors was appointed and other business transacted. With the directors named, and when that board has elected its executive officers, it was pointed out that the important matter awaiting decision was whether the City of Montreal was willing to provide the organization with a site for the exhibition, and also guarantee the bonds to the extent of $600,000. It is understood that the city is anxious to push the Exposition forward, and with co-operation between the municipality and the association, headway is looked for during the winter months.

AUTO ACCESSORIES SECTION OF CREDIT MEN'S TRUST ASSN.

Montreal.—At a meeting held at the Old Colony Club, the wholesale automobile accessory houses which are members of the Canadian Credit Men's Trust Association, Limited, organized a trade section. J. Thurston Smith was elected president, James W. Green, vice-president and Fred H. Pope, secretary. James Thurston Smith is secretary-treasurer of Lewis Bros., wholesale hardware jobbers, ex-president of the General Accountants' Association, ex-director of the Dominion Commercial Travellers' Association, ex-honorary treasurer of the Quebec Division of the Canadian Credit Men's Trust Association, Limited. The vice-president, James W. Green, is credit manager of the Dominion Rubber System, with which firm he has been identified during the past twelve years. The secretary, Fred H. Pope, is manager of the Quebec Division of the Canadian Credit Men's Trust Association, Limited, under whose auspices the section will function. The following firms have joined the section:—John Millen & Sons, representative, C. E. Kandrick; Goodyear Tire and Rubber Company, representative, F. H. Foster; Dunlop Tire and Rubber Company, representative E. H. Dudley; Canadian Fairbanks Morse Company, Limited, representative, W. H. Irvine; K. & S. Tire and Rubber Goods, Limited, representative, C. S. Lee; Dominion Rubber System Limited, representative, J. W. Green; Lamontagne, Limited, representative, O. L. Baillargeon; Lewis Bros., Limited, representative, J. Thurston Smith; Sun Company of Canada, Limited, representative, E. S. Graham; Gutta Percha Rubber, Limited, representative, J. N. Smith; Ames-Holden-McCready, representative, M. J. Kearns.

INCREASE CAPITAL STOCK

Notice is given by the provincial secretary authorizing the increase in capital stock of the St. Mary's Hardware Ltd. from $40,000 to $150,000.

HAVE COMPLETED MOVING OF HARDWARE STOCK

Owen Sound, Ont.—T. I. Thompson Ltd., has completed the amalgamation of its hardware stock with that of R. P. Butchart & Bro., which firm was taken over by the Thompson Company some months ago.

BRITISH TRAIN TO TOUR CANADA

Evidence of the desire of British manufacturers to improve their position in the Canadian market is the information from London that the British Train Traders, Limited, will send an exhibition train carrying samples of a great variety of British goods across the Dominion. It is proposed to have the train leave Montreal at the end of October, and ten months will be required to complete the tour. Two hundred and ten firms have signified their intention of participating in the exhibition.

GOVERNMENT MAY ESTABLISH COKE PLANT

Ottawa.—With the view of helping to ensure the fuel independence of Canada the government is considering the establishment of a huge plant at Sydney, N. S., for the treatment of bituminous coal and its reduction into coke as a substitute for anthracite.

Experts of the Mines Department have been asked to report on the project. The recurrent coal strikes in the United States and the advice that ten years hence American anthracite for export may not be available in any large quantities, suggests measures for the development of domestic sources of supply.

Coke was urged as a substitute for anthracite by experts before a fuel committee of the Commons two years ago. One argument in its favor is that it can be transported much more economically than coal.

The supply from the proposed Sydney station would be designed especially for Central Canada. A similar station may be established in the West if necessary, but it is calculated that British Columbia or Alberta coal either in its natural form or as coke will not come east of Winnipeg.

Western Canada News

McPherson Bros., Red Deer, Alta., are going out of the hardware business.

A. W. Sudin, hardware merchant, Elm Creek, Man., has sold to R. J. Montgomery.

Vancouver.—J. A. Hossack, representing the Lufkin Rule Co., made the rounds of the distributing trade this week.

C. Richardson has started a new hardware store at Broadview, Sask., and reports business showing an improvement.

Vancouver.—David Brewer of the A. MacFarlane Co. of Montreal, spent the week in this city while on a trip through the west.

Vancouver.—Mr. Adcock, of Chas. Adcock Ltd., manufacturers' representatives of Montreal, was renewing acquaintances here this week.

Vancouver. — David Griffiths, sales manager of the B. Greening Wire Co. of Hamilton, is making the rounds of the trade on the coast this week.

R. A. Walker, manager of the Calgary branch of D. Ackland & Son, Ltd., has returned from a week's visit to the head office of his firm at Winnipeg.

Joe Hawkins and Jim Whalen of Vancouver, were in Winnipeg attending the convention of the Western salesmen of the Sherwin-Williams Co. of Canada, Ltd.

Scott Hastie, of Condor, Alta., who lost his hardware stock recently through fire, spent some days in Calgary this week, placing orders for shipment of an entirely new stock.

Vancouver.—The Granby Consolidated Mining and Smelting Co. has a total of 17,000 tons of blister copper ready for shipment to New York. Another 500 tons will be available within a short time.

W. McIllveen, until recently manager of the motor accessory department of Wood Vallance & Adams Ltd., has left Calgary to live in Regina, where he takes charge of the Saskatchewan business of the Firestone Tire and Rubber Co. of Canada Ltd.

Vancouver.—Robert Gibson, president of Gibson's Limited and managing director of Britannia Wire Rope Company, Limited, who left here a few weeks ago for a business trip to England, has undergone an operation but is now convalescent. He expects to return about the end of the year.

F. J. Penberthy, managing director of Lowe Bros., Toronto, while on his return from the coast spent a short time in Winnipeg, and gave an address on the manufacture, use and misuse of paints before the Greater Winnipeg Save the Surface Association, which was thoroughly enjoyed by all present.

C. H. Edick of the Gillette Safety Razor Company of Canada, has returned from a business trip to Saskatchewan and Alberta and reports that business in the smaller towns is improving.

TO PERMIT MERCHANTS TO TAKE MORTGAGE ON FARMER'S GROWING CROPS

Edmonton.—A special inquiry is to be made by the attorney-general and the commissioner of Southern Alberta relief into that part of Alberta's drought area relief scheme regarding the right of merchants to take mortgages on the growing crops of their debtors. This is in order that the government may have necessary information for a possible extension of that right to other parts of the province, which is now being considered.

Under the law as it now stands, outside of the drought area, no proceedings can be taken by anyone against a farmer's growing crops, but the southern act provides that a merchant who has outfitted a farmer with necessaries of living, may take a mortgage on such crops up to a specified amount.

WILL DISCUSS PARCEL POST WITH UNITED STATES

Ottawa.—Decisions of an important nature may be reached at the forthcoming conference on postal matters between representatives of the postal departments of Canada and the United States, it was intimated by officials of the Canadian Department. While arrangements, and the program for the meeting, are yet in a tentative state, considerable enthusiasm over hoped-for results is being manifested by officials concerned. Whether or not the conference will be held in Ottawa, or some other Canadian city, or in Washington, has not yet been decided, although the departments of the two countries are in communication on the subject.

Subjects for the conference will probably include: Limit of weights on merchandise between Canada and United States; rate on merchandise passing by post between the two countries; insurance on parcels, special delivery service; co-operation between railway post offices in Canada and United States; money order services; customs declarations; rates on prints, samples and commercial papers; address of sender on parcel mail between two countries; exchange of mails between Windsor and Detroit with perhaps a joint arrangement for conveyance of mails both ways; transit of United States mails through Canada; reciprocal exchange of postal equipment between Canada and United States, and direct correspondence between postmasters in Canada and United States.

BARRED FROM U. S. MAILS

The United States Post Office Department has barred from the mails circulars of the United Silverware Company, the Roy Silverware Co., and the Radiant Diamond Company, of Montreal.

The department charges that one individual is back of these concerns and calls him "the greatest namechanger in the history of the world." He advertises picture puzzle contests and offers prizes of jewelry. He has changed the name of his company twenty-five times in several months, according to the department.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of November 8, 1902:—

"Geo. M. Edwards, managing director Henderson & Potts Co., Ltd., Montreal, was in Toronto this week."

"J. E. Elliott, buyer for McLennan McFeely & Co., Ltd., Vancouver and Dawson, was in Toronto this week."

"H. H. Clark, of Sherbrooke, Eastern Townships' representative of Lewis Bros. & Co., Montreal, and Miss M. A. Miller, of Griffin, were married on Oct. 22 in Griffin."

"W. D. Gillean, who has been connected with The Canada Paper Co. for over twenty-five years, has now become manager of the mills and product of Alex. McArthur & Co., Montreal."

"H. P. Hubbard, Canadian representative of E. C. Atkins & Co., Indianapolis, has returned from a successful trip among the lumber mills and hardware trade on the north shore of Lake Ontario."

"Yukon Hardware Co. has been formed at Dawson to take over the business of McLellan, McFeely & Co., Dawson and Vancouver. The promoters are Roderick Chisholm and Raymond Brumaugh."

"It is the general opinion throughout the trade that paints are becoming more extensively handled by hardware merchants every day. One is led to believe that it is only a short time until the bulk of the trade will be done by hardwaremen."

"The Canadian Wholesale Hardware Association held their quarterly meeting on Tuesday in Windsor Hotel, Montreal, Thomas B. Lee, president, presided. Fred Lewis, of Lewis Bros., Montreal, the vice-president, was prevented from attending due to illness."

"The Manitoba Frost Wire Fence Co., of Winnipeg, is seeking incorporation. The capital stock of the company is $40,000, the objects of incorporation are for the sale of wire fences, posts, etc., and the applicants are Henry Louis Frost, Welland, O. L. Byers, Winnipeg, C. H. Henson, W. E. Oulette and J. F. Phelps, Welland."

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

THE budget of price increases again far exceeds the number of reductions on the current hardware markets. A new higher list appears on wrought piping, as forecast in last week's issue of Hardware and Metal. A general upward revision is made in lead products, lead pipe and waste prices being increased, while solders also record a general leveling up process following the advances of two weeks ago. Cotton wrapping twine prices are advanced two cents per pound, as briefly reported last week. Revised quotations are in effect on cotter pins, both list and discounts being changed. An increase is also made in the galvanizing wire nail extras, and new discounts appear on hand taps and machine screw taps. Blow torches and furnaces are advanced five per cent. Tin is again higher on a speculative market and continues the feature of the ingot metal markets. Higher levels are considered pending on several lines of builders' hardware. Spring booking prices on refrigerators are approximately five per cent. lower, while a reduction is also made in common fence pliers. A further recession in pig iron quotations is foreshadowed, while eastern centres record another reduction in gasoline prices. Fall lines are moving briskly and a steady volume of trade is evident. Booked orders for snow shovels and winter lines are now being shipped. The call for builders' hardware is still proceeding. The movement of corrugated sheets, eavestrough, conductor pipe and kindred lines is slowing up with the approach of the winter season. There is an increasing disposition to provide for forward requirements. While this tendency is not yet general, it is developing steadily. Purchasing for immediate needs only, which has long been the common practice, is being succeeded in numerous instances by demands running well ahead, indicating more confidence in the future. Weather irregularities are considered responsible for a certain lack of uniformity which has been visible in the general trade survey. In wholesale circles the trend is still in the direction of progress.

Montreal, Que.

MONTREAL, November 9.—Hardware markets are again particularly interesting to the trade. Various lines are shown under price revisions. One of the most outstanding advances is a new list on wrought iron and steel pipe, showing a slight change in prices on piping from one inch and larger. Another increase is recorded on lead pipe, lead waste and solders. A new list and revised discounts is issued on cotter pins and prices are again revised upward, this change following the advance of last week. Blow torches and furnaces are advanced approximately five per cent. Another price development is recorded on the local gasoline market, quotations in Montreal being again reduced two cents per gallon. There is now a variation of two cents between prices in the city and those quoted to points outside in the province. With tin, spelter and lead on high levels a strengthening attitude is lent to many hardware commodities.

FURTHER ADVANCE IN COTTON TWINE PRICES

Montreal.

Following the advance of two weeks ago, cotton twine prices show a further increase of two cents per pound. A strong tendency is still evident in raw cotton circles, and is said to be responsible for this second revision. Following are present local quotations:

COTTON TWINE—	Per lb.
3 ply in balls	0 55
3 ply in cones	0 51
4 ply in balls	0 57
4 ply in cones	0 55

STEADY MARKET RECORDED ON COPPER PRODUCTS

Montreal.

Current quotations on copper and brass sheets, rods and tubing remain unchanged and the undertone of the market is now described as on a steady basis. There was a very firm tone noted in former weeks due to the strong market tendency of copper on primary metal markets, but this has recently shown some abatement, with signs of weakness. The movement of these products is fair for this season of the year at the following quotations:

	Base
BRASS—	
Sheets, base	0 24
Rods, ½ to 6 inch, round	0 22
Tubing, Seamless, base	0 30
COPPER—	
Rods, ½ to 2 inch	0 29
Soft sheets, plain, 16 oz. and heavier, lb	0 30
Plain tinned, 16 oz. and heavier, lb.	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are for full sheets or bars. Cuts 5c. per lb. higher.

FAIR ACTIVITY NOTED IN METAL LATH

Montreal.

A fair volume of business is still recorded in metal lath, distributors stating that building activities are well up to expectations notwithstanding the season is fast advancing. Local prices are steady at following levels:

METAL LATH—	per sq. yd.
Painted—	
26 gauge	23c.
24 gauge	28c.
32 gauge	32c.

Galvanized, 10c. per sq. yd. extra.

REVISED QUOTATIONS ON COTTER PINS

Montreal.

A revision is made in both list prices and discounts on cotter pins. Manufacturers are issuing a complete new list with re-sale discounts. The change is also effective on assortments in boxes, and shows an increase of approximately 12½ per cent over former quotations. Following is new list and discounts:

SPRING COTTERS—

Effective Nov. 1, 1922.

Wire Ga. Size No. 16—Size 1-16 x ½, $0.33 per 1000; 1-16 x ¾, 43c per 1000; 1-16 x 1, 53c.; 1-16 x 1¼, 63c.; 1-16 x 1½, 73c.; 1-16 x 1¾, 83c.; 1-16 x 2, 93c; 1-16 x 2½, $1.23; 1-16 x 3, $1.53.

No. 13—3-32 x ½, 33c.; 3-32 x ¾, 43c.; 3-32 x 1, 43c.; 3-32 x 1¼, 63c.; 5-32 x 1½, $1.45; 3-32 x 1¾, 83c.; 3-32 x 2, 93c.; 3-32 x 2½, $1.23; 3-32 x 3, $1.53.

No. 11—⅛ x ½, 45c.; ⅛ x ¾, 58c.; ⅛ x 1, 70c.; ⅛ x 1¼, 83c.; ⅛ x 1½, 95c.; ⅛ x 1¾, $1.08; ⅛ x 2, $1.20; ⅛ x 2½, $1.55; ⅛ x 3, $1.90.

No. 9—5-32 x ¾, 93c; 5-32 x 1, $1.10; 5-32 x 1¼, $1.28; 5-32 x 1½, $1.45; 5-32 x 1¾, $1.63; 5-32 x 2, $1.80; 5-32 x 2¼, $2.00; 5-32 x 2½, $2.20; 5-32 x 3, $2.60; 5-32 x 4, $3.80.

No. 7—3-16 x ¾, $1.25; 3-16 x 1, $1.55; 3-16 x 1¼, $1.85; 3-16 x 1½, $2.15; 3-16 x 1¾, $2.45; 3-16 x 2, $2.75; 3-16 x 2¼, $3.05; 3-16 x 2½, $3.35; 3-16 x 3, $3.95; 3-16 x3½, $4.55; 3-16 x 4, $5.15.

No .4, ¼ x 1, $2.80; ¼ x 1¼, $3.20; ¼ x 1½, $3.60; ¼ x 1¾, $4.00; ¼ x 2, $4.40; ¼ x 2¼, $4.80; ¼ x 2½, $5.20; ¼ x 3, $5.90; ¼ x 3½, $6.60;¼ x 4, $7.30; ¼ x 5, $8.70; ¼ x 6, $10.10.

No. 1, 5-16 x 1, $4.20; 5-16 x 1¼, $4.80; 5-16 x 1½, $5.40; 5-16 x 1¾, $6.00; 5-16 x 2, $6.60; 5-16 x 2¼, $7.10; 5-16 x 2½, $7.60; 5-16 x 3, $8.60; 5-16 x 3½, $9.60; 5-16 x 4, $10.60; 5-16 x 5, $12.60; 5-16 x 6, $14.60.

⅜ x 1½, $7.80; ⅜ x 2, $9.30; ⅜ x 2½, $10.80; ⅜ x 3, $12.30; ⅜ x 3½, $13.80; ⅜ x 4, $15.30; ⅜ x 5, $18.30; ⅜ x 6, $21.30.

Discount—32½ 10 per cent.

NEW HIGHER LIST ON WROUGHT PIPING

Montreal.

A new list, No. 57, effective November 1st, now governs domestic markets on wrought piping. An increase of approximately 2 per cent. is announced on standard buttweld black steel pipe from 1 inch upward, while on wrought iron a minor adjustment in prices is made on the same sizes. In lapweld black piping a revision upward is also recorded, although on certain sizes of galvanized prices are now slightly lower. The upward tendency in this market has been pointed out in recent issues of Hardware and Metal, it becoming more pronounced last week when new higher quotations were considered pending. Costs of raw material have continually advanced since the last revision, and supplies of skelp have been hard to obtain owing to transportation delays. The recent advance on American markets is also another factor which allows the announcement of higher prices on domestic markets to come without any surprise.

The new list is included in the current market quotation pages.

EASIER TENDENCY NOTED IN CORRUGATED SHEETS

Montreal.

There are still signs of a weakening in the market for corrugated sheets, and shading of prices is rumored in some quarters. According to one local dealer trade in these materials, while fair, is not as active as might be expected at this season, especially this year when following spring business which was unusually brisk in this district. Requirements for this fall's trade were anticipated, and fairly heavy stocks of flat sheets were placed. With the slackening in business dealers are anxious to reduce stocks as low as possible before the winter months set in, and some are willing to offer a price concession for attractive orders. While this is the version of one distributor, it is generally admitted that trade is a little quieter, and prices are slightly easier than formerly. Following are average quotations:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

GENERAL UPWARD REVISION IN LEAD PRODUCTS

Montreal.

Lead on primary markets continues on its upward climb, while spelter and tin are also again reported with firmer price levels. The tendency in these basic materials is further reflected on finished products, following the advance in solder prices two weeks ago. Lead pipe in all weights is increased one cent per lb., waste prices showing the same advance. Quotations on solders register a further increase of one-half cent per lb. on all grades with the exception of wire solder. Further price developments on this market will depend entirely on what action is displayed in primary circles, and while these metals have now reached levels which are considered high by some well informed, there is no indication at present of any weakness developing. Revised quotations are:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	14 00
Do., 2" to 8"	15 00
Do., 8" and over	16 00
Lead waste, per 100 lbs.	15 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs., sq. ft. lb.	0 11
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs., sq. ft. lb.	0 10
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 22½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

STEEL BUSINESS CONTINUES IN SEASONAL VOLUME

Montreal.

With a steady market tone prevailing in iron and steel, current business is reported as continuing in seasonal volume. The general improvement in the industry during recent weeks has caused mills to experience some difficulty in securing raw materials, thus placing the market in a firmer position. This condition, while naturally expected to improve as the weeks pass, has yet failed to better itself to any extent, and available cars for transportation are still at a premium. On the other hand, it is only natural to expect a slackening in steel business toward the latter end of this month, and any strength in the market due to the above is expected to be greatly offset by a quieter consumptive demand. Unchanged local quotations are:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50 3 65
Spring steel	4 75 8 50
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

MOVEMENT OF TROUGH AND PIPE NOW SLOWER

Montreal.

There is still a fairly firm tone in the market for eavestrough, conductor pipe, elbows, etc., although this tendency is not as marked as a few weeks ago when business was more active and galvanized sheets were on a slightly higher price basis. Dealers in these goods report a seasonal falling-off in demand with the appearance of colder weather. Following are list prices and unchanged discounts:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in., $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70 per cent.

CONDUCTOR PIPE—Round, Plain and Corrugated. per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in., $29.60; 5 in, $40.00; 6 in, $49.00; 6 in., $49.00.

Discount 70 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz.

2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in., $29.00.

Discount 60 per cent.

QUIETER DEMAND MAY AFFECT SHEET MARKETS

Montreal.

Insofar as the local galvanized sheet markets are concerned conditions relative to the future trend seem to centre around the two chief factors, quieter trade versus high replacement costs. It is generally stated that the movement of these sheets is not as active, and the trade is now faced with a quieter period during the ensuing months. Against this there is a firm tendency at production centres owing to higher costs, the most recent development being the rise in spelter on primary metal markets, thus increasing the cost of galvanizing. Up to the present no change in prices is announced by producers, but the tendency is declared upward.

Much the same situation is presented in black sheets, Canada plate and tin plate, although distributors describe these products as showing a stronger tone than galvanized. Much of the supplies locally are imported from overseas and there is the close of navigation, necessitating higher freight rates, to be reckoned with. Stocks on the local market are at a comparatively low level.

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 75
26 gauge	6 75	7 50
24 gauge	6 15	6 90
22 gauge	5 80	6 55
18—20 gauge	5 10	5 85
Other Brands—		
10¾ oz	6 75	7 50
28 U. S. gauge	6 35	7 10
26 U. S. gauge	6 05	6 80
24 gauge	5 90	6 65
2 gauge	5 90	6 65
18—20 gauge	5 75	6 50
16 gauge	5 60	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25
20 x 28 IC, 112s	12 75
20 x 28 IC, 112s	15 00
20 x 28 IXX, 56s	8 50

Welsh, polished, 60s	6 75
Galvanized, 52s	7 25
Galvanized, 60s	7 75

NEW NET PRICES ON GAME TRAPS

Montreal.

As announced last week advanced quotations are now effective on game traps, present price levels being ten per cent. higher than formerly. Following are new net prices:

GAME TRAPS—Per Dozen.

Victor—No. 0, $2.10; No. 1, $2.45; No. 1½, $3.80; No. 2, $5.25; No. 3, $8.85; No. 4, $10.60.

Hawley & Norton—No. 0, ...; No. 1, $4.70; No. 1½, $7.15, No. 2, $10.00; No. 3, 13.25; No. 4, $15.60.

Newhouse—No. 0, $6.00; No. 1, $7.00; No. 1½, $10.50; No. 2, $15.80; No. 3, $21.00; No. 4, $24.50.

Jump—No. 0, $2.85; No. 1, $3.15; No. 1½, $4.60; No. 2, $7.00; No. 3, $9.40; No. 4, $11.20.

Victor Giant—No. 1, $3.20.

GASOLINE PRICES AGAIN DROP IN MONTREAL

Montreal.

Following four successive reductions up until November 1, a further increase development in gasoline prices has now occurred, when local quotations are again reduced two cents per gallon. This brings a variation between prices locally and quotations to points in the province outside the city of Montreal. Formerly a flat price was given to the province as a whole. This latest revision brings Montreal quotations to 28 cents for motor grade, and 31 cents for the higher grade, while in rural centres price levels remain at 30 and 33 cents respectively. The gasoline market has been decidedly easier in recent weeks owing to lesser consumption and comparatively heavy stocks, but in the latest development it is said that keen competition has played no small part in the matter.

HIGHER LEVELS MAINTAINED IN INGOT METAL MARKETS

Montreal.

The ingot metal markets retain their firm tone, with perhaps not quite as much activity as has recently been showing. Tin has been somewhat erratic during the past week owing to extensive manipulation, but generally speaking all metals with the exception of copper may now be considered as having reached fairly high levels.

TIN.—With fluctuations of from £3 to £4 per day in either direction this metal may be described as very erratic, and not in a healthy position for general business. It is felt that the market is being manipulated from London and it is hard to say what their efforts will result in, or how high prices will be forced. Locally the market is firm at 42 cents.

COPPER.—This metal remains very listless which is a little surprising in view of the firmness of other metals. Export demand, however, is still quiet and with extensive stocks available in the U. S. A., there is no inducement to buy ahead. Prices locally are unchanged at 17¾ cts. for electro, 17½ cts. for casting.

LEAD.—The tone of the lead market remains firm both in England and the United States, but to-day's price can certainly not be considered cheap, and it is a question whether or not this level can be maintained for any length of time. Lead is quieter on the local market at 8 cents.

SPELTER.—Spelter has held remarkably well considering the rapid advance, and it would appear that Europe's requirements in the U. S. A. are not yet quite satisfied. Should this be the case, higher figures may yet be reached and in the meantime the market is firm at 9¾ cents.

ANTIMONY.—Following the flurry of a few weeks ago, owing to the American duty, antimony is again in a dull state, with prices unchanged at 7¼ and 7¾ cents.

ALUMINUM.—There is still little or no change in the market for aluminum, and the local quotation remains at 22 cts.

Toronto, Ont.

TORONTO, November 9.—Advances continue the order of the day in the current hardware markets. Higher levels are recorded this week on wrought iron and steel piping, lead pipe and waste, hand taps and machine screw taps. Ingot tin again records an increase on a speculative market and continues the feature of the ingot metal group. Some higher prices appear on solder in local jobbing circles, while there is also an increase in extras for galvanizing wire nails. New lists and discounts on cotter pins show a general revision. There is a general leveling up process in boiler tube prices. Higher prices are also reported pending on certain lines of builders' hardware, while the advanced levels on cotton wrapping twine, as briefly recorded in last week's issue of Hardware and Metal, reflect the upward trend of raw cotton markets. Another reduction in pig iron prices is foreshadowed, while price on Black & Decker electric drill has been substantially lowered.

INCREASE EXTRAS FOR GALVANIZING WIRE NAILS

Toronto.

The galvanizing extra on wire nails has been advanced 25 cents per cwt. The revised quotations are as follows:—$3.25 for one inch and larger, and $3.50 per cwt. for shorter than one inch.

NEW LIST AND DISCOUNT ON COTTER PINS

Toronto.

A new complete list has been issued on cotter pins showing a general revision all through, with prices on some sizes higher and others lower. The new list is effective from November 1, and is reproduced elsewhere in this section. The discount has also been changed and the revised quotation is, new list less 32½ and 10 per cent., f. o. b., Montreal.

REVISED DISCOUNTS ON HAND AND SCREW TAPS

Toronto.

New discounts on machine screw taps and hand taps are announced by the Greenfield Tap & Die Corporation. Machine screw taps are now quoted list less 55 to 60 per cent., and hand taps have been revised as follows: ¼ to ⅜ inches, 40 to 45 per cent.; 7/16 to ⅝ inches, 40 to 50 per cent.; 11/16 to 1 inch 35 to 45 per cent. This compares with the former quotations of 30 to 60 per cent. on sizes up to one inch.

HIGHER PRICES PENDING ON BUILDERS' HARDWARE

Toronto.

Higher prices are reported pending on several lines of builders' hardware. It is stated that the extent of this advance is in the neighborhood of ten per cent.

TWINE PRICES REFLECT RAW COTTON TREND

Toronto.

As briefly recorded in last week's issue of Hardware and Metal, a further advance of two cents per pound is now in effect on cotton wrapping twines. This increase, following on the higher levels announced two weeks previously, reflects the continued strength of the raw cotton markets. Revised quotations are contained in the current market pages.

SOME HIGHER PRICES APPEAR ON SOLDERS

Toronto.

Certain jobbing houses are quoting additional advances in solder quotations this week. The revised higher price levels follow: strictly, $28.75; commercial, $27.50; tinkers, $30.00; wire, $45.75.

ANOTHER REDUCTION IN PIG IRON FORESHADOWED

Toronto.

Pig iron is again easier on the local market, but no change has yet been made in prices, the average quotation remaining at $36.30. It is stated that a further recession on domestic centres in the near future would not be surprising, as the situattion in primary markets is decidedly easier, with indications of a price decline more or less pronounced.

HIGHER PRICE LIST ON WROUGHT PIPING

Toronto.

As forecast in previous pipe market reports appearing in recent issues of Hardware and Metal, a new higher price list on wrought piping is now in effect. This supersedes list No. 56, which was issued last August, and brings quota-

tions on standard buttwelds in sizes one inch and larger at slightly increased levels. Smaller sizes show no change. A similar revision is made in standard lapweld pipe, the current advance only being made on sizes 3½ inches and larger. This development corresponds with existing conditions outlined in the last issue and follows on the advances recently put into effect in southern primary markets. Price list No. 57, showing net prices in random lengths on both steel and wrought iron black and galvanized piping, is quoted below:

WROUGHT PIPE

Price List No. 57. November, 1922.

Standard Buttweld Pipe S/C

Size	Steel Blk.	Gen. Galv.	Wrot. Blk.	Iron Galv.
⅛ in.	6.00	8 00	....	....
¼ in.	3.96	6.00	7.20	9.30
⅜ in.	3.96	6.00	7 20	9.30

10L in.	1.92	2.43	2.82	3.39
10 in.	2.47	3.13	3.63	4.37

MARKED PRICE REDUCTION ON ELECTRIC DRILL

Toronto.

The Black & Decker Mfg. Co., Baltimore, Md., has made a substantial reduction in the price of their standard quarter-inch electric drill.

ADVANCED PRICES ON LEAD PIPE AND WASTE

Toronto.

Due to the recent upward trend in primary lead markets, quotations on lead pipe and waste are advanced one cent per pound this week. This revision places the base list quotation on lead pipe at 14 cents, with the usual discount of ten per cent. remaining unchanged. No change has yet been made in prices on lead sheets, the base of 9½ cents still being in effect. The climb of ingot lead has been specially pronounced during recent weeks, the strengthened undertone being followed by higher quotations, which trend is reflected in the market for finished products. Following are new local prices:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.	0 14
Lead Waste, pipe, list, per lb.	0 15
Do., over 8 in., list per lb.	0 16
Lead pipe is subjected to a discount of	**10%**
Lead traps and bends	15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 31
Do., strictly, lb.	0 25
Do., wiping, lb.	0 23½
Do., guaranteed, lb.	0 26½
Do., commercial, lb.	0 23½
Zinc sheets, per lb. 0 11	0 12

LEVELING UP PROCESS IN BOILER TUBE PRICE

Toronto.

Some slight revisions have been made in prices on a few sizes of boiler tubes, the changes being of an upward nature. While no general advance is being made, it is described as simply a leveling up in quotations at the present time. In the face of increases recently announced on other domestic markets, it is pointed out that local conditions govern the prevailing levels. However, distributors also state that some further advances on lapweld tubes are looked for in the near future, according to the strength of current primary markets and the cost of materials. One factor of note is the prevalence of slightly lower prices outside of Toronto, which situation is receiving attention at this time. Following are current average quotations:

BOILER TUBES—

Size	Seamless.	Lapweld
¾ inch	$19 00	$.....
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	24 00	.....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	.....
2½ inch	27 00	23 00
3 inch	34 00	28 00
3¼ inch	36 00	33 00
3½ inch	38 00	33 00
4 inch	55 00	40 00

PIPE FITTINGS ON STEADY PRICE BASIS

Toronto.

There is still a fair amount of trading in pipe fittings in evidence, a marked degree of finishing work on new buildings calling for a good supply of these products. Prices have generally remained unchanged, and while a tendency in an upward direction was recently noted, this has now subsided to a steadier basis. The fine weather experienced this fall has enabled construction work to continue longer than has been the case in other seasons, and a fair volume of activity in pipe fittings and kindred lines is generally expected during the ensuing weeks, as interior finishing will then be the rule. Following are prevailing discounts:

PIPE FITTINGS—

Cast iron fittings	27%
Plus, cast iron	27%
Do., solid	27%
Do., countersunk	27%
Bushings, mail	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flaged unions	27%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	34%
Do., ⅛ in. to 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk. and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ⅛ in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922.
Discounts: Class A, less 60 per cent.
Discounts: Class B, less 70 per cent.
Discounts: Class C, less 70 per cent.

SEASONAL ACTIVITY NOTED IN RANGE BOILERS

Toronto.

Increased activity in range boilers is now recorded, general reports of an improved movement in these goods being noted. This condition is attributed to the many new buildings requiring range boilers, while renewal work at this season of the year is demanding attention. Manufacturers describe the undertone to the market as firm, the recent revision in discounts having contributed towards this tendency, combined with the current seasonal demand. Quotations remain unchanged, as follows:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent; Extra heavy, 35 per cent.

TRADE IN CORRUGATED OF FAIR PROPORTIONS

Toronto.

While a fair amount of activity in corrugated sheets is generally recorded, the undertone is also slightly easier during recent weeks. This condition has developed since the heavier volume of trade has somewhat subsided and supplies of the flat galvanized sheets are also available. In discussing the reports of price shading on the lighter gauges of corrugated, one manufacturer remarked to Hardware and Metal that while there has been a slight tendency in this direction, it was considered that no general movement of this nature was under way, it being pointed out that while galvanized sheets recently were reduced in price, yet when these same products were previously advanced, quotations on corrugated remain unchanged at that time. The unusual volume of building activity at this time of the year has assisted in maintaining a fair trade in these products. Current price levels follow:

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

LOOK FOR BETTERMENT IN SCRAP MARKETS

Toronto.

In this week's waste material markets, copper scrap is stronger with an upward tendency but no large purchases have been made. It is the general opinion in the trade that the surplus scrap of this metal has now been pretty well absorbed and that prices may, therefore, be higher in the near future. The recent weakness displayed by copper was not reflected in this market. Red brass also is firmer and shows a decidedly upward turn. Yellow brass scrap is still plentiful and the market remains just about level.

In consequence of the decline in pig

iron prices, cast iron is easier and more plentiful than has been the case for some time. Heavy melting steel has also advanced in price but the consuming mills are still holding off. Higher prices are confidently anticipated in many domestic centres.

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00

Solid tires	0 60	1 00

TIN AGAIN ADVANCES ON SPECULATIVE MARKET

Toronto.

There remains an undercurrent of strength in most ingot metals with the exception of copper. In comparison with pre-war levels, lead and spelter show a distinct advantage, but copper has failed to enjoy the support of factors leading in this direction. The chief reason for this is the fact that Germany as a customer for copper has failed. Tin again features the current markets owing to advances of a speculative nature at London.

COPPER.—The suggestion of more strength in copper is found in the fact that the recent decline has been checked. The enforced absence of Germany as a leading copper consumer owing to the exchange situation, still remains the keynote to permanent recovery in this metal. At the present time, there has developed a slightly better tone in outside markets following a little improvement in demand. Domestic trading remains quiet and prices are unchanged from the level of 17½ cents.

TIN.—Tin continues to supply the feature on the non-ferrous group, new high records having been established at London on a speculative advancing market. This trend is reflected in the local quotation rising another cent, which change brings current prices to 42 cents. The high figures have resulted in trading falling off somewhat.

LEAD.—This market remains strong but more settled in tone. Domestic business is a little quieter, although the basis is firm and unchanged. In primary centres there is reported to be quite a shortage of this metal, but the market is steadier with prices firm. The local level remains at $7.50.

SPELTER.—The domestic demand for spelter is quiet, this development being chiefly attributed to the higher prices prevailing. Outside markets, however, continue high and the general tone continues firm. Local prices remain at the advanced level of $9.00 recorded last week.

London, Ont.

LONDON, November 9.—Business in the city of London and also in the surrounding country is reported as good. Fall lines are in active demand and the stores, although not rushed, are enjoying a steady volume of trade. Prices continue firm with further advances quoted on linseed oil, leather soles and cotton wrapping twine. Screen wire cloth booking price for 1923 is lower.

TONE IN TURPENTINE MARKET REMAINS FIRM

London, Ont.

There has been no change this week in turpentine prices, the undertone remaining firm and a fair movement prevailing.

TURPENTINE—

	Imperial Gallon
1 bbl. lots	2 35
2 to 4 barrel lots	2 34
5 gal. lots	2 50

LINSEED OIL PRICES CLIMB UP SEVERAL CENTS

London, Ont.

Linseed oil prices are again higher this week on the local market, this tendency being attributed to the current flax seed movement. The revised quotations follow:

LINSEED OIL—

	Raw	Boiled
1 to 2 barrels	1 17	1 20
3 to 5 barrels	1 16	1 19
6 to 9 barrels	1 14	1 17

Less barrels, add 15c gallon.

NEW QUOTATIONS ON SCREEN WIRE CLOTH

London, Ont.

Screen wire cloth prices for the season of 1923 show a slight reduction from former levels. The new base quotations follow:

SCREEN WIRE CLOTH—

Black, 12 mesh, $2.65 per 100 square feet.
Galvanized, 14 mesh, $3.75 per 100 square feet.
Bronze, 14 mesh, $9.50 per 100 square feet.
There is the usual additional five cents for 50 ft. rolls.

GOOD SALE CONTINUES FOR ELECTRIC HEATERS

London, Ont.

Both wholesale and retail merchants report that a good sale continues in electric heaters. Prices on these lines are steady and unchanged at the following levels:

ELECTRIC HEATERS—

	Each
Hot Blast, No. 20	3 76
Equator, No. A 7	6 45
Do., No. A 17	5 25
Majestic, No. 7	7 50
Do., No. 8	11 00

LEATHER SOLES AND HEELS ARE HIGHER IN PRICE

London, Ont.

New price lists are now issued on leather soles and heels. Many sizes and qualities of both tap soles and top lifts are from five to ten per cent. higher in price, while certain lines remain unchanged. Following are new net quotations on some well-known numbers:

LEATHER SOLES—

	Doz. Pr.
No. 43½, Misses assorted	1 40
No. 37½, Ladies assorted	1 85
No. 31½, Boys, assorted	2 20
No. 123, Mens assorted	3 10
No. 122, Mens assorted	3 40
No. 121, Mens assorted	3 80

For men's all size, 11 in. place of assorted, add 10 per cent.

ANOTHER ADVANCE IN COTTON TWINE PRICES

London, Ont.

Another advance of approximately five per cent. has been made this week in prices on cotton wrapping twines. The new quotations given locally are as follows:

COTTON WRAPPING TWINE—

3 ply in Balls, 59c. lb.
3 ply in cones, 56c. lb.
4 ply, in Balls, 63c. lb.
4 ply in Cones, 60c. lb.

SPRING BOOKING PRICES ON REFRIGERATORS LOWER

London, Ont.

New list prices issued this week on refrigerators for the 1923 spring season are approximately five per cent. lower than formerly. The revised quotations on the Sanderson-Harold make are as follows: Household refrigerators, new list less discount of 40 per cent.; other styles for butchers and stores, new list less 35 per cent.

REDUCED PRICES ON COMMON FENCE PLIERS

London, Ont.

New lower prices are now in effect on common fence pliers. Revised quotations follow: Williams 8 inch, $6.00 per doz.; 10 inch, $7.20 per doz.

ADVANCE IN WROUGHT PIPE

London, Ont.

A new higher list is now in effect on wrought piping. This advance has been outlined in former issues of Hardware and Metal. The revised quotations are contained on the current price pages.

SNOW SHOVEL ORDERS NOW BEING SHIPPED

London, Ont.

Booked orders for snow shovels are now being shipped. Following are prevailing prices:

SNOW SHOVELS—

L. H. Prince or No. 20 Doz.	5 50
D. H. Prince or No. 20	6 75
D. H. King or No. 40	7 50
D. H. Mouse, or No. 50	9 35
D. H. Furnace Scoops	5 75
L. H. Furnace Scoops	5 75

FAIR BOOKING ORDERS FOR ICE SKATES

London, Ont.

Booking orders for ice skates are reported to be in fair volume. Quotations on the Starr make remain at list less 30 per cent.

Winnipeg, Man.

WINNIPEG, November 9.—A better tone is being shown in the demand for seasonable lines of hardware. Wholesalers report that collections are showing a slight improvement. Weather conditions have been adverse to good business as farmers are still working the land, getting ready for next year's crop. With the approach of cold weather an improvement is expected. There are few price changes recorded this week. Manilla and sisal rope prices show a slight decline. Clay and rock picks are at lower levels. New price levels are in effect on bar iron. Steel fry pans have been slightly advanced.

MANILLA AND SISAL ROPE SHOW DECLINE

Winnipeg.

There has been a slight decline in the price of British, pure manilla and Sisal rope. Revised levels are quoted at 17½c for sisal, 18½ for British manilla and 21c for pure.

LOWER PRICES ON CLAY AND ROCK PICKS

Winnipeg.

Lower prices are quoted on both clay and rock picks. Five to six pounds are quoted at $7.75. Six to seven pounds $8.50 and seven to eight pounds at $9.

SLIGHT DECLINE IN PRICES ON RULES

Winnipeg.

There has been a slight decline in the price of two foot and three foot combination rules. Following are the new quotations:

TWO FOOT RULES—

No. 1375, $4.00; No. 1377, $4.80; No. 1192, $7.00; No. 1101, $8.00; No. 1167, $6.55; No. 1106 $8.45; No. 1118, $4.60; No. 1122, $22.45.

COMBINATION RULES—

No. 1190, $17.35; 3 ft., 1375, $4.95; 1112, $12.00; 1115, $16.00; 1118, $14.10; 1167, $8.00; 1169, $3.50.

PRICES ON BAR IRON AT HIGHER LEVELS

Winnipeg.

There has been a revision in prices on bar iron. To-day's quotations are as follows:

BAR IRON—

	Base
Small Rounds, 3/16, ¼, and 5/16"	5 40
Rounds and Squares ⅜ to 2 and flats up to and including 1 x 4"	4 35
Rounds and Squares—over 2" up to and including 2 ¾" and flats over 1 x 4 up to 6" wide	4 80
Rounds and Squares—over 2¾" and flats over 1 x 4 up to 6" wide	4 80
Rounds and Squares—over 2 ¾", up to and including 6"	5 10
Sleigh Shoe Steel	5 60
Bands	4 85

FAIR DEMAND NOTED FOR HORSE RASPS

Winnipeg.

There is a fair inquiry for all lines of horse rasps. Hellers are quoted at list price less 65 per cent. and garry rasps are quoted at list prices less 70 per cent.

GOOD INQUIRY FOR FINISHING NAILS

Winnipeg.

There is a good inquiry for finishing nails put up in one pound papers.

FINISHING NAILS—(In one lb. papers.)

½, $0.33; ⅝, $0.26; ¾, $0.21; ⅞, $0.19; 1, $0.17; 1¼, $0.16; 1½, $0.14; 1¾, $0.13; 2, 0.13.

FIRM TONE REMAINS IN TURPENTINE MARKETS

Winnipeg.

There is a strong tone to the turpentine market. Quotations of $2.25 per gallon locally show no change.

PRICES ON LINSEED OIL RULING STEADY

Winnipeg.

There is practically no change in the linseed oil situation. There is a good demand for small quantities with raw quoted at $1.25 per gallon and boiled at $1.28.

ORDERS FOR SLEIGHS AND TOBOGGANS ARRIVING

Winnipeg.

Wholesalers report that orders for sleighs, snowshoes, toboggans and other winter lines are arriving freely. Sleighs are quoted as follows:

SLEIGHS—

No. 1, $5.25; No. 2, $5.40; No. 4, $8.00; No. 7, $18.00.

SNOWSHOES—

No. 130, $1.60; No. 140, $2.00; No. 145, $4.15.

TOBOGGANS—

No. 3, $2.20; No. 4, $2.85; No. 5, $3.35; No. 7, $4.60; No .8, $5.10.

ACME STEEL FRY PANS ADVANCED IN PRICE

Winnipeg.

There has been an advance in quotations on Acme steel fry pans and the following quotations are now in effect:

FRY PANS—

No. 00, $1.20; No. 0, $1.99; No. 1, $2.30; No. 2, $2.56; No. 3, $3.07; No. 4, $3.32; No. 5, $3.94; No. 6, $4.86; No. 7, 6.14.

Calgary, Alta.

Arrival of Cold Weather Stimulates Seasonal Hardware Trade in Alberta

CALGARY, November 9.—A week of regular fall weather has made trade noticeably brisker in the retail hardware stores. Coal, gas and oil heaters are moving out well, and glass, putty, strip, and the numerous other lines necessary to winter comfort, are responding to a brisk demand. Retailers report cash sales better than for some time, and a corresponding improvement in collections. Reports from the smaller towns throughout the province indicate the same general tendency, and travellers' orders are better in assortment and in volume. A good sorting business can be expected on seasonable lines as the bookings for fall goods were light, with a dependence placed on jobbers' stocks to fill demands over the season.

Jobbers have distributed a nice volume of ice skates and hockey sticks, and this line looks promising. Besides the professional league, and the senior, junior and commercial leagues, there are school leagues, which include a number of teams, and probably use more supplies than the other leagues combined. Sporting goods departments are now finding the modern boy nearly as good a customer as the man.

The past year has witnessed quite a development in the use of electricity for cooking purposes. The city has made an attractive rate for power used for this purpose. The result has been a good many installations and present indications are that the sale of electric cooking ranges in particular, and other appliances in general, will be largely increased in the next twelve months. Hardware men are keeping a watchful eye on this development; the outcome of which may make necessary many drastic changes in the stove departments of the city stores.

Jobbers are now booking harvest tools for 1923 delivery at same discounts prevailing during 1922. The fact that prices have been issued would indicate the likelihood of a steady market on this line until well into 1923 at least. Current prices at Calgary, Edmonton and Lethbridge are 57½ per cent. off, and on private brands 55 per cent. off.

New prices are also issued on black wire cloth for spring delivery representing a decline of 25 cents per 100 feet. The past season was an active one on this line and with stocks clean, bookings should be heavier than of late. Prices now in effect at Calgary, Edmonton and Lethbridge are, for 12 mesh 3.00, and for 14 mesh 3.95 per 100 feet.

A substantial reduction is noted on clay and rock picks, to a level about 1.25 per dozen lower than prices of last week. Under present manufacturing conditions the reduction seems quite a marked one and will likely result in good sized orders being placed by jobbers for next spring business. Prices now quoted at Calgary, Edmonton and Lethbridge for both clay and rock picks are as follows: 5-6—8.55; 6-7—9.40; 7-8—10.00 per dozen.

New net prices are issued on Acme fry pans, representing a decline, with following prices current: No. 00—1.32; 0-2—2.15; 1—2.48; 2—2.75; 3—3.30; 4—3.57; 5—4.23; 6—5.22; 7—6.60 per doz.

The beginning of the radiator core

season is ushered in with a marked reduction on McKinnon cores for Ford cars. All other models remain the same as before; namely: 30 per cent. off for less than six, and 35 per cent. off for six or over. The Ford models are now as follows: type B 1916—10.08; 1917—12.09; type A 1916—11.04; 1917—12.90; less 10 per cent. in lots of six and over.

The week's records show a see-saw movement on cordage, all cotton lines being advanced, while sisal, British and pure manilla are lower. Cotton rope, 3/16 is now 58 cents, and ¼ in. and up is 56 cents per lb. Sash cord in hanks, No. 6—66; No. 7—65; No. 8 and 9—64. Sash cord in coils, No. 8, 10 and 12—64 cents per lb. Cotton clothes lines, 48—3.65; 60—4.60 per dozen. Cotton twine in balls, 3-ply—58; 4-ply—62; in cones, 3-ply—64; 4-ply—58 cents per lb. Cotton candle wick, 65 cents per lb. The decline on rope runs from 1 to 2 cents per pound, with following prices ruling at Calgary, Edmonton and Lethbridge: sisal, 18 base; British manilla, 19½ base; and pure manilla, 22 base.

A further advance on turpentine of ten cents per gallon touches a new high level and reflects the stiff tendency at producing centres. Present quotations at Calgary, Edmonton and Lethbridge are 2.45 in barrel lots and 2.55 for less than barrels.

Advice has been received of a further advance in wrought iron pipe affecting standard black pipe in sizes 1 to 4 inch only. This advance will in all probability be made effective out of local stocks early in the week.

Some adjustments in a downward direction are noted covering some lines of winter sporting goods, and include sleighs, baby cutters, toboggans, snow shoes and curling stones. Early winter sporting goods orders show evidence of a wider display than usual, but for very moderate quantities, and give promise of sorting activity as the season advances.

Vancouver, B. C.

October Best Month in Year Among B.C. Coast Wholesale Hardware Firms

VANCOUVER, November 9.—Wholesale distributors on the coast are almost a unit in declaring October one of the best months of the year from a standpoint of sales. Some say it was better than last year and much better than the preceding month. Further, with one exception—the fruit district—they say that the improvement is proportionately distributed over all sections of the province. An idea of the condition in the Okanagan may be gained from the fact that one grower in the Vernon district stated that for 1,000 boxes of McIntosh Red No. 1 apples, he would not receive more than $200 or less than 25 cents per forty pound box—much less than the cost of production. Collections are reported gradually improving.

In the electrical end of the trade, the feature of the last fortnight has been the display carried on in the electrical house on Shaughnessy Heights, when during a period of sixteen days nearly 22,000 people visited the home and inspected the many novelties in electrical devices. Already much benefit has accrued, the dealers say.

With a drop in the temperature during the last few days, there has been an increased demand for heaters and furnaces and retailers are making the most of the cooler weather to the extent of taking increased advertising space. To induce the sale of ranges, special inducements are being offered to householders. One firm, for instance, is selling ranges, set up, at ten dollars down and a similar payment monthly. Again, ranges are on offer at two dollars a week, while still another is accepting a dollar a week for a malleable range. In another instance a certain steel range is fixed for one day only at a uniform price of $69.75, one of the leading retailers having brought in a carload.

Two weeks ago, some dissatisfaction was heard in the Okanagan over an insufficient supply of cans for the season's preserving. A can manufacturer has pointed out that the fault lay not in Vancouver but with the buyers. Early this season orders were taken, he said, from the various canning companies for the year's requirements which were filled as per contract. Later it was found that the crop was so large as to necessitate more containers in the Okanagan.

Arrangements are already in progress with regard to the Christmas demand for chinaware and toys. One of these houses got the jump on the rest this week when it announced that on Saturday Santa Claus would make his first appearance at the store and that gifts of candy would be given each child who was present.

Changes in price have been negligible this week but retail departments, in some instances, have started their drives to make the most of the end of the year trade.

Following are some of the specials announced by various stores:

Garbage cans, $2.69; electric irons, 4.89; corn brooms, .98; aluminum double boilers, 1.75; nickel plated tea kettles, 2.39; galvanized wash-tubs, 1.19; wringers, 9.00; water power washing machines, 25.00; self-basting steel roasters, 2.00; razor blades, .75; turbine egg beaters, .40.

In builders' hardware special inducements are also on the list. For instance one standard set is placed at $15.60 a dozen, heavy bevel sets at $11.40 and inside sets (brass and copper finish) at $10; sash weights at four cents a pound and sash cord at one cent per foot; galvanized sheet iron at $1.65 per sheet for the 30 x 96 and $1.80 for the 36 x 96 size.

St. John, N. B.

Prospects for Busy Winter Season at St. John With Better Hardware Trade

ST. JOHN, N. B., November 9.—W. B. Snowball, of Chatham, N. B., a lumberman of this province, was in St. John last week, and stated that when the shipping season closed this fall, on the north shore, much of the old stock of lumber and a large percentage of this year's cut would be gone. He said that the lumber situation was better. Numerous steamers had taken cargoes from Miramichi and other shore ports, and three more vessels are now on the way to the river to load cargoes. Mr. Snowball stated that the Fraser Companies Ltd., would log quite extensively, mainly on areas of the New Brunswick Land Co. In the extreme northern counties, woodsmen were reported to be in strong demand, many men having gone over the Quebec border to cut lumber for the winter.

J. W. Corey, a Tobique lumberman, stated that in his opinion, New Brunswick will again pay her debts with spruce logs, it being quite evident that the money will not come from the products of the soil. This is the way he summed up the general business situation along the Upper St. John river.

The advent of November marks the near approach of the winterport season of St. John. An analysis of the advance prospects for the coming year indicates that St. John should enjoy a much better season than it has had since the termination of the war. Already nearly all last year's services have been announced by the steamship companies for the coming year, while additional routes also will be inaugurated from this port. Vast quantities of grain are expected to pass through here during the winter, while other freight cargoes also are expected to be good. The local shipping offices anticipate that the coming season will be a banner one. Already the loading of a consignment of about 1,000,000 bushels of grain is underway at Fort William, en route to St. John, and the first shipments are expected this week. Approximately thirty car loads a day will arrive until this consignment has been stored in the C. P. R. elevators

PROSPECTS FOR BUSY WINTER SEASON

(Continued from page 50)

in West St. John. The C. N. R. has about 500,000 bushels booked to arrive here during this month. The Furnace Line have added a new service, and are operating a line of steamships from St. John direct to Hull, England.

Building permits in St. John, covering construction estimated at $135,000 were issued by the building inspector during the month of October, as compared with $134,000 for the same month last year. The total to date for 1922 is $650,000, which is an increase of $11.000 for the total up to October 31, 1922. Twenty-nine repair permits were issued last month. The revenues from the harbor department up to the present are about $15,000 in excess of the amount received in the same period last year. During the month of October the receipts were nearly double those of October, 1921. For the month closing, $7,000 was taken in in wharfage charges. Last October they amounted to only $3,700.

Major E. A. Belcher, Colonel A. Christie and F. W. Bates, members of the British Empire Exhibition commission, spent considerable time in inspecting some of the St. John industries. One of the factories visited was that of T. S. Simms & Co. Ltd. Preparations are being made on Grand Manan for the opening of the lobster fishing season on November 15. With the opening of the lobster fishing season, the clam canning industry will get under way, so that many of the smaller boats now idle owing to the closing down of the sardine plants, will be active until nearly spring.

Angus McLean, president of the Bathurst Co. Ltd., has announced that the paper mill to be built at Bathurst, N. B., will cost $2,000,000 and will employ, when in operation, between 2,500 and 3,000 men.

Receipts from license fees under the Motor Vehicle Act in New Brunswick during the fiscal year which closed on October 31, amounted to $302,200. This is the largest in the history of the province. There are some sixteen thousand automobiles and trucks registered in the province this year.

On December the first the rule will be changed in New Brunswick, and will be "Turn to the Right." A large amount of advertising is being done by the department to this effect, and every New Brunswick publication from now on will contain this announcement.

Business is steadily picking up as the winter season approaches, according to the statements of several St. John hardware merchants, and with the prospects of a busy winterport season, the outlook is bright. It has been found that business in household hardware is always a good deal more active when the port is busy. More than two thousand men find employment on the docks, at good pay, greatly increasing the purchasing power of the citizens.

Hamilton, Ont.

Pre-Holiday Retail Buying Now in General Swing: Active Winter Lines

HAMILTON, November 9. — Pre-holiday retail buying is commencing in general. Particular interest is shown in such lines as electrical household appliances, glass ovenware, cutlery, sporting goods, toys, chinaware and tools. Prices are firm and the general price tendency in the hardware market is mainly upward. Where current price adjustments are on a lower basis, this trend is mainly attributed to economies which have been effected at the sources of production rather than a lessening in material costs. Stoves and furnaces, auto accessories and hunting equipment are in good demand. Collections in some districts are easier, but are generally not as good as had been expected because of the scale of prices that prevails for farm crops, the fact that in many cases disposition of crops has still to be made, while fair weather conditions have held the interest of the farmer on the land.

The movement of furnaces has been especially active during the past few weeks, and in certain quarters it is noted that a shortage now exists in some sizes. One manufacturer stated to Hardware and Metal that the movement had been exceptionally brisk for several weeks past, with no signs of the demand letting up. Already a shortage was evident, as furnaces were being shipped out to meet prevailing requirements just as fast as they were received from the foundry.

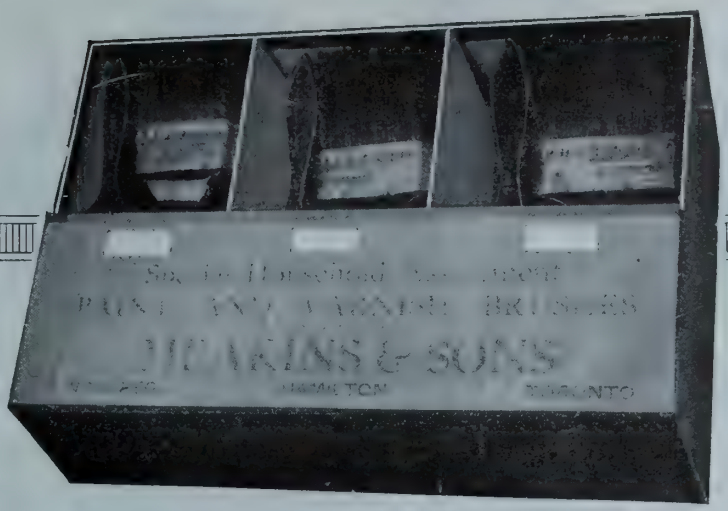
Electric ranges are also selling as fast as ever, while gas stoves and coal and wood ranges are also experiencing an unusual volume of seasonal trade. The viewpoint is expressed that these products remain the centre of attraction for several weeks with the trend of prices undoubtedly very firm.

Steel distributors report that the month of October has made a good showing in local trade, when compared with the records of the past two years. Any slowing up now apparent in certain seasonal work is not viewed with any sense of alarm, as it is pointed out that this development is more or less expected at this period of the year. In many lines, however, an average trade is looked for during the winter months, although business is on a relatively moderate scale due to the lack of construction activities. No changes have occured in existing price levels, the market remaining steady in both primary and domestic circles.

Pittsburg, U. S. A.

Production of Steel Moving Forward Under More Favorable Operating Conditions

PITTSBURG, November 9.—Operations of the steel industry continue at between 70 and 75 per cent. of capacity, the rate being probably close to 70 per cent., although some observers put it at fully 75 per cent.



Supplies of open-top cars continue at the better rate inaugurated about three weeks ago, and are fully equal to moving the current output of materials requiring such cars, while additional inroads have been made upon piles of materials previously accumulated, so that there is not much left of such material. A fresh box car scarcity, however, seems to be developing, as a result of box cars being ordered to move west to help in grain movement.

The finished steel markets, as a whole, are very dull in point of turnover in the open market. The heaviest movement is in sheets, but sheet purchases have been below the rate of production for a couple of months and lately have been considerably below. In merchant steel pipe, there is a very strong demand, but this does not involve very much new buying as there is a large amount of business on books, and buyers are pressing mills for heavier deliveries against these old orders. A little of the tonnage dates prior to the price advance in August, from 71 to 68 per cent. basing discount. Relatively little business has been done on the further advanced price, 66 per cent, basing discount, in effect since October 19.

Dullness in Some Lines

Bars, shapes and plates are particularly dull. Delivery premiums on these products have now practically disappeared, having been diminishing for more than a month. Several independent mills are now able to make quite early deliveries, although they have some orders on books calling for deliveries strung out to the end of the year.

Tin plate is seasonably dull and is particularly dull on account of price uncertainty. Independent mills have been claiming that there should be an advance from the $4.75 price to $5.25, but buyers are unwilling to contract at an advance when the Steel Corporation has not committed itself. The corporation is likely this week to make a price announcement, and open its books for first half in the case of manufacturing consumers and first quarter in the case of jobbers.

Displays and Selling Helps

We believe firmly in the old adage that—"goods well displayed are half sold."

So we have prepared for you—the dealer—attractive cards and cartons on which Meakins' Brushes are displayed. These displays are money-getters.

Your jobber can supply you with the complete Meakins line and all the dealer helps that go with it.

Farmer John Now Has Time to Paint

"Save the Surface" on the Farm Buildings and Implements Before the Cold Weather—Urging Establishment of Reserve Supply for Use at Odd Times in Indoor Months—Pushing Specialty Lines for Household Use in Winter Season

NOW is the time when the farmer has most time in which to replenish his paint stock and to do what protective painting is necessary on the farm buildings, implements, etc., before the winter comes. Throughout the year many hardware merchants have done much to show farmers the value of "Save the Surface" and now is the time when constructive suggestions linked up with this campaign may be all that is required to put across the idea in a substantially profitable manner. Barn paint, linseed oil and many specialty lines should be suggested to farmers at every opportunity right now and if prospects do not come to the store it may be found profitable to call them up on the telephone and suggest an order which will be adequate for the farmer to do what painting is necessary now and for having a supply handy during the indoor months for interior work. Some merchants by calling up farmer prospects throughout the district and making this suggestion have secured enough business to warrant keeping the delivery truck employed on regular trips for a while.

The mailing list should also be worked vigorously in both town and country at present because it is a fact that at the change of the seasons people are more susceptible to suggestions. Concentration might be made on varnish stains, floor finishes, radiator enamel and screen paints or small cans of house paint for storm sash. These lines have a specific purpose and should be displayed as such in the windows, not merely shown as a group of paint cans. Show a sample screen half painted before being put away for the winter and have a definite message pointing out that not only will this save time in the spring but it will result in more years of service for the screens because of their being protected against rusting.

Painting the Storm Sash

A storm sash might also be shown. Perhaps the house has been painted this year and the storm sash overlooked because they were off. The appearance of the house for the winter will not be what it should unless the storm sash are painted too. A piece of wall board can similarly be used to show the effect of using wall paint, gold paint for picture frames, linoleum varnish, aluminum paint, radiator enamel, etc.

Various household paints are much in demand at this time of year as much interior re-decoration is being done. The housewife is cleaning out the pantry shelves, fruit cupboards, etc., and paint can be sold for these. Perhaps she will be undertaking the refinishing of some pieces of household furniture and if so she will be a steady customer for paint, varnish stains, etc. Quite a number of housewives are buying ordinary kitchen chairs and oddly constructed tables and painting them up as breakfast room sets. One hardwareman has sold a great deal of paint for this purpose by suggesting that such a set can be made up very easily and at little expense whereas a set purchased in the furniture store runs to considerable money. There is still good weather for the big volume business for exterior painting but it is well to make preparations for a series of window displays and advertisements concentrating on certain specialty lines for interior work so as to keep the cash register busy during the indoor months. It pays to give close attention to satisfactory work on these small specialty orders because that customer may be the buyer of paint in large quantities next year for exterior painting.

Specialties to be Featured

A number of such lines which might receive special attention are outlined as follows: Spar varnish should come in for wide use now for refinishing front doors; the porch floor has probably been much scraped during the summer months and should receive a protecting coat of paint against the dampness of fall and next spring when the snow begins to melt. Insufficiently protected roofs may give trouble with leaking before next summer unless given a coat of roof paint. With the indoor months, young people's parties, dances, etc., the floors come in for much harder treatment and should be given attention at this time. How about black enamel for stove pipes, grate fronts and irons? Aluminum is the best finish for cast iron pipes exposed.

There are many such specialty lines in the store which should be singled out for special treatment, based on an extensive investigation of the uses for them. Sometimes some good pointers can be secured from customers as to the use to which they have put some lines.

In planning such arrangements the merchant should ask himself what the people who are in the market for these lines want to know about them. The legitimate answer is "What the goods will do for them." With this in mind displays should be arranged to show strongest comparison and emphasizing the small cost and small expenditure of time to achieve the result. This plan followed out with paint specialties has pulled especially good results for one hardware firm the writer has in mind.

Show What People Want to Know

Recently a window featured stove pipe enamel, auto enamel and radiator paint. Did they display a lithographed feature sent out by the manufacturer, a few color cards and

FARMER JOHN NOW HAS TIME TO PAINT

(Continued from Page 54)

some cans which might be said comprise the average paint window trim? They did not! They showed what the people were most interested in—how these specialties would transform the appearance of the things on which they were used.

In the left-hand side of their large window was an old stove with pipe. Half of the stove and pipe was rusty and the other half refinished with the stove pipe enamel offering a strong contrast that spoke louder than words.

The center of the window contained a radiator partly rusty and partly refinished. The refinished part was done in both gold and aluminum so that there wasn't a question in the mind of the potential or prospective customer as to what could be expected if these paints were used on his own radiators.

Two auto fenders were in the other side of the window. One was quite badly worn and the other newly finished with the auto enamel. It was easy to see that they were brothers, but one surely looked like a step child compared with the other.

Along with each of the displays was a neatly-lettered card telling in a modest way the virtues of the particular product which had been used.

This window had no great kick nor did it make a big splurge. However, it did what windows are supposed to do. It sold goods because it contained a real selling idea which stood out from all other ideas. It told the people just what they might expect if they used the products displayed.

Trims such as this often help out a merchant in dull times or off seasons.

CANADA PAINT CO. SALESMEN IN CONVENTION AT WINNIPEG

The Canada Paint Co. Ltd. held a salesmen's convention of their Western representatives at Winnipeg for four days. The general feeling was of confidence that the year approaching would be a good one, and plans have been laid to take care of the large trade now existing in the West. W. C. Boyd, sales manager, and salesmen are looking forward to a record business this year. Business has been increasing for the past two months and the future is looked forward to with confidence. The members were pleased with the co-operation that the trade in the West has given them as they realize that a paint and varnish department is a most profitable one if looked after properly and a bigger opportunity presents itself for still larger sales of prepared paints and varnishes. Following representatives were present:

W. C. Boyd, Winnipeg, Man.; D. E. Fawcett, Brandon, Man.; J. Sexton, Saskatoon, Sask.; F. M. Watt, Regina, Sask.; R. N. Ray, Calgary, Alta.; J. A. Manseau, Edmonton, Alta.; T. W. Doyle, Winnipeg, Man.; H. W. Bell, Moose Jaw, Sask.; R. W. Humphreys, Winnipeg, Man.

A splendid opportunity exists for the sale of brushes at this time of year. The fag end of fall housecleaning is still being done and interest should be carried over to pre-Christmas cleaning period and to the suggestion of brushes for suitable Christmas gifts. This will be another year of gifts of utility and a set of brushes designed to lighten labor in various household duties would be much appreciated by the housewife. Perhaps they might be grouped in gift boxes or with some such distinctive Christmas marking. This display by A. McCallum of Owen & McCallum Hardware, Vancouver, B.C., shows some novel arrangements of brushes on variously shaped display boards. This would offer a good basis of arrangement of brushes for this time of year and the Christmas decorations may be added a little later.

Sherwin Williams Co. Holds Convention of Western Salesmen at Winnipeg

SHERWIN-WILLIAMS Co. of Canada, Ltd, held a convention of their Western representatives at their Western district headquarters at Winnipeg. W. S. Fallis, Vice-president and Managing Director, together with W. J. Delaney, Advertising Manager, were in attendance. Plans were taken up for the coming year and it was felt that confidence in the West was justified. The company in the past year has made an extension to their building and plant. The Winnipeg plant is fully modern in every respect. Representatives came from all parts of the West as far as the Pacific Coast.

W. S. Fallis stated that judging from the experience of his company there is no room for "calamity howlers." "In times when there is the most stringency you have to fight the hardest for the business you should get. There are too many who lie back and all they do hard is grouse. They complain, instead of going after what is to be had for the finding. We ourselves have had a very good year. This does not apply to any one part of the country more than to another. In fact, as paint is one of the essentials, if material is to be preserved, our good year rather points to a general return to that normal state of trade to which we find we have returned."

The following members of the company were present at the convention:—

H. H. Eager, Western District Manager, Winnipeg; H. H. Eager, Jr, Winnipeg, W. J. Miller, Brandon, J. M Linwood, Manitoba, O. F. Maw, Saskatoon, W. R. Ecclestone, Regina, George Kerr, Moose Jaw, W. J. Wallace. Winnipeg L. Hannay, Calgary, D. Milne, Edmonton, J. H. Hawkins, Vancouver, J. J. Whalen, Vancouver, W. S Berryman, Vancouver, W. A. Paton, Calgary. A. W. Mowl, Winnipeg, J. A. Acheson, Winnipeg, R. Gardiner, Winnipeg, W. A. Dixon, Winnipeg.

At the conclusion of the convention H. H. Eager, the genial Western district manager, was presented with a sterling silver inkwell with the names of every salesman engraved on same.

Mr. Eager made a suitable response thanking the boys for their kind remembrance and assured them of the goodwill existing between the members of the company and the representatives.

Two Staple Lines that hold Wonderful Christmas Possibilities

BOECKH'S HI-GEN-IC HAND BRUSHES AND BOECKH'S SHAVING BRUSHES are two staple lines that hold wonderful Christmas possibilities for you.

They are both among those things that so many people want, yet put off purchasing for themselves and are therefore always much appreciated as gifts. And they are good, lasting, practical.

Why not suggest them to gift seekers?

Boeckh's Hi-Gen-Ic Hand Brush, with its beautiful aluminum back, its strong, pure bristles, is a gift that any man or woman would love to receive.

As for Boeckh's Shaving Brushes! Breathes there a man who never to himself hath said, "Boeckh's —That's the only shaving brush for me!"

Play up Boeckh's Hi-Gen-Ic Hand Brushes and Boeckh's Shaving Brushes this Xmas season. Display them attractively as special Xmas suggestions. You **know** their excellent quality, and you know their practicability. And you know, too, that the most appreciated gifts are the practical ones. Your extra efforts will be well rewarded.

Check up your present stock, and let us or your wholesaler know as soon as possible how many extra Boeckh's Hi-Gen-Ic Hand Brushes and Boeckh's Shaving Brushes you need for the Xmas season.

They are put up in attractive individual Packages.

Weekly Paint Markets

Montreal

MONTREAL, November 9.—Turpentine again offers the feature of the paint markets when prices are advanced ten cents per gallon locally. This change is announced by most distributors, although some are still withdrawn from the market. From prevailing conditions in the South a strong market tone seems assured for the following weeks. Demand is again reported as unusually brisk for this season with every indication of an active market for the remainder of the year at least. With new receipts only in moderate volume this is considered sufficient to maintain a very firm market position. Linseed oil prices are unchanged, but this market also displays a firm tendency. Local crushers state that difficulty is still experienced in obtaining fresh seed supplies, with congestion not only at the head of the lakes, but felt locally. The rising tendency in the pig lead market still contributes a very strong market for white lead in oil. This is so pronounced at the present time that one local corroder states that the market for the basic metal will be watched with interest during the next week or so and if present levels are maintained, higher prices on the finished product would not be surprising in the near future.

MAY BE ADVANCE IN WHITE LEAD IN OIL

Montreal.

Continued strength in white lead in oil, owing to marked advances in pig lead, again feature this market. There appears to be no let-up in the strength of the basic metal, an advancing market being reported in England, America and locally. An unusual thing is that New York prices are still well above domestic quotations.

In discussing the probable effect upon white lead in oil, one local corroder stated that with lead on its present level, and linseed oil at to-day's prices, higher levels on the finished product were fully warranted. Corroders have already had to advance their prices to distributors and another rise is thought pending. In summing up, much depends on the trend of pig lead during the next week or so. If present prices are held, or higher prices appear, a revision in white lead in oil would not be surprising within the near future, notwithstanding the present quieter season.

TEN CENT ADVANCE IN TURPENTINE PRICES

Montreal.

A further advance of ten cents per gallon is quoted on turpentine by most distributors. This brings the present price to $2.10 in one-barrel lots, although one distributor announces a price of $2.15. In other quarters quotations are withdrawn owing to no available stocks and the present unsettled state in the market. While demand locally is a little quieter than in former weeks, reports from the South state that the trade are buying as freely as at any time during the season. Buying also is again in fairly large quantities, with a marked improvement from export quarters. As has been pointed out in recent reports the future trend of this product will largely depend upon demand, and with conditions, as outlined above, prevailing at primary centres, it would seem that a strong market is likely for some weeks to come. Opinions are now expressed in the South that the present activity will continue for the balance of the year and the peak in prices has not yet been reached. Local average prices are the following:

TURPENTINE—		
1 barrel lots	2 10	2 15
2 to 4 barrel lots per gal.	2 08	2 13
Broken lots	2 20	2 25

MIXED PAINT ALSO HAS FIRMER UNDERTONE

Montreal.

Not only is there a stronger tendency in the market for white lead in oil, but ready mixed paint is also described as much firmer in tone, owing to the rise in basic materials. Manufacturers, however, are not attaching the same interest to these products at the present time as they are to white lead in oil and it is felt that a price development will occur in the latter before any change is announced in paint.

SEED SUPPLIES STILL HARD TO OBTAIN

Montreal.

Linseed oil prices are unchanged, following the advance of last week, but the undertone of the market is still very firm, owing to prevailing conditions in the flaxseed market. As far as the local market is concerned seed is described as firm, and hard to get. Not only is the freight congestion felt at the head of the lakes, but at the local port difficulty is experienced in getting flaxseed from the boats or cars owing to the heavy shipments of other grains. In discussing the situation with local crushers this week, the opinion is unanimous that a stiff market will prevail during the remainder of this month at least. Not only is the transportation question a strong factor, but reports from other outside markets state that seed is in a very strong position.

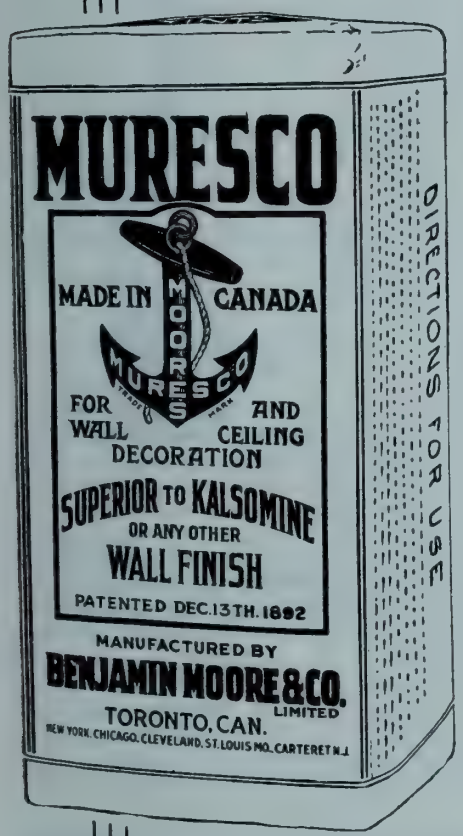
The English oil market, which is being watched more closely than formerly, is strong with quotations at about the same level as those given by domestic interests, and competition is not yet felt from this source. Following are unchanged prices:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per gal.	1 08	1 10
5 to 8 bbl. lots, per gal.	1 06	1 08

Less quantities, add ten cents per gallon.

Toronto

TORONTO, November 9.—Window glass continues to move freely and putty is also recording a seasonal degree of activity. Paint products, however, are now in a quieter vein upon the approach of the winter period. The strength of pig lead in metal circles has reflected in the tone of white lead in oil and should the upward climb continue, it is considered possible that white lead prices might rise accordingly. No changes are made this week in either linseed oil or turpentine quotations, although a range is still evident in prices quoted by local distributors. Southern producing centres record a slightly easier trend in turpentine, due to consumers holding off on account of the high figures. The market remains upon a firm basis, however, and while fluctuations of this nature are expected, a general recovery is also considered inevitable in future levels in view of supply conditions.



COMPLEX DEVELOPMENTS IN LINSEED MARKETS

Toronto.

The local linseed oil market shows a complex attitude this week. While no price changes are announced, yet some slightly easier levels were more or less considered pending, due to the relatively quiet movement of oil at this time of the year. On the other hand, however, the strength recently apparent in flax seed circles has been maintained and reflected in the oil market. Deliveries of seed have been light and competition for flax remains keen. These factors, combined with the comparatively small stocks on hand, serve to influence the current lin-

TORONTO PAINT MARKETS

(Continued from page 58)

seed quotations. There is still a range noted in local levels on oil, the lower price recorded being in the neighborhood of $1.10 for raw, while other distributors maintain the higher level noted last week of $1.17. Future price developments are generally considered somewhat uncertain, although with the removal of transportation difficulties and the arrival of seed in heavier volume, an easier tendency is looked for in some quarters. Following are prevailing quotations;

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrels	1 10—1 17	1 13—1 20
3 to 4 barrels	1 09—1 16	1 12—1 19
6 to 9 barrels	1 07—1 14	1 10—1 17

Less barrels, 15 cents per gallon.

TURPENTINE IN SOUTHERN MARKETS SLIGHTLY EASIER

Toronto.

While southern primary turpentine markets record a slightly easier tone this week, this development is chiefly attributed to lack of buying interest, which it is pointed out is more or less natural because of the sudden rise in prices. That a recovery in this respect, however, is looked for is indicated by the fact that no changes have developed in local quotations. It is also pointed out that offerings in the south are not large, and this condition reflects the firmness of future levels. One distributor expressed the opinion that fluctuations may develop from time to time, but the general undertone is one of strength based upon prevailing supplies in comparison with anticipated volume of requirements during future months. A spread is still noted in prices offered on the local market.

TURPENTINE—		
1 barrel lots	2 25	2 45
2 to 4 barrel lots	2 24	2 34
5 gallon lots	2 40	2 50

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

FOUNDATION ON WHICH TURPENTINE PRICES REST

Toronto.

In discussing current turpentine market conditions and the chief causes of the present high price levels, the latest report from Savannah indicates that between 75 and 80 per cent. of the total crop has now been marketed. The high prices that have prevailed in the past two months have naturally led to the rapid shipment of the spirits turpentine to the primary markets. Normally about 75 per cent. of the production would be in by the end of October. This year it is the general impression in southern circles that an even larger proportion has come to market. This means that the world will have to get along on approximately 20 per cent. of the production, and what small reserves exist at the ports for the next five months —and if the spring is backward, for next April as well. This is the base on which current high prices rest.

FAIR TRADE IN GLASS: PRICES STEADY

Toronto.

Current trade in window glass is described as on a satisfactory plane, with some manufacturers reporting that the total volume of sales are slightly below the records for previous seasons. This condition is mainly attributed to the fact that building activity, although most pronounced in the larger cities, has not been quite so brisk in many country districts. Other reports are more optimistic however, and the feeling is noted that a good movement in window glass for the next week or two is looked for. No changes have been made in quotations, the list and discounts on both imported and domestic glass remaining steady. The markets are described as firm, it being pointed out that foreign centres are stronger, while the stocks on all sides have been tested by the recent seasonal requirements.

BRUSH TRADE STILL IN FAIR VOLUME

Toronto.

In the brush markets it is reported that some business of a fill-in nature is still coming to hand, manufacturers and distributors stating that the demand is keeping up well. In some cases also orders are being placed for early spring delivery. No change is being generally looked for in brush prices for several months, commitments in the way of bristle supplies having been made on the basis of recent levels, which record little variation.

INCREASED ACTIVITY EXPECTED IN SHELLAC

Toronto.

Shellacs have apparently settled on a slightly steadier market, with quotations remaining at the recently revised levels. There is a recent improvement in the undertone, buying becoming more active in primary centres, and although locally the demand is seasonably quiet a gradual increase in purchases is looked for. Unchanged prices are as follows:

SHELLAC—	White		Orange	
In barrels	4 25	4 60	3 75	4 10
One gallon jugs	4 55	4 95	4 05	4 45

CHARGED WITH SHELLAC DECEPTION

The U. S. Federal Trade Commission alleges methods of unfair competition in a complaint issued against the Don-O-Lac Co., Inc., of Rochester, N. Y.

The concern is a manufacturer and distributor of paints, varnishes, shellacs and kindred products, and is charged in the complaint with advertising and selling under the name of "American shellac" a substitute for shellac said to be inferior to shellac as commercially known. The trade and the general purchasing public, the complaint avers, is thereby deceived into the belief that the respondent's so-advertised product is composed of shellac gum and alcohol, when such is not the case.

CANADIANS AT BOSTON VARNISH CO. CONVENTION

Group of delegates to the Kyanize Sales Convention of 1922 at the factory of the Boston Varnish Co., as outlined in last week's issue of Hardware and Metal. Personal application sessions were a feature of this convention under the direction of H. A. Hall, treasurer of the company. The company's policies were outlined by H. B. Winne, Sales manager, the credit policy by W. W. Gilmour, Credit Manager, and industrial selling by S. L. Stuart, Industrial Sales Manager. Among the Canadians attending the convention were C. H. S. Bamford, J. H. Ashdown Hardware Co., Winnipeg; E. A. Townsend, Montreal; J. B. Jenkins and D. Sutherland, of J. H. Ashdown Hardware Co., Calgary and Saskatoon respectively.

The Entire CANADA Line Is of Proven Quality

It means every CANADA Brush you sell stays sold.
"Staying Sold" means that the dealer is assured of repeat orders and satisfied customers.

Repeat Sales Are Certain

—when you stock and sell one of these standard brands of files.

Files wear out and must be replaced quite frequently. File customers are steady customers—when you give them what they want.

And they want one of these brands—known as the standard for over fifty years.

Newer *and* Better
The Beach Pipeless Furnace

Into this new member of the Maple Leaf Foundry has been built every desirable feature of ordinary pipeless furnaces plus refinements and improvements made by our own engineers that lift the new Beach Pipeless to a place apart.

Ease of operation, economy of fuel, heating efficiency and long life are part and parcel of the Beach Pipeless—these qualities are inbuilt. Write to-day for our folder which shows in detail the many points of Beach superiority and which contains also some interesting information regarding prices and profits for you.

Something Different in Wagons

"A Money Maker"
"A Time Saver"

SELLING POINTS IN THE *Trans-Canada*

No cotter pins to tear the boy's clothes, outside of wheel is flush.
One-piece malleable unbreakable wheel.
Box all solid oak.
Sprayed with varnish, trimmed with red and black.
No repair parts needed, thus saving time and annoyance.
The wheel comes set up. The Trans-Canada is equipped with a patented self-contained roller bearing hub and all metal unbreakable wheels. All you have to do is to place one bolt for each wheel.
This new wagon has made a big hit with the boys. It is strong, well finished and is practically unbreakable. If your jobber cannot supply you, write us direct for prices.

Facts versus Fiction!

In a recent advertisement appearing in Canadian newspapers appeared the following:—

"SAFETY OR DOUBT—

No question about it at all if you roof with Asbestos Shingles.
The only absolutely fireproof roof made in Canada."

Realizing that oft-times the zeal of the ad-writer will exceed the facts, we wrote to this concern in Quebec Province, asking whether it might not be well to limit the statements to the confines of truth, inasmuch as

A Metal Roof is Fireproof!

Although nearly a month has elapsed we have no reply—and evidently because the only reply would be an admission that their statements were wrong.

Now we know that asbestos has great merit, but why should they try to misrepresent its virtues when

Galvanized Steel Shingles and Corrugated Sheets make Safe and Satisfactory Roofs?

You can get such roofing material—so good and so durable that no one can deny—from any sheet metal worker.

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks —made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.
These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.
Have you written for our prices?

THE J. H. ASHDOWN HARDWARE COMPANY, LIMITED

Calgary Winnipeg Saskatoon

Automotive Wrenches and Accessories

We can help you in handling auto accessories. Every hardware merchant purchasing our stock orders "G" and "H" will receive Display Boards, "G" and "H," which show SOCKET AND FLAT WRENCHES in various styles.

Superior in Quality and Construction.

Our Sockets cannot loosen on the stem.

Made by new patented process.

Write for description of the workmanship; it will please you.

Manufactured by

The Gray Ball Bearing Co.

Limited

686-692 St. Clarens Ave. - Toronto

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly.

Manufactured in Canada

If interested tear out this page and place with letters to be answered.

RATS!

The damage done by rats runs into millions of dollars each year. They also are a menace to health.

This is the most effective rat trap on the market, and is made in two sizes, 16″ and 20″. It catches not only one but several rats during a night.

The top illustration shows the fabrication of this trap—it is strong and will last indefinitely.

Order from your jobber.

The Original Keystone WESTCOTT Adjustable "S" Pipe Wrench

Makes a special appeal to your customers because it can be used in many out-of-the-way places quite inaccessible to the ordinary monkey-wrench. These efficient, reliable wrenches are made of first-class material, and are strong and durable.
These are the genuine Keystone "Westcott" wrenches, plainly trade marked "Westcott" on the handle. Many of your customers have used these exceptionally satisfactory wrenches for years and will replace them with no other kind. Display them well. Let the prospects know you have "Westcott" wrenches.
If your jobber cannot supply you, write us direct.

The Keystone Mfg. Company, Postal Station "B", Buffalo, N.Y.

OIL CUPS FOR EVERY PURPOSE

No. 53

The No. 53 oil cup is designed for use in a vertical, horizontal or oblique position. Absolutely dust-proof, the cap is fitted with a spring which prevents it from jarring open. Easily operated and cleaned. Made from brass in six sizes. It is also made in a self-closing style, No. 70.

The Empress line of lubricators consists of more than twenty different styles of oilers and thirty types of standard grease cups beside many special styles. We also make spring shackle bolts and dowel pins.

Write for complete catalog and prices.

The No. 77 Oil Cup is an exceptionally strong and well-made cup of the hinge lid style. The cap is easily operated with the oil can spout, closes automatically and cannot jar open or loose; dust-proof; made from steel in three sizes. Also made with a plain nipple for driving into an oil hole, No. 78.

No. 77

Laidlaw Products

"You and I have very little individuality except to those who are very well acquainted with us, W.N. Most people don't give much thought about who we are or where we come from."

"Don't be pessimistic, B.T., don't you know that the way we act is just as important as though we wore a Laidlaw button on our coat lapels; and you have always been a perfect success, you know!"

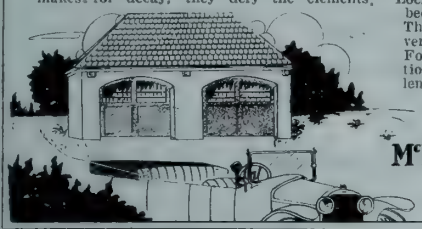
Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

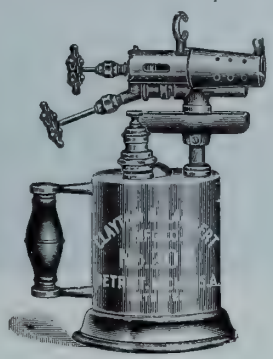
Cary's "Self Tightening" Round Wire Box Strapping

This strapping is put up in reels of 5,000 feet each, or in bundles cut to special lengths. Made from a special soft coppered round wire in number 14, 15 and 17 gauges. Nails are to be driven between twisting points; the further in nail is driven, the tighter the strap is on the case. *Samples and dealers' discounts upon request.*



CARY MFG. CO. - Manhattan Bridge Plaza BROOKLYN, N. Y.

Manufacturers of Shippers' and Packers' Specialties--Send for Complete Catalogue.



"Crown" Metal Shingles

You Can Safely Recommend Them

For any and all kinds of building, for they have been scientifically constructed to adapt themselves to the most exacting roofing work. They are absolutely storm, water, fire and wind proof, making the strongest metal roof in existence. Free from solder, exposed nails or anything that makes for decay, they defy the elements. Locked on all four sides they become a continuous piece. They are easy to apply and are very attractive in design. For details and any information on any sheet metal problem, write

McFarlane-Douglas Co.
Limited
Ottawa, Canada

No. 208 TORCH
List Price Each $17.00.
Ask for Discount.

Let us tell you why

The No. 208 Torch gives better service and satisfaction. The improved Double Blunt Needle Burner burns petrol, the modern fuels, either gasoline or kerosene. Burner can not be ruined by enlarging the gas orifice as both Needles are blunt, not sharp pointed as in other makes. Jet block is removable. Upper Needle is used to clean the orifice, thus insuring a perfect flame; lower regulates. Burns perfectly in cold and windy weather. Tank thoroughly braced. Has all up-to-date patented improvements. A time and fuel saver. Jobbers supply at factory prices. Get a catalogue.

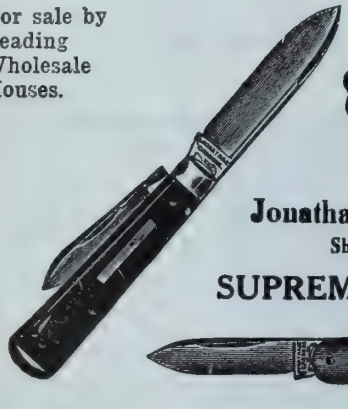
bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Further information for the asking. All kinds of wire cash and parcel carriers and pneumatic tubes.

Gipe-Hazard Store Service Co., Limited

113 Sumach St., Toronto, Ont.
Also 318 Homer St., Vancouver, B.C.



Here is a Carrier affording the merchants better service in return for the money it cost than does any other of its type ever produced. It is also more compact and handsome.

Note that it has no cords, pulleys, elastic springs or other frail, cumbersome and unsightly toggery, and its means of propulsion are not only the most simple, but afford more power than any other made, and therefore the Carrier is more rapid and dependable.

There are many users of these machines throughout Canada, and you are invited to inspect and make inquiry about them from any one of these.

Examine Your Ladder

There are manufacturers to-day who are not getting the profits they expect out of their business. It will be found in many instances this is due to a missing rung in their business ladder.

That rung is

Dealer Co-operation

Without the good-will and support of the merchant, the business ladder is imperfect. It cannot be readily scaled to the "Profit" and "Success" rungs at the top, unless the Dealer Co-operation rung is in the proper place.

The following trade newspapers, all leaders in their respective fields, offer manufacturers the most economical and effective method of securing the co-operation and sympathetic support of the dealer:

Canadian Grocer
Dry Goods Review
Men's Wear Review
Canadian Automotive Trade
Hardware and Metal
Druggists' Weekly
Bookseller and Stationer
Sanitary Engineer

All Published by

The MacLean Publishing Co., Ltd.

143-153 University Ave., Toronto

Also publishers of Financial Post, MacLean's Magazine, Canadian Machinery, Power House, Marine Engineering News, Canadian Foundryman and Printer and Publisher.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

Why Hardware and Metal Dominates Western Canada

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg, Calgary and Vancouver.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London, St. John, Hamilton and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing." Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

DIETZ LANTERNS--FOR QUICK SALES AND SATISFACTION

Shipments Made Promptly

"That's Our Promise as Well as Our Slogan"

Mr. SMP

Copyright in Canada by the SMP of Canada, Ltd.

Those three letters SMP are full of meaning. First, they represent in brief form the Sheet Metal Products Co. of Canada, Limited. Second, they appear in our trade-mark on goods in thousands of hardware stores in every corner of Canada, guaranteeing service, satisfaction and long wear to housewives. And finally they mean "Shipments Made Promptly," our trade slogan, and our promise to merchants that all orders will be handled with care, promptness and quick despatch.

We are in a position, after years of work and planning, to fill all orders as speedily as any merchant could ask. With our immense, splendidly co-ordinated manufacturing facilities, and our fine warehouses situated at Montreal, Toronto, Winnipeg, Edmonton, Calgary and Vancouver, we are in a position to live up to all contracts.

In the year 1922 the letters SMP have taken on a new significance throughout the Dominion. Millions and millions of newspapers, farm papers, country publications and magazines have carried messages into Canadian homes telling of SMP wares. Those wide awake merchants who have teamed up with our big campaign have been well rewarded by bigger turnovers at frequent intervals with the resulting profits. Talk to our representative when he next calls on the possibilities of a closer tie up to the magic letters SMP.

Hoovers Worth $11,000 Sold by Hardware Store in 18 Months—50% Gain This Year

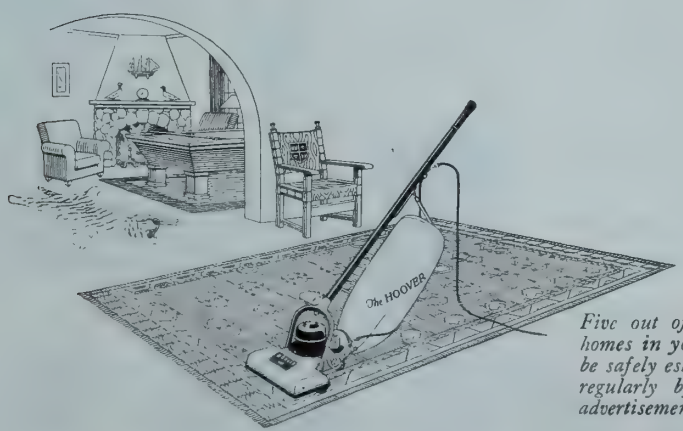
The Hoover Bag Is Properly Reënforced

(Another Patented Hoover Feature)

THE heavy dirt which is suctioned into the bag of an electric cleaner, describes an arc and falls—as indicated above—upon a small area at the base of the bag. Naturally this portion must withstand the most wear. In the Hoover bag, a double thickness of the special chemically treated fabric is provided at this point. The remainder of the bag is but one thickness of the fabric treated so that even the finest dust particles are prevented from escaping, yet permitting the ready escape of the air, a feature necessary to real cleaning efficiency. By the special re-enforcement at the point of most wear the life of Hoover bags is materially increased. Covered by a Hoover patent granted *February 17, 1920*. Over twenty patents now protect The Hoover. Additional applications for patents are pending.

The Moose Jaw Hardware Ltd., in Moose Jaw, Sask.—a city of 3,794 wired homes—during 1921 sold 86 Hoovers valued at $6,515.

During the first six months of the current year, however, their sales were 67 Hoovers worth $4,548.50. This represents a gain of more than 50% for 1922, and a total volume of business of $11,063.50 for eighteen months.



The famous Hoover Co-operative Plan is in effect here as it is in so many other prominent stores. Under this very successful arrangement our trained sales organization—working closely with the dealer—secures leads, demonstrates, sells, delivers and services the cleaners.

At the center of the main floor, in the store of the Moose Jaw Hardware Ltd., a Hoover demonstrating table is located. Hoover window displays, local newspaper publicity on The Hoover, and special sales campaigns at intervals, are also used to build business.

The years of experience which our sales organization has had in successfully assisting retailers to sell Hoovers, is at your disposal. Whether you are in a small or a large city, we are organized to help you properly.

Why not take the matter up with our representative? Send for him—there is no obligation.

The SALES Leader

"We picked the Caloric as the best mechanically from fifty different makes of furnaces." —

FRANK POWERS
Lunenburg, Nova Scotia

Mr. Powers further says that on account of Monitor Engineering service, and other features especially valuable in closing sales, he considers The Monitor Stove Company, Ltd., good people to do business with.

Write for testimonials from any province in which you are interested. The experience of people who use the Caloric is the strongest evidence of Caloric leadership and superiority.

The Caloric is the **sales leader** in the heating field because it offers the buyer unequalled advantages over other methods of heating. It sells more easily because people want the most for their money—and the Caloric gives it to them.

Tests in more than 135,000 buildings throughout Canada, the United States and European countries, prove that the Caloric heats more uniformly and with one-third to one-half less fuel than other systems require. Other methods cannot compete when this outstanding economic advantage is understood by the buyer.

Through years of service Caloric superiority has been firmly established. Thousands of dealers have already built up substantial businesses with the Caloric—many have made independent fortunes.

You can go with the tide of success by joining the Caloric dealer organization NOW. Write to-day for details of the Caloric opportunity in your territory.

Hamilton DOWSWELL TRADE MARK Canada

For Christmas Selling

Aggressive work at this time will double your sales of washing machines and clothes wringers. A suggestion to customers who enter your store will in many instances be gratefully received. Many a man will buy a washing machine or clothes wringer (or both) for his home from live dealers who display and demonstrate these household labor savers. Now is the time to have an assortment on your floor.

Our washing machines are practical, simple, durable and all but trouble-proof. We make washing machines for hand-power, water-power, electric power and engine drive—to suit every purse—all of proved worth.

Our clothes wringers are unsurpassed for wearing and wringing qualities.

Jobbers sell and recommend them.

LADD
Mixer Churn

EGG-BEATERS NOT SEASONAL

PROVEN BY OUR RECORDS THAT LADD BEATERS ARE NOT SEASONAL GOODS NOW. We know consumers' decision and stores confirm it. Years ago many stores dropped interest in certain housewares in December and January.

Are sensible dealers doing that now? Not at all — figures prove they are not. Why, last January, we shipped **MORE GOODS** than any month this year except two and last **DECEMBER WAS A VERY GOOD ONE.** 10 years ago these months were nothing.

Fact is, Egg-beaters are being worn out and broken in December just as they are in March, and if your stock is out, then your customers, wanting the goods, go to a merchant who will keep a continuous stock of **GOODS THAT ARE STAPLES** and **SELL EVERY MONTH IN THE YEAR.** Again, our records prove the thing to go crazy about, is the stuff that sells **EVERY DAY IN THE YEAR** regardless of celebrations; that is what pays the board and rent and puts **PROFITS** in the bank. **KEEP UP YOUR STOCK OF LADD BEATERS** in December just as any other month. They will not hurt your inventory.

JOBBERS the world over and **US.**

Why "Quality" Drivers Are Superior

See how the steel in the Quality Screw Driver extends clear through the handle. Note how the strong blade is held by a heavy steel rivet, driven straight through ferrule and blade. Observe the round drop forged end—the blade can never turn in the handle, and the handle will never come off, split or loosen.

Ask your jobber to supply you.

Is the Sawdust Soaking Up Your Profits on Oil Sales?

With the ordinary barrel and measure "system," oil drips from the barrel faucet, oil is spilled from over-flowing measures—every drop of which is wasted.

But with Bowser tanks there is no waste of oil. You check in each amount received—it is stored in leakproof, fire-proof tanks—it is dispensed through accurate measuring pumps directly into the receptacle.

In operation, if oil is carelessly spilled it goes back into the tank through the Bowser drip pan—no sawdust is needed. Thus every drop of oil you buy is sold and pays you a profit.

The time saved by the Bowser will alone pay a handsome dividend on the investment.

And the fast, accurate, cleanly service makes every customer a friend of your business.

For specific figures as to the possible economies in your oil department ask for booklet C-16 and get the Bowser story.

The MAXITAP For Staybolts

Records of Maxi Staybolt Tap performance show results of 1,000 to 1,700 holes per tap—even on the exacting test of boiler repair work. Compare these figures with the staybolt tap performance in your own shops—consider the economy of Maxitaps.

The mechanical features of the Maxitap form one reason for this exceptional showing—the pilot point, chip breaker, special hook, long taper section, and special relief all contribute to longer wear, and keep the holes true to size. The other fact in Maxitap success is the service that stands back of every Maxitap, ready to help solve your staybolt tap problem.

Keep this in mind—remember that "G T D Maxitap" means more than a staybolt tap—it means economical production of perfectly threaded staybolt holes. Let us prove this on your boiler work in your own shop. Bulletin 129 sent on request.

Examine Your Ladder

There are manufacturers to-day who are not getting the profits they expect out of their business. It will be found in many instances this is due to a missing rung in their business ladder.

That rung is

Dealer Co-operation

Without the good-will and support of the merchant, the business ladder is imperfect. It cannot be readily scaled to the "Profit" and "Success" rungs at the top, unless the Dealer Co-operation rung is in the proper place.

The following trade newspapers, all leaders in their respective fields, offer manufacturers the most economical and effective method of securing the co-operation and sympathetic support of the dealer:

Canadian Grocer
Dry Goods Review
Men's Wear Review

Those Inaccessible Soldering Jobs—

The kind that make you squirm and swear until they're done—those jobs are made *easy* and *simple* with Kester Acid Core Wire Solder. All you do is to apply a touch of heat and Kester Solder and the job is finished—*quickly, economically* and *permanently.*

The reason? Kester Solder has an *acid core* that feeds the proper amount of flux as the solder is melted, and in this way eliminates the troublesome pot of acid or paste and the messy swabs, sticks and brushes; besides the job is done in half the usual time.

Kester Solder comes coiled in one-pound cartons or on one-pound spools, but for quantity users it is more economical to buy it on five and ten pound spools.

Dealers everywhere stock Kester because it is a *clean, fast seller,* and brands their store as an establishment that caters to the modern mechanic.

ORDER FROM YOUR JOBBER

GENUINE High Power Coleman Mantles are best for use on COLEMAN QUICK-LITE Lamps and Lanterns because they work perfectly with the gas tip and air intake in producing the brilliant light that has made the Quick-Lite famous.

Nothing better for use on all other gasoline lighting devices. Our new package (12 Mantles in a box) enables dealers to sell a dozen where only two were sold before.

Coleman Junior Mantles (No. 41) are highest grade. Made of long fibre Egyptian cotton, correctly shaped and treated with powerful light-giving chemicals.

Order from your Jobber, or write us for further information, prices, etc. The new Counter Display Carton is a real silent salesman (illustrated above).

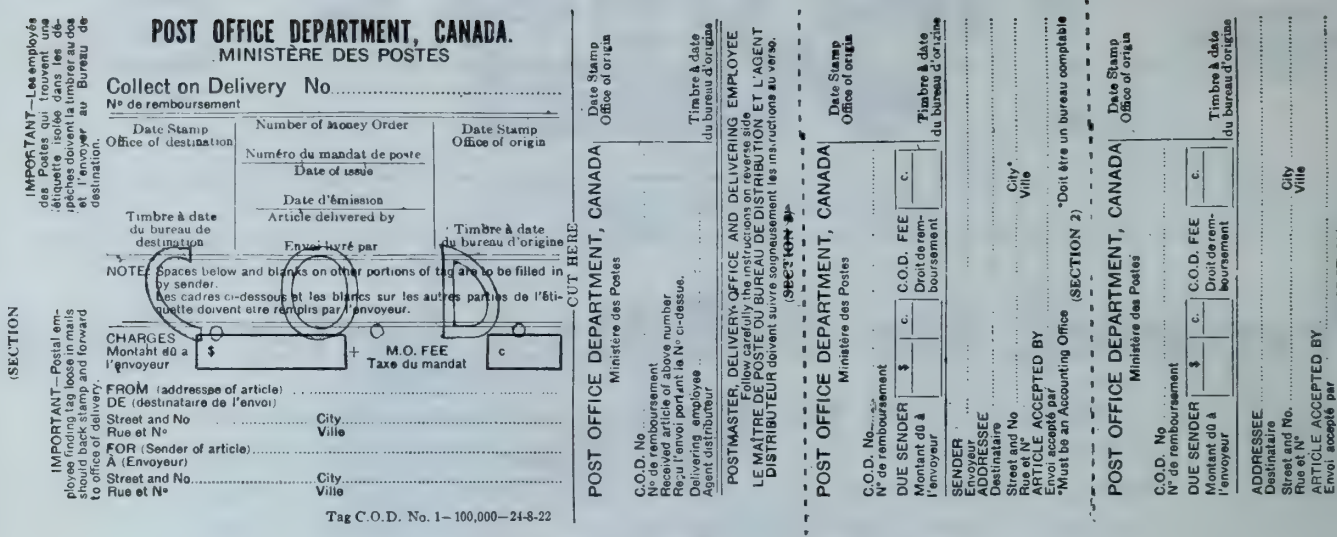
Preparing for Big Mail Order Trade

Investigation Shows Mail Order Firms Dominating Parcel Post Shipments Under New C.O.D. Regulations—Records of Insured Parcels for Past Year Reveal Interesting Trends of Mail Order Business—Some Odd Situations Arise in Enforcing New Regulations

WITH a view to establishing just what progress is being made by mail order firms in developing business, and of finding out who is making chief use of the new postal regulations providing for C.O.D. service on parcel post, Hardware and Metal this week visited Terminal Station "A" of the Toronto Post Office. Here the matter was discussed with various officials and some interesting figures secured which give some indication of just what is developing and the likelihood of further development of this service which competes in many cases with retail hardware and other merchants throughout the country.

A table appears in this article showing shipments under Insured Parcel Post from Terminal Station "A" in Toronto month by month for the past year. It is arranged according to the value of the parcels. The shipments from this station represent approximately ten per cent. of the parcel post business done by the city and these records are being used merely as indicators of trends of business which will be of interest to retailers. As representing ten per cent. of the parcel post done in insured parcels, the total of 219,874 parcels for 13 months is indicative of the great volume of business done by city firms in the rural districts. It must be borne in mind that parcels sent under the C.O.D. system since October 1 of this year are not included, neither is the big volume of parcel post which goes through in the ordinary way uninsured. It is significant that the large city mail order firms which originally sent their parcels under the insured plan now curtail expense by sending parcels uninsured unless they are particularly valuable, such as jewellery. Of course, in case of damage the mail order house generally makes good the shipment to the purchaser and assumes the liability itself.



A study of the statistics showing shipments of insured parcels for the last thirteen months indicates some interesting facts. The totals indicate a gradually increasing trade during the last three months of the year. A dropping off with the advent of the new year, then a steady climb up until May, then a falling off during the three midsummer months, followed by the steady climb again in the fall. A comparison of the figures for October of this year with the same month last year indicates a considerable increase in volume of business this year. It will be noted that the increase in December, which obviously represents Christmas gifts, is chiefly in articles valued less than $5 and a small increase in parcels between $5 and $25, while there is a decrease in parcels valued $50 and over. The increase in the number of parcels in October of this year compared with last year is consistently maintained throughout the whole range of values. Some indication of the growth of mail order business by one of the largest Toronto firms is found in the fact that fifteen postal men are now constantly employed in the premises of this firm to attend to Parcel Post mail matter, this being three more men than were used at this time last year.

Another interesting feature is that the volume of parcels valued from $25 to $50 fell off considerably all year until the month of October. Parcels $50 to $100, while showing some improvement, are not yet back to the volume of the last months of 1921. These fluctuations bear a close relation to business conditions in those periods.

Much interest is being taken in the new regulations providing a C.O.D. service on parcel post, in effect since October 1. It was felt that because of the fact that mail order firms generally secure cash in advance in the ordinary course of their business they would not be much interested in this new feature of the Parcel Post service. However, the records secured by Hardware and Metal of C.O.D. parcels handled through Station "A" indicate the startling fact that city mail order firms are practically dominating the new service. During the month of October last 2,099 C.O.D. parcels passed through this station of which 2,093 were of less value than $50 and six were valued at more than that amount. Of this number 1,763 parcels, or 84 per cent., were those ordered on the C.O.D. basis by customers of a large city department store which operates a large mail

TAGS USED ON C. O. D. PARCELS

From left to right the sections are for the following purpose—The upper part of the first section is filled in by postal officials giving number of money order which pays for the shipment, date of issue and name of carrier delivering the parcel, date stamp of the office of origin. A delivery number as authority for collection is placed on each tag. The lower part of the first section shows the amount of the charge, addressee of article, street number, sender of article and street number. The first section running crosswise on the tag is a delivery record. The postmaster of delivery office detaches this coupon and obtains signature of delivering employee. If the article is not delivered the coupon is returned when the article is returned. Postmaster at delivery office will retain coupon until article is again given to him for delivery. The second portion is the mailing record for the office of origin. The end portion is the Sender's Receipt on the back of which the C. O. D. fees are outlined.

order business as well. Of that number 104 parcels were from a competing mail order firm; 60 per cent. of the other 232 parcels were from wholesale woollen firms and the other 40 per cent. were from wholesalers of other lines of goods.

These records show that while the regular mail order business of such department store-mail order firms dominates the regular Parcel Post, that through the medium of their city newspaper advertising and other efforts they are able to link up with the C. O. D. system and thus provide the country with a combination almost as effective as the mail order catalog.

Investigating the subject as to whether or not mail order firms would be inclined to make wider use of the C.O.D. service by eliminating prices from catalogs, thus not being compelled to issue new catalogs or price lists except as new stock or style changes made it necessary, it was pointed out to Hardware and Metal that this was an unlikely development under the present regulations. The mail order firms were said by Post Office officials to dislike the C. O. D. regulations as applied to their business for a variety of reasons. In the first place few people will send for an article when they do not know what it will cost them until it is delivered and when, according to the regulations, they must pay for it before examining contents. Some amusing situations have already arisen in certain other cases where parcels have been handled in this service. In some cases parcels have been refused after being ordered and the onus is on the sender to show the carriers that he had a bona fide order to send the parcel out. In these cases the Post Office must stand the liability of carrying a parcel and returning it without charge. In certain other cases due to misunderstanding the person ordering the parcel had sent the money to the company immediately after ordering the parcel and on refusing to pay the carrier for it the parcel was held and returned to the sender. Postmasters in some post offices are not much acquainted with any business duties outside of identifying letters and they do not thoroughly understand the regulations. Another disadvantage to the new service was said

(Continued on page 58)

Joint Meeting to Discuss Taxation Measures

Joint Sessions of Manufacturers, Wholesalers and Retailers to be Held in Toronto to Consider Taxation Plans Which Will Remove Complications of Present System

A VERY important joint committee meeting between members of the Canadian Manufacturers' Association, the Wholesale Merchants' Association and the Retail Merchants' Association of Canada will be held in the Prince George hotel, Toronto, on Tuesday, Wednesday and Thursday, December 5th, 6th and 7th, to prepare a memorandum which will be satisfactory to the three organizations, and which will set forth their views with regard to a feasible system of taxation to replace the one at present in operation. The intention is to present these views to the government at the earliest opportunity.

An effort will be made to arrive at a plan which will produce sufficient, if not more, revenue than is produced by the present system, and which will remove a lot of complicated points that are now disturbing the trade. Special consideration will be given to the Receipts Tax, which comes into operation with the beginning of the year. Discussions at recent gatherings of retail merchants throughout the country have clearly established that the trade is absolutely opposed to this form of taxation and a wealth of resolutions have been forwarded to the office of the Dominion board, strongly urging the board to take all possible steps to have the tax abrogated.

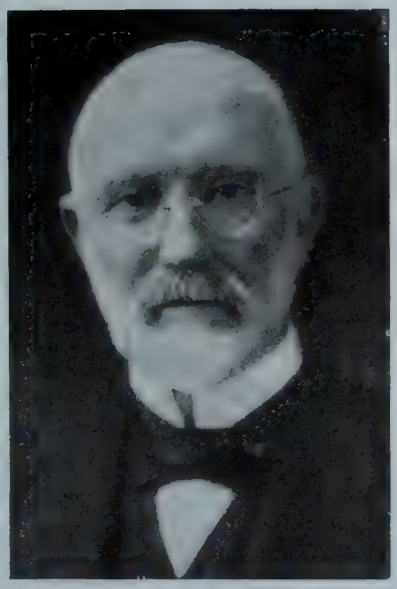
The meeting will take the form of a round-table conference. The members will broach the subject with an open mind, having one object in view, and that is to raise the revenue required by the government, but to raise it in a way that will not be accompanied by the annoying features that the present system of application has created.

Discussing the prospects and opportunities of a meeting of this kind with the Ottawa representative of Hardware and Metal, E. M. Trowern, secretary of the Dominion board, Retail Merchants' Association, said: "The whole three organizations feel that it is their duty to consider problems that they are directly interested in, and with their knowledge of conditions that surround the three lines of trade, some plan can be devised which will be mutually beneficial both to the government of Canada and to the public generally, as well as to themselves."

"Individualism as a Factor in Affairs"

Is Subject of an Inspirational and Most Impressive Address Delivered by Sir Joseph Flavelle, Before the Canadian National Newspapers and Periodicals Association on the Occasion of the Annual Convention

TORONTO, Nov. 18. (Special).—Speaking at a luncheon of the Canadian National Newspapers and Periodicals Association the other day, of which organization Hardware and Metal is a member, Sir Joseph Flavelle, who was the guest of honor, declared that individual effort and achievement are the greatest elements in life. Sir Joseph was speaking on "Individualism as a Factor in Affairs." His address was inspirational and remarkably impressive. It was a call for the development of the individual man. Sir Joseph spoke as follows:—



In emphasizing Individualism, I am not claiming for it a "cure-all." If we were discussing the whole broad issue I would give it its relative place, but in the time at our disposal I cannot do so. In stressing Individualism, I am only stressing one of the great underlying principles in affairs. I will introduce the subject with a few illustrations, and perhaps you will catch the drift of my thought.

In a book of Memoirs of a German Prince—one of the Hohenzollerns—the Prince tells of his experience with General Falkenhayn. The General is teaching him to ride, and after taking him across much rough country in which his heart nearly failed him, the Prince was brought up against a stiff obstacle. The General spat out: "Throw your heart across, the rest will follow." I think in this statement lies the interpretation of character. Our difficulties accumulate, and when the supreme one comes at the tail end, the test of a man is his capacity to "throw his heart across."

Lord Rosebery in his book of "Miscellanies" furnishes a copy of an address which he delivered to the students of the University of Glasgow, and in which the following appeared:

> "We had then (speaking of a period fifty years back) the terrible hand-to-hand struggle with learning on the one hand and poverty on the other, which embodied in a new form the competitive spirit of our ancestors, but which turned out indomitable Scotsmen, who had suffered so much, and who had done so much, that they needed and dreaded nothing in the battle of life."

He illustrates this by a fellow-craftsman of yours, Robertson Nicholl, the son of a Presbyterian minister, and now Sir Robertson Nicholl of the British Weekly. He won a bursary of £12, which took him to the University of Aberdeen. He spent £8 in fees, and had £4 left for his maintenance during twenty weeks in Aberdeen. He spent a shilling a week on lodging; his food was bread and cheese, and his drink treacle and water. Lord Rosebery says, by way of parenthesis—"I ask you to remember I am not recommending a diet, but recalling a character." Nicholl won out, even though he had to go through an Aberdeen winter without fuel or fire in his room.

SIR JOSEPH FLAVELLE

"And Its Name is Courage"

Sir James Barrie, in his rectorial address delivered at St. Andrew's University in May last, said to the group of young men graduating from the University:

> "I cannot provide you with a staff for your journey, but perhaps I can tell you something about it, how to use it and lose it, and find it again, and cling to it more than ever. You shall cut it—so it is ordained—every one of you for himself—and its name is Courage."

He illustrated this in a letter to him from Captain Scott of the Antarctic, written in the tent "you know of," where it was found long afterwards with his body and those of some other very gallant gentlemen, his comrades. The letter, in part, was as follows:

> "We are pegging out in a very comfortless spot. Hoping this letter may be found and sent to you, I write you a word of farewell. I want you to think well of me, and my end. Goodbye. I am not afraid of the end, but sad to miss many a simple pleasure which I had planned for the future in our long marches.....We are in a desperate state..feet frozen, no fuel, and a long way from food, but it would do your heart good to be in our tent to hear our songs and our cheery conversation.....Later (It is here that the words become difficult) We are very near the end.....We did intend to finish ourselves when things proved like this, but we have decided to die naturally without."

Barrie then took these young graduates to Gallipoli, and told of a young officer "dropped overboard to light decoys on the shore so as to deceive the Turks as to where the landing was to be. He pushed a raft containing them in front of him. It was a frosty night, and he was naked and painted black. Firing from the ships was going on all around. It was a two hours' swim in pitch darkness. He did it, and crawled through the scrub to listen to the talk of the enemy who were so near that he could have shaken hands with them, lit his decoys, and swam back. He seems to look on this as a gay affair. He is a V. C. now, and you would not think to look at him that he could ever have presented such a disreputable appearance, would you?" The officer was present, so that these University lads could look at the man who "threw his heart across" and the rest followed.

> "Fight on, my men, says Sir Andrew Barton,
> I am hurt, but I am not slain,
> I'll lie me down, and bleed awhile,
> And then I'll rise and fight again."

You say "These are heroic cases, incident to the war, effected by the war spirit." Let me give you one from humble life.

Two years ago, driving from Oakville to the city, in the morning, I picked up a passenger on the highway near the Goodyear rubber plant. It transpired that the man had served in the Great War. He had been invalided home from wounds, and he still had an unhealed sore on his back from shrapnel. He had secured a position at Goodyear's when business was active, and had bought a piece of land and built a shack on the Etobicoke. Then the bad times came in the rubber business, and he was laid off. He told me he had a wife and six boys, the eldest being thirteen years old. He had secured a job at the Dome Mines for the winter, and had been out that morning to tell a chum that he could secure a place for him, and was met with

the rejoinder "I'll starve before I'll go to the Dome Mines." It transpired that in the great explosion in Halifax, his wife's eyes were filled with powdered glass, and the surgeon found it necessary to remove both eye-balls, and in consequence, she was stone blind. The morning after her eyes were removed, her sixth baby boy was born. I said to him "Your wife blind, and six boys to care for—how do you get on?" "Well," he said, "We get on just about as well as we ever did. My wife does all the work at home, washes, irons, mends the children's clothes, keeps the house as she did before she lost her eyesight. When we came to Etobicoke, the neighbors saw my wife putting clothes on the line, and were told she was blind. They hesitated to believe that it was possible. She is keen to go to Dome Mines, stating that we will get free fuel for the winter, and be that much further ahead in the spring." This woman could have said that she was part of the war wreckage, that someone ought to take care of her children and her home, but she had the fighting quality in her, and said "I have a husband and children, and a home; I will take care of them." As we separated in the city, my soldier friend said, "I am sure if you were to come with me now to my home, you would find my wife whistling or singing."

Not Towards Self-Reliance

You will agree with me I am making no overstatement when I say the spirit of the present time is not running in the direction of self-reliance. The popular view writes off the individualist as a selfish beast, who thinks for himself, works for himself, and who shirks responsibility for his fellows. As a theory of life, individualism has developed mean selfishness, and its advocates are frequently neglectful of those who are less strong and less able to take care of themselves. It represents, however, a vital principle of personal responsibility, upon which, whether they know it or not, the world of men and women rest and depend. It bases its advantages upon its discharge of this responsibility, through hard, determined, unflinching personal effort.

Dependence Upon the State

Lord Rosebery said this further thing in his address to the students of Glasgow University:

"As things are, we in Scotland do not take much, or even ask much from the State, but the State invites us every day to lean upon it. I seem to hear the wheedling and alluring whispers 'Sound ye may be, we bid you be a cripple. Do you see? Be blind; Do you hear? Be deaf. Do you walk? Be not so venturesome. Here is a crutch for one arm, when you get accustomed to it you will soon want another. The strongest man, if encouraged may soon accustom himself to the methods of an invalid, he may train himself to totter, or to be fed with a spoon. The lesson of our Scottish teaching was 'level up.' The cry of modern civilization is 'level down.' Let the government have a finger in every pie, probing, propping, disturbing. Every day the area for initiative is being narrowed, every day standing ground for self-reliance is being undermined, every day the public infringes on the individual, the nation is being taken into custody by the State. I should like at least to think, that in one powerful city, youth was being reared to know that most of what a man has to do in the world he must do for himself, and that it should produce men and women who shall look not to external or even legislative support, but to themselves for their success in life. May the tone and note of this University be independence and self reliance. May it produce not merely scholars, but men."

—ON THE WAY

A TORONTO HARDWARE SALESMAN

Says that as he picked up his grip to leave the room of a New York hotel, while on a recent visit there, he noticed the usual sign reading, "Have you left anything?" After paying his bill at the desk he returned to his room and corrected the sign to read, "Have you anything left?"

The reliance placed upon what governments can accomplish is pathetic, and the frequent determination of even thoughtful men to turn to government or to legislature, for relief in business and other troubles is part of the daily experience. Manufacturers call for the Department of Trade and Commerce to find export business for them. Farmers call for government controlled and operated Wheat Boards at the public risk, and with transportation charges relieved at the public expense. Labour seeks to secure through legislation, shorter hours of labour, assured employment, and minimum wages, and the people generally, through public ownership or government control are to be delivered from the tyranny of private enterprise.

A recent writer stated:

"Our Social Reform schemes are conceived on a theory of pleasure economy, but history and evolution show that man has come up through a pain economy—he has struggled up—found his way up through never ceasing effort and struggle and battle. Man is at his best rowing hard against the stream. In our facile plans for the future of society, no place is found for sacrifice, yet in all the long history of mankind, sacrifices had a conspicuous part. We are planning to rely too much upon social and political machinery, and we underestimate the importance of physical health, education, and the sense of individual responsibility. No society will survive without the integrating motive, which consists not 'in not having,' but in doing one's full share. The world is stirred to-day by powerful centrifugal forces like a whirling wheel, which will fly into pieces unless it is held together by equally powerful centripetal forces. These integrating forces are measured self-control, obedience, respect for law and authority, restraint, limitation of desires, the feeling of obligation. We have a superabundance of vital energy—what we need is vital control."

Dependence Upon Organization

If you consult with a company of your associates in business for the correction of weaknesses or the increase in production, the usual result is that your officers will say "Give us more machinery and a larger organization." It is a rare thing for the men on the working lines to say "We will learn to work harder and more intelligently, and to make greater use of the existing organization and machinery." When the United States came into the war, the President made a call upon business men to assist the nation, and there came to Washington probably the greatest aggregation of executive capacity that was ever gathered for public service in one city. They came from all parts of the Union. They sat for weeks and months, not knowing what to do. Under the American system, the Chief of Ordnance is responsible for the production of munitions of war. I said to him, "We have had some experience in Canada during the war in making use of business men for purely business purposes. If you will draft these executive men whom the President has brought into Washington to carry on the business for you, your engineers can prepare the necessary specifications and furnish the needed technical inspection, in which case I think you will secure excellent results. This is the present British practice. They tried what you are doing, but had to drop it. Their army officers and engineers now prepare designs, and furnish inspection, but business men have charge of production." He replied "I will not pass over to a body of business men what this Department should itself perform." So he built a very wonderful organization, housed it in excellently constructed buildings near the White House. The organization reached, I be-

lieve, as high as twenty-two thousand men. There were miles of blueprints illustrating the organization. There were, however, few if any, American shells fired during the war, and few, if any, American guns in service. Charged with the same duty in Ottawa, we had been at work for a year or more when someone asked for a plan of our organization. I replied "I fear we have not prepared one. In securing production of munitions of war, we have not thought of preparing a plan."

There is another aspect of this question of "Dependence Upon Organization" that is impressive. The Ford plant at Detroit is a wonderful place. You take off your hat to the men who have organized it, but looking at it from another side it is the most dis-spiriting place possible. Each man repeats the same operation on a piece of material passing before him upon a moving belt. He turns a screw, bores a hole, or does some other single act repeated all day long. As one looks at it one thinks of the noble profession of craftsmanship. I am not saying this to make light of the Ford organization, but to direct attention that we are living on our capital of craftsmanship, and one wonders what will happen at some later time when all these one-job people are called upon to do some other work. This organization of repeat work kills the development of the craftsman. He is simply a cog in a huge operating machine, and we are in danger of forgetting that a man is a man, and has a right for all round development.

A few years ago, three gentlemen from a town on Georgian Bay, called on me and said, "We desire to establish a packing house plant in our town, and want to talk to you about it." They submitted their plans, and we had an interesting hour together. These men had hitherto been somewhat bitter opponents for the North Shore trade. I asked them "Who is to manage this business?" and they replied, "Oh, we will all do it." After they had gone, I said to Mr. William Davies, "These people will come to grief; they have an impression that by building a house, and organizing with some sort of general oversight from themselves, that it will go itself. They will come a cropper." The plant, which cost five hundred thousand dollars, has been closed up for the past ten years or more.

I remember during the War, that manufacturers of munitions in this

This Booth Brought Valuable Prospect List

A GOOD DEAL has been said about hardware merchants using fairs for the purpose of exhibiting their hardware stock. Dunlop & Company, Ltd., Pembroke, Ont., retail hardware merchants, have consistently recognized the importance of such exhibitions and this year their booth, as illustrated herewith, was very productive and well justified itself. The booth as arranged by F. V. Ryan shows a grouping of distinctly Fall lines, those which are moving actively right into the early winter months. It includes electric fixtures, oil and electric heaters, coal, wood and electric ranges, tools, bathroom fixtures, vacuum cleaners, electric washers, guns and ammunition, kitchen utensils, silverware, varnish.

These are household lines in which special interest is centered at this time of year and lines which it is necessary to more definitely link up with the hardware trade. Hence it was an effective display to make at a fair. This exhibit was made at the local children's fair. A unique feature of it was the staircase finished in white and mahogany. This not only served as a sample of paint and varnish in use but served as a splendid basis for a display of silverware of interest to the housewife. Much interest was shown in electric fixtures due to the fact that much house renovating was under way and the dark evenings coming when fixtures are used more. Bathroom fittings and tools were shown affixed to the walls and served as an apt reminder to many onlookers of their requirements. It is found that a considerable trade in tools is made by appealing to men handy at odd repairing or renovating jobs around the house. This is based on the point that good tools enable much higher grade work to be done in less time than by making use of old tools of days gone by and now unfitted for good work. Many housewives were keenly interested in electric ranges and in kitchen utensils shown with the ranges.

Quite a number of direct sales were made at the booth, but probably the most valuable feature was the securing of a list of prospects on whom effort will now be concentrated.

Province formed a munition section of the Manufacturers Association. The President and Secretary came to Ottawa to lay their views before the Chairman of the Munitions Board. They stated: "Your revised prices for shells are too low. They cannot be made at a reasonable profit. We represent three hundred and thirty manufacturers, and we are expressing their view when we say it is necessary that we should have a higher price." I said in reply, "I am sure you are wrong; if the purpose of your organization is to secure higher prices, you do not need an association of manufacturers to convince the British Government that they should give a fair price for work done in Canada. What you have not known is that through the courtesy of a number of manufacturers, we have in detail the cost of producing various sizes of shells in their plants, and the prices we have fixed are based on their experience and upon their statement that they think the price a fair one. You will perform real service with your Association if you will co-operate, and those who have greater experience assist those who have less, in establishing better production with the same overhead. You will make more money, and you will assist a hard pressed British treasury." It has always appeared to me that one of the dangers of the Manufacturers Association was that it led to dependence upon assistance from outside, and did not look enough toward improving business from the inside. I have never believed in Trusts, nor been a member of a Trust or combination—not because I thought they could do much harm to the consumer over a length of time, as sooner or later the spirit of competition took care of that side, but that the harm came to the consumer because men depended upon the organization in place of trained judgment developed under the stress of necessity. I remember a manufacturer during the War saying "You will fall down in the delivery of munitions unless you pull these infernal munitions inspectors out of munitions plants, as they try to impose all sorts of ridiculous standards upon the manufacturer." I asked the Chief Inspector to send his senior officer to this plant, and to bring back a report. Upon his return, I had the manufacturer join in the conference. Complaints had reached the Board from the British authorities that the ammunition boxes pulled apart under stress because the screws did not hold. The Chief Inspector said, "My officer went into this manufacturer's shop at the finishing end, and inspected the boxing of shells. The workman was driving the screws in the boxes home with a hammer. The inspector asked him 'Do you permit that?' 'Permit what?' came the reply. 'Permit screws to be put in your boxes in that manner?' And for the first time the manufacturer saw it. He said 'You damn fool, what are you doing that for'?" Similar conditions were found all over this man's establishment. The correction of his troubles lay with himself, and did not arise from unreasonable standards set up by the Inspector.

Another Type of Co-operation

Prior to the War, I was asked to speak in the town of Ayr, where they had a very active Farmers' Organization and Women's Institute. The subject of my address was "Co-Operation," and I fear the Company was disappointed in the type of Co-operation I recommended. The Chairman of the meeting had been one of a group of some twelve hundred farmers, who had gone to Ottawa from all parts of Canada to prefer a plan about something—the nature of it I have forgotten. I said to them, "The Chairman of this meeting was one of a Company who went to Ottawa. I am not passing upon the question, whether what they wanted was right or wrong, but I would desire to say to him, and to you who are farmers present, that if every man in the Company w went to Ottawa had in place of going there to seek for remedy, formed themselves into a league, each with his neighbor and he in turn with his neighbour, to fight bad weeds, to cultivate the land better and deeper, to use better seed, and to get rid of their scrub cattle, they would make more money for themselves and add far more to the wealth of the country than by anything which they, or twelve times their number could secure from Ottawa."

Take Labour. We know the abuses under which Labour suffered, and respect the causes which led to the organization of Unions, and the redress of many wrongs made possible only through the pressure of organized Labour, but there has developed an insistence for collective bargaining, the closed shop, the sympathetic strike, and the policy of Ca' Canny. Redblooded men are told that they must lower their output. Any action which through the force of organization levels the good man down, is a menace to society. The control of the spirit and purpose of a man, and his responsibility is with himself, not with his neighbour, his Union, his Group, his Party, or the Combination to which he belongs. It is a frequently forgotten truth from which there can be no deliverance "Whatsoever a man soweth, that shall he also reap." The question was

(Continued on page 54)

Right of Merchant to Return Goods Involved by This Decision

THE findings of a Manitoba Court in a suit recently brought by an Ontario manufacturer, against a merchant who tried to return goods, will be of general interest.

The defendant gave a written order for several cases of boots to be made up with a special style of sole and to be shipped February 1, 1920. Shipment was not made until some two months later, but the goods were received by the defendant in ample time for the spring trade. The defendant took delivery, but on April 12th wrote to the plaintiff stating that he wished to cancel the order and asking that the goods be taken back, alleging that they were not up to sample and were damaged when received. The manufacturer declined to take back the shipment, but the customer returned them, on the grounds that they arrived too late, were not up to sample, and were damaged. When the goods arrived back at the original point of shipment, the manufacturer refused to take them, on account of their condition, and brought action against the customer to secure payment. It was found that two of the boots were literally eaten to pieces as by sulphuric acid. One case was without cartons and contained much floor waste. Although the customer stated under oath that he had opened only one case, the entire shipment was returned in paste board cartons of a Winnipeg concern. The shipping weight on the return trip was some 54 pounds less than the original weight, and seven pairs of boots were missing.

The judge found:

1. The goods were sold by sample and description.

2. The goods were manufactured in accordance with the order and well up to sample description.

3. The goods were delivered to a common carrier in good condition and properly boxed.

4. The substance that destroyed the two pairs of boots got on them either in transit or in the hands of the defendant.

5. The goods reached the defendant in time for spring trade.

Judgment was given for the plaintiff with costs, so that the customer was obliged to pay a very considerable amount for storage charges, to take the goods in their present condition, to pay the full amount of the invoice and interest (although prices now are much lower than at the time the goods were invoiced), to pay at least two-thirds of the cost of the litigation, and to pay his own legal expenses. The stand is taken that an order cannot legally be disregarded, and that it may be very costly to attempt to evade responsibility, because of price changes, business conditions, or other reasons, for orders accepted and executed in good faith by manufacturers.

Early Preparations for Xmas Trade

Wholesalers Report Active Booking of Seasonable Lines by Retailers—Christmas Trade in Electrical Goods and Specialty Hardware Lines Expected to be Big—Toys Will be Featured—Gifts of Utility Will Again Predominate

FROM early indications an active trade may be expected this year during the usual festive season at Christmas time. Fall trade has opened up quite satisfactorily, seasonal lines moving well throughout jobbing circles. In discussing this recently with a Montreal wholesaler, Hardware and Metal was informed that while dealers generally were buying in a conservative way, the month of October would show returns comparing favorably with past years and lines which sold well to swell the total were goods usually receiving a heavy call at that time. Included among these, electrical goods and auto accessories were given special mention. Electric heaters, grills, flashlights, lamps and other fixtures were in brisk demand practically all through the month.

Continuing, this wholesale merchant stated that there was every reason to believe that business would continue along satisfactory lines until the end of the year at least. Retail dealers had now become accustomed to the requirements of their customers, which had been a little different in recent years on many commodities to times before the war, and were in a position to conduct their business in a more satisfactory way for all concerned. Then, too, the buying public were again drifting to the more receptive stage and were purchasing hardware goods which have more or less been classed as specialties. An instance of this, which might well be taken, was cutlery. Cutlery, for years past, has not been selling in anything like the volume evident a few years ago, and many merchants who formerly conducted a neat, well-stocked department in their store were forced to abandon it to a degree. Conditions which brought about this were now fast disappearing, such as high prices and inability to procure.

With such an optimistic outlook it would appear that Christmas trade this year might be looked to with confidence, and dealers who have suffered have an opportunity to make a big stride toward records which are due to the hardware store at this season.

Toys As a Feature

Many retailers in Quebec province feature toys, believing that apart from reaping a benefit through their sale, they offer a lead to all other merchandise at the holiday period. In other words by catering to the child they thereby secure the custom of the parents. Toys are featured in some stores to the extent that one-half of the store is set aside for their display. Where kitchen utensils and other household goods occupy the floor space during the remainder of the year, toys are given a spacious and attractive showing.

Having regard also for the fact that toys often become soiled to the extent that they become unsaleable when on display all the year round, different merchants are in the habit of bringing them out around the first of December and again packing them away directly after the New Year. When presented with the question of toys not producing a wide enough profit to warrant stocking, one merchant offered the opinion that this was one of the main reasons why some merchants found them a non-paying proposition. Loss through damage and soiling was heavy, but it could be largely eliminated if they were put away when the sale for them was very limited.

Hardware Lines As Presents

Whether toys are carried or not, it is well recognized that the hardware trade offers a very wide range for gifts both to young and old apart from them.

Showcards for the Christmas Window

The Christmas spirit can be reflected very largely in the get-up of the window cards used in the display of Christmas hardware. Here are some suggested cards which can be prepared very easily by anyone handy with the pen and which will do much to stimulate early action in the buying of gifts.

What You've Been Waiting For

Announcing the 1922 Hardware and Metal Xmas Window Contest

Bigger and Better Than Ever Before

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

The contest closes on Monday, January 1, 1923. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one.

Test Your Salesmanship By Dressing a Better Xmas Window Than This!

EVERY retail salesman of hardware has a certain pride in his ability to secure the prospect's interest and develop him into an enthusiastic customer, but no matter how competent we may be in that direction there is still something for us to learn.

Participating in the annual Hardware and Metal Christmas Window Contest is a splendid means of comparing selling ability through the medium of the window display. This is a good opportunity to test out your original selling methods and see how they compare in effectiveness with those adopted by other merchants.

A window of Christmas gift suggestions which won high place in other contests last year in addition to being second in the group of 5000 and over in the Hardware and Metal Christmas Window Contest was this one by E. Rahn of the Bond Hardware Co., Guelph, Ont. It includes a wide range of silverware, cutlery, cut glass, etc., all neatly priced and carefully arranged with a very attractive background of panels with suitable Christmas decorations. Some neat cards urge onlookers to "do their Christmas shopping early."

Hardwaremen Discuss Many Troubles

Lively Session of Toronto Hardware and Paint Club Discuss Many Trade Evils—Sec. Macpherson of O.R.H.A. Says Efforts Are Having Effect and Problem of Too Many Stores Will Solve Itself—Retailers' Connection is Big Asset

A LIVELY discussion, not unlike that of a real live Question Box session, took place at the monthly meeting of the Toronto Hardware and Paint Club, held at the Prince George Hotel this week. The question of the number of hardware stores in Toronto and that of wholesalers selling direct to the public, also of manufacturers selling goods through channels other than the recognized channels of distribution for hardware, were among those discussed.

Addresses were also given by President George May, of the Ontario Retail Hardware Association, by Secretary W. F. Macpherson, of that association, and by G. D. Davis, Hardware and Metal. Secretary Macpherson dwelt on the responsibility of the hardware merchant as a citizen, pointing out that the hardware merchant can be a distinct asset or liability to his community. President May told of a number of new ideas which he had recently adopted which had produced surprising results in the way of business.

Deals With Trade Questions

G. D. Davis covered a number of trade questions and also answered a large number of enquiries made by various members of the association referring specifically to many of the complaints now heard from certain retailers regarding conditions in the hardware trade in Toronto. He stated that in many cases those who were complaining the most would find the trouble, or a large part of it, was within their own store or organization and that lack of efficient selling methods was one of the greatest troubles with a lot of Toronto hardware merchants at the present time.

A number of the members present gave various experiences which they had had with wholesalers and manufacturers who are alleged to have sold goods direct to the public and who are also alleged to have demoralized trade in certain communities through injudicious placing of merchandise in the hands of certain classes of trade who were unqualified to make a success of selling these lines.

Allan McNeil, hardware merchant of Mimico, Ont., was admitted to membership in the club. Discussion of the question of a suitable meeting night resulted in a change of the constitution providing that the meetings will be held on the second Tuesday of each month instead of Monday.

Discussion of the situation caused by the large number of new hardware stores opening up in the city, as introduced at a former meeting of the Toronto Hardware and Paint Club, was renewed at the meeting of the organization Monday, when reports were received from the committee of three concerning progress made in interviewing wholesalers and manufacturers on the subject.

One member of the committee reported an interview with a wholesale hardware firm in which he had pointed out that many retail hardwaremen would not deal with that firm because of their practice of encouraging new stores to start business and their practice of selling consumers at wholesale prices. This firm was reported to have admitted the practice but that they were anxious to stop it if they could be shown how to do so. While not much satisfaction had been secured, this member of the committee felt sure action would be taken, and, in fact, had already been taken by the fact that within the past few days a customer who came to his store and bought 100 nuts for ⅜ in. bolts stated that he had been in the habit of purchasing at the wholesale firm in question but had just been turned down for the first time. Another retailer present added weight to this deduction by pointing out while in the warehouse of this wholesaler in the past few days he had seen two cases of people turned away when attempting to buy at wholesale price. One of the officials of this firm had pointed out that in some cases those placing legitimate wholesale orders came to make purchases for themselves and sometimes brought some friends along. It was difficult to turn them down abruptly, but a policy of charging a price equivalent to that of the retail store would, he thought, serve as a definite check upon such trade. This wholesale firm is said to have assured the committee of its co-operation in eliminating this practice as far as possible.

Bought Gun At Wholesale

The committeeman also cited a case of a customer who, while being served in his store, picked up a recent copy of a wholesaler's catalog quoting prices to consumer and noted a price of $82.50 for a gun. He enquired what allowance the retailer made, and on being told that this was the price, he replied: "I bought one down at the wholesale hardware for $41.45."

George May had some sympathy with the customer and the wholesaler in this case, pointing out that few hardware stores in Toronto carried a stock of such guns. He thought there was more excuse for this than in the case of selling something such as a mop. F. R. Jackson thought this trouble could be overcome in the same manner as with stoves and certain other utensils, where, if the retailer does not carry a stock, he sends the customer to the wholesaler or manufacturer and is given some credit on the sale. President Joy stated the stand of the organization was that there was no objection to that gun being sold if it was sold at retail price. He was of the opinion that the stand taken by the association, namely that the function of the wholesaler is to sell to the retailer and not to the consumer, would cover the case.

Too Many Hardware Stores?

In introducing the discussion on the subject of the number of stores in Toronto, President H. N. Joy commented upon the report which appeared in the October 21 issue of Hardware and Metal of the discussion of this subject as commenced at the former meeting. "The report was handled well, missing nothing, was very fair and yet prepared in such a way as to give no offence," said Mr. Joy. The association went on record at that meeting agreeing that there was a problem involved in the number of stores opening up in various city and suburban districts, and the committee, as outlined, visited wholesalers and manufacturers to discuss the subject. There were said to be approximately 250 hardware stores in the city now, of which 75 had started in the past year.

Another member of the committee reported that one manufacturer called upon pointed out that the situation would rectify itself; that there had been two failures of stores which were opened where possible business was not such as to justify them, and that there would probably be more failures of such stores before next spring. All of which would serve as a warning that more care must be exercised and more capital be at the disposal of the prospective hardware merchant.

"We did not expect that wholesalers would refuse to sell anyone who had the money to buy a hardware stock, but what we protested was the wholesaler putting in stocks, and they assured us they were getting the money for all stocks which they were now putting into new stores."

This member of the committee thought the discussion would serve to show

wholesalers the importance of going carefully in encouraging new stores. Wholesalers were reported to be watching credits very carefully now, and to have stated that they will watch any new stores very carefully for signs of weakness.

Doesn't Blame Wholesaler

The third member of the committee reported that, after several interviews with wholesalers, his opinion of their stand was that they did not encourage the opening of new stores but if these stores do start up, of course, the wholesalers will sell to them. "I don't blame them for that," he added. One wholesaler was reported to have said that where the smaller merchant cannot compete with the larger retail hardware firms in supplying builders' hardware, for instance, they will deliver the necessary stock to the job on the order of the smaller retailer and allow him a percentage on it. "We cannot stop anyone starting a hardware store," he stated.

Mr. Joy, the president, reported that without exception wholesalers and manufacturers who were interviewed agreed that there were too many stores in the city and suburbs and they were anxious to help regulate the matter from the standpoint of new ones contemplating entering the business. Those already in the business would either progress or gradually fall out through inefficiency. Mr. Joy stated that many persons entering the hardware business knew nothing of the conditions, oftentimes they were influenced by seeing a hardware store filled with customers on a Saturday night or other busy time. The wholesalers were said to have admitted that travelling men were keen to put in opening stocks, and that, therefore, the retailers should take steps to draw the attention of the club to instances where opening stocks were being put in stores where conditions did not warrant their doing business. In some instances, no doubt, the prospective merchant forced the hand of the salesman by pointing out that if he did not get it from him he could get it elsewhere. Mr. Joy's suggestion was the appointment of two members of the club in each locality to report on the probable opening of new stores. Such instances would be drawn to the attention of the wholesalers who, it was felt, would co-operate in keeping down the multiplicity of stores which, it was claimed, was more costly to wholesalers through having to split orders into smaller quantities, larger delivery charges and higher accounting expense.

Eliminate Publicity

"One wholesaler," stated the president, "had Hardware and Metal on his desk and had been studying it, particularly the report of the last meeting of our club. He knew why we were coming." This wholesaler was reported to have favored eliminating all publicity of this matter for fear the public would imagine the Toronto hardwaremen were endeavoring to get a "corner" on the trade. The retailer took issue with this on the grounds that the matter could only be righted by having a broad discussion of it. They were facts, they claimed, and there was nothing to hide. It was a serious matter for those who entered the business with little capital and lost it through ignorance of actual conditions. Mr. Joy told of one case where a hardware stock changed hands six times and most of the capital represented was lost each time. In another case a store was closed after two days of business, the "merchant" remarking that he "had been fooled."

"I think the subject should be treated as Hardware and Metal has treated it, by reporting the discussions," said Mr. Joy, "so that those in the trade in other parts of the country who contemplate coming to Toronto to enter this business should know the facts."

One member thought the trouble was not so much that there were too many stores but that new ones starting almost invariably do so with new stores. He thought it strange that those entering the business did not buy out old established stores, there being a good selection of both small and large stores available from time to time.

The suggestion had been made to wholesalers that they recommend such action but the reply had been made that those entering the business, in most cases, had only a few hundred dollars and could not finance an established business.

There was some discussion of the importance of opening orders to travelling salesmen. Mr. Joy, on asking a wholesaler if travellers were compelled to get opening orders to raise their sales to the level on which they could be paid a good salary, was told that salesmen were not paid on this basis.

Encroachment of Drug Stores

At this point there was some feeling that there were other problems of more pressing nature before the trade, such, for instance, as the encroachment of the drug and other trades upon hardware lines. Messrs. Jackson and Mathewson Sr. pointed to the practice of drug stores in selling shaving brushes, strops, flashlights, cutlery and even paint, and they were said to have an unfair advantage by being allowed to sell on Sundays.

George May disagreed that effort should be made to stop drug stores from encroaching in this manner, pointing out that the hardwaremen should give the druggist more competition for such business and meet him three-quarters of the way. "We put on a safety razor blade sale at 39 cents, the same as our competing druggist," said Mr. May, "and we sold hundreds of packages and made more money on them at that price than at the usual 50 cents per package."

As an illustration of how goods could be sold, Mr. May stated that he had recently placed in his window a display

"By November 20th Our Store is in Full Christmas Regalia"

Says J. N. Trudel, Manager Hardware Department McKinley & Northwood, Ottawa, Ont., in Outlining Some Helpful Selling Hints for Winter Sport Goods, Toys and Games for Xmas, etc.

There are some Novel Suggestions Based on Actual Experience in This Timely Article to Appear in Next Week's Issue of Hardware and Metal.

In Addition there is Likely to be Something Said in this Issue Concerning—

"Lowering of Insurance Rates on Automobiles Equipped With Certain Auto' Accessories."

Watch for These Big Articles in NEXT WEEK'S ISSUE.

stand in the form of a series of small boxes which were arranged around the outer edge of the show windows. These compartments are about 6 inches square and they feature many small lines such as skeleton keys, basin stoppers, drawer pulls, small padlocks and such lines which can be easily displayed. A price ticket is placed in each compartment.

"I have been amazed at the number of sales that have been made from this display," says Mr. May. "One time we bought skeleton keys by the dozen, now we are buying and selling them by the gross, as the result of placing them where people can see them. We used to buy small rubber basin stoppers by the dozen and now, as a result of displaying them, we are buying them by the gross. The same thing applies to any other lines which we have on display in our store."

Sells To Grocers

One member drew attention to the practice of a certain aluminum ware manufacturer in selling preserving kettles to grocers in competition with hardwaremen. On finding this in his community he returned the shipment which he had just received from the aluminum ware manufacturer. He suggested that other merchants follow his practice in seeing the travellers and telling them that if they sell grocers in his vicinity he will stop buying from them.

A Danforth Avenue hardware merchant, whose company also operates another store, complained of the action of an enamelware manufacturer who had sold his products to stores within a few doors of him which he considered to be unsuitable for the sale of enamelware. He stated that he liked the product of this manufacturer but felt that the latter was forcing too much competition upon him. He wanted to know what he could do under the circumstances, and the only suggestion offered was by another member to the effect that he purchase another brand of enamelware from another manufacturer.

A unanimous vote was given that the officers of the club were working along the right lines in their efforts to meet the problem of too many stores opening in the city, and they were authorized to extend their efforts in that direction.

One member stated that he would like to express his appreciation of the way Hardware and Metal had taken up the question of the smuggling of motor accessories as outlined in an issue of a few weeks ago. He stated he was glad to see that results had already been secured in the action taken by the Customs officials at various points along the border during the past two or three weeks.

Survival of the Fittest

George May, as president of the Ontario Hardware Association, spoke briefly, introducing Secretary W. F. Macpherson, of Prescott, who spoke as follows:

"I think your taking this matter of the number of hardware stores up will have its effect. It is a hard problem and not alone existing in the hardware business. Eventually it will be a case of the survival of the fittest. In towns the merchant's connection is the big thing in holding trade. Apparently in the city a man puts in a stock and opens his door and if no one comes he is discouraged right away. The matter of connection is just as important in the city as in the town."

Here Mr. Macpherson referred to the necessity of every merchant considering whether he is an asset or a liability to his community by the extent of his interest in local affairs. By so doing he would strengthen his position, get larger business and have a surer clientele. Showing the importance of the retail trade represented by the merchants in these organizations, Mr. Macpherson pointed out that the buying power of the retailers in the Ontario Retail Hardware Association numbering just under 700, was between forty and fifty million dollars a year.

Mr. Macpherson briefly outlined plans for the coming convention of the O. R. H. A. in February, which is to be the "biggest and best in history." The armories in Toronto, which have been secured, will accommodate sixty more exhibits than the accommodation in Hamilton. A very instructive program is being arranged, a feature of which is the securing of Frank Stockdale, noted retail merchandising expert, to give some practical solutions to problems facing the trade.

Mr. Macpherson also referred to the efforts of the association to create better conditions in hardware stores of members of the association through the more general use of the Association Price Book which, if followed, will enable the hardware merchant to secure a better selling price on many lines of hardware. He stated that the few who were not satisfied with the service were those who had not made use of it as was indicated. The great majority of the members were highly pleased with the service given by the association.

Wholesalers Getting More Careful

Referring to the relations of the retailers with the wholesalers, Mr. Macpherson stated that, from his observations, the wholesalers were getting more careful as a result of the objections made by retail organizations to certain practices. He thought the present system of merchandising was alright provided everyone worked in proper relation to the other. Mr. Macpherson suggested that wholesale firms hang up a sign reading "Strictly Wholesale" in their offices and live up to this.

President Joy then called upon G. D. Davis, Manager of Hardware and Metal, who with H. L. Southall, Managing Editor, attended the meeting. Mr. Joy referred to the work which Hardware and Metal was doing in the hardware trade throughout Canada, also to the fair manner in which problems of the hardware trade are handled. He asked Mr. Davis if he would speak on developments in the hardware trade and also on some phases of the discussion which had previously taken place. Mr. Davis spoke in part as follows:

"Your president has stated that I have missed two or three meetings of your Club. The reason is, that I have been attending conventions in other parts of Canada, and in the United States, and

Displaying of Hardware Will Offset Efforts of Peddlers

MANY dealers are complaining of the canvassing or peddling of certain classes of articles to house-holders, claiming that merchants or storekeepers are paying rent and taxes to help keep up their home town or city. It is really too bad that this habit has grown considerably during the past few months, and ladies of houses are largely responsible by encouraging this class of canvassing by even looking at goods.

There is hardly a line worth mentioning that cannot be purchased for less money at any regular hardware store.

On the other hand, dealers are more or less negligent in not displaying these household requirements where shoppers can see them, with price tickets on, and the Retail Hardware Dealers' Association should take some definite action to try and have this nuisance stamped out. Some proper official representation should be made to Provincial or Dominion officials.

It would not take long to have the matter adjusted. As many as three different classes of peddlers have been seen on one street in 24 hours, with practically the same line of goods, from different distributing centres.

If it is not brushs, it is some brand of aluminum wear, a floor mop or wall duster. Women must be getting tired of answering the door bell, only to find another kind of goods offered at twice the retail dealer's price.

What is every dealer's business has drifted to nobody's business. Each depends on the other fellow to do something, but nothing is done.

If not soon curbed this will drift into many other lines of hardware, and dealers should try to have a remedy applied before it is too late.

(Signed) FAIR PLAY.

For Current Prices see Winnipeg Section of "CURRENT HARDWARE QUOTATIONS" in this Issue.

Hafford, Sask:—E. C. Bowers has moved to Riddell, Sask.

St. Vital, Man.—W. J. Douglas has commenced a hardware business.

Frank Slough, hardware merchant of Veteran, Alta., was a Calgary visitor during the week.

R. R. Sutherland, of Sutherland Bros., hardware brokers, Winnipeg, is visiting his principals in the East.

A. M. Berryman, manager of Metals Ltd., Calgary, spent a few days this week visiting their Edmonton branch.

Clifford Wilkinson, manager of the Wilkinson Hardware Store at Stettler, Alta., spent the last weekend in Calgary.

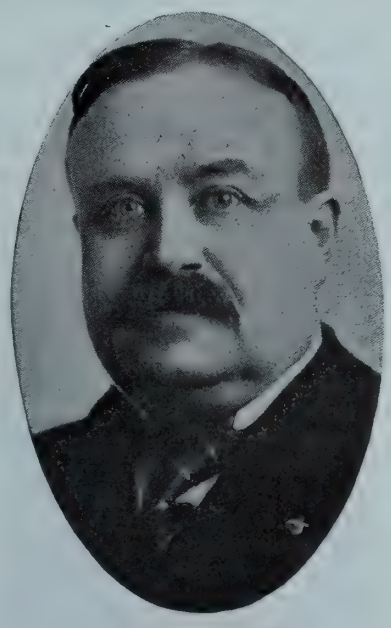
Bill Hammonds, of the Canadian Fairbanks-Morse Co., Winnipeg, is attending the Automotive Equipment Show which is being held in Chicago.

E. M. Adams, general manager of Wood-Vallance & Adams Ltd., Calgary, is on a business trip to Cranbrook, B. C., and other Crow's Nest Pass points.

George W. Endress, of Moncrieff & Endress, manufacturers' agents, Winnipeg, is attending the Automotive Equipment Show which is being held in Chicago.

J. Hossack, of the Lufkin Rule Co. of Canada, Ltd., Windsor, Ontario, has just returned from a business trip throughout the West and states that business is showing a decided improvement and that larger orders for rules have been placed this year than for many seasons.

The Alex. Martin Sporting Goods Co., Calgary, have moved from their old stand to premises two blocks west, and very central to the best shopping district. The new stand, besides providing more space, is modern throughout, with good display windows and shelving, and stock is laid out in a most attractive manner.



With fifty members present, Saskatchewan members of the Northwest Commercial Travellers' Association elected the following officers to the Saskatchewan advisory board of the organization at a meeting held at Saskatoon: President, A. A. Brown, Regina; vice-president, J. W. Lightbody, Yorkton; treasurer, D. D. Thompson, Regina; secretary, K. W. Ross, Regina. R. W. Birch, Regina E. N. Argue and H J. Trevelan, of Saskatoon, were elected provincial directors. Thos. Fox, retiring president, was in the chair, and Fred J. C. Cox, general secretary, came from Winnipeg to the meeting.

Hardwaremen Says Hard Times Not an Unmixed Evil in West

C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Co., of Winnipeg, who is east on a business trip, brings an optimistic note concerning the business prospects of the West.

"The West," he said, "is passing through some very trying times, but it has touched bottom and is now on the up-grade."

He said that, while there would be no boom like 1912, a gradual, steady, solid, substantial progress had already started. Business was improving, and with the turn of the year a revival in trade will be quite noticeable. Stocks in retailers' hands were low and there must be large purchases in 1923. The hard times had not been an unmixed evil, for they had forced the Western farmer to adopt a more diversified type of farming. More wheat had been shipped out of Canada so far this year than had been shipped out all last year. The money was coming into the farmers' hands and they were beginning to pay off their debts.

Charles Adcock, representing North Bros. Mfg. Co., Philadelphia, Pa., is in Winnipeg on a business trip.

SAYS ANNOUNCEMENTS RE STEEL PLANT ARE MISLEADING

Vancouver. — Returning this week from his trip to England, Hon. T. D. Patullo, minister of lands in the B. C. cabinet, found that, to a certain extent, recent announcements by local interests as to the backing for the establishment of an iron and steel smelter in this province were misleading. It had been stated by the promoters of the Coast Range Steel Co. Ltd. that support was assured from both the Dominion and Imperial governments.

Mr. Patullo found, he said, that, after consulting with Premier King in Ottawa and Hon. Mr. Fielding in England, the Dominion government had not committed itself. He stated that he had been assured that Ottawa officials would give the project every consideration but that the whole matter would have to be carefully scrutinized before any action was taken.

SAYS U. S. AND CANADA INTERESTS OPPOSE B. C. STEEL PLANT

London, England.—Opposition to the establishment of the proposed steel smelter for Western Canada at or near Vancouver is said to be coming from large United States and Eastern Canadian steel interests. Pressure is being brought to bear upon the Dominion government, it is stated, to prevent it from sharing with the Imperial government and the British Columbia government in guaranteeing the debentures of Coast Range Steel, Ltd.

Following an interview with Hon. W. S. Fielding here recently, Henry Landahl, moving spirit behind the scheme to place a steel industry in Western Canada, stated that the Canadian finance minister's attitude had not been wholly satisfactory.

Mr. Landahl expressed the fear that powerful steel interests in Eastern Canada and the United States have looked with little favor on developments promising a steel industry in the West, which would be in a position to compete in the growing Far East market, and are doing their utmost to discourage continuance of the plan.

While the Imperial government, Mr. Landahl states, has confirmed in writing its statement that it would hold £800,000 for the undertaking, it is conditional upon the support of the Dominion government.

High Spots in Steel Industry

PRODUCTION of the chief steel mills in America shows constant improvement, the rate now being between 75 and 80 per cent. of capacity. This is the highest rate for the year and the outlook is for further increases in some districts. There is some tendency among consumers to look for further price concessions in view of the decline in pig iron and weakening in semi-finished steel. Heavy railroad demand, continued active building construction and buying of requirements for early 1923 by automobile manufacturers, are among the factors which indicate continued activity. The higher rate of production now being experienced is due to pressure of accumulated orders. Transportation difficulties are still being experienced, and the re-imposition of a general embargo on iron and steel by one U.S. railroad gives some indication of the heavy tonnages piled at some mills.

Raising the "Ante"

THERE is a peculiar connection between the article appearing in this issue dealing with the place of Individualism in business, and that setting forth the discussion which has been taking place among certain retail hardwaremen concerning the multiplicity of stores. The latter condition is a direct outcropping of the situation existing in the mercantile world today and it must be kept in mind that the same tendencies which have governed business for many years past are still existing. It can only be expected that others will desire to enter any line of business which looks sufficiently attractive from the standpoint of profit. This has been a principle of business from time immemorial and it is just as well that it is so for efforts to "corner" the market or restrict the machinery of distribution in any way are deleterious to the final consumer, and we are all consumers. The point for retailers to demonstrate is that they owe their success to the service which they give and the connection they have built up. There is something more than a "cut price" in successful merchandising. If this were not so "we would all be riding around in Ford cars" according to one student of economics. This is no reflection on the Ford car but indicates that there is an important place for those who have something else in mind in buying a commodity except the price. The same thing applies to merchandising and it is the basis of successful retailing to-day just as it was in years past.

Individualism is the point which is being stressed, and its importance in business is vividly portrayed in the address by Sir Joseph Flavelle in this issue. It shows that machine methods with their cold, calculating, unsympathetic attitude are sometimes applied with sad results. It is shown that the personal integrity of the individual is, after all, a very important factor in business. It is the personal factor which enables a connection to be built up. It is not something hypothetical, it is a material thing and it is the element that helps the retailer to hold his customer connections despite efforts of "mushroom" stores and mail order influences. Of course this alone will not suffice, he must pay close attention to his business management.

In a highly competitive period such as exists to-day and which is characteristic of this part of the business cycle when productive power exceeds powers of consumption, it is a case of survival of the fittest. There are many problems before the retail hardware trade to-day such for instance as the inroads of the drug and other trades into the sale of hardware. If close attention is given these matters and business put upon such an efficient basis that such competition will be minimized, then there will be far less danger from the opening of too many new stores because the "ante" will be too high for them.

Increasing Movement of Goods

IT IS encouraging to note that despite restrictive tariff legislation of other countries and other handicaps, that Canada's total trade for October showed an increase of thirty million dollars compared with the same month the previous year and the record for the seven months of this year also shows considerable increase over the same period last year. Exports were chiefly responsible for the increase, though imports for the month were also about seven million dollars greater in value.

Another sign of increasing movement of merchandise is indicated in increased freight traffic. The record of cars handled in the Toronto terminal during the last week or ten days shows an unprecedented volume. Merchandise of all kinds, building materials and coal figure chiefly. This activity in Toronto is said to be but an indication of the activity being experienced all through Canada.

Where Collections Are Slow

CURRENT business reports indicate that collections cannot be described as in a satisfactory condition. While contributory reasons are given for this state, the principal cause is ascribed to the lack of interest displayed on the part of the farmer in discharging liabilities which in many cases have now been carried over for several months awaiting the present crop returns. Retailers and wholesalers are both suffering, each in turn, this circumstance being specially prominent in the smaller towns. The collection situation is a troublesome item, however, both in eastern and western Canada. The fact that the fine weather experienced during recent weeks has had a tendency to keep the farmer on the land engaged in fall plowing and similar activities, is one of the reasons encountered, while another prominent reason submitted by the farmer when expecting continued credit is the fact that existing low prices for crops have resulted in these being withheld from the market by the producer pending higher levels in the future. Where pressing obligations should be met, however, it would seem reasonable to dispose of sufficient returns in the shape of produce, in order that retail merchants and those depending on them should not suffer through the business routine employed by the agricultural consumer. Restricted collections mean hampered business operations, not only for the retailer, but also through the jobbing and manufacturing channels, with its consequent reflection upon prosperity in general at a time of the year when it is most desirable to maintain as high a ratio of employment in cities and producing centres as is possible under the circumstances.

Events in the Trade

NEW FIRMS

W. R. Stump is opening a new hardware store at 1399 Gerrard St. East, Toronto.

Ottawa, Ont.—Morgan O. White, late of the Capital Hardware, has severed his connection with that firm and, with G. F. Armstrong, has opened a hardware store at 1196 Bank St. under the firm name of Armstrong & White. The new store carries a complete stock of hardware and builders' supplies.

BUSINESS CHANGES

Courtright, Ont.—About a year ago R. Cowan sold his hardware business to G. Hoskin. R. Cowan has now again purchased the business, which has been extended and a tinsmith shop added. G. Hoskin is returning to his former home in Strathroy, where he intends to retire.

FIRE LOSS

Grand Valley, Ont.—Laird Hardware was badly damaged by fire and water.

FIRE LOSS AT SYDNEY

Sydney, N. S., suffered a fifty thousand dollar fire loss when a large business block was destroyed.

DOMINION INCORPORATIONS

Northern Giant Explosives Ltd. is incorporated with capital of $2,500,000 and head office in Montreal to manufacture and deal in explosives, powder and ammunition.

ONTARIO RETAIL FIRMS INCORPORATED

S. H. Cutts Ltd., retail hardware, of Toronto, is incorporated with capital of $40,000 to deal in hardware, paint, oil, glass, etc.

The Davey Hardware Co. Ltd., retail hardware of St. Thomas, Ont., is incorporated with capital of $200,000.

PERSONAL

Percy D. McAvity, of T. McAvity & Sons, Ltd., was in Fredericton last week demonstrating a portable gasoline pump for use in fighting forest fires.

L. C. DeMerrall, manager of the Martin-Senour Co., Vancouver, and W. P. Walsh, manager of the maritime division of the company, visited the head office in Montreal this week.

Harry Meyers, of J. R. Meyers & Son, Stratford, and J. R. Simpson, manager of Stanley Mills Hardware, Hamilton, were Montreal visitors this week.

Russell Beattie, of the Russell Beattie Hardware, London, Ont., is mentioned at the head of a slate of business men it is proposed to run for the city council at the elections next month.

Stewart Heddle, of the Alexander Hardware, Hamilton, Ont., is spending his holidays at his home in Caledonia, Ont.

Col. W. M. Gartshore, of the McClary Mfg. Co., London, Ont., has left for New Zealand where he will spend the winter months.

Col. T. S. Hobbs, of the Hobbs Hardware Co., London, Ont., who has been ill at his home for some weeks, is considerably improved.

WINDOW OF TOOLS FOR HANDYMAN

The Mills Hardware Co., of Hamilton, Ont., has a very attractive window display of tools, medium-priced articles that interest the handyman around the house, predominating. Special price cards are used on the various articles.

HAMILTON GAS MANTLE CO. CHANGES NAME

Dixons Ltd. has succeeded the Hamilton Gas Mantle Co. Ltd., Hamilton, Ont., in the manufacture of mantles, gas, gasoline, kerosene, oil and electrical lamps, lanterns, fixtures, heaters, etc.

UNITED STATES PUTS DUTY ON CEMENT FROM CANADA

Ottawa.—Information has been received by the government from M. M. Mahoney, representative at Washington of the department of external affairs, of a decision by the United States treasury department to assess duty on cement imported from Canada at the rate of eight cents per 100 pounds. The weight of the package is to be included in the weight for duty. Cement from the United States was provided free entry into Canada under the latest Canadian tariff, but provision was made for the imposition of an equal duty on cement entering Canada in the event of the United States placing a duty against Canadian cement. The rate of the Canadian tariff on imports from the United States, therefore, becomes eight cents per 100 pounds.

Important Changes in B. E. Steel Staff

Alexander Dick Appointed General Manager of Coal Sales and E. P. Merrill as General Manager of Steel Sales

ALEXANDER DICK

TWO IMPORTANT appointments have been announced in the personnel of the British Empire Steel Corporation. Alexander Dick is appointed general manager of coal sales of the corporation, with headquarters at Montreal, and E. P. Merrill is appointed general manager of steel sales, also with headquarters at Montreal.

Mr. Dick has been for a number of years general sales agent of the Dominion Coal Company, the largest coal-producing subsidiary of the British Empire Steel Corporation. Since the formation of the new corporation, Mr. Dick has been in charge of all coal sales, but this is the first official announcement that the entire management of coal sales of the corporation are under his supervision.

Mr. Merrill, for the past three years, has been located at Sydney as general manager of the Dominion Steel Corporation Ltd., and brings to his new duties at Montreal the advantages of recent close contact with the operations at the properties.

PLAY HALLOWE'EN PRANKS ON HARDWAREMAN

The plate-glass window of Weber's Hardware, Cargill, Ont., was broken by young boys indulging in Hallowe'en pranks. The proprietor, who was a witness of the performance, saw one boy push another lad through the window. The fathers of the lads were asked to hand over the price of a new window, the estimated cost of which is $200.

SAYS GREAT IMPROVEMENT IN WESTERN CANADA

James A. Hossack, sales manager, Lufkin Rule Co., of Canada, who has just returned from a trip through the West to the coast, states that there has been a remarkable improvement in Western business. In B. C. the lumber industry is exceedingly busy and is said to be on the eve of great developments. The removal of the duty on shingles going into the U. S. has had a stimulating effect on this industry and is reflected on other industries as well. There is also said to be a much better feeling in the prairie section and in the city of Winnipeg, and orders are being placed on a fairly large scale for spring requirements. There is a much more optimistic feeling throughout the entire west and there has been a splendid revival in business. Mr. Hossack also states that the fine weather has enabled Western threshing operations to be carried through to completion under favorable circumstances and has helped the farmers get the land in good shape for the coming spring. The outlook for the coming year, in his opinion, is much brighter than for some time past.

NEGOTIATING FOR BALDWIN

Bethlehem Steel Corporation, as hinted in these columns some weeks ago, are negotiating for the purchase of the plant in Toronto of the Canadian Baldwin Steel Corporation. It is learned at the office of the latter that while the deal is going forward, there is nothing to be made public in that connection and that reports in a daily newspaper, commenting upon details as to price, were absolutely erroneous.

The Baldwin plant is idle at present although there are large stocks of black and galvanized sheets on hand which are reported to be moving freely. While some of the equipment of the plant, particularly that of the rolling mill, is of American make, the galvanizing equipment is British. The outstanding cause of the plant's idleness at the present time is the inability to secure adequate supplies of quantity and quality to keep the plant running steadily on requirements of the Canadian trade.

BURGLARS ENTER HARDWARE STORE

Kingston, Ont.—C. F. Fawcett's hardware store at Tweed has been burglarized twice during the past month, the thieves gaining an entrance through a window at the rear. Cartridges appear to be the article most in demand. Acting on a tip which he received recently, Mr. Fawcett visited a certain home and took a constable with him. As a result of his visit he is now in possession of the names of the culprits, and it is stated that a prosecution will follow.

Suggest Amending Sales and Stamp Taxes

Manufacturers Desire Protection Against Failures —Endorse Trade Acceptances Instead of Open Accounts in Doing Business—Would Ask Government to Establish Standard Rate of Exchange Between Foreign and Canadian Currencies

QUESTIONS important in Canadian trade channels were discussed at some length by the Executive of the Montreal Branch of the Canadian Manufacturers Association at a meeting held in Montreal. A lengthy debate took place with regard to the question of trade acceptances instead of open accounts in doing business. It was stated that a move had been on foot in the United States during the past two years with the idea of promoting the system of trade acceptances in lieu of open accounts. These trade acceptances would be in the shape of drafts, notes or bills of exchange passed upon the purchaser of goods, thus giving the seller a legal admission of indebtedness at the time of transaction. It was felt that everything possible should be done to promote this business system, and to discourage the practice of conducting business by the policy of open accounts, as furnishing better legal proof of indebtedness. Under the present Bankruptcy law it was pointed out trade acceptances could be handled with much greater facility in case of a business failure than could simple open accounts against a firm.

Standard Rate of Exchange

Dealing with Customs certificates on goods imported there was now some difficulty encountered owing to variations in the value of foreign currencies. These difficulties could be ameliorated if the Government would establish some standard rate of exchange between foreign currencies and the Canadian dollar for Canadian customs invoices, these rates to be changed as existing conditions dictated.

Stamp and Sales Tax

The stamp tax on drafts and bills of exchange, which has been a live issue with different trade sections for some time, was discussed at length, and a resolution was adopted urging that the law in this regard be amended so that, to eliminate any loss to the seller, tax stamp on such drafts and bills of exchange should only be cancelled by the banks when they were actually paid.

Another of the newer business taxes which has caused considerable trouble with the manufacturer was the bearing of the sales tax on sales made to firms which subsequently failed. In many instances such sales were made and reported in regular returns to the Government, with payment of the sales tax, while later on the purchasing firm became bankrupt, which involved payment of taxes on sales that proved losing transactions. A resolution in this connection recently adopted by the Chamber of Commerce was strongly endorsed, that quarterly returns made to the Government by all manufacturers showing their losses through the sales tax with insolvent debtors, so that these taxes might be refunded by the Government.

The hope was expressed that the association generally would take up these questions so that some betterment could be reached through united action.

RUMORED WILLIAM JESSOP & SONS TO BUILD IN CANADA

Reports are current in the Toronto steel market that William Jessop & Sons, steel manufacturers, Sheffield, Eng., are preparing to locate a branch factory in Canada. Enquiry at their Toronto office regarding the matter brought an emphatic statement that there was absolutely nothing to give out at the present time and that rumors indicated a somewhat more extensive outside, and hence unreliable, knowledge of the company's affairs than could be claimed by their own officials.

It has been common knowledge that, for some time, this firm has considered the advisability of a Canadian plant but nothing definite has emerged. Present reports have it that methods of financing the Canadian proposition were actually being considered and that the plan would involve the taking over of a going Canadian plant with which would be incorporated the Jessop lines of steel. This was done in connection with the introduction to Canada of the English Electric Co. It is a plant that has merit since it makes available an equipment and organization familiar with Canadian methods and conditions.

William Jessop & Sons opened their Toronto office some thirty years ago. At their "Brightside Works," Sheffield, their steels have been made since 1775. Four typical industries in which their products have figured largely are fine toolmaking, shipbuilding, machine tool work and automobile engineering. It may be that the possibilities of the motor car industry, from a domestic as well as an export point of view, have some appeal to the company.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

THIS week's budget of price developments in the hardware market is exceptionally heavy. While a few declines are recorded, advances still continue the premier feature in point of numbers as well as importance. Many staple lines of iron and steel shelf goods are advanced by manufacturers. These include cast thumb and other door latches, clothes line reels, cobblers' sets, sad irons and handles, plated butts, hinge rasps, door bolts, shelf brackets, grindstone fixtures, hog rings, cast well wheels, saw sets and saw vises, harness hooks, hat and coat hooks, barn door rollers, door pulls, japanned door buttons and awning pulleys. As foreshadowed in a former issue of Hardware and Metal, some revisions have taken place in prices on several lines of builders' hardware. Cylinder sectional door sets, cylinder wrought brass and bronze front door sets and inside steel door sets are all higher in price. On the other hand, the lower grade of inside rim locks are on slightly easier price levels. Other current price increases affect coal oil, cut nail galvanizing extras, and asbestos sheathing. Reductions include pig iron, spring booking prices on poultry netting, grab and slide hooks, and saw wedges. Veneered chair seats are lower in price, while owing to the rapid advance in raw cotton markets, it is felt that some higher quotations may develop on cotton wastes. In the paint markets, the extension of the booking date on white lead in oil to April 1, 1923, without at present increasing the price, is receiving special attention. Turpentine and linseed oil are easier this week, with receding prices noted in certain quarters. New prices are reported pending on fencing and gates for next year. In commenting upon fall business, jobbing houses state that the call for lines usually in demand at this season has kept up in satisfactory proportions and activity is still pronounced. Merchants are concentrating more intensely this year on "gift hardware" and early buying activity is noted.

Montreal, Que.

MONTREAL, November 16.—Important announcements continue to be made in the current hardware markets. Increased price levels are now given by manufacturers on many lines of iron and steel shelf goods. A few lines of builders' hardware are also included in the list. There is a stronger tone in the market for asbestos products, and asbestos sheathing and magnesia pipe covering are higher in price. Coal oil is increased one cent per gallon. It it rumored that advanced quotations may appear on cotton wastes in the near future.

Revisions in a downward direction are also prominent. Next season's quotations on poultry netting are now issued, showing a substantial reduction from prices given one year ago. Veneered chair seats are lower in price. The expected decline in pig iron prices has now materialized.

There is an improved tone in the scrap markets, while on ingot metals there is still a strong tendency in most lines although markets are a little quieter. Fall trade is continuing in good seasonal volume, with activity still shown in building circles.

PRICES ON NUMEROUS SHELF GOODS ADVANCED

Montreal.

Of considerable interest to the trade is the upward price movement in many staple lines of iron and steel shelf goods, included in which are a few lines of builders' hardware. Manufacturers of cast iron goods announce an increase of about ten per cent., among which are such well known goods as cast thumb and other door latches, clothes line reels, cobbler sets, sad irons and handles, etc., while in steel goods such staple lines as plated butts, hinge hasps, door bolts, shelf brackets, etc. In builders' hardware, certain sectional store door and front door sets are quoted higher.

It will be remembered that quite a general advance of ten per cent. was made in builders' hardware in September last, and at that time there was a very firm undertone in iron and steel goods generally owing to higher coal and raw material costs. At the present time, however, it would appear that the question of supply and demand is an important one in the market. Basic materials can hardly be said to be on the steady upward trend as was evidenced in previous months, but there has undoubtedly been a better call for many of these products through building activities. Thus the present strength is apparently due more to the selling end of the industry.

ADVANCED QUOTATIONS ON MRS. POTTS SAD IRONS

Montreal.

An increase of approximately 10 per cent. is recorded in quotations on Mrs. Potts sad irons. New prices are; polished $1.95 per set, nickel plated $2.05 per set.

CANADA STEEL GOODS CO. ANNOUNCE REVISION

Montreal.

The Canada Steel Goods Co. have issued a revised price list, showing both higher and lower prices on their products. Changes, however, are mostly in an upward direction, affecting such lines as plated butts, shelf brackets, door bolts, etc. Local jobbing houses have not announced their new resale prices.

NEW SEASON'S QUOTATIONS ON POULTRY NETTING

Montreal.

Prices for next season are now issued on poultry netting showing a substantial reduction on both one and two inch mesh from quotations issued in the fall of last year. One inch mesh is now quoted at 20 per cent. off list prices, two inch at 30 per cent. off. Discount last season was 12½ per cent. on both sizes.

CHAIR SEATS NOW SELLING AT REDUCED PRICES

Montreal.

A considerable reduction is made in quotations on veneered chair seats, these now selling at 40 per cent. off list prices. Following are lists and discounts:

CHAIR SEATS—	per 100
13 inch	$ 13 00
14 inch	14 00
15 inch	16 00
16 inch	18 00

Less 40 per cent.

COAL OIL ADVANCED ONE CENT PER GALLON

Montreal.

Current quotations on coal oil are advanced one cent per gallon on the local market, in direct contrast to the trend of gasoline in recent weeks. Coal oil however has been on a firmer market during the past few weeks owing to heavier consumption, while this usually falls off in gasoline after the active summer months.

SOME REVISIONS IN BUILDERS' HARDWARE

Montreal.

Manufacturers of builders' hardware announce a price revision on some of their lines, an increase of approximately ten per cent being made on cylinder sectional store door sets, cylinder wrought brass and bronze front door sets and inside steel door sets. The cheaper grade of inside rim locks are a little lower in price. No further change is made in other lines at the present time.

FIRMER PRICE TREND IN ASBESTOS PRODUCTS

Montreal.

Advanced prices are now quoted on asbestos sheathing and magnesia pipe covering, and there is stated to be a general firming tendency in the undertone of the market. Other products such as asbestos pipe covering and boiler covering have unchanged quotations on the local market up to the present, but a revision in these materials would not be surprising in the near future if the stronger tone continues. Although there is little to indicate a stiffer tendency in production circles, the improved demand in recent weeks is described as a strong factor in this direction. Building activities have continued quite favorably during the later summer and fall months and in some lines there is difficulty in procuring ample supplies. Following are revised quotations:

ASBESTOS PRODUCTS—

	Off list prices
2 ply pipe covering	67½%
3 ply pipe covering	65%
4 ply pipe covering	60%
85% magnesia	40%
Boiler covering	$1.50 per bag
Asbestos sheathing	$7.75 to $8.25

MAY BE HIGHER PRICES ON COTTON WASTES

Montreal.

Although cotton waste prices have been on a steady basis for some months past, in face of a strong undertone in the market in recent weeks, it is now rumoured in some quarters that higher prices may be announced in the not far distant future. It is again pointed out that higher price levels have appeared on practically all other cotton goods, and there is still a strengthening tendency in raw cotton circles. A change is thought to be fully warranted in wastes, and revisions would not come as a surprise around the close of the present month, or early in December. Present quotations are:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14
Anvil	0 16

RADIATORS AND BOILERS ARE GOOD SELLERS

Montreal.

"We are still busy," is the general statement of manufacturers and distributors of radiators and boilers in describing trade. Although the season is fast advancing there is still a good amount of building construction demanding supplies. Another factor contributing to the present active period is that deliveries with some manufacturers were delayed earlier in the season and they are now having an opportunity to catch up. With open weather continuing for a short time hence it is said that a brisk trade is assured for the earlier winter months at least. Prices are steady at following quotations:

RADIATORS AND BOILERS—

Radiator list prices are for 1, 2, 3, 4 and 5 column radiators, per sq. ft.

45 in., to 38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in., $1.40; 16 in., $1.50; 4 in, $1.55; 13 in., 1.60. Discount 55 per cent. for hot water, and 56 per cent. for steam.

Wall radiators—5 ft., $1.15; 6 ft., $1.10; 7 ft., $1 05; 9 ft., $1.05; 12 ft., $1.05; Discount 52 per cent.

Boilers—Round hot water boilers, sizes from 0 t o10, 60 per cent off list.

Square or sectional hot water or steam boilers, 15 in., 15 per cent.

Square or sectional water boilers, 19 in., to 36 in., 20 per cent.

Square or sectional steam boilers, 19 in., to 36 in., 17 per cent.

Ontario Government trimmings, 15 per cent.

Round steam boilers, standard trimmings, 28 per cent . Ontario Government trimmings, 25 per cent.

F.o.b. Montreal, Toronto, Guelph.

STEEL FENCING PRICES UP EIGHT PER CENT.

Just as Hardware and Metal goes to press, advice is received that an advance is made in prices on steel fencing for next season's booking. The approximate extent of the increase is 8 per cent. Quotations on gates remain unchanged.

SLIGHTLY EASIER TENDENCY IN COMPRESSION GOODS

Montreal.

Although there is no general announcement up to the present time of a revision in certain lines of valves and bibbs, there is said to be a little easier feeling in the market, and certain firms are quoting an extra discount on some of the best selling lines. In one quarter a discount of 50 per cent. is quoted on standard compression bibbs, although valves and cocks remain unchanged at 45 per cent. off. Whether a general revision will be announced in the near future is hard to say, but in view of the easier tone of copper on primary markets a slight change would not be surprising to some. Following are average discounts:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	54%
Do., removable discs	54%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins gate or straightway	16%
Jenkins iron body, globe and angle	5%
Jenkins iron body, gate	25%

GOOD FALL TRADE IN RANGE BOILERS

Montreal.

Trade in range boilers is still in good volume, according to manufacturers and distributors. Demand for requirements in new building and replacements remains in evidence, and the position of the market for these products is much more satisfactory than it was in previous spring and summer months. A lull in the strong undertone, owing to rising costs of raw materials, is recorded, but they are still said to be on a fairly steady basis, with nothing like the amount of price shading that was formerly evident. Unchanged list and discounts are as follows:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent. Extra heavy, 35 per cent.

FURTHER DECLINE IN PIG IRON PRICES

Montreal.

Conditions on the local iron and steel market are now more or less affected by the recent revision in pig iron prices. To some the reduction of $2.50 per ton by Canadian producers will not materially change the outlook, for the present at least. It is stated that the quotation on the domestic product is only now on a par with the imported iron, and mills in this section have recently been purchasing the Scottish and English pig. Stocks of this too are now sufficient to carry them for some weeks ahead, or where there is any shortage this will be taken care of between now and the close of navigation.

Current trade in bar products continues in a fairly satisfactory volume, and although there are no larger inquiries there is a steady volume of smaller

business. While it is naturally expected that trade will show a slackening towards the latter end of the month, November will bring returns comparing favorably with previous months. Quotations locally are unchanged at following levels:

IRON AND STEEL—		
Common bar iron, 100 lbs.		3 15
Refined iron		4 65
Irish finish machinery steel		3 20
Mild steel		3 15
Single reeled machinery steel		5 25
Band steel	3 50	3 65
Spring steel	4 75	8 50
Sleighshoe steel		3 15
Tire steel		3 35
Harrow tooth steel		3 30
Toe caulk steel		4 05
Mining tool steel, per lb.		0 20½
Black Diamond tool and cast steel, per lb.		0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

SHEET MARKETS MAY FOLLOW EASIER TREND

Montreal.

The recent announcement of a slight reduction on American sheet markets is looked upon as likely to have little or no material effect locally at the present time at least. What will have a greater bearing on the situation is the fact that stocks are now fairly well filled for the coming months, and where there is not sufficient there are orders now on the way from overseas to arrive before the close of navigation. Whether the reduction on markets to the south is indicative of the future trend of these products is hard to say, but considering that deliveries are still delayed and the rise in certain raw materials, such as spelter for galvanizing, it is hardly felt that prices will decline to any great extent. It is looked upon more as an adjustment. Undoubtedly the undertone of sheets has been a little easier than on other iron and steel products but not as pronounced as to indicate a general weakness. However, price levels locally are not looked upon as being as firm as formerly.

INGOT METAL MARKETS ARE MUCH STEADIER

Montreal.

A quieter tone is now evident in the ingot metal markets, with prices somewhat steadier after the advances in the past few weeks. Although price levels are quite high on some metals there appears to be more stability in the markets at the present time, and in some cases the rise is of a healthier nature than on former occasions.

TIN.—This market has been fluctuating within narrow limits with very little ultimate change in prices. It now remains to be seen whether or not another advance will be made, but certainly the new higher levels reached have not helped consumption. Local price unchanged at 42 cents.

COPPER.—Copper shows a firmer tone both in London and the U. S. A., and producers appear firmer in their ideas. This is a welcome change as this market has been lagging for some weeks past. Home consumption is a little better and export is also improved. Quotations remain at 17¾ and 17½ cents.

LEAD.—This metal is quiet in London, but the American market is quite firm with no signs of weakness there. Prices are considered on a fairly high level, but lead is still in a firm market position, with local price at 8 cents.

SPELTER.—October figures in the United States showed a further decline in stocks, and they are now at the lowest point in several years. Although present price is high it is felt that it is based on the shortage, and East St. Louis has now reached $7.35. The local market is slightly higher at 10 cents.

Toronto, Ont.

TORONTO, November 16.—Advances continue the rule in the current hardware markets, the number of higher prices again exceeding the reductions. Increased quotations appear on many manufactured iron and steel goods as foreshadowed in Hardware and Metal several weeks ago. A general upward revision is recorded on such products as wrought staples, shelf brackets, door pulls, door bolts and butts. Other lines with increased prices include grindstone fixtures, clothes line reels, the Potts' sad irons and handles, coal oil, the galvanizing extras on cut nails, and asbestos sheathing, while some new price levels appear on lead sheets, this advance, however, not yet being uniform. In an effort to settle the local wire nail situation and bring quotations up into line with other centres, an advance of ten cents is made in the base price.

The new lower booking prices on poultry netting feature the current reductions. Pig iron is also reduced this week, a development which was forecast in Hardware and Metal. Black sheets are on easier price levels, with blue-annealed also recording a very slight reduction. A good season is expected in toys and specialties. Merchants are concentrating early on gift hardware.

TEN CENT INCREASE IN WIRE NAIL BASE

Toronto.

As foreshadowed in a recent issue of Hardware and Metal, an advance is now made effective by manufacturers and distributors in the base price on wire nails. The extent of the advance is ten cents per keg, thus bringing the prevailing level to $3.75, with the usual f.o.b. points. For several weeks past there has been much unsettlement in the local market, price shading on wire nails having been more or less common, with the former $3.65 base having become merely a nominal quotation. It is pointed out that the current increase is the result of steps to eliminate this condition and bring local prices up to a uniform level with other centres.

GENERAL REVISION IN CANADA STEEL GOODS LINE

Toronto.

A general revision is made in the price list of the Canada Steel Goods Co. A few lines remained unchanged, but others are slightly lower, while several advances are also recorded. Hardware affected by this change includes wrought staples, shelf brackets, door pulls, door bolts, and steel butts.

HIGHER QUOTATIONS ON MANUFACTURED IRON GOODS

Toronto.

A number of manufactured iron goods, both japanned and nickel plated, have been advanced approximately 12 per cent. This list of products made by Taylor-Forbes Co.. and Canada Foundries & Forgings, Ltd., includes such products as hog rings, cast well wheels, clamps, saw sets, saw vises, harness hooks, hat and coat hooks, door pulls, barn door rollers, barn door latches, japanned door buttons, and awning pulleys. This upward revision is in line with the development along these lines foreshadowed in Hardware and Metal market reports several weeks ago.

NEW BOOKING PRICES ON POULTRY NETTING

Toronto.

Through the issuing of new discounts on poultry netting, spring booking prices for 1923 are relatively lower. The revised discounts are as follows: Canadian netting, 2-inch mesh, 20 per cent. off; 1-inch mesh, 30 per cent. off. American netting, 2-inch mesh, list less 20 per cent.

INCREASED PRICES ON GRINDSTONE FIXTURES

Toronto.

A marked advance is now in effect on grindstone fixtures, the revised quotations showing an increase of around twenty per cent. New levels on the 15-inch are $9.60 per doz.; and on 17-inch, $10.20 per dozen.

HIGHER QUOTATIONS ON CLOTHES LINE REELS

Toronto.

Quotations on clothes line reels are now increased approximately ten per cent. This advance brings the following price levels into effect locally: No. 1, $19 20 per doz., No. 2, $20.40 per doz.

ADVANCE GALVANIZING EXTRAS ON CUT NAILS

Toronto.

An advance is made this week in the galvanizing extras on cut nails. These are now as follows:—Under one inch, $3.50 per cwt.; one inch and over, $3.25 per cwt.

BLACK SHEETS ON EASIER PRICE LEVELS

Toronto.

Conditions this week in the local sheet market show slightly easier levels in black and blue annealed sheets. In discussing prevailing market factors, a prominent domestic sheet manufacturer stated in part as follows:

"I am afraid there is going to be a soft spot although from present indications it will not be what you might denote 'mushy,' especially in galvanized sheets because of the very continued strong tendency of zinc spelter.

"My idea therefore is, that for the next two or three months, the Canadian buyer will sit rather tight in the saddle and take few chances which may in the end be just as well.

"We are continuing our prices unchanged but that is due to the fact that we have had a large excess of orders in the last week or so."

GALVANIZED SHEETS—

	Premier and Apollo
10¾ oz.	6 65
U. S. 28 base	6 25

SOME HIGHER PRICES ON LEAD SHEETS

Toronto.

In conjunction with the upward movement of other lead products, prices on lead sheets have been advanced in some quarters. The increase is approximately half-a-cent per pound, this change bringing current base levels to ten cents. The new higher level is not yet general, however, the former price of 9½ cents still being maintained by other distributors.

LEAD AND ZINC GOODS—

TRADE IN COMPRESSION GOODS WELL SUSTAINED

Toronto.

There is a fairly good call noted for compression goods, the movement keeping up exceptionally well for this time of the year. While a slackening has naturally been evident from the brisk volume of trade recorded in recent weeks, yet Fall building activities have resulted in sustaining the demand well into what is usually regarded as the quiet period. No further revisions have been made in prices, the following being discounts quoted locally:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%

STRENGTH OF ZINC REFLECTED IN BRASS

Toronto.

There has been no decided development in the market for brass and copper products such as sheets, rods and tubing. Trade conditions are practically the same as reported during the past two weeks. The upward trend in zinc prices is naturally reflected in the stronger tone of manufactured brass lines, but no further adjustments in quotations have taken place. Most metals remain with an upward tendency at the present time, both in primary and domestic markets. Prevailing local quotations follow:

BRASS—	
Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22
COPPER—	
Rods, base, per lb.	0 30

Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

TROUGH BUSINESS STILL IN MODERATE VOLUME

Toronto.

Manufacturers and distributors report that current trade in eavestrough, conductor pipe and kindred lines is keeping up in fair volume for this season of the year. The late activity in these products is generally attributed to the fair weather that has been experienced during recent weeks, a factor which has enabled buildings, especially of the smaller type, to maintain this class of work for a longer period than would otherwise have been considered. Quotations remain unchanged, it being stated that very little revision in this direction is beng looked for now that the active season is drawing to a close. Prevailing levels follow:

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per. 100 ft.	
8 inch	$15 90	15 inch	$28 80
10 inch	17 70	18 inch	36 80
12 inch	21 20

FAIRLY GOOD TRADE IN BAR IRON AND STEEL

Toronto.

Local trade in bar iron and steel is reported as good for this season of the year. Last month activity was apparent in all lines and the present month's trade is recording a fairly well sustained movement. Local warehouses state that they do not look for any further price advances at the present time, the market having reached a stationary position for the quieter winter period. Quotations are therefore unchanged, both on domestic and primary centres.

IRON AND STEEL—		
Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40

Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

UPWARD TREND NOTED IN COTTON MARKETS

Toronto.

While marked advances have been recorded recently in the raw cotton markets, and prices on practically all manufactured cotton products have been correspondingly advanced, the quotations on cotton wastes have remained unchanged. Distributors point out that

the by-products in this class are not affected so promptly by primary market changes as on other lines, and no immediate revisions are looked for. That some action in this direction may materialize later is the general feeling, however. Business is described as steady and of seasonal volume. Following are unchanged levels:

COTTON WASTES—

PRICES ON POTTS SAD IRONS MOVE UPWARD

Toronto.

An advance of approximately ten per cent. has been made by manufacturers and distributors in quotations on the Potts line of sad irons. The revised local levels are: Nickel plated, $2.10 per set; polished, $2.00 per set. Handles, japanned, $21.40 per gross.

PIG IRON QUOTATIONS RECEDE $2.50 PER TON

Toronto.

As foreshadowed in last week's issue of Hardware and Metal, there has been a decline in domestic pig iron prices. The reduction is $2.50 per ton, which change brings the current new level to $33.80. It is stated that one of the primary reasons for this development was the operations of the Buffalo pig iron market, and the lower level compares very favorably with southern primary quotations. It is pointed out that this decline may be reflected in future price levels on finished iron and steel products.

EASIER TREND IN CORRUGATED MARKET

Toronto.

With the approach of the quiet season, an easier tone has developed in the corrugated sheet market. Prices on flat sheets have also registered a decline during recent weeks and following this precedent, some slight adjustments in corrugated quotations are more or less looked for in the ensuing weeks. Reports of some price shading on lighter gauges have again appeared, although concessions of this nature are considered consequent upon distributors moving stocks prior to the completion of building activity for the current season.

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00

No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

EXPECT FAIR SEASON IN TOYS AND SPECIALTIES

Toronto.

With the approach of the Christmas season, preparations are being made for the prospective annual trade in toys, specialties, and other lines, enjoyed by the hardware industry during this period of the year. This season, however, merchants are concentrating more intensely on "gift hardware." Early indications in this direction are generally regarded as promising from the viewpoint of normal business.

Up to the present, the activity in the toy field is described as fair. The conservative buying policy until recently adopted by retail merchants in practically all lines of trade, is still evident with regard to purchases of toys, and stocks are described as moderate. The increased range and greater variety of toys on the market, is claimed as an indication that business in these lines will be up to expectations. For this reason, both manufacturers and distributors are preparing for a brisk volume of trade, as the requirements of the retailer and the public become manifest.

ADVANCE DEVELOPS IN COAL OIL PRICES

Toronto.

Coal oil prices are advanced one cent. per gallon. This development brings the current new quotation to 21 cents. Such an advance has been forecast in recent market reports contained in Hardware and Metal. The undertone of the coal oil market has steadily gained strength during recent weeks, chiefly owing to increasing consumer demands. Other oils remain unchanged in price. Gas oil is recording brisk activity, while gasoline is entering the quiet period and is still weak.

London, Ont.

LONDON, November 16.—Hardware business continues excellent here. Fall and winter lines are in good demand and the stiffening markets have a stimulating effect on sales, as merchants are stocking up more than in the past few months. Sorting business for Christmas lines is also good at present.

ADVANCE BASE PRICE ON WIRE NAILS

London, Ont.

An advance of ten cents per keg is made in quotations on wire nails, this bringing the prevailing base to $3.75.

FINISHED IRON GOODS ADVANCED IN PRICE

London, Ont.

Goods made of iron, both japanned and plated, manufactured by Taylor-Forbes Co., and Canada Foundries & Forgings Ltd., have been advanced approximately twelve per cent. Some of the lines affected by this increase are as follows:—Awning pulleys, side and screw pulleys, japanned door buttons, barn door latches, barn door rollers, door pulls, hat and coat hooks, harness hooks, saw vises, saw sets, quilting frame clamps, cast well wheels, hog rings, sad irons, clothes line reels, grindstone fixtures.

LOWER BOOKING PRICES ON POULTRY NETTING

London, Ont.

A new lower price is announced on poultry netting for present delivery and 1923 spring bookings. The revised discounts on the galvanized 1 inch mesh is 30 per cent., and on 2 inch mesh, list less 20 per cent.

LINSEED OIL PRICE REDUCED TWO CENTS

London, Ont.

Linseed oil prices are two cents per gallon lower this week. There is a fair seasonable sale recorded. New quotations follow:

LINSEED OIL—

	Raw	Boiled
1 to 2 barrels	1 15	1 18
3 to 5 barrels	1 14	1 17
6 to 9 barrels	1 12	1 15

TURPENTINE QUOTATIONS RECEDE FIVE CENTS

London, Ont.

A reduction of five cents per gallon is recorded this week in turpentine prices. This development is chiefly the result of the easier tendency which has been noted in southern primary centres, and is looked upon as a reaction from the recent rapid advances. There is just a fair sale at present. New prices follow:

TURPENTINE—

	Imperial
1 bbl. lots	2 30
2 to 4 barrel lots	2 29
5 gal. lots	2 45

REVISED NET PRICES ON GAME TRAPS

London, Ont.

The new net prices on game traps, showing an advance of approximately 10 per cent., are as follows:

GAME TRAPS—

Victor, per doz.:

No. 0, $2.10; No. 1, $2.45; 1½, $3.85; 2, $5.25; 3, $8.85; 4, $10.70.

91, $4.00 doz.; 91½, $5.65; 1, Giant, $3.20.

Oneida Jump, per doz.:

No. 0, $2.85; No. 1, $3.20; No. 1½, $4.60; No. 2, $7.05.

Newhouse, per doz.:

No. 1, $7.05; No. 1½, $10.55; No. 2, $15.90; No. 3, $21.15; No. 4, $24.65.

81, $8.45; 91, $8.85; 91½, $12.35.

Hawley and Norton, per doz.:

No. 0, $4.05; No. 1, $4.75; No. 1½, $7.20; No. 2, $10.00; No. 3, $13.45; No. 4, 15.75.

GOOD SALE FOR NAILS STILL BEING RECORDED

London, Ont.

A fairly brisk sale of nails still continues. The current supplies of cut nails are showing some improvement over conditions earlier in the season. Prices on both wire and cut nails are unchanged at the following levels:

NAILS—

Wire nails, base, $3.75 per keg.

Cut, do., base, $4.60 per keg.

SAW WEDGE PRICES NOW SLIGHTLY LOWER

London, Ont.

Prices on saw wedges are slightly lower this season. The prevailing quotations are as follows:

SAW WEDGES—
¾ lb., 24c. lb.; 1 lb., 21c. lb.; 1¼ lb., 18½c. lb.; 1½ lb., 18½c. lb.

EASIER PRICE ON GRAB AND SLIDE HOOKS

London, Ont.

This year's prices on grab and slide hooks also show a slight reduction. Following are the revised levels:

SLIDE HOOKS—
¼", 11c. ea.; 5-16", 16c. ea.; ⅜", 20c. ea.; 7-16 in. 25c. ea.; ½", 30c. ea.

INCREASING SALES OF PLATED FLATWARE

London, Ont.

A good sale is reported this fall for community and 1847 Rodgers' plated flatware. Prices remain unchanged and net lists are quoted.

IMPROVED ACTIVITY IN THERMOS BOTTLES

London, Ont.

There is also a good sale this season for the thermos line of bottles and lunch kits. Following are net prices on some of the most popular lines:

THERMOS PRODUCTS—
Bottles, No. 11, pint, $1.35 ea.; No. 1111 1½ pint, $2.03 each.; No. 112 Quart, $2.36 ea.
Refills—No. 61c. pint, 85c. each. 612c Quart, $1.52 ea.
Lunch Kits—No. 396, metal, $2.70 ea.; No. 400, imitation Leather, $2.10 each.

BRISK SALE STILL NOTED FOR WINDOW GLASS

London, Ont.

A brisk seasonal sale is still in evidence for window glass. Quotations remain unchanged, both on imported and domestic makes. Current discounts follow:

WINDOW GLASS—
Domestic Glass, single and double diamond, less than 25 cases, list less 5 per cent. 25 cases and over, list less 10 per cent. Cut lights, list less 75 per cent. Belgian glass, less than 25 cases and over, list less 20 per cent.

GOOD DEMAND FOR PAINT FOR SPRING DELIVERY

Winnipeg.

Manufacturers state that spring orders are coming in more freely and are showing more volume for paints than last year. Quotations are unchanged.

LINSEED OIL STILL MAINTAINS FIRM TONE

Winnipeg.

The tone of the linseed oil market continues to rule firm and local quotations of $1.25 for raw and $1.28 for boiled, show no change.

FIRM TONE REMAINS IN TURPENTINE MARKET

Winnipeg.

There is a firm tone to the turpentine market and prices have moved upwards and indications point to still higher levels. Dealers report a fair demand at the quotation of $2.35 per gallon.

Winnipeg, Man.

WINNIPEG, Nov. 16.—Slight advances have been recorded on wrought iron and galvanized pipe. Game traps have also shown a slight advance. Wholesalers report a seasonable demand for cutlery, skates, toys, etc. Paint manufacturers state that orders for next Spring delivery are coming in in larger volume. Linseed oil maintains a firmer tone. The turpentine market is ruling firm and a further advance has been recorded.

SLIGHT ADVANCE IN WROUGHT IRON PIPE

Winnipeg.

There is a slight advance recorded in quotations on wrought and galvanized iron pipe. Following are the new quotations:

PIPE—	Wrought	Black	Galvd.
⅛ in.		6 84	9 24
¼ in.		4 68	7 12
⅜ in.		4 82	7 26
½ in.		6 15	8 00
¾ in.		7 48	9 55
1 in.		10 65	13 72
1¼ in.		14 42	18 56
1½ in.		17 25	22 20

8 in.		200 50	
9 in.		280 75	
10 in.		260 16	

ANOTHER ADVANCE IN GAME TRAPS PRICES

Winnipeg.

An advance of practically ten per cent. is now in effect on game traps. There has been a good demand for this line and new quotations are as follows:

GAME TRAPS—	Victor	H & N	Jump
No. 0	2 15	4 10	....
No. 1	2 45	4 80	3 25
No. 1½	3 90	7 30	4 70
No. 2	5 35	10 15	7 15
No. 3	8 95	13 65	9 60
No. 4	10 85	16 00	....

SEASONABLE DEMAND FOR CUTLERY RECORDED

Winnipeg.

Bookings for pocket, table, dessert, and carving knives and forks are being filled by wholesalers on seasonable quantities. Pocket knives are quoted from $5.95 to $14.00 per dozen. Table knives and forks are quoted at from $5.75 to $10.00 per dozen and carving knives and forks range from $2.75 to $4.00 per set.

REVISED QUOTATIONS ANNOUNCED IN ROPE

Winnipeg.

Revised prices effective on sisal, pure and British manila rope, are as follows:

ROPE—

Sisal—	
¼ in. and 5-16 in.	0 19½
⅜ in.	0 19

⅜ in.	0 22½
7-16, ½ and 9-16	0 22
⅝ in.	0 21½
¾ and larger	0 21

Calgary, Alta.

Alberta Farmers Still Confining Purchases to Immediate Necessities

CALGARY, November 16.—Hardware business has not yet reached in volume what might be expected at this season. The towns in the coal fields are sending in good orders, and a very fair business is coming in from the lumber sections, but those who serve farming communities only, find their sales confined to immediate necessities, and the volume under what a good crop year should bring. The city stores are reflecting conditions at the country points and are looking for the usual rush of fall buying to be spread over some period of time. In the meantime a good bit of energy is being displayed in advertising, window displays, and other efforts to attract and serve customers.

Skating on the smaller sloughs has started and some of the rinks will have ice ready in the next week or ten days, and the business brought into evidence by this popular pastime is being sought in a lively manner.

Collections are slowly but steadily increasing in volume, and the month of November is expected to show a good reduction in the outstandings of both the wholesaler and the retailer. Indications are that the crop returns already available have gone largely to reducing liabilities, rather than to the purchase of new goods, and that later returns will be spent wisely, and with an eye to next spring's needs.

Weather is colder and more seasonable, but still very favorable to all outside work. A number of new houses have been started since the first of the month; six being noted in one block; and sufficient in total to provide work for a good many of our resident mechanics. Tinsmithing shops are busy. General repair work and furnace jobs have made this trade probably the busiest of any of the trades allied with the hardware store.

A price change of general interest just at this time is an advance of about

ten per cent. on all lines of game traps. Alberta is a heavy user of traps, particularly in the Edmonton district, and with the gradual closing out of outside work, trappers' supplies are quite active and will continue so for some time. Early placing orders represented a good volume with individual orders on the light side, and sorting can be expected to turn in an active trade well into the winter. Prices now in effect at Calgary, Edmonton and Lethbridge follow:

Hawley & Norton:—0, 4.23; 1, 4.95; 1½, 7.55; 2, 10.50; 3, 14.15; 4, 16.55.

Victor:—0, 2.25; 1, 2.60; 1½, 4.15; 2, 5.65; 3, 9.40; 4, 11.35; 91, 4.25; 91½, 5.95.

Oneida Jump:—0, 2.98; 1, 3.40; 1½, 4.90; 2, 7.45; 3, 19.05; 4, 11.90.

Newhouse:—1, 7.15; 1½, 11.05; 2, 16.45; 2½, 25.85; 3, 22.05; 4, 25.85; 4½, 66.60; 5, 202.05; 50, 139.95.

Clayton & Lambert torches and firepots are advanced in sympathy with recent revised factory discounts; the advance being from 35 per cent. off to 32½ off at Calgary, Edmonton and Lethbridge.

A general advance on carriage malleables of around 2 cents per pound is also in effect. The Alberta jobbers have issued prices on the main items such as clevises and McPhail hooks, by the dozen instead of by weight in order to simplify pricing and avoid errors in weight. The plan seems to have worked out to everyone's satisfaction and will probably be extended to cover other lines. The prices now in effect at Calgary, Edmonton, and Lethbridge follow: malleable clevises 395, 2.27; 410, 2.44; 420, 2.60; 427, 2.77; 430, 2.92 555, 3.42; 666, 3.74; 777, 5.36 per dozen. McPhail hooks 107, .99; 207, .77; 307, .82; 2.67, 1.04 per dozen.

A substantial decline is noted on Rabone boxwood rules, particularly in the finer qualities, some numbers being reduced as much as 25 per cent. A change in horse rasps is also noted and Hellers are now 62½ per cent. off and house brands 67½ off at Calgary, Edmonton and Lethbridge. Adjustments are noted on a wide range of household brushes, both advances and declines being in evidence. Generally the trend is an advance on the cheaper grades and a decline on the higher priced lines. Asbestos wick packing is reduced from 65 to 57 cents a pound.

Standard wrought steel pipe has reacted to the manufacturers' advance of a week ago, and new prices are issued. The change affects all sizes in black from one inch up, and in galvanized from four and a half inch up; which sizes are roughly two per cent. higher. Trading on this line is reported fair for quantities covering current needs with most activity shown in the pump sizes. Following prices are now current at Calgary, Edmonton and Lethbridge;

Black		Galvanized
⅛	7.09	9.49
¼	5.10	7.54
⅜	5.38	7.82
½	7.00	8.85

St. John, N. B.

Maritime Hardware Merchants Now Preparing for Christmas Business

ST. JOHN, N. B., November 16.—The first snow storm of the year struck the city of St. John, and did considerable damage to property, especially in the southern part of the province. It is rather unusual for the first storm of the season to cause so much damage. The change in weather came about so quickly that many citizens were caught unawares, and several outdoor jobs that were under way had to be abandoned for a few days. Motor traffic proceeded with difficulty for a day or two, and there was a good demand for tire chains.

In anticipation of the coming change in the rule of the road in New Bruswick on December I, the commissioner of public safety is preparing some slight amendments to the civic by-laws covering traffic regulations. This is being done in all towns throughout the province. Many motorists have declared that they will keep off the road for a few days, when the change comes into effect, as it is expected that there may be some accidents during the first few days.

The Retail Merchants' Association of St. John is keeping right after non-resident agents who come into the town and sell merchandise from door to door, interfering with the business of the local merchants who are the main contributors to the city's revenue. Last week a case was brought up by Miss Alward, the secretary of the Retail Merchants' Association, showing where an agent had sold more than $8.000 worth of merchandise, and that neither he nor his firm paid any tax in the city. The secretary pointed out that it was up to the city council to stop this kind of trading, in the interests of the St. John merchants, and that a good tax should be imposed on these agents or their firms looking for retail business in the city.

The city commissioners stated that there were several lines of business that needed protection.

Of late years, curling has come forward as a favorite sport with many business men, and a large number of the maritime province hardware men are enthusiastic curlers. The provincial government has decided to co-operate in the entertainment of the Scottish curlers, who will visit Canada in January. The New Brunswick curling clubs will join in sending rinks to St. John for a bonspeil with the Scottish visitors from January 6 to 8.

Passenger traffic to and from the British Isles and the continent, carried by the Canadian Pacific lines, will be diverted from Montreal to St. John at the end of November, according to the winter sailing schedule issued by the Canadian Pacific Steamship Service, Ltd.

St. John's new dry dock, now in the course of construction in Courtenay Bay, will be opened next fall.

The C. P. R. elevators are now in operation, and grain is being steadily received in small lots. Fire which endangered the Inverness coal mines for three days is now under control. The fire is believed to have been smouldering since a similar outbreak about two months ago. It is now confined to a small area walled off with concrete, and the danger is believed to be over.

In the third quarterly report of the provincial fire marshal of New Brunswick, it is noticed that a large majority of fires were caused by sparks on roofs, and this fact has caused many of the hardware and builders' supply houses to advertise largely fire-proof roofings and shingles. It is an interesting fact that during the last three months not one fire in the province of New Brunswick originated from rubbish and litter. The fire marshal has for the past year or so conducted a vigorous campaign against allowing rubbish to accumulate in cellars and yards, and apparently his compaign has met with the desired results. Each year, before the cold weather sets in, the city of St. John advertises a clean-up day, and urges the citizens to dispose of all their accumulated rubbish and litter before heaters and furnaces are started. The hardware merchants usually take a part in this campaign, and advertise ash and garbage bins, ash-sifters, shovels and brooms.

Many of the New Brunswick lumber mills are now sawing laths, and the business seems to be booming, with a big demand from the United States at a price that is highly satisfactory to the producers. There is some little fear that the industry will be over-done, but so far all engaged in the production of laths are experiencing no difficulty in finding a market.

The merchants of St. John are now preparing for Christmas business, and many of the storekeepers are clearing sections of their premises for special displays. Two or three of the large hardware

houses issue a pamphlet, giving prices and illustrations of seasonable articles. Last year W. H. Thorne & Co., Ltd., distributed several thousands of such pamphlets with good results. One section of the circular was devoted to sporting goods, another to electrical goods and others to toys, silverware, etc. Messrs. T. McAvity & Sons, Ltd., usually get out a McAvity Messenger during the Christmas season, and circularize the city.

Last week the hardware merchants confined their advertising to furnaces, stoves, fire-side furnishings, coal buckets and ash-sifters, and the various windows were trimmed in accordance with the advertising. Winter automobile accessories were also displayed, and owing to the severe snow storm, tire chains were largely played up.

Outside painting is now all over, and painters state that this year there has been more painting done by householders than in any former year since 1914. Dealers report that white lead, oil and paint sales have been very good, both to the painters and householders. There is every indication of a good business in coach and carriage paints during the winter months, for the automobile painting trade.

Vancouver, B. C.

Early Buying for Holiday Trade With Money Now Slightly Easier in B.C.

VANCOUVER, November 16.—While various retail trade houses in Vancouver have recently reported that business is none too good, that statement scarcely applies to hardware in general, though some of the stores in outlying districts where building is inactive, are having a hard enough time to carry on. It is sufficient to note that there are far less special or freak sales this November than at the same time last year, which is fairly conclusive evidence that money is a little more plentiful.

Increased enquiry for china and crockery ware for the holiday trade is now recorded and in some instances deposits are being taken for later sale. From the early buying it is felt that money is a little more plentiful than last year. Displays of new lines are showing up regularly, progressive houses taking advantage, possibly to a greater extent than ever, of good window space. Firms report that although it takes more work and time to change their windows, results prove the wisdom of this course.

Distributors report that business during the first half of November is well up to the satisfactory trade of last month, and that buying orders are fairly well divided among the different sections of the province. There is a continued good enquiry and resultant sale of heating equipment. Collections are generally in good shape, cases where pressure is needed being infrequent.

At a meeting of the city council, contracts for the supplying of 3,000 feet of fire hose were awarded at a common price of $1.50 per foot. The Gutta Percha and Dominion Rubber System companies were awarded one thousand feet each, the remainder being split between the Goodyear and Dunlop Tire companies.

Hamilton, Ont.

Arrival of Colder Weather Supplies Stimulant to Trade in Winter Goods

HAMILTON, November 16.—The arrival of regular fall weather has made trade noticeably brisker in the retail hardware stores. Coal, gas and oil heaters are moving out well, and glass, putty, weather strip, and the numerous other accessories to winter comfort, are responding to a brisk demand. Retailers report cash sales better than for sometime, and a corresponding improvement in collections. Reports from other towns throughout the province indicate the same general tendency.

Fall and winter goods are moving briskly and a steady volume of trade is evident. Booked orders for snow shovels and winter lines are now being shipped. The call for builders' hardware is still proceeding. The movement of corrugated sheets, eavestrough, conductor pipe and kindred lines is slowing up with the approach of the winter season.

There is an increasing disposition to provide for forward requirements. While this tendency is not yet general, it is developing steadily. Purchasing for immediate needs only, which has long been the common practice, is being succeeded in numerous instances by demands running well ahead, indicating more confidence in the future. Weather irregularities are considered responsible for a certain lack of uniformity which has been visible in the general trade survey. In wholesale circles the trend is still in the direction of progress.

With a drop in the temperature during the last few days there has been an increased demand for heaters and furnaces and retailers are making the most of the cooler weather to the extent of taking increased advertising space.

The seasonal reaction in the finished steel market does not indicate that consumption has decreased. Rather it is construed as representing the natural reaction due to buyers having been particularly free in their purchases all this year, presumably under the stimulus of the coal strike in primary centres, and the expected transportation disability. During recent months it was considered somewhat unlikely that steel was being consumed at the full rate in which it was being bought and delivered, and the present market is, therefore, naturally attributed to the existence of stocks and not to consumption having decreased.

The question of establishing fixed resale prices promises to come in for considerable discussion in connection with certain governmental action being taken in the province of Ontario. This question is one which extends beyond the province of Ontario; it is a national one. Fixed prices form an important phase of the general discussion which is going on concerning merchandising methods and the expressed desire to eliminate all waste so as to reduce the spread in price between manufacturer and consumer.

Pittsburg

PITTSBURG, November 16.—Production of steel ingots by the 30 companies which make monthly returns to the American Iron and Steel Institute was 2,871,415 gross tons in October, against 2,373,779 tons in September, showing an increase of 21 per cent., the months having the same number of working days.

Allowing for the producers not making monthly returns, October production by the whole industry was at the rate of 40,000,000 tons of ingots a year, or about 76 per cent. of estimated capacity, which is a trifle above the estimates made during the month. However, October, on account of weather conditions, is usually a month of production above the average, while the midwinter and midsummer months run below, hence the probability is that hardly as much as 76 per cent. of the productive units were actually engaged.

There has been not merely a recovery from the curtailment in production produced by the coal strike but a further gain, since the October production was at the highest rate since October, 1920. June, the best previous month this year, was beaten by 9 per cent. Should production continue during November and December at the October rate, which is somewhat improbable, the year's ingot production would be close to 34,000,000 tons. This would be 75 per cent. above the output in 1921 and more than 10 per cent. above the output in either 1912 or 1913, by far the two biggest tonnage years before the war.

HARDWAREMEN DISCUSS TROUBLES

(Continued from page 38)

while I have not been present personaly I know our paper has been represented at all the meetings by Mr. Southall or Mr. Dover. I did not expect to be called upon to say anything this evening, but now that you have extended the invitation I will say a few things which occur to me as a result of the discussions which have taken place at this meeting.

Shou'd Have Publicity

"In the first place, the question of giving publicity to meetings of this kind was discussed. I believe in giving publicity to matters pertaining to the relations of retailers, wholesalers and manufacturers, provided the aim behind that publicity is to correct unfair conditions, and provided all parties are dealt with in a fair manner. Our policy is to be absolutely fair and I am glad that you feel that we have been fair in reporting the activities of your organization. I might point out in connection with the discussion of the number of hardware stores in Toronto that if you will make a survey of the new stores you will find that a great many of them are being conducted by men who were clerks in other stores a few years ago. Many of the hardware men of the future are now clerks in hardware stores. It is of importance to the hardware trade as a whole that these men should be fully acquainted with the problems of the hardware trade. They should be made as familiar as possible with standards of practice that are going to elevate the trade, and create better conditions for the merchandising of hardware. It is only through giving publicity through trade publications that these men can become fully acquainted with trade problems and remedies for trade evils.

Drug Stores Cutting Into Hardware Trade

"Reference has been made on several occasions this evening to the way in which the drug stores are cutting into the hardware business. I want to say right here that you have not yet felt the inroads of drug stores as they have been felt in some parts of the United States. I spent two weeks of last month in the United States, one week of which I spent at the convention of the National Hardware Association of the United States, and the other week in visiting various places, and studying developments in the hardware trade, particularly in connection with the chain store systems and the drug trade. You have referred to the way in which drug stores are selling razors, strops, scissors, various cutlery lines, alarm clocks and other lines. Some of the best window displays of pliers, scrub and paint brushes, screw drivers, rules, hammers, during recent weeks have been in drug store windows in the United States. Some of the finest displays of household hardware have been in the five and ten cent stores of the United States. If you will analyze the situation you will find that these and other stores are taking on a great many lines which in the years gone by have been considered solely as hardware lines. They are taking on these lines because they can be turned over quickly, provided they are properly displayed, and because they offer quick turnovers. What are the hardwaremen doing to offset this competition? What are you doing to offset this competition? One of your members has told tonight how he is selling certain articles by the gross where he formerly sold them by the dozen. He is getting out and hustling for this small profitable business. He has the right idea. He is following along the lines of Woolworth's. Too many hardwaremen are overlooking these small profitable lines, which in many cases will almost sell themselves if properly displayed, and are tying up a great portion of their capital in slow moving costly lines which only give a very narrow margin of profit and a small number of turnovers.

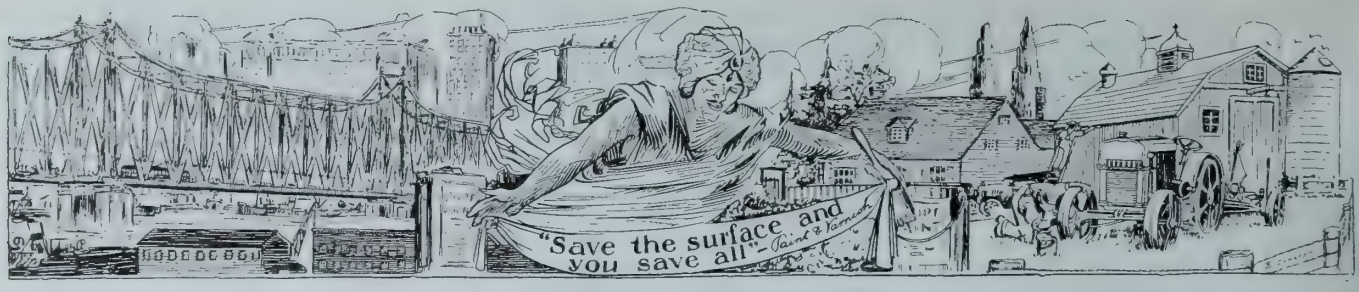
Can't Stop Stores Opening

"A great deal has been said regarding the number of hardware stores in Toronto. You cannot prevent men from starting in the hardware business. I am going to be frank with you and I think you will agree with me, when I say that there are too many inefficient hardware merchants in Toronto, rather than too many hardware stores. We have some so-called hardware stores that are not a credit either to the city or the hardware trade. Some of these men are doing the most kicking about conditions in the hardware trade at the present time. There are too many men in the retail business who are not willing to pay the price necessary for success. They buy goods and then hide them away where you would require a searchlight to find them. On the other hand there are many hardware merchants who are making a splendid success of their business. They are using modern methods for displaying and selling their merchandise. They study the requirements of their community, and are looking for new ideas which will assist them in keeping abreast of the times and meeting the competition of drug stores, variety stores and other forms of competition.

"It is quite true that there are many evils in the trade, some of which are gradually being eliminated, and others which will no doubt be remedied in the near future. It is well to remember, however, that a great many merchants will find gerater evils within their own building and business than they will possibly find outside. Too many dissatisfied merchants are merely taking the business which comes to them. The public would never think of going to drug stores for alarm clocks, unless the druggist had displayed alarm clocks, and let the public know where they could be secured. If druggists had waited until the public went into their stores asking for alarm clocks they probably never would have stocked them. There are too many dead dollars in some hardware stores. It is quite true that on certain staple lines you will have only a certain amount of business and that at very little profit. I refer now to nails, certain kinds of paper and other heavy lines which are staple, for which there is a certain amount of business, but which are not the big profit makers. This is business which you will handle in the regular way, but most of the dead dollars are found among the lines which should be rapid sellers, but which unfortunately are too frequently hidden away in boxes, drawers, etc., instead of being displayed as in the five and ten cent stores, drug stores, etc."

No Wonder Some Don't Make Money

"A few weeks ago I required a new lawn rake to rake up the leaves on my front lawn. The first two hardware stores visited did not have a lawn rake in stock and in the third store I secured the only lawn rake which he had and it had to be dug out of a back room. Is it any wonder that some men do not make money in business?



"I will give you another illustration. Last summer I required a pair of hammock chains. I went to the hardware store nearest to my home and found that he did not have a pair in stock nor did he offer to get a pair. I went to another hardware store two blocks away with the same result. I decided to see the thing through to a finish so I went back home, got my car and visited ten hardware stores without success. I finally got a pair at a department store. Not one of the ten stores suggested that they could get a pair for me, nor did they try to sell anything else. Some of these men are kicking about conditions in Toronto. Some of them are kicking because they are not getting enough business. I venture the opinion that in some cases they send more customers out without goods, than they do with goods."

(A voice) "I bought a box of hammock chains last Spring and I still have them in stock. What do you say about that?"

Why He Has Them in Stock

"I will tell you why you have them in stock and I will illustrate it with a little story. A hardware merchant a few months ago purchased a dozen mops with cloths attached to them for mopping up floors. They have a fine dry basement in this merchant's store and the dozen mops were put down there. About a month later the traveller came around again to sell the merchant some more mops, and he was pretty nearly thrown out of the store because the dozen previously purchased had not been sold. A day or two later the meter reader from the gas company came in-

Buys Not Paint But Service it Offers

Paint Sale is Only Begun When Can Has Been Handed Over the Counter and Money is in the Cash Register—Doesn't Take Half an Hour to Sell a Can of Paint—Can Give Information for Use of Paint on the Telephone

Address by A. PINARD, Lowe Bros. Co., before Greater Winnipeg Save the Surface Association

EDITOR'S NOTE:—Some very helpful points were brought out at a meeting of the Greater Winnipeg Save the Surface Association, when Messrs. F. J. Penberthy and A. Pinard of Lowe Bros. Co., Toronto, spoke. Mr. Pinard showed a number of slides illustrating the first part of his lecture with the advertisements used by the Save the Surface campaign committee. He then outlined a number of suggestions designed to assist the retail hardware merchant in his efforts to stimulate paint trade at this time of the year. Following is the part of his address referred to:

I POINTED out in the first place that the Save the Surface campaign was not to sell, that its function was to educate the public to paint for protection rather than for beautification and it is a campaign that we might say is designed and executed to stabilize the paint industry, to prevent the fluctuation we have been accustomed to having in our paint business in the last five or six years, that is, one year a whale of a business when things are flourishing and the next year a great fall in business, and the reason for that was that people grew to think of paint as something to beautify and in days when they were not flourishing and had not a great deal of money they were not able to paint, and now the Save the Surface campaign comes along and says—Beautification is a secondary consideration, the main feature is protectiveness, if you save the surface you save all. It points out that it is a question of insurance and as a matter of fact, actual statistics tell us that the property depreciation from the lack of paint and varnish is far greater than that of the total fire loss of the Dominion of Canada in a year. Imagine that, with all the fires we have and all the destruction that takes place by fire, it does not amount to the loss and depreciation that occurs from lack of painting.

Not Selling Paint

"This advertisement is not selling paint and varnish, etc." Now gentlemen, that seems quite obvious; if the Save the Surface campaign was planned for immediate results it would mean that individually you would use the Save the Surface campaign as you saw fit, that is, if it were used with say a small community around, to be used on chance and when you thought you had to advertise protection you would use a Save the Surface advertisement and presuming it was effective and you used it in the spring, it would have brought a certain volume of sales to your store; when this would have come in and you had collected your money from it your campaign would have ceased and that is all you would have had. "If planned for immediate results only—but in building up we are building for the future."

Same as Mail Order House

It is true the Save the Surface campaign does not sell, it was not designed to sell paint, for that matter, little advertising is designed to sell paint, but whether advertising is efficacious or not I have only got to refer you to the mail order house, who has never yet employed a personal salesman but who does a volume of business that amounts to millions, in some cases 125 million dollars a year, purely on the printed word. Now, gentlemen, if anybody thinks that advertising is something—well yes, it may be all right—just think of that, and the same principle, perhaps the detail of planning, perhaps designing, perhaps the execution of the advertisement may differ,—most of them, but in principle it is exactly the same as the mail order house who buy a catalogue,—and in many cases it is not a question of price. I have seen, and perhaps you know a mail order house goes into towns where the community can purchase their commodities just as cheaply and sometimes more cheaply than that of the mail order house, and yet they buy from it, and the principle that works for the mail order house in advertising works for the retail hardware man also.

Buys Service

Now the point is this—nobody buys—and I think you gentlemen are salesmen enough to appreciate this—nobody buys any article for the sake of buying it, or to every one who does, a million do not. We only buy a commodity when we see in that commodity a service that it will effect, or will affect our welfare in some form or other. I made the statement, gentlemen, some time ago—I said, when a man or woman comes into your store and asks for a can of paint, they didn't really want a can of paint; paint was no objective to them, it is the thing that is going to be done, so the man or woman asks for a can of paint; before she bought the can of say, floor paint, she either saw an advertisement or a colour card or saw a neighbour's floor—which is also another form of advertising for your treatment of beautiful finish, a varnished floor, and she went back to her kitchen and found the kitchen floor splintered and ugly and it has occurred to her she has got to get down and scrub that floor and it occurred to her if I get a nice floor paint I can use a mop. All these things had to happen and had to happen in that consumer's mind before she went into your store; then she walks into your store and asks for a can of paint, floor paint; most salesmen would hand her a can of floor paint and collect 60 cents or whatever the price, put it in the till and that is all that would happen. Now gentlemen, there is a motive in everybody buying something, I don't care if you buy a suit of clothes or a can of paint; a definite process takes place in your mind and that is an intangible thing; you cannot feel it and you can-

not turn that over for money any more than you can estimate in concrete terms the Save the Surface campaign; you cannot do it. A very noted pyschologist some time ago made this remark: he said—the trouble with the world to-day with all our speed and rush and so on was simply this—that we were no better than we were a century ago or three centuries ago, with all our improved methods, and he thought that the reason for that was simply this—that the tendency to-day was to externalize things and not to internalize them; now these may not have much significance but they were associated with that little instance I gave you; you will see that no action of ours can be performed without some thought; your mind is the first and ruling factor of your actions.

Reflects the Manager

The retail store is the reflection of the man behind it,—the manager, and the volume of sales, the success or the failure is the reflector of the individuals connected with that store; just as it takes mind and thought to work out the details and further all business, so it takes mind and thought to perform

NO, IT IS NOT UNLAWFUL

For Hardware Merchants Who Sell Paint and Varnish to use Some of it on the Outside of Their Own Stores

any other activity of our life; it is a fact, a principle, a law that you cannot get over. That woman bought the can of floor paint only because she saw it as such, but before she did it she bought it as a can of cheer, a can of comfort, a can that lessened her drudgery, a can of ease, and if you can appreciate that, and if you can appreciate the fundamental motive that takes anybody to your store to purchase any article, then your chances of being a first rate salesman are greatly increased.

Just with the Save the Surface campaign, it doesn't sell a can of paint for you;—there have been exceptions—once a gentleman, because he saw this ad. realized—he is the manager of a very large factory in Toronto, and he had just constructed a warehouse made out of galvanized iron at a cost of something like $17,000; I believe, and about a year after, at the time when property soared up to such an extent, he had this building appraised and they valued that building at over $34,000.00, more than one hundred per cent. over what he had paid for it, and when he read the Save the Surface ad, the first thing he thought of was that building, not the $17,000 building he had bought a year previous, but the $34,000 or $35,000 building he owned now, and he said, "Now here, at the cost of a few hundred dollars I can preserve that building," and the Save the Surface ad actually sold him that proposition.

Incorporations at Victoria, include the name of the Sampson Hardware Co., Ltd., of Nanaimo, whose capitalization is given as $25,0000.

A True Story of Two Houses That Needed Paint

The author lives on Staten Island, New York. Her letter with thousands of others like it is in the files of the Save the Surface Campaign Committee

Our Experience

CREDIT	DEBIT
1—Respect of the neighborhood.	1—$550—cost of painting.
2—Shingles saved.	
3—No water spots on ceilings.	
4—Saved drain pipes.	
5—Dining room paper saved, as a result.	
6—Whole house in good condition.	
7—Offered $2,000 more than our neighbor.	

Balance $1,450 GAIN plus what one would consider the other things were worth.

THE year before the World War we decided to paint our house and put up new drain pipes, both improvements being badly needed.

"Our house and that of our neighbor are two of a row of houses built about the same time by the same contractor.

"We let our contract for $550. Our neighbor thought we were very foolish when we paid extra to have the shingles on the roof painted. And when we poured the remaining paint in a wooden trough we had constructed, and rolled the drain pipes over and over in it until they were painted inside and out, he decided we were crazy indeed.

"The house looked fine when we were finished, and our neighbor decided he ought to paint, too. He put up new drain pipes saying he would let them stand until he painted, and then paint them.

"He put it off that year. The next year the war came on and he decided to wait till prices dropped. Last summer the roof of his house started to leak, and now four of his upstairs ceilings are ruined.

"There is a turn of two joints, over a cornice, in the drain pipe, and his drain pipes have rusted through at the joint of the pipe, and every time it rains the water comes through the pipe and seeps through the cornice and runs down the wall paper in the dining room. You can imagine how the paper looks.

"About six months ago they decided they did not like the house any more and offered it for sale, but I guess every one feels the same way they do. They have had only one offer and that was for a thousand dollars less than they are asking.

"We have been offered a thousand more than they are asking, but we refused to sell, as our house looks nice and there is not a leak anywhere. It is in good condition.

"If we both kept books, our ledgers might look something like those shown herewith.

Our Neighbor's Experience

CREDIT	DEBIT
1—Saved the $550 that we spent for painting.	1—Neighbors call him careless.
	2—Must repair ceilings.
	3—Must shingle.
	4—Must re-paper dining room.
	5—Must repaint whole house.
	6—Must put in new drain pipes.
	7—Offered $2,000 less than we were.

Balance $1,450 LOSS plus what one would think the other things were worth.

New President of Sherwin-Williams Co. in U. S.

W. H. Cottingham Becomes Chairman of Board of Directors, Succeeded in Presidency of U. S. Interests by George A. Martin

WALTER H. Cottingham has retired as president of the Sherwin-Williams Co. interests in the U. S. and is succeeded by Geo. A. Martin, former vice-president and general manager at Cleveland. Mr. Cottingham, for the past three years, has been living in England and has devoted much of his services to the English end of the business. It is for this reason that he asked to be relieved of his active duties as president of the American interests. He still retains his holdings in the company and becomes chairman of the board of directors.

Mr. Martin's connections with the company cover a period of over 30 years, in which time, through faithful service, he has worked his way from the bottom. His progress has been continuous, he having occupied nearly every position from office boy to his present position of chief executive. It is felt by other officials of the company that the presidency will be ably filled by Mr. Martin, and that continued progress will be made through the leadership of a very capable and thoroughly experienced head.

Another change in the executive announced at the annual meeting was that L. H. Schroeder, former assistant treasurer, becomes treasurer of the company. The company passed through a successful year financially, declaring 8 per cent. on their dividends.

WALTER H. COTTINGHAM
who has retired as president of the Sherwin-Williams Co. interests in the U. S. and becomes Chairman of Board of Directors.

"INDIVIDUALISM AS A FACTOR IN AFFAIRS"

(Continued from page 32)

asked long ago "Do men gather grapes of thorns, or figs of thistles?"—acres of thorns or fields of thistles, because they are numerous, give no greater promise of grapes or figs.

There have developed bodies of determined men, in classes, in groups, in associations, in brotherhoods, in Unions, who claim they are righting injustices and relieving society of tyranny. They are found in politics, in industry, in agriculture, in education, and in the Church. They are mostly sincere, and frequently uninformed or misinformed. The onlooker, seeing some of them in action, may be forgiven if he indicates they seem to be chiefly concerned in what they can capture for their theory, for their class, their group, or their organization, whether what they desire to secure presses upon others or not. It would appear they are too commonly possessed of the selfish purposes of the individualist without his creative force or courage. He seeks to create through his own effort, and if he will he can share with others. They depend upon organizations and collective power to force their plans, if they are not willingly accepted. They develop and exploit class consciousness, and determine to have their way if the forces at their command can compel its acceptance. One is inclined to ask—are we setting up another form of tyranny, without the compensating gain of individual responsibility and individual initiative and effort? The community needs both forces—individual initiative present in organized groups which are exponents of opposing views but neither should seek the exclusion of the other.

We are slow to see it, but our problem is not, how shall we obtain our share, but how shall we make something worth sharing; not one solved through capture, but through creation. It was perhaps natural in the reaction from the strain of the war to believe in the possibility of economic restoration along the path of less work and more enjoyment. We have entertained delusive hopes of a high standard of living to be attained with less effort and shorter hours of labor. It will not do. We must travel along the old highway of hard work with ungrudging service, while practising sound economy. This is an asset, not a penalty.

Many still believe that hard work for full hours is a penalty. Listen to Barrie's experience as recited to the young men at St. Andrew's:

> "So you will have to work harder. The Almighty doubtless could have provided us with better fun than hard work, but I don't know what it is. To be born poor is probably the next best thing. The greatest glory that has even come to me was to be swallowed up in London, not knowing a soul, with no means of subsistence, and the fun of working till the stars went out. To have known any one would have spoilt it. I did not even quite know the language. I rang for my boots, and they thought I said a glass of water, so I drank the water and worked on. There was no food in the cupboard, so I did not need to waste time in eating. The pangs and agonies when no proof came. How courteously tolerant was I of the postman without a proof for me. The magic days when my article appeared in an evening paper. The promptitude with which I counted the lines to see how much I should get for it."

Here Barrie catches the spirit. Life is a great adventure in which a man of red blood plays his part with joy in struggle.

Years ago, at the plant of of the William Davies Company the level of the city drains permitted a minimum of fall to the Don River. In consequence, during high water, the street drains blocked, and had to be opened. It was a particularly bad place for the workmen, as the ground had all been filled in, and mostly with cinders, hence there was no bond. On one of these occasions, the Superintendent of the work came into my office, mud from head to foot, and declared with enthusiasm "We have beaten every previous record in the time spent in opening and clearing the drain." Even in this class of work there is joy in struggle and achievement.

Suspicion, envy, hatred, with consequent unrest, have been unloosed in the world to an unparalleled degree. There is no world deliverance from this and the economic burdens of the war except through individual courage, with patience, individual acceptance of the spirit of obedience, with the individual hard work and determined saving, and with it all cheerfulness. If we have concurrent, purposeful, national and international action, planning for sound economies by Government, re-established exchanges and better understanding between nations, there will follow the gradual emergence from the present state of confusion and distress in Europe. Probably greater progress than known has already set in.

Few Serious Losses

Canada has had few serious losses to bear. We can accept our moderate discomforts with dignity and restraint. We can secure no early relief from heavy taxation. There can be no freedom for years from the drain upon our cash resources through overbuilt railways, now the property of the State, but we have no cause for fear, if we play the game with high courage—and do not leave our cheerfulness—whatever happens, we must not lose courage, or abandon a sense of individual responsibility. Taxation is troublesome. It arouses a sense of injury, with anger. This may be useful if it curbs new and extravagant national and municipal expenditures. But otherwise surely it is a mistake, unless

Weekly Paint Markets

Montreal

MONTREAL, November 16.— A further increase in turpentine quotations is the chief price development on the local paint markets this week. Although this product has now touched a new high point, there is still a firm undertone locally. Quotations on linseed oil remain unchanged and there is a slight improvement noted in the question of flax-seed transportation from the head of the lakes. Whether or not this betterment will continue is problematic, the opinion being expressed that with the close of navigation and dependence on the rail route there will still be a difficulty in securing supplies. Much depends on this condition and for this reason the future price trend is considered as uncertain.

Although the strong undertone in white lead in oil has been very marked in recent weeks, the decision is reached to make no change in quotations at the present time and to extend the booking date to April first next year. Conditions in the market, however, are such that a revision may even yet be announced at a little later date, much depending on the trend of pig lead on primary markets in the following weeks. Shellac prices are unchanged with a somewhat firmer market tone reported from primary centres.

SOME IMPROVEMENT IN FLAX-SEED TRANSPORTATION

Montreal.

During the past week there has been a slight improvement in seed transportation, a factor which has been important on the local linseed oil market for some weeks past. This betterment, however, is only slight and to some there is still difficulty in getting supplies through from the North-west. It must be considered that navigation is now closed and crushers will have to depend entirely on rail shipments. With a shortage being felt for weeks past it is hardly thought reasonable that arrivals will increase to the extent that a normal condition will again exist for the earlier winter months at least. Crushers also are behind in their oil deliveries and there is keen interest in the market for all available flax-seed. It is recognized that the demand will not be as great during the next month or so, but with the above condition there would seem to be little relief insofar as the producer is concerned. Quotations locally remain unchanged in one and two barrel lots while the quotations on larger quantities are reduced through an increase made in the differential. Although no definite reason is given for this change, it is believed that it is for the purpose of attracting larger buyers, and meeting outside competition. Present prices are as follows:

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.....	1 08	1 10
5 to 9 bbl. lots, per gal.	1 03	1 05

Less quantities, add ten cents per gallon.

TURPENTINE PRICES ARE AGAIN INCREASED

Montreal.

While former quotations on turpentine were recognized as being on a high level, apparently the peak is not yet reached as local distributors announce a further advance of five cents per gallon, due to the strong tendency still apparent in Southern primary markets. Reports from these centres indicate that during the past week the market recorded a slightly easier tone during the first few days but it fully recovered towards the latter end of the week, and is again placed in a very strong position. Business, while described as a little spotty, is generally active notwithstanding the new high levels reached almost each week. Offerings are still light and this is reflected locally where stocks are only moderate. Opinions are again expressed by local importers that little recession is probable during the balance of the year. Fluctuations may occur, but the undertone will maintain a strong market for some weeks to come. Following are revised quotations:

TURPENTINE—

1 barrel lots	2 15	2 20
2 to 4 barrel lots, per gal.....	2 13	2 18
Broken lots	2 25	2 30

WHITE LEAD BOOKING DATE EXTENDED TO APRIL 1ST

Montreal.

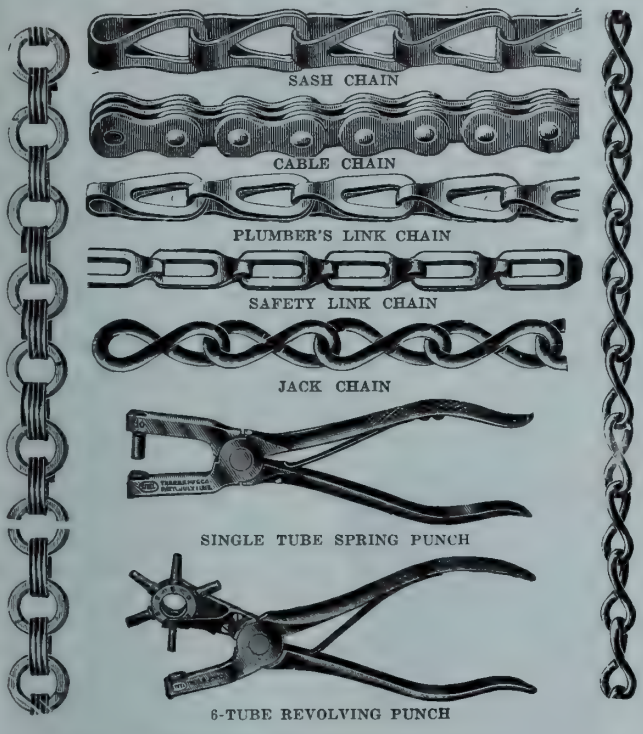
Although there is still a very firm undertone in the market for white lead in oil, it was decided this week to make no changes in prices, but to extend the booking date to April 1, 1923. The continued strength of pig lead on primary metal markets and the present price of linseed oil has maintained a strong tone in the finished product and there was a feeling that prices might be advanced at an early date. It is stated that there is little or no indication of any weakness in the market at the present time, and conditions are such that some revision may be necessary in the course of the next few weeks if raw materials continue on their upward climb.

Toronto

TORONTO, November 16.—Reductions in prices on turpentine, linseed oil and imported window glass feature the local paint markets this week. New discounts appear on Belgian glass which development brings prices on the imported grades nearer to a uniform basis with quotations on the domestic product. Turpentine price levels recede five cents per gallon, owing to the easier tendency now apparent in Southern primary markets. This trend is described as a natural reaction consequent upon buying inactivity resulting from the recent rapid upward movement. Distributors generally are not looking for any marked weakness, however, as the foundation of turpentine rests upon conditions of supply and demand extended over the ensuing winter period until the 1923 crop makes its appearance. Linseed oil prices drop two cents, current trading being on a quiet scale, with flax-seed supply conditions now showing some improvement. The extension of the booking date on white lead in oil to April 1, 1923, without any change in prevailing quotations, is another premier factor in paint circles.

Business in the paint industry continues fairly good, and there is but little change from week to week. There is the usual variation in conditions due to the change in seasons, and naturally consumption during the next few months is not going to be so heavy as during early fall; however, demand is generally reported to have been better than normal for the season, and it continues so.

REACTION APPEARS IN TURPENTINE MARKETS



Toronto.

Turpentine quotations have been reduced five cents per gallon, this development reflecting the easier tendency that has been apparent in Southern primary centres. This change brings the local prices to $2.30 per gallon in one-barrel lots, and also reduces the spread in figures quoted by local distributors. Stocks are still described as moderate, while current trading continues quiet.

Recent reports from Savannah indicate that there has been a weaker tone to the market, chiefly on account of inactivity of buyers. Offerings, consequently, accumulated to some extent and quotations slightly receded. Price concessions, however, are more or less

TORONTO MARKETS

(Continued from page 56)

expected under the conditions which contributed towards the recent rapid rise in prices. Distributors point out that while fluctuations may be evident from time to time, a general recovery is looked for owing to the firm basis of the market in respect to supply conditions in comparison with requirements extending over the ensuing months.

Following are revised local quotations:

TURPENTINE—

1 barrel lots	2 25	2 30
2 to 4 barrel lots	2 24	2 29
5 gallon lots	2 35	2 40

Less barrels, add 15 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

LINSEED OIL PRICES ON EASIER TREND

Toronto.

Linseed oil prices have receded two cents per gallon, this change also reducing the range which has been noted on the local market in levels quoted by distributing sources. The current call for linseed oil is described as just moderate, as it is now recognized that the prevailing demand will not be so extensive during the ensuing weeks. The condition in the flax-seed markets, however, have tended to maintain an appearance of firmness. With the arrival of seed in larger quantities there is a feeling that some corresponding price adjustments may be recorded in the near future. Some of the larger consumers are reported to be well covered at present, while others continue to purchase in small quantities. The revised local prices follow:

LINSEED OIL—

	Per gallon Raw		Per Gallon Boiled	
1 to 2 barrels	1 10	1 15	1 13	1 18
3 to 4 barrels	1 09	1 14	1 12	1 17
6 to 9 barrels	1 07	1 12	1 10	1 15

Less barrels, 15 cents per gallon.

EXTEND BOOKING DATE ON WHITE LEAD IN OIL

Toronto.

The decision to extend the booking date on white lead in oil to April 1, 1923, with no change from the present price levels, constitutes one of the premier paint market developments this week. Owing to the recent climb of pig lead prices and the strength thereby reflected in the finished product, it was generally felt that some advance in quotations on white lead in oil would not be surprising. However, quotations rule unchanged at present, although it is admitted that should raw materials, such as lead and oil, continue their upward price movement, a corresponding revision in white lead may develop.

WHITE LEAD IN OIL—

In five gallon lots $12.70 per cwt.
In one ton lots, $13.45 per cwt.
In less quantities, $13.80 per cwt.

"INDIVIDUALISM AS A FACTOR IN AFFAIRS"

(Continued from page 54)

the burden of taxation is unfairly distributed. We fought a good fight. A great increase of national indebtedness followed, which must be met by taxation. There is a manlier way than scolding about the cost to us individually. We can still remember that the flower of our young manhood gave their services, and many of them their lives in the great struggle. If we have to go without some comforts because our share of the burden means the payment of heavy taxes, should we complain?

Slippy McGee said "Parson, think of me leading the brigade down here, keeping up the work, fighting things that hurt, and finding out things that help. Lord, what a chance! A hundred millions to work for, a hundred millions of one's own people, and a trail to blaze for the unborn millions to come. Lord God, that is a man size job!"

There is an honourable place for each man in Canada to do his job as well as he can each day, and that is the way the world's work, which matters, is done.

PREPARING FOR BIG MAIL ORDER

(Continued from page 28)

to be the fact that for some years express companies have offered a C.O.D. service on parcels without such limitations of weight and carrying the right to the recipient to examine contents before paying.

Much Early Enthusiasm

When the C.O.D. regulations were first introduced many firms enquired very enthusiastically about its possibilities and stated that they expected to make much use of it. In some cases hundreds of tags were requested and all preparations made by these firms to do big business. Post Office officials are much disappointed that this burst of enthusiasm has not been maintained, and some veiled suggestion is made that the regulations may be changed somewhat to be more in line with the requirements of trade.

A very busy Christmas trade is expected in the Parcel Post division this year and plans are now being made to handle the biggest volume which has ever gone through. This is based on investigation work conducted by the postal authorities, and serves as an indication to retailers that an active Christmas business can be expected generally.

Questioned regarding the sending of "freak" parcels through the Parcel Post in view of the recent exposures showing that bricks, kegs of nails, etc., had been sent through this service in the United States, postal authorities stated that little of this was done in Canada largely due to the limitation to 11 lb. parcels for domestic business and the 4 lb. 6 oz. limit on parcels to and from the United States. It was pointed out that as high as 50 lb. parcels are allowed in the United States, in certain zones, and this allows a much more varied class of merchandise to be carried in this service.

HARDWAREMEN DISCUSS TROUBLES

(Continued from page 51)

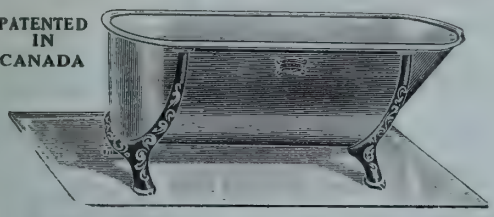
to the store, went downstairs to read the meter. In a few minutes he came back upstairs and brought up one of the mops. He said to this hardware man, 'Say, boss, how much is this? It's just the thing I have been looking for.' The hardware man said the price was $1.00 and the meter reader took it along. Suddenly a bright light began to dawn and it occurred to this merchant that perhaps if he displayed these mops he would sell them. He therefore had the bundle brought up out of the cellar, displayed them in the window, and in the store, and in a comparatively short time had sold them all and placed a repeat order.

"Now I am going to ask you a question. What did you do with those hammock chains when you bought them?" "I put them on the shelf in the box." "All right, if that's the case I know and you know darn well why you didn't sell them." "I know it is not a very nice thing to have to criticize ourselves, but we might as well look conditions right in the face, and when we are wrong, swallow the pill even though it is a bitter one. There is too great a tendency to hide goods away on the shelves or under the counter."

President Joy—"I might state that I had an experience with hammock chains. I bought some last spring and sold out my whole stock of them, and what is more, I could not get any more of them from the wholesale house. If I had known that this other member had a stock which he could not sell I would gladly have taken them, because I could have disposed of them."

Explains Chain Store Development

Asked regarding chain store systems, and the Winchester chain store system in particular, Mr. Davis gave an outline of what had taken place in the United States, and also the comments of associations, officials, and members at the recent convention in the United States



A lengthy discussion followed in which a great many phases of hardware merchandising were discussed including chain stores, theft of goods in the store, value of displays, and the possibility of conducting successful chain store systems in the hardware trade.

The next meeting of the Club will take the form of a dinner on December 12th. Announcement of the program will be made in the near future.

After visiting the big trading centers of Eastern Canada and the United States, Geo. Crump, buyer of hardware, ranges and toys for the Hudson's Bay Company, Vancouver, returned this week.

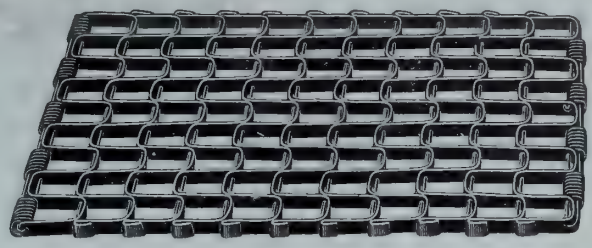
Saves High-priced Coal



Help your customers to keep down the coal bills—urge them to use weatherstrip around the windows and doors. It's the best investment they can make.

"Frost King" is a weatherstrip that is well-known now—and it is known as efficient and reliable. Placed around windows and doors it will keep out the cold drafts and conserve the warmth in house. Made of felt—it is quick-selling, efficient and durable.

Order from your jobber

Frost King Weatherstrip Co.

Montreal -:- Que.

KEYSTONE

Flexible Steel Mats & Matting

Keystone Mats are clean. They can be lifted and the mud and snow wiped away. They will not fill up and hold mud and dirt like the fibre and brush style mats.

Keystone Mats are flexible, reversible and durable. Special size mats of any desired dimensions made on short notice. They come in one hundred foot rolls, all widths, from which are made complete mats, any length.

We stock them in sizes 1 to 8. We will be glad to supply particulars of our Keystone Flexible Steel and Ideal (Rigid) Wire Door Mats.

Port Hope Mat & Mfg. Co.

PORT HOPE, ONTARIO

Model F—A High-grade Ladies' Skate

C.C.M. Figure—For Fancy Skating.

Two of the new models

Check Up Your Stock

Every time you are out of a certain size or a particular model required by a customer, you may lose a sale. Skate customers, as a rule, want their skates right away. They won't wait for you to send to the factory.

To avoid losing sales, why not check up your stock now and see if you are low in some lines? Then order from our representative or by mail. And don't forget the new C.C.M. models (two of them shown above) when you order. They will add to the interest of your skate displays and should prove good sellers. Also bear in mind **C.C.M. Bob Skates** and **C.C.M. Improved Steel Ankle Supports**—two winners!

The Apex

ELECTRIC SUCTION CLEANER

Gets into the Corners and under the Furniture

Only with the Apex can you clean under things as well as around them; the exclusive inclined Apex nozzle gets under radiators and low furniture, around table legs, goes square up to baseboards, edges into corners and gets the dirt wherever it is.

Dealers:—Write for literature, dealer helps and sales plans that will show you how Apex advertising and Apex performance can make money for you.

The Cheapest Service

"Plumbing is the cheapest Service extended to the Public"

This is very contrary to the general disposition of the public toward the plumber's charges but it is a fact and the reason why is outlined in an article in the Nov. 15 issue of Sanitary Engineer by Wm. J. Wooley, who has had years of experience in the plumbing industry. He gives some fine suggestions as to how plumbers can overcome the prejudice which exists.

611,000 Rural Dwellings In Canada Have No Plumbing

Canada's population is 54 per cent. rural. With per capita wealth of $2,500 there is little reason for this vast field of possible business being so neglected as these figures show.

The possibilities of the rural field of business in sanitary and heating equipment are dealt with in the Nov. 15 issue with some definite suggestions for developing this class of trade.

Twelve Phonographs For Every Gas Water Heater In Use

Conditions indicate much more aggressive salesmanship on part of those selling phonographs, automobiles and other more or less luxury lines than is the case with water heaters and such plumbing equipment which is a distinct utility.

Enough Work for Every Journeyman Plumber to Be Constantly Employed for 28½ Years

Installing plumbing in houses now built but unequipped and enough work installing heating equipment to keep **every Heating Engineer busy for 28½ years** installing equipment in houses now built but unequipped. These facts are given a definite application in an article in the Nov. 15 issue of Sanitary Engineer.

Read the headlines over again. Do they interest you? Do they startle you? Do they make you want to read the article and find out what they are pointing to? Act on that impulse! Treat yourself to an early Christmas present by subscribing to receive SANITARY ENGINEER regularly—every two weeks for all next year. It will be a pleasure—and it's a sound business investment for BETTER BUSINESS IN 1923.

Send the Coupon While You Are Thinking of It — NOW

.....*1922*

Please send me Sanitary Engineer. It is understood if I subscribe now I will get the November and December copies as well as all of 1923 for the regular yearly subscription price.

I am enclosing
Bill me for $2.00 to pay for my subscription till December, 1923.

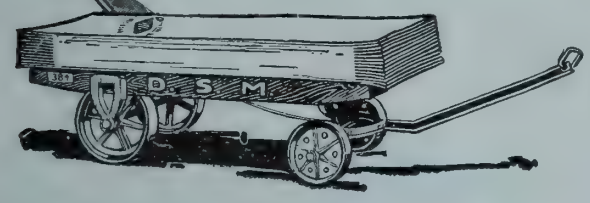
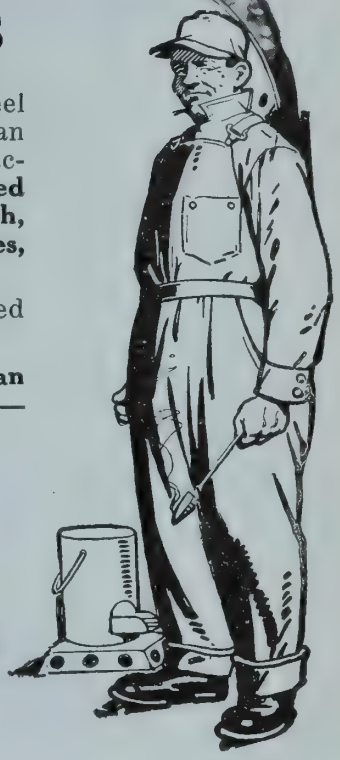
TINKER TOM'S TALKS.

NO. 385



TIGHT COATED SHEETS

Our regular coating on "Premier" Galvanized Steel Sheets is quite heavy, in fact 25% to 30% heavier than considered necessary by most makers. On that account it may be advisable to specify **"Tight Coated Sheets"** for special forming work, such as **Eavestrough, Conductor Pipe, Ridge and Hip Cap, Metal Shingles, etc.**



Such stock has the regular coating specially applied to withstand forming satisfactorily.

When you get a "Premier" Galvanized Sheet **you can absolutely depend on a satisfactory uniform coating**—no rusting through thin spots after short service.

Profit By Created Confidence

CONFIDENCE is the foundation of business. The volume of trade that you may do is determined by the measure of public confidence you enjoy. Given confidence and proper business methods your possible turn-over is limited only by the purchasing power of the consumers you reach.

But confidence is hard to create. It costs money, time and effort and back of these there must be quality products and honest men. It is the most costly part of a business structure and the most easily destroyed. One mistake, one inferior lot of goods, may cost any firm the confidence it has developed in years of constructive selling.

Advertising has been proven to be the most effective and economical means of creating confidence. The public confidence necessary to the success of the largest industries has been gained through advertising. This confidence is an existing sales force that should be used to your advantage.

When you feature goods advertised in The Nor'-West Farmer you add to the confidence you already enjoy, you profit by the confidence your customers have in advertised goods and benefit by the confidence this paper has earned in forty years of service to western farm homes —almost 80,000 now.

Buyers of advertised goods are repeat customers. You hold their confidence by supplying them with goods they know. You can protect and strengthen the structure of confidence you have built by handling advertised lines.

The Nor'-West Farmer

The Pioneer Farm Journal of Western Canada

Winnipeg, Man.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

CAMPBELL'S VICTORY
HAND MADE ALUMINUM FINISHED
TUBE SKATES

Hockey, Racing and Pleasure Models manufactured in Winnipeg to suit the Western trade's requirements.
Liberal profits. Quick sales.
We can supply you with the famous "Richards" hand-made skating boot.
These two lines should be in every hardware store in Western Canada.
If your jobber cannot supply you, write direct to

HARLEY-DAVIDSON CYCLE CO.
498 PORTAGE AVENUE **WINNIPEG**

The Cord With a Heart

This is the cordage—indoors or out—that actual tests have proven the best.
It excels in tensile strength—the heart is covered by braided, multiple plies of cotton under high tension.
It is weather—rot—stretch proof.
It is certainly the best cordage made.

Buy it from your Jobber

Brandram's Genuine B.B. White Lead

pronounced the best by an independent expert

When one of the foremost chemists on the continent states that he has never seen a finer White Lead than Brandram's Genuine B.B., it speaks volumes for the superiority of our Canadian product.

During ten generations, Brandram's Genuine B. B. White Lead has maintained its world-wide reputation as the premier White Lead in oil, excelling as it does in spreading and covering qualities as well as in durability.

GLENN H. PICKARD
CHEMICAL ENGINEER
DESIGN AND OPERATION OF PLANTS FOR THE MANUFACTURE REFINING AND USE OF VEGETABLE OILS
FACTORY ORGANIZATION AND OPERATION PAINT MANUFACTURE
SOUTH CLINTON STREET
CHICAGO

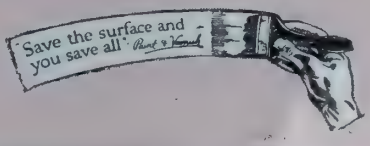
January
Ninth
Nineteen-twenty-two

Brandram-Henderson, Limited,
Montreal, Canada.

Dear Sirs:

Without knowledge at the time of the identity of the samples, I have on two occasions examined samples of BRANDRAM'S GENUINE B. B. WHITE LEAD in comparison with competitive products.

The samples were submitted to both a chemical analysis and to a physical evaluation to completely determine their relative worth.



The chemical analysis showed that BRANDRAM'S GENUINE B. B. WHITE LEAD will fulfill the requirements of any recognized standard specification.

When judged from the standpoint of paste characteristics and color, and from the standpoint of the hiding power, spreading capacity, working quality and smoothness of the paint made from it, I stated, in my report, that the sample of BRANDRAM'S GENUINE B. B. WHITE LEAD was an excellent product and that no finer white lead ever has been examined by me.

Very truly yours,

Glenn H. Pickard

A Real Big Seller—The New

SMP ROASTER

Here is the new roaster we have been working on—the new No. 10—a line simply loaded with fine selling possibilities. Wherever introduced they are selling fast. You can have them in Pearl Ware, Crystal Ware, Lumino Ware, or Polished Steel.

Pearl Ware **Crystal Ware** **Lumino Ware**
(Pure Aluminum)

The size is their great feature. They are 15¾ inches long, 11⅜ inches wide by 6½ inches deep—a most convenient, handy size.

Large enough to hold a pair of chickens or a turkey; small enough to fit any oven.

This No. 10 **SMP** Roaster will fit into a two or three burner gas oven, an electric range oven, an oil stove oven, Quebec Heater oven—in fact, in any size oven. And at the same time it is big enough to take a good-sized roast, a pair of fowl, fish or even a fair-sized turkey. It is seamless, of course, has embossed feet, and is self-basting.

A PROFITABLE LINE

There is no competition for this new roaster. It is in a class and a field by itself, a real big seller and a line in which there is steady profit for every up-to-date hardware man. Place your order at once. The demand is heavy.

Three Mighty Fine Points About an "America Hanger"

First—**Built for hard usage**

In the Factory
On the Farm
In the Warehouse
In the Garage — anywhere where unfailing hanger service is demanded.

Second—**Anti-Friction Forged Steel Yokes**

Result — Rollers slide evenly, steadily and noiselessly — all the time.

Third—**Simple Adjustments**

Built down to the utmost simplicity in every part
Adjustments can be made easily and with perfect confidence

Equipment supplied with each pair of hangers includes two end caps, bolts for hangers and lag screws for brackets. The entire outfit is carefully packed for immediate use.

Encourage the confidence of your customers. They are your mainstay. Our "America" Hanger never breaks faith with its users.

WHY THE HAPPY FACES?

"Because with that WESTINGHOUSE Lighting System installed, the boys see more readily, and can work faster. Result—increased pay for them; larger production for us."

"Who made the installation?"

"Girard, the Westinghouse Dealer on Maple Street."

"He must be pretty clever, Sam. The average electrical dealer wouldn't be able to handle a job of this size."

The average Westinghouse dealer can, because of the help he gets from the Westinghouse Illuminating Bureau. Girard had an engineer down here two or three times from the

PEXTO BITS

No. 4 Solid Center Auger Bit

No. 14 Short Car Bit

No. 100 Expansive Bit

No. 24 Long Car Bit

All Pexto Bits are forged from special bit steel, each bit is hardened and the temper drawn individually which gives them a uniform quality. The lips are hardened to just the right degree. They are pitched to bore with or against the grain of wood, and the pitch throws the chips out clear of the hole. The finish is attractive and lasting.

The Samson Solid Center Auger Bits are made in a wide variety of sizes and are packed in canvas rolls, wooden boxes and in sets, as well as by the dozen.

The Samson Expansive Auger Bits are graduated on the shanks to determine the depth of the bore. The Cutters are interchangeable with any properly made Clark Pattern Bit.

The Car Bits are made in two lengths, a large variety of sizes of each length, and are forged throughout from one solid piece of steel.

A New Millers Falls Tool
Hack Saw Frame No. 1100

Millers Falls
All Metal
Hack Saw Frame
No. 1100

Specifications

Capacity 8—12 in.
Depth 3⅛ in.
Stock 3/16 x 13/16 in.
Weight 1 lb. 14. oz.
Packed in a pasteboard box

OUR salesmen are taking orders for this serviceable tool. Here are the talking points they are using:

"Notice the powerful all-metal frame. The back is one solid piece—cannot bend or buckle.

"The entire frame is electro zinc plated to prevent rust. This makes it well adapted for outdoor work.

"The 'Pistol Grip' handle gives a firm, comfortable hold, and prevents hand cramp.

"Hack Saw Frame No. 1100 is a fine, sturdy tool. You can recommend it without reservation. Your customers will come back for more.

"Order half a dozen as a starter."

Are you still "Growing up?"

Says the Wise Old Owl

From nothing at all
grows the business vast;
From the acorn small
is the oak tree cast—
And nothing at all
it matters how fast
They grow if they KEEP
ON GROWING

If you are a merchant, is this Christmas going to help you to **grow** bigger?

If you are a clerk, are you **growing** into a merchant?

Christmas will bring you a lot of transient trade. The **growing** merchant is going to make a lot of it permanent trade. The **growing** clerk is going to bend his every effort to bring that trade back to the store again—"his" store, he calls it.

The New Improved and Brownie Gillettes are your best Christmas opportunities—**best,** because they are natural builders. They bring your customers back to you for blades, shaving brushes, soaps, powders and lotions;

best, because they stand behind your recommendation for all time—age cannot affect the service—

best, because they are backed consistently by sound advertising and good selling plans.

You do not have to say "Call Again" when you sell a Gillette. The razor says it for you. Push the Gillettes this Christmas.

THE RETURN AIR AND WARM AIR CHAMBERS ARE SCIENTIFICALLY PROPORTIONED AND SO CONSTRUCTED THAT THE HIGHEST EFFICIENCY IS OBTAINED IN CIRCULATION, THEREBY OBTAINING ALL AVAILABLE HEAT UNITS FROM THE FUEL CONSUMED.

THE INNER CASING, DIVIDING THE WARM AIR AND RETURN AIR CHAMBERS IS MADE WITH AN OUTER LAYER OF HEAVY GALVANIZED IRON, AN INNER LAYER OF TIN AND AN ASBESTOS INTER-LINING.

DIRECT DRAFT DAMPER HANDLE IS LOCATED IN A HANDY AND CONVENIENT PLACE. THE DAMPER ROD LEADING FROM THIS HANDLE TO THE DAMPER IS OUTSIDE OF THE COMBUSTION CHAMBER AND FLUES. THE DAMPER IS OF FULL SIZE AND EQUIPPED WITH AUTOMATIC GAS EXPLOSION ATTACHMENT, WHICH IS VERY ESSENTIAL WHERE COAL CONTAINING A HIGH PERCENTAGE OF GAS IS USED.

SUITABLE PROVISION HAS BEEN MADE FOR THE INSTALLATION OF A HOT WATER SECTION. THE HOT WATER PIPE MAY BE TAKEN THROUGH THE TOP OF THE RADIATOR OR THROUGH THE UPPER PART OF THE FIRE DOOR FRAME, THE RETURN WATER PIPE THROUGH THE LOWER PART OF THE FIRE DOOR FRAME.

THE TWO DOORS GIVE A VERY LARGE OPENING TO THE FIRE CHAMBER MAKING IT CONVENIENT FOR ADDING LARGE CHUNKS OF COAL OR WOOD AND THE CLEANING OF THE FURNACE. THE TOP DOOR, IF LEFT CLOSED WHEN FIRING THE FURNACE, ACTS AS A SMOKE PLATE AGAINST THE ESCAPE OF SMOKE AND GAS WHEN ADDING FUEL. THE DOORS ARE ALSO PROTECTED FROM THE HEAT BY HEAVY METAL LININGS.

THE HOUSING FOR THE LARGE COMBUSTION CHAMBER IS MADE OF HEAVY STEEL. THE PARTS COMING IN DIRECT CONTACT WITH THE EXTREME HEAT FROM THE PRODUCTS OF COMBUSTION ARE PROTECTED WITH HEAVY CAST SHIELDS AND CAST LININGS. THIS CONSTRUCTION IS DURABLE AND GIVES RAPID RADIATION OF HEAT UNITS.

THIS DUST FLUE ARRESTS THE DUST WHEN GRATES ARE BEING SHAKEN, THUS PREVENTING IT FROM ESCAPING INTO THE BASEMENT.

THE GRATES ARE TAKEN OUT SIMPLY BY REMOVING THIS GRATE PLATE.

LARGE WATER PAN IS CONVENIENTLY LOCATED IN THE OPENING UNDER THE FIRE DOOR IN FRONT OF THE DUST FLUE AT A POINT WHERE THE HEATED CASTINGS EVAPORATE THE WATER RAPIDLY. THE HUMIDITY FROM THIS PAN GIVES MOIST WARM AIR CONDUCIVE TO GOOD HEALTH.

THE GRATE BARS ARE HEAVY, DURABLE AND OPERATE INDEPENDENTLY OF EACH OTHER, OR MAY BE OPERATED IN PAIRS BY THE ADDING OF GRATE BAR COGS. THEY ARE ALSO EASILY REMOVED BY TAKING OFF THE GRATE PLATE.

THE LARGE ASH DOOR IS EQUIPPED WITH A DROP DRAFT DOOR PROVIDED WITH CHAIN AND PULLEYS FOR CONTROLLING THE FIRE FROM THE FLOOR ABOVE. THE ASH DOOR IS ALSO PROVIDED WITH SLIDE DAMPER.

THE HOUSINGS FOR THE AIR CHAMBERS CAN BE ADJUSTED TO ANY BASEMENT HEIGHT.

ABSENCE OF ANGLES AND SHARP TURNS REDUCES FRICTION AND PREVENTS THE POCKETING OF AIR, THEREBY GIVING AN EASY AND FREE CIRCULATION OF AIR INTO AND OUT OF THE FURNACE.

SPECIAL LUGS WITH LONG THREADED SCREWS ARE ATTACHED TO THE INNER AND OUTER CASINGS AND SO ARRANGED THAT THE FURNACE CAN BE ASSEMBLED WITH EASE AND A GOOD TIGHT JOINT OBTAINED.

RADIATOR IS OF THE HORSE SHOE DESIGN AND OF LARGE SIZE. THE INNER PART OF WHICH FORMS THE COMBUSTION CHAMBER. IT IS OF HEAVY WEIGHT AND STRONGLY CONSTRUCTED, ALL RODS AND BOLTS BEING OUTSIDE OF COMBUSTION CHAMBER AND FLUES. THE STEEL HOUSING OF THE RADIATOR IS DRAWN TIGHTLY AGAINST HIGH CAST METAL RIBS, THEREBY MAKING A PERFECTLY GAS TIGHT JOINT.

SHIELD PREVENTING THE DIRECT HEAT OF THE FIRE POT FROM COMING IN CONTACT WITH THE LOWER PART OF THE INNER CASING PREVENTS THE FORMATION OF EDDIES OF HOT AIR AND THUS INCREASES THE FREE AND EASY FLOW OF THE HEATED AIR IN THE WARM AIR CHAMBER

HEAVILY RIBBED TWO PART FIRE POT FITTING TOGETHER WITH DEEP CUP JOINTS MAKES THEM DURABLE AND PREVENTS THE ESCAPE OF DUST OR GAS. GUARANTEED.

THE WARM CHAMBER CASING BEGINS AT THE PROPER HEIGHT FROM THE BASE AND PERMITS THE RETURN AIR AT ONCE TO COME IN CONTACT WITH THE HOT CASTINGS.

VERY LARGE ASH PIT, WHICH MAY BE CLEANED EASILY ON ACCOUNT OF THE SQUARE ENDS.

Spare Three Minutes?

In three minutes you can read every word of descriptive matter printed above.

As a live hardwareman is it not worth your while to spend 3 minutes to get acquainted with the Newest and best Pipeless Furnace on the market?

Read this detailed description then send for our folder and price list. You'll be surprised to learn just how much money you are losing by not selling Beach Pipeless Furnaces.

Special Note to Dealers.

The Maple Leaf line of stoves, ranges, heaters and furnaces covers every possible requirement—and does it well.

Stop Import of Automatic Revolvers

First Intimation of New Regulations in Effect Which Prevent Importation Into Canada of Automatic Revolvers, When Shipments to Wholesale Hardware Firms Are Seized and Held for Re-export—Will Not Affect Revolvers Now in Wholesalers' and Retailers' Hands

WHILE THE question of the relation of the revolver to the spread of crime throughout Canada is a subject which has come in for a good deal of discussion and the effort of numerous public bodies has been directed toward securing regulations to greatly restrict their sale and use, the first definite action of a restrictive nature is that taken this week by the Customs Department in withholding a shipment of revolvers to a Toronto wholesale hardware firm and after examining the contents closely, allowing certain types to be delivered over to the merchant, but holding those of another type for re-export to the manufacturer in the United States.

The custom in practice under the Firearms Regulations, enforced nearly two years ago, was for wholesalers to secure a special permit from Ottawa, covering each importation of firearms. In the case of the above shipment, permit was granted covering the entry of certain revolvers, but denying permit of others and the Customs Department in Toronto will not deliver those for which no permit is issued by Ottawa. On applying to Ottawa for a reason for denying entry of certain of the revolvers in the shipment, this wholesale hardware firm has just received from the office of R. R. Farrow, Commissioner of Customs, Ottawa, Ont., the letter shown on this page.

Discussing the subject with the local Collector of Customs, Hardware and Metal was advised that these regulations will not interfere with the sale of such automatic revolvers and pistols as are now in the hands of wholesalers and retailers in this country. The regular permit regulations will of course apply. Asked as to the reason for such action it was pointed out that it was probably due to the recommendation of the head of the Royal Canadian Mounted Police who thought this would be an effective means of combating the spread of crime by the use of such firearms. No official amendment to the Firearms Regulations has yet been made, in fact, the only advice so far received by the local Collector, is the letter which is reproduced herewith. Shipments have been held up on a number of local wholesale firms and steps are being taken to broadcast information regarding the new regulations to avoid further complications for all concerned.

Discussing the subject with one Toronto wholesale hardware firm it was the opinion that such action would not materially prevent the spread of crime by the use of firearms, because those who use arms for such purposes do not as a rule purchase them in the ordinary way through the hardware store. In many cases the arms are said to be smuggled in on the person from the United States, where both new and second hand ones can be purchased freely in the stores. Under the prevailing regulations in Canada it has been necessary for any purchaser of a revolver to secure a police permit, and it was thought such a regulation would, if properly enforced, safeguard the interests of the community. It was suggested as a possibility that arms purchased in this way had found their way into the hands of those using them for criminal purposes. Under the new regulations it is evident that persons having a legitimate use for a revolver would be at a disadvantage in being unable to buy an automatic type, whereas the criminal would frequently be equipped with such a weapon.

Also confirming the foregoing opinion another Toronto wholesaler pointed out that their revolver business, which runs to considerable proportions, is more than half of the type which is not denied entry and that if the regulations are to be enforced it is said to be likely that many of the enquirers for automatic revolvers will be satisfied to purchase those which the law allows. In this way little if any business will be lost, but it was not thought that there was sufficient difference between the two types of revolvers to justify the thought that restricting one and permitting the other would effectually stop much of the criminal use of revolvers.

LETTER FROM OFFICE OF COMMISSIONER OF CUSTOMS, OTTAWA, TO TORONTO WHOLESALE HARDWARE FIRM

"I have the honor to acknowledge receipt of your letter for permit to import Iver Johnson firearms:
3 revolvers, 32 calibre,
2 revolvers, 38 calibre,
10 guns, 44-26.

"In reply I beg to advise that the Collector at Toronto is being instructed to allow these to be imported. You are reminded of the provision of the Criminal Code to the effect that purchasers of the above shotguns must be in possession of police permits on Form 76, and revolvers must not be sold without such permit.

"I note that the invoice from Iver Johnson classes these revolvers as 'automatics' but we would consider from samples submitted to us that they are 'double action.' For your information I may say that the Department has adopted the policy of refusing permits for importation of all kinds of automatic revolvers and pistols of whatever value except for police or military use. For this reason we are unable to furnish permit for the pistol from Colt Patent Arms Co. You will be allowed to re-export it to the United States."

—Department of Commissioner of Customs.

Reducing the Cost of Distribution

Too Big a Price is Paid for Distribution—Careless Buying Largely Responsible—Large Volume Sales With Small Margin is Way to Successful Merchandising—Stock Limits Used on Seasonable Lines

By ADRIAN D. JOYCE, President The Glidden Co.

EDITOR'S NOTE: — Everyone engaged in the distribution of merchandise to-day knows that one of the biggest problems facing them is that of cutting down distribution costs so that the much talked of spread between manufacturers' cost and price to consumer may be so reduced as to stimulate the movement of merchandise. In the following article by Adrian D. Joyce, president, The Glidden Co., in System, details are given of the steps taken by this paint and varnish manufacturing company to reduce the big price paid for the distribution of their product. The advantage of larger turnover with smaller margin, the part played by careless buyers, use of stock limits, and discussion of other methods for reducing cost of distribution are just as applicable to the retail hardware merchant's case as to this manufacturing plant. The key to many of the retail hardwaremen's problems is contained in this article.

ADRIAN D. JOYCE

President The Glidden Co.

A FRIEND said to me the other day: "What do you consider the most important things you've learned in the last two years about doing business?"

I declined to answer. "It would," I replied, "take too long a time to tell!"

My merchandising experience covers more than 30 years. In all that time I cannot now recall any other period that provided a more rigorous schooling in straight thinking about the fundamentals of business, or that demanded a more determined application of the basic and rather homely qualities that enable people to sell goods and to make a profit on their transactions, as good traders always do.

We have been through some rather hectic experiences. We are forced now to resort to old-fashioned common sense, to dispense with cherished but expensive frills, and to drag out of the attic where they were stored, such old standbys as hard work, thrift, resourcefulness, simple honesty and courage.

Without speaking hastily, I should say that one outstanding fact driven home in these two years seems to be the excessive price we pay to get distribution. It does cost a lot of money to sell. Probing into the problem in our own business, we find that the costs ramify in many directions, and not all of them are necessary. Here is a fairly simple case in point:

A salesman left our Cleveland plant for a trip through a territory nearby. One of the places on his route slip was a town which I will call Galesburg.

Before leaving, the salesman mailed the customary postcard telling our Galesburg dealer when he expected to arrive, and requesting to be warned if the day happened to be inconvenient. He heard nothing to cause him to change his plans, as he could have done easily and without loss of time. But on his arrival he found the merchant out of town for the day.

"I'm very sorry!" the man's partner protested. He did none of the buying himself, but he suggested that the salesman drive to a neighboring town and return the following day. "Bill," he said, "will be back then."

The request was not unreasonable. Of course the salesman politely acquiesced.

That is the point. Salesman do politeley acquiesce. Ordinarily, they are pretty much forced to. Orders mean too much to-day to risk the displeasure of good customers by refusing to heed their simple—though costly—requests. However, there is more to this episode.

Merchant Occupied

Returning to Galesburg the following day, our salesman found the merchant fully occupied. Duties had piled up during his absence. Only a short time could be devoted to the discussion of an order, and finally the merchant said:

"I wish you'd stay till tomorrow. I'll have more time to talk and we can go into everything thoroughly then."

The salesman stayed; there was nothing else to do. He could not put in his time profitably, for it was a one-dealer town. Therefore he idled.

The order was written next day. But there was no profit in it for us. The cost of the salesman's extra time, the extra hotel bills, and the extra travelling expense wiped it out.

That is a little sidelight on a big problem. Nor is it so insignificant. Our study shows that an appreciable share of the blame for the high cost of distribution, when it is excessive, can be laid at the door of careless buyers. I will amplify this point presently. But first let me state our whole problem as we stated it to ourselves.

Prices had turned downward. Buying fell off. Orders were scarce. Competition stiffened. Everybody trimmed prices to encourage purchasing. Margins of profit were narrowed and threatened with extinguishment. A very little carelessness might turn an expected profit into a loss. Of course we had to make sure of our profit. But just how were we to do that?

This was on the whole a curious situation to face after several years of unexampled ease in selling. But we found in due time that what we were up against was nothing more nor less, after all, than the normal problem of getting business under about the usual variety of difficulties.

We speedily resolved the general problem into specific problems, each concrete. There is nothing abstract, for example, about costs. Money leaves the business because something is bought; advertising space, say, or the time of a salesman. The problem there became one of making all of these purchases a little more effectively.

What we really want to do, at all times, is not merely to buy so many columns of space in a magazine, or so many hours of a salesman's time. We want to buy sales, results. And when we began our intensive study, we found the fact to be that we bought a great deal of wasted time along with

the used time of salesmen; we bought excessive shipping charges by failing to ship to the best advantage; we bought, I may as well admit, a great deal of inefficient retail merchandising; we bought the questionable advantage of large inventories of finished goods. We paid money for these things. The cost had to go into our prices, and although we were no worse off than anybody else, to the extent that we were wasteful, we suffered in competition or in profits. Neither way were we satisfied.

A Definite Program

These are all things, therefore, that we have undertaken to correct. We have now resolved our plan to make money under present conditions into a fairly definite program which, stated as a formula, would read something like this:

1. Get a relatively large volume of sales with:
2. Relatively small stocks on hand; these two resulting in:
3. A faster rate of turnover.
4. Take a relatively small percentage of mark-up; but:
5. Control expenses to make every item produce a fair and commensurate return; the whole resulting in:
6. A satisfactory profit on the capital invested.

That, briefly, is our program. In my judgment it sums up pretty completely the way to merchandise successfully to-day. Followed conscientiously, it has resulted in profitable business for us.

We are manufacturers, of course, and we distribute on a very wide scale. However, it is part of our policy to keep in close touch with retail merchants, and to take an active interest as a matter of service to them and of ultimate profit to ourselves, in the retail merchandising of our products. We find that our own program is as sound in principle for the merchant as for the manufacturer.

Take the question of stocks on hand. It might not appear at first glance how a heavy spring frost in Georgia or an unexplained falling-off in the number of potato bugs propagated in a given year, might affect the profits of a concern dealing primarily in paints and varnishes. A connection does exist, however.

Among our products are insecticides, which we sell in large quantities. Formerly we set maximum and minimum stock limits on practically all our products on the basis of the normal yearly demand. However, some products, among them insecticides, are not in demand at all at certain times of the year. To carry a stock of these products during the period of no demand obviously costs money. We now arrange our stock limits on a seasonal rather than a yearly basis.

Under our old plan we would usually begin to manufacture insecticides about the first of August. At that time we could only guess, on the basis of sales in previous years, what the actual demand of the following year would be.

Sometimes a heavy frost would fall late enough to kill a considerable part of the peach crop, and then there would be an abnormally light demand for arsenate of lead to spray the trees. There was no fruit to be saved and no reason for spraying. Similarly, when potato bugs were not so bad as in other years, the demand for Paris Green was far below normal. In those years our manufacturing program, based on the demand of normal years, was figured too high, and we were left with an excess of products which we had to carry over to the next year.

Carry Only One-Quarter Former Stocks

When we began to study our stock limits from the point of view of the seasonal instead of the annual demand, we found a better method of arranging them. Our present plan is to carry only about one-fourth as large stocks as heretofore. We do not carry any stocks during the period of no demand. And instead of beginning to manufacture in August, we start making insecticides in October or November.

Of course that forces us to keep in closer touch with the weather forecasts and advance crop reports. If, as the season advances, conditions appear to warrant it, we are able to put our factories on a 24-hour schedule.

Thus we manufacture practically to order. Our stocks on hand have a near relation to, and are closely regulated by, demand. We have no left-overs at the close of the season. Our investment is minimized. The risk of loss from depreciation and price declines is also lessened. And we are enabled at the start of the next season to take advantage of the new low prices for raw materials which may then prevail.

We apply this plan as far as possible to all classes of products. Where it cannot be applied in its entirety, we keep the investment in stocks as low as possible by careful control. The executive in charge, for example, is expected to keep in close touch with all stocks through daily reports and observation. If he discovers that a certain class of goods is accumulating in the warehouses beyond normal, he sends notice of that fact to the branch managers and sales executives. They put on the needed extra efforts to move these products.

The Steps We Took To Increase Sales Volume

A relatively large volume of sales is another definite present need that we have taken a variety of steps to secure. In conjunction with small average stocks, a large sales volume spells a fast rate of turnover. With the percentage of mark-up reduced to a small figure, as it necessarily is in order to meet and beat competition, the required yearly volume of profit can be maintained only by securing many small profits on fast-turning stocks.

We have at present about 275 salesmen. This is slightly above our average. But our main emphasis has been on improving the quality of the individuals, rather than on adding to their number.

It takes a better salesman to get profitable business now than it did during the boom years. It needs a man who appreciates those old-fashioned qualities I have mentioned; who knows how to sweat and to stick; who is not afraid of buyers; and who will not accept a little order merely because it is offered, when he knows that a big order may be secured if it is fought for.

(Continued on Page 44)

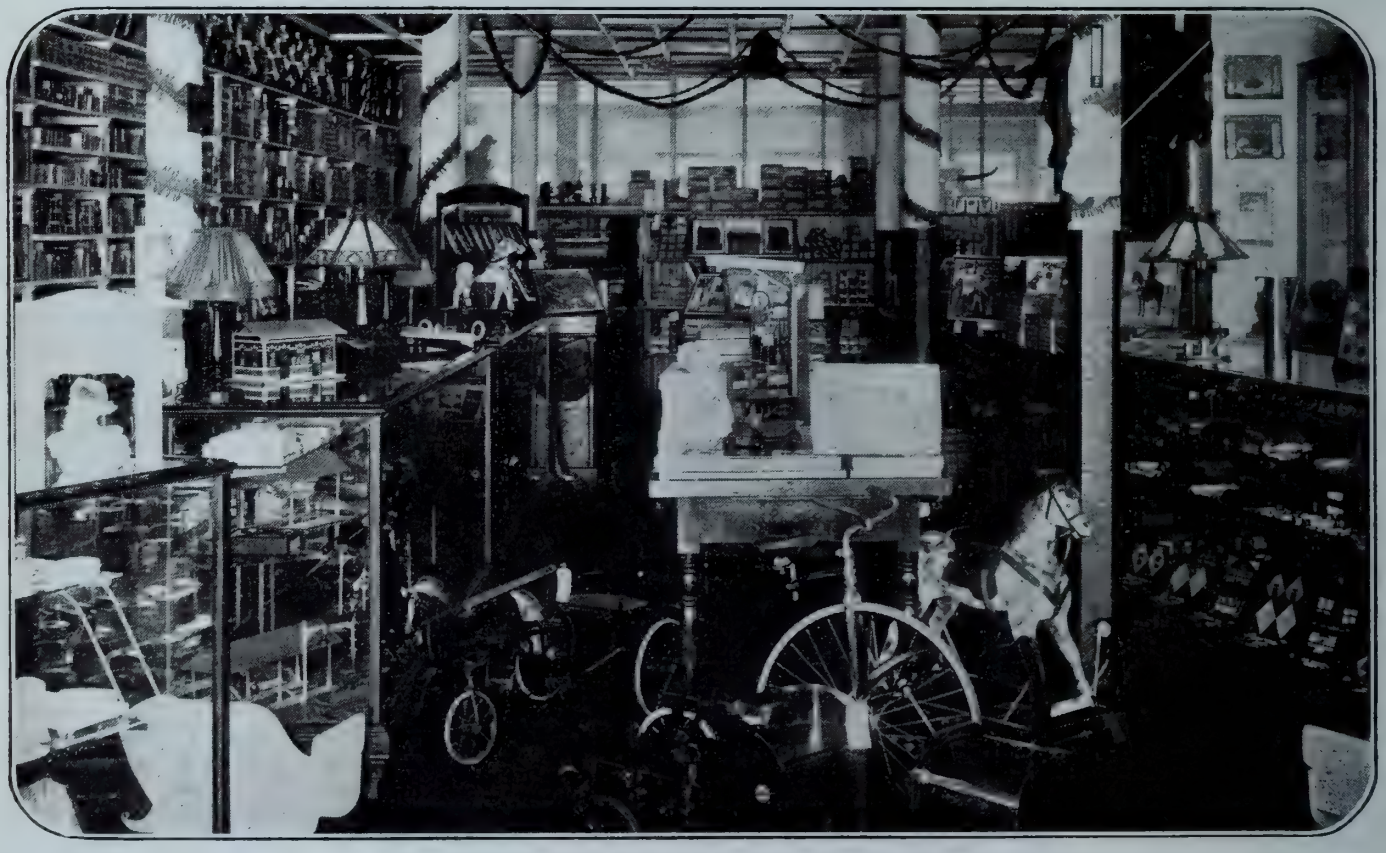
"To-day we require salesmen who won't take a little order just because it is offered them by the retailer."

Gift Hardware Has "Right of Way"

AT THIS time of the year practically every hardware merchant in the country will be "setting his house in order" to receive the Christmas shoppers. Every member of the trade has his own ideas as to the most effective methods to be adopted in this respect. Long study and experimentation with various suggestions has enabled the hardware firm of McKinley and Northwood in Ottawa to make use of a number of ideas which have been tried and not found wanting. A few of these schemes, which are sound in every detail, are part of the firm's stock-in-trade and are trotted out and put in harness every Yuletide.

Just as the alarm clock notifies the slumberer that the time has arrived to commence the day, so November reminds this firm that the time has arrived to commence getting ready for the Christmas rush. It is at this time of each year that the salesmen are detailed to relegate the ordinary stock on the tables and counters to the cellar and to commence spreading the Christmas spirit by displaying gift goods.

Encourage Shopping Early



"By doing this," said Mr. J. N. Trudel, manager of the hardware department, "we are helping to educate the public to do its shopping early. This plan is effective. In the past we have sold hundreds of dollars' worth of Xmas merchandise during the month of November, just on the strength of its having been displayed where people could see and handle it.

"We always change our store completely shortly after the first of November. Everything that we can possibly get rid of is shifted under the counters or to some other hidden portion of the store, and the gift goods are prominently displayed. As a rule, the 20th of the month finds us in full Christmas regalia. We endeavor to introduce the Yuletide spirit to every portion of the store by the use of all kinds of seasonable decorations, including a number of Christmas trees, one of which we always place at the front door.

"One scheme which we have found to be very successful is that of placing a large sign on the door which moves upwards every time the door is opened. The wording on this sign is: 'Don't Forget Your Christmas Tree Holder.' This is printed on both sides of the card and cannot fail to catch the eye of the customer as he enters and leaves the store. This is backed up by a display of Christmas tree holders just inside the front door, and also by a display of them in one of the windows for a short time just previous to the holiday.

Complete Line Of Toys

"We make it a point of carrying as complete a line of toys as possible, including games, etc. All our toys are displayed on tables in the centre of the store. The sporting goods, such as sleighs, toboggans, etc., with the exception of skates are kept at the rear of the store. The reason this is done is that we expect our customers to ask for

Only in the toy business for four years, J. S. Neill & Sons Ltd., hardware merchants of Fredericton, N.B., have built up an extensive trade largely through continuous displays of high class toys throughout the year, with special features at Christmas time. Here is an interior view of the Neill store showing Christmas decorations and a wide range of toys of the better class. Children are encouraged to visit the department after school hours and they frequently bring parents who in turn become buyers of suitable gift lines.

such goods as these and we consider it pays well to have them walk the full length of the store to examine them. It gives them plenty of opportunity to see the rest of the toys and other gift goods which are displayed. We have always made it a point of keeping the skates well up towards the front."

While discussing skates, Mr. Trudel outlined a rather useful idea for the convenience of the management which is used at Christmas time and throughout the remainder of the season. This is the adoption of price cards which enable the salesmen to keep tab on the stock. The skates are labelled Model A, Model B, etc., and a card is made out for each model, stating the number of pairs of each model there are in stock and the price of each. As a pair is sold, the salesman makes a note of it on the card, and thus it is easy to tell at a glance how many pairs of a certain model are left.

Only One Game Handled

Another helpful stunt that is carried out in this store is the arrangement of the box games in such a fashion that only one game of dozens of the same sort on display is handled by the customers. The games are placed in a pile on the tables or counters with one open box on the top of the pile. The customer is allowed to handle the top box and if he decides to make a purchase of this article, the one immediately underneath is selected by the salesman as the one which the customer will carry away. The consequence of this scheme is that a minimum loss is effected. Some parts of the top sample may be found at the end of the Christmas season to be missing, but all the other exhibits will be intact.

In the past the firm has imported its expensive tool sets for older boys, from England and the United States. This year it has adopted the idea of making up its own sets, which it is able to dispose of at a somewhat reduced figure. "In this connection," said Mr. Trudel, we have set prices which are remarkably easy for the salesmen to remember. The least expensive of these sets is being offered at $12.50 and others at $14.50, $16.50 and $18.50. With these prices well established in their minds there should be no reason why the salesmen should waste time by trying to find them out in some other way.

Keep Leftovers in Good Shape

The policy of this firm with regard to winter sporting goods is to try and open each season with as clean a stock as possible. This is accomplished by packing the leftovers away neatly at the end of each winter season, using plenty of paper and cord, so that the dust has little chance of getting in and marring the appearance of any of the articles. They are thus in good shape for display at Christmas time.

This store boasts two exceptionally fine windows, which are made good use of during the holiday season. As a rule, one window is devoted exclusively to toys. A good display is put in about the first of December and left in until after Christmas. The other window is more subject to change. For a part of the time it is used for showing winter sporting goods, while a little later on other gifts goods are displayed. Everything in the window bears a price ticket. "We consider it a very good policy to put the price on everything," stated Mr. Trudel. "It saves time and is appreciated by the customer."

Doesn't Fear Dept. Store Competition

The value of being situated in the down-town section of the city at Christmas time was emphasized by Mr. Trudel. "There are piles of stores around us where just such goods as we offer are sold," he said. "But this does not hinder

Santa Claus Opens Hardware Toyland

GRAND OPENING OF

TOYLAND

Saturday Will Be the Glad, Glorious Day for the Children

SANTA CLAUS Arrives For His VISIT TO TOYLAND

Well! Well! Well! Here he is again! *SANTA CLAUS* coming *SATURDAY* to the *BIG OPENING OF TOYLAND* at the *DAVEY HARDWARE CO., LIMITED.* Early, you say? Not a bit of it! Why, he comes every year just about this time. And, little girls and boys, would you believe it, he hasn't changed a bit. *SANTA* is just the same apple-cheeked, starry-eyed, jolly old soul that you have always known him to be. He may be a wee bit fatter to be sure, but then so is his sack of toys. It is *POSITIVELY HUGE!*

AND SUCH A PROCESSION IT WILL BE! FULL OF THRILLS FROM BEGINNING TO END!

First *SANTA CLAUS'* special body-guards dressed in bright green coats on two prancing horses, after which the grand float of that jovial personage, *OLD KING COLE*, sitting on his beautiful throne with his own *COURT JESTER* driving his car, if you please. Then, the most ridiculous clowns in the world. And before you stop laughing at their absurd antics, along comes *MOTHER GOOSE* sitting in an immense moon with her squalling old goose. Then what do you think? The funniest old fellows you ever did see jumping around on a big wagon. And all the time you are watching *SANTA CLAUS'* wonderful procession you hear the strains of the unseen mysterious band; yes, sir! And the music seems to come from right out of *SANTA CLAUS'* immense palace; and then, yes, bless him. *SANTA CLAUS* himself perched away up on top of his palace

THE DAVEY HARDWARE CO., LIMITED

A WEEK'S CAMPAIGN *preceding the opening of Toyland by Santa Claus in the Davey Hardware Co. store, St. Thomas, Ont., aroused interest among the young folk to fever heat. Small ads are run giving messages from day to day as to progress Santa Claus is making from Lapland to Toyland. Large ads are also run outlining the program and giving route of parade in which Santa Claus, clowns, Old King Cole, Mother Goose are featured. The big ad announcing the opening of Toyland is shown herewith. A specialty is made of putting goods away for Xmas with a small deposit. An aluminumware sale is put on with a free cook book. Demonstrations of other hardware lines are arranged near the Toy Department to interest parents of children coming to Toyland. A look over this ad will show the wide range of toys handled in the big trade done by this firm at Xmas.*

Many Women Buy Auto Accessories

Wives, Sweethearts and Children Are All Prospects for Automobile Accessories as Christmas Gifts—Accessories in Distinctive Christmas Wrappers—Sends Card With Accessory Gift Suggestions and Follows Up On Telephone

WITH ONE in every sixteen persons in Canada owning a motor car it is easily seen that motor car accessories will take a large part in this year's Christmas gift trade. Several persons will be buying gifts for that automobile owner and it is only reasonable to expect that at least a portion of them can be influenced to buy motor accessories providing the merchant puts the matter up to them in a sufficiently forcible manner.

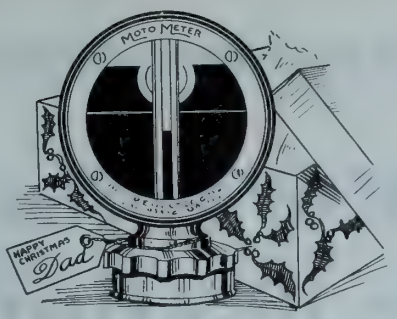
This year gifts of utility will be given and what could be more desirable and utilitarian than some article of automobile accessories which will increase the comfort of winter driving? At the recent convention of the Automobile Accessory Branch of the National Hardware Association, the question of the manufacturers putting accessories up in suitable boxes for Christmas gifts was taken up. It was agreed that there were big opportunities for the sale of accessories at Christmas and several instances were cited of merchants who have developed a very profitable trade in them. The suggestion was made that rather than attempt to box these accessories individually for such trade and having to destroy such containers if not sold at Christmas, that merchants secure a supply of colored paper and some holly ribbon and cards and prepare the parcels suitably for gifts when sold. A feature could be made of this idea in the display or advertising.

No Extra Investment

Most of the accessories necessary are right on the shelves now so no extra investment is required. All that is needed are some bright ideas and some application to put them into effect. One thing to remember is that women are the chief shoppers and even the kiddies will be interested in some practical gift suggestions including some accessories. For this purpose a lighted Xmas tree might be shown in the window with some accessory lines suitably prepared for Christmas presents as illustrated herewith. Some lines to be shown in such trade would include motometers, flashlights, visors, robes, windshield cleaners, foot warmers, etc. The showcase can display other lines such as bumpers, jacks, chains, tires, etc. In displaying the accessory in the window it might be a good idea to show one wrapped with the colored paper, holly ribbon, etc., and card enclosed, and alongside show the same accessory unwrapped, to indicate what is contained in the closed parcel.

Some good advice is handed out in a letter to the director of the Automotive Equipment Association from a dealer who has put across the merchandising idea at Christmas with good success. After making the foregoing point re showing one parcel wrapped and the article unwrapped, he goes on to say: "Make a point to see the wife, or daughter or sweetheart of every car owner that you can get in touch with during the early part of December or for a month before Christmas. Pick out a certain one of these articles you are concentrating on that the car needs, then approach the lady, explaining that the ordinary Christmas gift, such as socks, neckties and shoe strings are getting to be more or less an old habit not thoroughly appreciated and soon forgotten, while something for the automobile will be appreciated more than anything else, as a man's automobile is next to his heart.

"After accumulating the orders he gets for these articles, which should all be taken for delivery about December 20, the dealer can order the equipment from his jobber, get it in stock only a few days before he delivers it, get the money for it before he has to pay for it and do a thousand dollars' worth of business on $25 investment, making $350 profit in less than thirty days."



This arrangement of automobile accessories by a Toronto merchant has proven effective at this time of year inasmuch as it is confined to those accessories which are in special need in the winter. This window was arranged at Thanksgiving, hence the decorations at the top. Similar decorations of a Christmas nature might be used between now and Dec. 25. Some ideas for displaying accessories as Christmas gifts are outlined in this article.

Sends Card To Prospects

A Toronto merchant prepares a card which might be used to advantage. This card suggests: "Give Automobile Gifts for Xmas." On the other side it enumerates a wide range of articles with prices from $1.75 up to $50, thus interesting the prospective buyer of accessories having in mind almost any amount. This appeals especially to those members of the household who are not readily acquainted with accessory prices. This merchant follows up this

plan with a personal canvass over the telephone of the household to which the card has been sent. Out of 240 calls in two weeks, being on the basis of twenty a day, he figures on approximately 40 sales. The card enumerated the following lines with prices:—Radiator cap; radiator wing, small and large; rubber running board mats, per pair; aluminum mats; tire cover; luggage carrier; outlook windshield cleaner; motometers; outside mirror; inside mirror; windshield visor; flashlight; chains; spotlight; automatic windshield cleaner; horn; robe; bumper; shock absorbers. This merchant also uses stickers on all parcels and literature bearing the words "Give an Automotive Gift for Xmas."

Accessory business for more than eighty thousand new automobiles annually in Canada is the estimate recently made in compiling statistics covering the motor industry in this Dominion. This is business in addition to the equipping with auto accessories of the aggregate five hundred thousand passenger and business cars at present in use. The figure of 80,000 merely covers replacements only and does not take into consideration the opportunity of also equipping with accessories new cars purchased by those who formerly did not own one.

Motor Meter as Xmas Gift

Field For Accessories Extends

These estimates serve to indicate not merely the growth of the automobile industry in this country, but also throw a gleaming spotlight upon the possible volume of accessory trade, a factor which is of vital interest to the hardware merchant especially at Xmas. The field for auto accessories is thus extending rapidly year by year, while there is also the consideration that the number of accessories continues to grow. It can readily be seen that these facts are not only of importance from the viewpoint of the accessory dealer but will supply a basis for future estimates and corresponding expansion in this department of the store.

The report also points out that while the number of motor vehicles is steadily increasing, this is especially so in the western provinces. Another impressive statement is that a very large proportion of the cars are owned by farmers, indicating that increased opportunities in the accessory business are available to merchants in both urban and rural districts alike

"It is conservatively estimated that the number of passenger cars and trucks in use in Canada at present total approximately 500,000.

Catching the Eye of the Fall Hunter

Here is a Fall sporting goods window of such a nature as to attract a great deal of attention of those interested in hunting at this season, and a window which should do much to stir up a longing for the hunting grounds among the uninitiated. This window arranged by Evariste Babineau of Sumner Co., Ltd., Moncton, N.B., shows a stuffed bear, deer head, partridge, squirrel, etc., and two live rabbits were placed in the window to give it a still more realistic effect and bring action into the display. Evergreens and moss have been used generously, the tent with the fire and the various camp accoutrements presents a very natural appearance. Included in the display are rifles, revolvers, cartridge belts, thermos bottles, ammunition, camping utensils. The window attracted much business and many favorable comments.

NOW Is The Time To Join The 1922 Hardware and Metal Xmas Window Contest

Bigger and Better Than Ever Before

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

The contest closes on Monday, January 1, 1923. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one.

What This Christmas Contest Means To YOU

TO BE a prize winner or to receive honorable mention in this contest is much to be desired by hardware merchants or their salesmen. The contestants who have won honors in this contest in past years have achieved substantial benefit from the encouragement given them in arranging displays and also from the wide publicity given the results of the contest.

Former participants who have been runners-up in previous contests will benefit from the comparing of their window displays with prize winners, and new entries are wanted from merchants or their retail salesmen in all parts of Canada. Don't forget:

Get Your Entry In Early.

SECOND PRIZE WINNING DISPLAY in places under 5,000 population, in the 1921 Hardware and Metal Christmas Window Contest. It was dressed by G. P. Eldridge, of George W. Ecclestone, Ltd., Bracebridge, Ont. It has a most pleasing appearance, a distinct Christmas atmosphere, and represents a fairly wide range of suitable Christmas gifts to be found in the hardware store. It features silverware, cutlery, electrical toasters, lamps, percolators, shaving brushes and razors. Prices are prominently displayed on each item. The panels at the rear and the general construction of the display keep the eye interested at all stages of the inspection.

Another Chain Store Episode

THE Piggly Wiggly Corporation, an extensive group of chain stores operating in the grocery trade of the United States, with an annual turnover running into many millions, has been frequently pointed to by exponents of the chain store system of merchandising as an example of the broad accomplishments of this form of retail distribution. While complete details have not yet come to hand, telegraphic advice to Hardware and Metal just as we go to press indicates that there has been widespread failure among certain parts of the organization. The Manhattan Piggly Wiggly Corporation has failed with liabilities of $1,250,000 and assets of $350,000. The Piggly Wiggly Eastern Corporation has failed with liabilities of $1,000,000 and assets of $25,000. These two corporations operated under separate franchises from the parent corporation, under group arrangement. The founder of the corporation states these stores were operated distinct from the parent company and that there was no connection financial or otherwise. Some hint of being stock selling propositions has been given. This group has opened 38 stores and were planning to eventually have 2,000 stores. Later advices are that four more stores in New Haven and three in Bridgeport have been added to the list of failures.

Can Be Too Enthusiastic

THERE IS no doubt that fundamental conditions underlying the business structure are gradually becoming re-aligned and thus forming a more solid foundation for future business, but one of the biggest dangers which lies in the present stage of the business cycle is the possibility of over-inflation. Everyone remembers what happened after the last period of price inflation but still some manufacturers and merchants seize on the first opportunity to get a longer margin if they think it can be secured, instead of trying to develop bigger volume business on a shorter margin. It is well to be optimistic and enthusiastic providing it is kept within reasonable bounds, but at the same time we must look closely into business developments in order to get constructive suggestions in order that such improvement will be maintained.

Some of the factors on the other side of the question are outlined in an analysis of the business situation by Peleg Howland, President H. S. Howland Sons & Co., wholesale hardware merchants, Toronto, in his address as President of the Imperial Bank. After pointing out that the general business trend has been consistently on the upgrade for the last six months he states that progress has been necessarily slow because of the besetting obstacle of labor inefficiency, high wages, restricted markets and chaotic Europe. He thought that basic industries such as mines, pulp and paper, lumbering, fishing, all have better prospects, the harvest was exceptional, wholesale trade has increased in volume and unemployment has steadily decreased. It was stated, however, that the activities of the country are not being carried on at a profit and capital is not being accumulated, this being reflected in diminishing savings. Taxes have increased, there has been little reduction in the debt of the Dominion and there is comparatively little immigration.

The need for encouragement of the right kind of immigration was emphasized and the importance of having Europe on a better basis through the encouragement of trade was pointed out. Other factors were economy on the part of the individual, careful adjustment of taxation, a fiscal policy the aim of which is to cheapen cost of living and the cessation of legislation of a sumptuary or paternal character.

It is a hopeful sign that in respect to taxation, improvement of the European situation, and more efficiency in our marketing and distribution system, some progress is being made along the lines suggested. There is still some way to go however, and the retail merchant plays a big part in intelligently meeting the situation.

A Lesson For The Retailer

MANY OF the most pressing problems facing the trade to-day are those in connection with costs of distribution. This subject has many ramifications for the retailer involving as it does the question of store administration, but it is a subject to which manufacturers and wholesalers are also giving much more attention and as their decisions in regard to marketing methods directly affect the retailer, he must be fully alive to what is going on and introduce such efficient methods in his business and take such steps to stimulate turnover that producers will not be given cause to consider other channels for adequate marketing of their goods.

For some months it has been quite apparent to manufacturers that too much attention has been paid in the past to production, and too little to distribution. This was a more or less natural development of the war period when productive capacity of our industries was strained, and in the immediate post-war period when there was little hesitation on the consumer's part to buy freely. In recent times, however, this condition has changed and not only must the manufacturer seek an outlet for his normal production but in many cases he must secure more than ordinary distribution to keep running those plants which were expanded under the pressure of war requirements. Thus the problem of distribution has become an acute one for all concerned.

After examining production costs closely some of the shrewdest manufacturers in the industry state they have been paying too big a price for distribution. There has been too much careless buying on the part of retailers which has hurt their own interests as well as those of the manufacturer. The solution is a larger volume of business on a smaller margin of profit. This can be partly brought about by using stock limits on seasonable merchandise and other mediums of intelligently guiding buying and selling. The trouble which certain retail hardwaremen claim is facing them to-day in the form of too many retail stores is fundamentally the same trouble which has been facing the manufacturer for some time past. There have been too many factories and too little buying on the part of the retailer. But the manufacturers have not endeavored to solve the trouble by taking action to curtail the number of producers, they are following out the more constructive plan of adopting more efficient methods so as to shorten the margin and secondly of developing their connections with their retail customers on the basis of service. "We are selling our connection to-day rather than merely a product" says a prominent hardware manufacturer who finds that this plan plus fair prices has solved many of their marketing problems. The same solution will do for the retail hardwareman.

"Less Legislation—More Co-operation"

Hardware Manufacturer Discussing Price Fixing Investigation Says Too Much Legislation by Well Meaning But Misguided Individuals—Wholesaler Favors "Suggested" Resale Prices But No Combines—How Fixed Prices Affect Retailer and Consumer

Editor's Note:—The discussion which was outlined in the October 28 and November 4 issues of Hardware and Metal concerning the investigation being conducted by a committee of the Ontario Legislature into the question of fixed resale prices, has brought forth some further interesting comments from manufacturers of various hardware products, as outlined herewith:

A STOVE manufacturer who believes in the policy of established resale prices points out that the position of various manufacturers varies because some are primarily interested in the stability of prices because of the ultimate bearing on retail hardware merchants who are their customers. On the other hand the investigation being conducted is said to be interested in reducing prices to the consumer and is not interested in the success of the merchant. He points out that the fact that stabilized prices and resulting success of retail hardware merchants works to the advantage of the consumer inasmuch as hardware merchants are consumers in all other lines, is a hard matter to impress upon the average legislator. A number of arguments showing the advantage to the consumer of fixed prices on nationally advertised products, as prepared by this manufacturer, is as follows:

(1). The consuming public easily becomes familiar with the published retail prices and is thus protected against the possibility of paying a higher price.

(2). The dealer is prevented from charging a price higher than the published price, although there is no law which will prevent him from charging a lower price.

(3). The consumer is again protected from paying a high price for an inferior quality of product. We might take an illustration from our own business before our retail price list was established:

A good many dealers were handling various brands of imported stoves which were very inferior in point of workmanship and operation and, therefore, in service rendered, and, because of the absence of any policy on the part of the manufacturers to even suggest a retail price, dealers were in a position to charge more for such stoves than the prevailing prices of our line, and thus the consumer was paying what might be considered an exorbitant price for an inferior article.

(4). Nationally advertised goods, with a fixed list of prices to the consumer, can be manufactured and marketed at an average lower cost to the consumer than under any other plan. This is not only true of stoves, but is true of many other lines, such as automobiles, cameras, watches, talking machines, electrical appliances, etc., etc. The reason for such lower cost is the greater confidence which the consuming public has in these classes of merchandise, thereby assuring stability to the industries, and that in turn makes it possible to operate with more certainty on a lower margin of profit than would otherwise be the case.

Should be Carefully Considered

"Personally I am not in favor of strict enforcement of retail prices set by the manufacturer, and we as paint manufacturers do not state to the trade that they must sell at certain given figures. True we do issue a list of quotations for the merchant on practically all of our products, but it is merely 'suggested' prices, offering a fair margin of profit for him and allowing protection to the buying public," said a Montreal paint manufacturer.

As for selling to the distributor it was pointed out that the jobbing trade purchased on a discount, and they in turn sold the trade at the same figures as the manufacturer. The latter also solicited the retailers and both sections were on an even footing as far as prices were concerned. This method of merchandising had always proven very satisfactory to all concerned, and by naming prices only after closely anticipating production costs, the ultimate consumer is only asked to pay fair prices. Any contemplated action on the part of the Ontario Government should be carefully considered before anything definite is done.

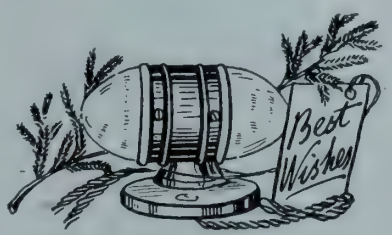
Need Common Understanding

An Ontario hardware wholesaler states: "We are of the opinion that when associations meet, consider and offer suggested resale prices on lines of goods, whether it is hardware, dry goods, groceries, etc., it has a stabilizing effect on the trade generally.

"This, of course, comes about in a natural way by wholesalers meeting and discussing the value of such merchandise, which may be of a common grade of manufacture, that is, goods of a kind manufactured in various parts of the country can be marketed easily on the suggested resale plan.

"Yet, on the other hand, if the manufacturer steps in and dictates to the wholesaler how he should sell these goods to the retailer and inflicts penalties by exclusion or otherwise, this system of marketing goods in our opinion is decidedly wrong.

"In other words, we believe that the freedom of marketing goods under a system of common understanding is better done than if the price arrangement is forced.



"As far as this company is concerned, we would be willing to agree to a method such as mentioned in the fore part of our letter and we cannot conform to the ideas of a combine."

Too Much Legislation

Another paint manufacturer states: "As far as the paint and varnish industry is concerned, I am sure such an Act would have no bearing as we have never individually or as an organization ever attempted to dictate to the retailer the price he must sell at. It is true that 'at the request of retailers' some companies have from time to time distributed a 'suggested' list of prices that would assure the retailer a fair margin of profit but at no time have we ever attempted to 'dictate' to the dealers the prices they must sell any of our products at. However, I do feel that the business and social world is burdened down very heavily at present with a raft of radical legislation that is hampering progress and making it difficult for us to get back to sane and steady living.

"The proposed Act is just another of those monkey wrenches that well-intentioned but misguided people are trying to throw into the business machinery of Canada.

"What we need at the present moment is less legislation and greater co-operation on the part of our governments."

Parking light as a Xmas gift.

Lieut.-Col. W. M. Gartshore, President, McClary Mfg. Co., London, Ont., received an acclamation in civic nominations for the Hospital Trust.

REDUCING COSTS OF DISTRIBUTION

(Continued from page 35)

Our men are working for volume. They understand they must get it or go where the need is less urgent.

Furthermore, we are getting our men to lay less emphasis on an order and more emphasis on a connection. We insist on the type of salesman who sells his house and his product so thoroughly that the merchant will want to deal with the concern and will send in his order by mail. There is a great loss if buyers always wait for the salesman, or if they give the orders to other houses if our salesman does not happen to come.

Indeed, we consider the number of times a salesman has to call on each merchant in the course of a year a fairly good index of his quality. If he can hold the business, and increase it, with a few calls, he can then increase the number of merchants he calls on and that makes him a better man for us.

A salesman used to make an average of three or four trips to get a merchant's stock order. Those extra trips represented quite a few needless dollars and cents in the cost of distribution. The type of salesman who now has a permanent job with us is one who can save those extra dollars, explain to the merchant the need for saving them, and get the stock order with a single trip.

There was a time during the full severity of the depression when our best salesmen found it difficult to sell at all. We then did a thing which we feel gave us more permanent benefit and prestige than anything we could have done. We set our salesmen to work helping retail merchants clear their shelves of goods purchased at the high prices. We said to them:

"If you find a merchant already stocked up and his goods not moving, and you can't take an order from him, go out and canvass business for him. Call on architects and builders—go from house to house if necessary—take orders for the goods on which he is overstocked. Get his shelves clear. Not until you have done that will you stand much show of getting him to buy more."

Advertising has also been an aid to greater volume. We participated heavily in the campaign of the National Association of Paint and Varnish Manufacturers. That was undertaken as soon as the depression got under way in 1920, and was designed to stimulate saving the surface of old furniture and woodwork by the timely application of paints and varnishes. "Save the surface and you save all" was, and is, the slogan; the campaign is continuing, and our share of the results has been highly satisfactory.

We also increased the amount of our own advertising in the midst of the depression period, as soon as we felt that the early hysteria of the buyers' strike was passing. This advertising would be a good deal less effective than it is, did we not merchandise it continuously and energetically to our dealers.

Our plan is not original, but it is very effective. If we have a page in a weekly of national circulation, for example, we are careful to send an advance proof to every dealer. He places it in his display window. We thus gain a repetitive value from each advertisement. The consumer sees it in two places, and is impressed with the conviction that the dealer is up-to-date. A natural inference from that is that the merchandise is probably also up-to-date.

People Renewing Old Furniture

It is a curious indication of the trend of consumer demand at the present time that our sales of Jap-a-lac in the last three months have been larger than at any other period since the product was put on the market. This has been without the application of more than normal stimulus on our part. The first big sales on Jap-a-lac were made during the normal years from 1909 to 1913. During the war and the period of inordinate spending, sales fell off, presumably because most people were not so anxious to refurbish their old furniture. They had money in their pockets, more ready money than many of them had ever heard of before. They were easily induced to scrap entirely anything that was old, and to buy something new.

That reckless period has gone. Consumer spending has again become more normal and sane, and the sales of Jap-a-lac reflect the condition by surpassing all previous records.

I have always been a believer in advertising, more advertising, and yet more advertising, providing it is skilfully done and the product and the channels of distribution are right. I believe it is scarcely possible to let consumers know too much about a good product. And I believe that advertising is one element in the cost of distribution where the apparent paradox applies, that the more you spend the less it costs.

We have curious and convincing proof of this in one territory. There is probably no place in the country where the flood of information about our products is greater than in Detroit. A considerable percentage of the population is engaged either directly or indirectly in some phase of the automobile business; and we sell to approximately 90% of the automobile manufacturers of the country. Our advertisements appear regularly in the automobile trade journals read by the dealers in accessories and equipment. The cans containing our products are seen on the shelves of stockrooms and in the factories. People are thus familiarized with our products by constant advertising repetition and by actual use.

With what result? Nowhere else, in a community of like size, is our volume of sales per person so large.

Refer to the merchandising "formula" that I have mentioned, and you will see that the fifth clause covers the control of expense to make every item produce a fair and commensurate return. There may be a knack, but there is no mystery connected with expense control. It merely consists of getting a dollar's worth for a dollar spent, and that is another of the old-fashioned virtues known as thrift.

Change Wasteful Habits

I have described the episode of the salesman calling at Galesburg, to show that buyers to a greater extent than is often suspected, and to a greater extent than they commonly realize themselves, may share in the responsibility for high distribution costs. We have given considerable effort to the task of eliminating certain abuses of this kind, and to changing certain wasteful buying habits.

"So," we say to the merchant as a concrete example, "when you receive our salesman's card saying that he expects to be in your town on a certain day and that day does not happen to be convenient for you, won't you exert the slight effort required to ask the salesman to come at some other time? He can change his plans; but he can never make up lost time."

That is but one of a hundred ways in which the merchant can help as respects the salesman. He can also give his decisions more promptly, ask less in the way of repeated calls, and so on. In little, these things seem small indeed. But it is a question of aggregates. I have no doubt that the time salesmen spend cooling their heels needlessly because buyers are careless, could be reduced by an expert mathematician with an imagination, to a cost total of millions of dollars yearly.

Suppose the buyer does help—is a little less careless in these small matters. The money saved comes back to him finally in lower prices. He can sell more, and more easily. It is a widening circle, and the benefits to all constantly increase.

There are plenty of other ways to save. The method of shipment is one. Here we have found that the merchant and

SOME INTERESTING DETAILS ON REVOLVER QUESTION NEXT WEEK

Information in connection with governmental action just taken to prohibit the importation of automatic revolvers into Canada was secured by Hardware and Metal just at press time. Details of the new regulation are given in this issue. More will be heard of this subject in next week's issue when the matter is thoroughly analyzed from the standpoint of all interested parties. It is likely some interesting details will be uncovered as to the reason for this action. Watch for the next issue.

manufacturer can effectively co-operate.

We pay 40 cents for a shipping case that will contain 6 one-gallon cans of our product. For 16 cents we can buy a sound second-hand barrel in which we can pack with equal security and convenience, 20 one-gallon cans. We are inducing merchants, wherever we can, to allow us to ship them in barrels instead of in cases.

A few years ago, when we spent some money to get a lot of sales, we might not have paid much attention to a detail like that. To-day, when we are spending a lot of money to get some sales, the cost of a container is one of many things that assumes a new consequence. The difference between 16 and 40 cents is not inconsiderable in the total, when thousands of gallons are shipped.

Freight Rates

We are also urging merchants to buy to take advantage of the lowest freight rates. We pack our products in cases containing a standard number of packages. We discourage the breaking of cases in shipments.

If a merchant wants to buy four gallons of paint, say, and a case lot is six gallons, we do our best to get him to buy at least the six gallons. If he does insist on having just the four gallons, it is quite possible for us to pay somebody in our shipping department enough money for the time he spends finding paper or other material to stuff in the box in place of the two cans, to take up more than all of the profit on the broken-case shipment. Anyhow, why pay freight on a box stuffed with old paper?

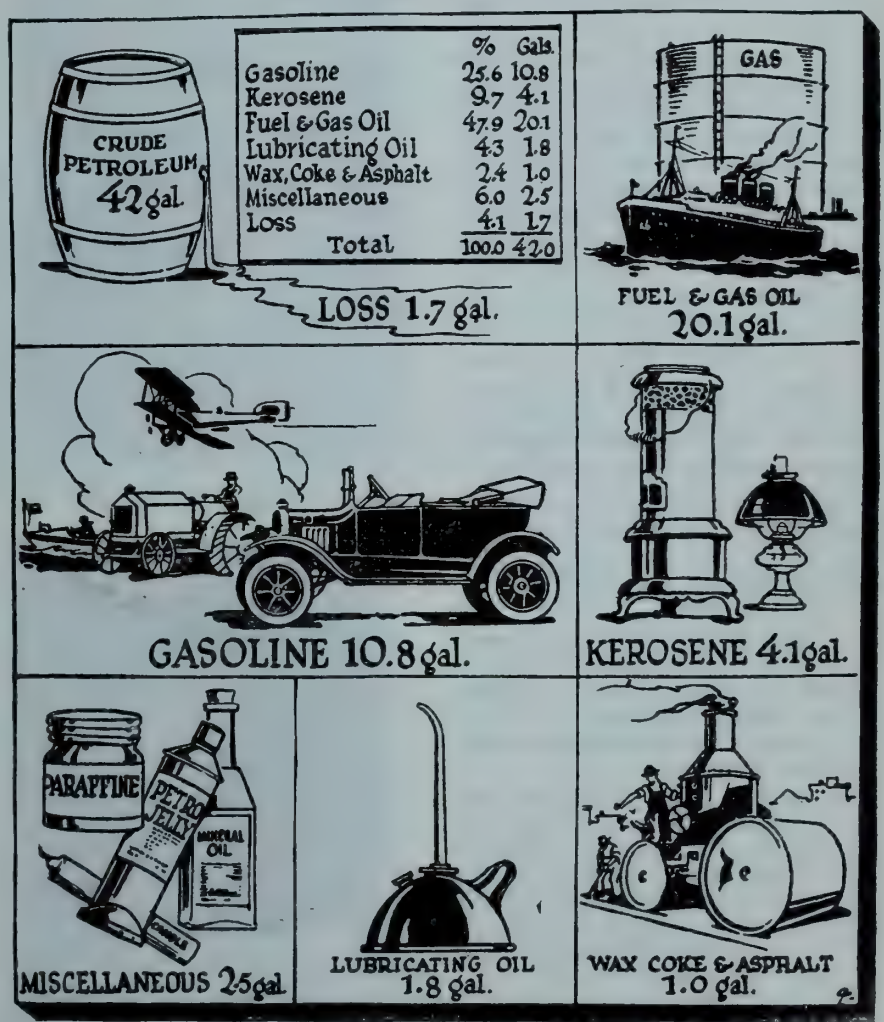
In the aggregate, I repeat, these little wastes assume staggering proportions. If the exact truth were available, I should not be much surprised to learn that a great many of the high costs complained of in distribution to-day, trace back simply to the spread of a spirit of anti-thrift; not a deliberate desire to be wasteful, but a disclination to exert the effort required by strict economy. That can be remedied by resorting to thrift as we used to understand it in business, and as most of us still understand it in our private affairs.

I had occasion not long ago to investigate one of our branches which was not yielding a satisfactory profit. I found that the very condition just mentioned was at the root of the trouble. Many of the merchants in this territory had got in the habit of buying in driblets and odd amounts. They had been encouraged in the habit during the war when other considerations than strict economy were paramount. Nobody had taken the trouble to wean them from this, the most expensive way.

A merchant here would order time after time in broken-case lots. He would make up his order and forget to inquire how much of a shipment it would make; as a result he often had to pay less-than-carload rates, when a little consideration would have enabled him to secure carload rates. Goods, in place after place, were standing on the merchant's shelves at too high a cost. They were suffering. We were suffering with them. The difficulty, once we discovered it, suggested its own remedy. We are now conducting a vigorous campaign to convince the merchants of the folly of their method of buying.

How Careful Study Resulted In Decreasing Freight Wastes

Settled buying habits, however, are not easy to change. We have 17 factories located at various points about the country, and 30 distributing warehouses. For a long time we did not mind particularly whether we shipped from one plant or from another If the dealer had a preference, we respected it without any question.



A merchant in Southern Illinois, say, having for a number of years received his shipments from Cleveland, continued to receive them from there without serious remonstrance on our part. In our close analysis of expenses, we saw the waste of that. We are now making a special effort to show our merchant in Southern Illinois—and all others where the same rule applies—that he can get exactly the same goods from our St. Louis factory, at a considerable saving to him in freight rates.

A waste like this, when brought to light, seems so obvious that one might suppose it would correct itself. But in fact it is just such wastes, which increase costs and benefit nobody, that attach themselves like leeches to the process of distribution; and they are not quite so obvious as they seem, until expert analysis is set to catch them.

For a long time the rail freight rate between New Orleans and Houston was very high, so high that it was about as

(Continued on page 58)

What Comes From a Barrel of Crude Oil

This illustration shows very effectively what comes out of a barrel of crude oil. Hardware merchants handle the majority of these products. The percentages will be interesting to keep for reference so that when price fluctuations occur on crude oil, merchants will be able to form some opinion of the extent of the change to be reflected in the various by-products such as gasoline, kerosene, lubricating oil, etc.

Events in the Trade

BUSINESS CHANGES

Simcoe, Ont.—W. H. Davidson has sold his hardware business to H. F. Prelipp.

Montreal.—M. Miller and Son, hardware, has dissolved. New firm registered under same style.

NEW FIRMS

F. T. Terry has commenced a hardware business in a new store at 517 Annette St., Toronto.

Kingsville, Ont..—Harris Bros. are commencing hardware business here and are desirous of receiving catalogs and price lists on hardware and automobile supplies.

St. John, N. B.—The first hardware store to be started in the fast developing east end district of St. John, is that of H. G. Enslow. Mr. Enslow's store is at the corner of Prince Edward and Union Streets. The store is a large one in a three-story brick building, and is well stocked. The store is equipped with two large display windows. Mr. Enslow was formerly on the road.

PERSONAL

Mr. Binns, representing Sheet Metal Products Co., Ltd., was in St. John last week. He was optimistic regarding business conditions in the Maritimes.

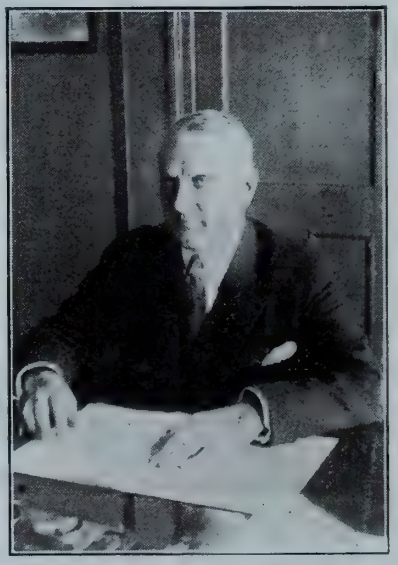
H. G. Rogers, hardware manufacturers' agent with offices in the Globe Building, St. John, has been on a trip to Europe. Mr. Rogers had his office formerly on Dock Street.

G. U. Hatch, general sales manager Millers Falls Co., Millers Falls, Mass., will visit Hamilton, Toronto and Montreal this week in company with F. J. Macdonnell of Hamilton, manager of the company in Canada.

Lieut.-Col. W. M. Gartshore, president McClary Manufacturing Co., sailed on the Niagara for New Zealand, where he will spend the winter. It is stated that the company is pushing its Oriental and Antipodean trade and it is also in connection with this, that the chief executive is crossing the Pacific.

OBITUARY

The sympathy of the trade is extended to A. R. Dundas, hardware merchant of Cobourg, Ont., in the death of his wife Annie I. Simmons. Interment was made in St. Peter's Cemetery, Cobourg.



HARDWARE HOCKEY LEAGUE

The Toronto Wholesale Hardware Hockey League is again organized for the season's play with teams representing the following houses in line;—Rice-Lewis & Son, Ltd., H. S. Howland, Son & Co., Aikenhead Hardware Co., and C. Kloepfer Ltd.

Officers elected are as follows;—Hon. Presidents J. T. E. Aikenhead, D. H. Foster, E. Halloran and R. C. Fisher; President, F. B. Feeney; First Vice-President, F. Jeffrey; Second Vice-President, D. Murray; Third Vice-President, J. W. Burman; Secretary, A. G. McIntyre; Executive Committee, J. W. Crone, I. Findley, C. Cameron.

Changes Among Officials of the Barrett Co., Ltd.

Montreal.—Changes among the officials of the Barrett Co. Ltd. include the appointment of D. P. Hatch as General Sales Manager of the company. Mr. Hatch was formerly Sales Manager at the Montreal Branch of the company. A. E. Pay, formerly Sales Manager for the Barrett Co. Ltd., for the Maritime territory, has been transferred to Montreal and appointed Sales manager for Quebec as well as for the Maritimes.

D. P. HATCH

Appointed General Sales Manager of The Barrett Co., Ltd., Montreal.

CANADIAN INCORPORATIONS

Clear Vision Pump Co. Ltd., incorporated at Toronto with capital of $50,000 to deal in pumps, tools, fittings and appliances for motor cars.

Norton Steel Co., Ltd., head office Montreal, capital $100,000 to manufacture and deal in saws, edge tools, hammers, shovels, wire rope, etc.

T. McAVITY BOWLING LEAGUE

St. John, N.B.—The employees of T. McAvity and Sons, Ltd., have organized a bowling league, and the King Street and Water Street stores of the firm have entered teams. There are some skilled bowlers on both of these teams who will vie for honors as pin topplers with teams from the manufacturing departments of the firm.

DEATH REMOVES ACTIVE EXECUTIVE

St. John, N.B.—In the death of R. B. Emerson, the hardware trade of the Maritime Provinces lost one of its best known figures. Mr. Emerson was one of the founders of the wholesale and retail hardware firm of Emerson and Fisher, of St. John. This firm was started on Prince William Street about forty years ago. Fifteen years ago the concern removed to its five-story brick building constructed on Germain Street, near the entrance to the city market. Mr. Emerson manifested a deep interest in the cause of education and was chairman of the board of school trustees of St. John for several years. He was also one of the most energetic presidents the St. John Board of Trade ever had.

INDUSTRIAL GANANOQUE LOSES LEADING FIGURE

Gananoque, Ont.—William M. Byers, a member of one of the families who for more than half a century have been actively associated with the financial and industrial life of this town, died suddenly Saturday evening at the residence of his brother-in-law, B. W. Heaslip, with whom he resided.

Deceased was largely interested in the Ontario Steel Products Company, Limited, the Gananoque Spring and Axle Company, the Ontario Wheel Company and other industrial as well as a number of financial interests.

He was a veteran of the 1885 Northwest rebellion, having served under the late Co. Cotton. He was never married, being survived by one sister. Mrs. B. W. Heaslip. Main street. and Mr. James P. Byers of Chatham, Ont.

ROYAL WINTER FAIR IN TORONTO

The Royal Winter Fair is being held in Toronto from November 22-29 at the Royal Coliseum, Exhibition Park. This Fair is a national live stock show, a national horse show, a national dairy show, apple show, fox show, and poultry show. Various amusement features are also provided. Reduced railway fares have been granted to patrons of the show.

APPOINT CANADIAN AGENTS

Smith-Stewart Co., London Loan bldg., London, Ont., has been appointed Canadian agents for the entire line of the Lenk Mfg. Co. of Boston, Mass., manufacturers of aluminum solder, alcohol blow torch, automatic torch and soldering outfits.

NARROW ESCAPE FOR OCCUPANTS OF HARDWARE TRUCK

Chatham, Ont.—The delivery truck owned by the Wanless Hardware Company was struck by a freight engine on the C. W. and L. E. crossing on Queen Street, near the Grand Trunk station. In the truck at the time were the driver, John Hill, and two other men. The truck was carried some distance after it was struck and is a total wreck. All of the passengers miraculously escaped.

COMPLETE NEW STORE

St. John, N. B.—For more than forty years, Duval's Hardware Store on Waterloo Street in St. John, has been one of the best known of the smaller hardware stores of New Brunswick. When Mr. Duval retired from business four years ago, the business was purchased by Isaac Gilbert and Sons, proprietors of a second-hand store on Mill Street in St. John. The purchasers have built a two-story brick building on the site of the old two-story wooden building. The new store is a large one, with two large display windows. The Duval name is retained by the Gilberts.

STORE CHANGES IN PURDOM HARDWARE CO.

London, Ont.—For the past 83 years a wall has stood on the east side of the Purdom Hardware Company, Limited, store, 124 Dundas street. It withstood the Chapman fire some years ago and since that time has been left exposed. Now, however, it is being torn down and a new one erected.

This wall is built of brick and is 11 inches thick and 50 feet long. It is being razed owing to the fact that it stands on the Kingsmill property. The new wall will be built on the property occupied by Purdom Hardware.

The removal of this wall and the erection of the new one necessitates numerous changes to the interior of the Purdom store.

In order to more easily handle the work the store is conducting sales of stock which will reduce the amount of goods to be moved while the new wall is being put in place.

Firm of Hardy & Badden to be Sec'y Wholesale Ass'n.

The appointment of the firm of Hardy and Badden, Toronto, as secretary of the Canadian Wholesale Hardware Association is now officially confirmed. Since the death of the late James Hardy, and the consequent re-organization of the firm of James Hardy & Son, the work has been carried on by the present officials, Arthur J. Hardy and Harold J. Badden. Mr. Hardy was a partner with his father in the former organization, having been associated with the business for 22 years. Mr. Badden has been actively connected with the firm for 17 years.

ARTHUR J. HARDY

HAROLD J. BADDEN

MEMBERS OF BRITISH EMPIRE EXHIBITION MISSION VISIT CANADIAN FACTORIES

St. John, N. B.—The visiting members of the British Empire Exhibition Mission, were shown around the city and visited several of the manufacturing plants under the wing of the Board of Trade, and expressed themselves as much pleased with what they saw. At noon they were entertained at luncheon by Premier Foster, at his residence, Coburg Street, the local, provincial and federal representatives and president of the Board of Trade also being invited.

During the morning Col. Belcher inspected the T. S. Simms brush factory and other plants. It is the intention of the Board of Trade to follow up the matter of representation at the Empire Exhibition with the local manufacturers and try to have them send exhibits.

HARDWAREMEN NOMINATED

St. John,, N. B.—The nomination of condidates for the officers and council was before the monthly meeting of the St. John Board of Trade. The nominations resulted as follows, and include prominent hardware men. For president, George E. Barbour; for vice-pesident, L. W. Sims; for council members; F. W. Burditt, W. S. Allison, M. E. Agar, F. S. Crosby, H. W. Fring, J. G. Harrison, C. P. Humphrey, D. W. Ledingham, R. A. Macauley, J. F. Gregory, H. W. Rising, H. C. Schofield, A. C. Skelton, J. E. Sayre, G. L. Warwick, A. H. Wetmore, J. Hunter White, Ralph S. Hayes, A. S. Allan, A. P. Paterson, Alexander Wilson, H. A. Porter, George D. Ellis, W. Vassie, A. N. McLean, E. A. Schofield, R. D. Paterson and F. W. Roach.

HARDWAREMEN IN POLITICS

St. John, N. B.—H. R. McLellan and Senator Thorne have been consistent opponents for many years. When Mr. McLellan was Commissioner of Public Safety in the City Commission of St. John, he made Senator Thorne one of the many targets for his abuse. Soon afterward, McLellan was forced to face a recall election and was defeated by John Thornton, the present incumbent. McLellan was elected mayor of St. John in April and because he broke his pledges he was again forced to face a recall election and again was defeated. He blamed Senator Thorne and T. McAvity and Sons, Ltd., another hardware concern of St. John, for the recall agitation, and abused the members of both the Thorne and McAvity firms immeasurably on the platform and in his campaign for votes. McLellan was soundly beaten by G. Fred Fisher, manufacturers' agent for hardware, etc. To make matters worse the Hardware Clerks Association of St. John were instrumental in starting the recall against him, and R. A. Willett, a member of the association, was chairman of the organization handling the Fisher campaign.

BIG SALE OF SPORT GOODS

St. Stephen, N. B.—McNichol's Hardware Store at St. Stephen, N. B., has been doing remarkably well with a line of athletic goods during the fall months, and are now showing skates effectively. The Christmas trade at this store is getting bigger each year, despite the proximity to the little Maine city of Calais.

NO MORE HUNTING OF BEAVER

The beaver has been granted a complete respite from the depredations of hunters and trappers in New Brunswick until November 1, 1924. There has been a closed season in New Brunswick for the last ten years, although hunters and trappers were allowed to take beaver from certain sections during that period under special permits, where the beaver colonies were large and not in danger of becoming extinct.

MONTREAL INDUSTRIAL HOCKEY LEAGUE

Montreal.—It has been decided to operate the Montreal Industrial Hockey League in two divisions this year. Composing the first division are the following firms: Steel Co. of Canada, Imperial Oil Co., Sherwin-Williams Co., Simmons Ltd., Walter Baker Co., and Goodwin's Ltd. The second division will comprise six clubs to be selected at a later date.

QUEBEC DIVISION C. M. A. EXECUTIVE MEETS

Montreal.—Montreal members of the Canadian Manufacturers' Association journeyed to St. John's, Quebec, by special car to attend a meeting of the executive of the Quebec division. Officers and members were guests of the recently-formed St. John's branch, and, following a luncheon, a number of important matters were discussed, prominent among which were the sales tax in relation to the Bankruptcy Law and the present wide-spread membership campaign for the Provincial C. M. A.

HARDWAREMEN FIGURE IN TRAVELLERS' OFFICERS' ELECTION

Montreal.—Frank Sumner, of Hodgson, Sumner & Co., Ltd., was elected by acclamation president of the Dominion Travellers' Association, to take office at the annual meeting on December 16th.

There will, however, be elections both for the second vice-presidency and for the board of directors.

For the five vacancies on the board of directors there were nominated: W. A. Wood, of Caverhill, Learmont & Co.; Herbert S. C. Holland, Pierre Rolland, Maurice Shea, William Blanchard, J. Copping and Mr. Massiah, of the Sherwin-Williams Co., Ltd.

Maxwell Murdock was re-elected treasurer, and D. Campbell continues as secretary.

Overseas Trade Ass'n Formed in Montreal

MONTREAL.—The Export Club of Montreal and district formally has decided to separate itself from the Canadian Manufacturers' Association under whose auspices it was inaugurated, and operate as "The Overseas Trade Association." A new set of officers has been elected and an enlarged circle of membership will now be sought. This decision was unanimously taken and met with the approval of the C. M. A., with whom the new association will work in close harmony.

A report was presented at the meeting by a special committee setting forth the steps taken to reorganize the Export Club on an independent basis in order that it might extend its membership beyond manufacturers so as to include all persons directly or indirectly connected with the export and import business of Canada. The committee recommended that membership be open to all exporters, importers, manufacturers, transportation, banking and insurance interests, and all other agents essential to export and import trade, under the name of either the "Foreign Commerce Association" or the "Overseas Trade Association," with annual dues of $15, with officers, committees, new headquarters and the usual appurtenances of such a club.

The objects of the new association were set forth as follows:

To develop Canadian overseas trade, particularly as regards exports.

To become acquainted and promote friendly relations between the interests interested in overseas trade so as to work for the benefit of Canada in general.

To assist each other on the various problems which confront the foreign trader, and in this way to profit by each other's experience.

To receive and spread for the benefit of all reliable information. To act as a unit and where necessary in conjunction with other organizations in an effort to improve facilities by carrying on, and, where possible, furthering the high reputation of Canadian trade.

To co-operate with the Department of Trade and Commerce in all matters pertaining to foreign trade.

To be in all export matters intelligent, reliable, progressive, well informed and enthusiastic Canadians.

NEW REPRESENTATIVE OF BRIDGEPORT HDWE. MFG. CORP. IN MARITIMES

The Bridgeport Hdwe. Mfg. Corp. of Bridgeport, Conn., U. S. A. have appointed S. E. Calhoun of Moncton, N. B., as their representative for the Maritime Provinces of Canada for the sale of their line of tools consisting of nail pullers, box openers, crate openers, screw drivers, pliers, valve lifters, tire tools, etc. Mr. Calhoun is well known among the jobbers in the provinces of New Brunswick, Nova Scotia and Prince Edward Island, having called on them in the past in his capacity as manager of the Humphrey Glass, Ltd. Previous to the war he was in the lumber business and during the war served overseas as a Lieutenant with the Canadian Forestry Corps. Mr. Calhoun also represents the Bridgeport Chain Company and the Bridgeport Shear Company, both of Bridgeport, Conn.

S. E. CALHOUN
of Moncton, N. B., appointed Maritime representative of Bridgeport Hardware Mfg. Co.

PROGRESS IN IRON MINING IN ONTARIO

Fort William, Ont.—Hon. Harry Mills, minister of mines for the province of Ontario, announces that the following is the committee selected by him to report on the iron mining possibilities of Ontario:

Prof. H. A. Guess and Prof. Haultain, of Toronto University; Mr. Morrow, general manager of the Hamilton Steel Company; George Cowie, manager of the Soo Steel Works; Lloyd Harris, of Brantford, to represent the commercial interests, and Mr Bell, of Montreal, an expert on tariffs and transportation. This committee will report to the government at the next session of the legislature, probably early in the new year. Meanwhile, a test of 43,000 tons of briquetted ore from the Moose Mountain mine will be made at the Hamilton Steel Works.

NEW ASBESTOS PLANT

The Canadian Johns-Mansville Co. are erecting a new plant at their mining property, Asbestos, Quebec, where, it is stated, a full line of asbestos products will be manufactured. The first shipment from the new plant is expected early in the new year.

News of Western Canada

For Comment on Winnipeg Hardware Market Tendencies see "WEEKLY HARDWARE MARKET REPORTS."
For Current Prices see Winnipeg Section of "CURRENT HARDWARE QUOTATIONS" in this Issue.

Sale of the Capital Hardware and Sporting Goods Co., Regina, is reported pending.

Westlock Hardware & Furniture Co., Westlock, Alta., has changed ownership.

Winnipeg.—Hemstreets' Community Paint & Hardware Co., has moved to corner Broadway and Sherbrooke Sts.

C. R. Morton, hardware merchant of Vegreville, Alta., was a caller at the J. H. Ashdown Hardware Company, Winnipeg, this week.

C. H. Clerkson, formerly of Swanson, Sask., and now of Broadview, Sask., has changed his business into a limited company.

Alf Babb, hardware merchant of Portage La Prairie, Manitoba, was a business visitor to Winnipeg and while in the city called at the J. H. Ashdown Hardware Co.

R. G. Consterdine is in charge of the advertising department for Wood-Vallance Limited, Winnipeg. C. H. Drewe of Wood-Vallance Limited, Winnipeg, is in charge of the catalogue department of this firm.

EDMONTON RETAIL CLERKS WIN COURT CASE

Edmonton, Alta.—The resolution of the city council, passed on September 11, which suspends the half holiday charter amendment as created through the municipal law committee of the provincial legislature in 1920, was quashed in the Supreme Court by Mr. Justice Walsh, after the hearing of a chamber application brought forward by A. W. Carmichael, president of the Retail Clerks' Association.

CLOSING BYLAW FINES HEAVIER IN WINNIPEG

Winnipeg, Man.—Winnipeg shopkeepers convicted of infringing on the early closing bylaw will, in future, be dealt with more severely, Magistrate Sir Hugh J. Macdonald said.

Up to the present time offenders have not been fined more than $5 because no official notification had been issued to the effect that the bylaw would be enforced more rigidly, Sir Hugh stated. In future, however, the court will take the attitude that all Winnipeg shopkeepers have had sufficient warning and if convicted will receive no leniency.

Interesting Court Decision Favors Hardware Merchant

A Saskatchewan hardware merchant has written to Hardware and Metal as follows:—

"I have just got through with a very important case which I think would be very interesting to your readers. It was a case of a party giving a chattel mortgage to us. The chattel mortgage was given on his share of the crop grown on a parcel of land which he had rented, his share being two-thirds. The grain was thrashed and the owner of the land put his share in one granary and the tenant put his in another. The writer went to see him on several occasions and he promised to haul the grain to town. Instead of doing so he put it in another bin and mixed it with other grain belonging to a neighbor. I had him arrested. He was found guilty; he made restitution to the extent of giving me an order on his neighbor for 400 bushels of wheat. The neighbor accepted same and he was allowed out on suspended sentence for 12 months. I thought this would be very interesting to your readers as this has been quite a common occurrence and they have been getting away with it, and I understand that this is the first case of its kind that has ever come before the King's Bench. It is certainly going to have a great effect."

MAY ADOPT SLOGAN "BUY CANADIAN COAL"

Edmonton.—"Buy Canadian Coal" may be the slogan used in the cancellation stamp at post offices all over Canada for the next three months, says Howard Stutchbury, provincial trade commissioner, who has just returned from a very enthusiastic meeting of the federated boards of trade of Alberta, held at Calgary, to discuss ways and means of boosting the sale of Canadian coal. Mr. Stuchbury has written the postmaster-general of Canada, asking that such a slogan might be permitted, and if consent is given every letter posted anywhere in Canada will carry the message on its face during the winter months.

Vancouver.—Lt. Col. W. M. Gartshore, president of the McClary Manufacturing Co. was in Vancouver this week, preparing to leave for Japan, where oriental trade relations will be considered.

J. H. ASHDOWN ONLY ONE OF COUNCIL LEFT

James H. Ashdown, head of J. H. Ashdown Hardware Co., is the only member of Winnipeg's first city council still resident in the city. Forty-nine years ago the Winnipeg city charter was obtained from the provincial government, and the first election was held in the same year. The governing body assumed office in 1874, with Francis Evans Cornish, as mayor.

GUIDING PRINCIPLES FOR AD. WRITERS

Benjamin Sherbow, who established himself some years ago as a typographical consultant, has just died. He earned big fees as an adviser to the Curtis Publishing Company, Calkins & Holden, and a number of other big concerns in the advertising field. In all his work he steadily contended that legibility should come before frills in advertising typography. He always held that the typographical stunt invariably attracted attention to itself instead of the message it was trying to convey.

The fact that he was so prosperous in his particular field is evidence that these theories of simplicity should be a guiding principle of ad-writers.

PAINT MAN GOES TO CALIFORNIA

Calgary.—J. D. McDonald, of the McDonald Baker Co., Calgary, is severing his connection with this firm, and for reasons of health is leaving shortly for California. The Calgary Paint Club gave a dinner this week at which Mr. McDonald was guest of honor, and advantage of the occasion was taken to express to the departing member the general esteem he has won for himself throughout the paint trade of the province. In presenting Mr. McDonald, on behalf of the Paint Club, with a handsome travelling bag, Mr. Geo. Christie referred to the long connection their guest had had with the paint trade of the province and the city, and to the general regret that it seemed necessary to leave. Mr. McDonald was for years manager of the Winnipeg Paint and Glass Co., of this city, and three years ago started in the present business with Mr. Baker, who continues the business. Paint Club interests, and other community interests of the right sort, always received a good share of Mr. McDonald's time.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

PRICE increases are again in the majority on the current hardware markets. Higher levels are recorded on handles, including axe, hammer, hatchet and pick handles, peavies and cant hooks, brooms and whisks, hack saw blades, made up stove pipe and zinc sheets. At outlined in last week's issue of Hardware and Metal, advanced prices appear on steel field fencing. Through another revision in discounts, cotter pins are also increased.

Following the higher quotations on asbestos sheathing and magnesia pipe covering, the improvement in this market has produced an upward movement on air cell covering in certain quarters. Revisions are made on Eureka diggers, corn planters, wire stretchers and clothes bars. Certain Thermos products are lowered approximately ten per cent.

Booking prices for 1923 on hammocks show no changes, but owing to raw cotton advances it is stated that an upward movement in the near future is considered likely. The heavy call experienced for game traps has depleted stocks in many quarters, especially in certain numbers. Higher levels on cotton wastes are described as more or less imminent. Revised list and discounts are evident on the Onward make of sliding shoes, but net prices show little variation.

Western centres record higher prices on galvanized range boilers, wrought steel butts, light tee and strap hinges, and easier levels on Corbin ball-bearing padlocks. The arrival of colder weather has brought improved trade in holiday lines.

Raw steel materials such as pig iron continue on an evident decline, but finished and semi-finished steel has remained stable. Sustained activity is noted in bar products, this degree being somewhat in excess of domestic anticipations for this time of the year.

It is pointed out that while the recent mild weather served to restrict sales of certain winter lines to some extent, yet it also assisted in keeping up the movement of builders' hardware, roofings and kindred products used in construction and repair work. With a touch of winter now being generally experienced, renewed interest is apparent in seasonable goods and holiday displays. Gift specialties are receiving marked attention.

Montreal, Que.

MONTREAL, November 23.—Actual price developments are not quite as numerous this week, but the upward tendency is again evident. Quotations on cotter pins show a further revision and are again quoted higher. The firmer tendency in asbestos products has produced increased prices on air cell pipe coverings. In waste materials, scrap zinc and rubber display a firmer tone and slightly increased quotations are evident. Higher cotton waste prices are expected locally, one dealer stating that the announcement of a revision is looked for within the next few days. New quotations appear on field fencing, the increase being recorded as outlined last week. Lead products are still in a firm market position, metals in primary circles displaying a strong tendency. Local sheet distributors are expecting advanced prices on galvanized sheets imported from England, while importers of American sheets look for little if any change, although tin plate prices are described as very firm. There is a quieter tone in iron and steel business. Jobbing houses report somewhat more interest being shown in seasonal holiday lines.

COLDER WEATHER IMPROVES TRADE IN XMAS LINES

Montreal.

The change to colder weather within the past few days is welcomed by local jobbing houses who state that an improvement is already noted in seasonal lines. The period of milder weather during previous weeks did not offer a stimulus for Christmas trade and there was a certain amount of hesitancy on the part of merchants to anticipate their needs for the following weeks. Plated ware and cutlery are now selling in much better volume.

REVISED DISCOUNTS ON COTTER PINS

Montreal.

Following the new list and discounts on cotter pins two weeks ago is the further announcement that discounts are again revised to 10 and 10 per cent. off list issued at that time.

HIGHER COTTON WASTE PRICES NOT UNLIKELY

Montreal.

As pointed out in last week's issue of Hardware and Metal, an advance in quotations on cotton wastes would not be surprising. In discussing the market situation of these products with a local dealer this week it was stated that higher prices were expected later this week or early next week. Although no definite information with regard to the extent of the increase could be given it was intimated that new prices would be about one cent higher than formerly. Other firms stated that there was no definite indication of a change, but undoubtedly the market was in an upward direction.

GOOD SEASONAL TRADE IN BAR PRODUCTS

Montreal.

Smaller warehouse trade in bar iron and steel products is still of fair volume but a slackening in larger lines is now noted. Whether or not this marks the close of the better buying movement this fall is hard to say, but with earlier winter now at hand little further activity is expected by most distributors. Usually a slackening is noticed towards the latter end of November and there is no reason why this year should be any exception. There appears to be a fairly steady tone in the market and some express the opinion that little change will be made for the balance of the year although the recent reduction in domestic pig iron prices was at first considered a factor which might bring about a reverse trend in these products. The fact that local mills were fairly well supplied with imported iron is still thought to be reason enough for no change at

the present time at least. Local quotations remain as follows:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50 3 65
Spring steel	4 75 8 50
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

SCRAP ZINC DEVELOPS FIRMER TENDENCY

Montreal.

The continued stronger tone of spelter on primary metal markets is now reflected to an extent in the scrap markets, and quotations are now slightly higher. Rubber is also showing a little spurt after a prolonged period of quietness. Prices on this commodity are also advanced one-half cent per pound. There is a slight improvement in the buying movement, somewhat more interest being displayed on the above materials, also in non-ferrous metals. Dealers state that consumers are anxious in many instances to anticipate requirements before the closed winter weather. However this tendency is not noticeable on iron and steel waste, business in these lines being still limited. Following are average dealers' buying prices:

SCRAP—	
Automobile Tires	0 50
Rubber Shoes	0 02½
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 04½
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11½
Wrought iron, B. Rd., No. 1 per gr. ton.	10 00
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 10 00
No. 2 busheling	3 00
Boiler plate	8 00 to 9 00
No 1 machinery cast	20 00 22 00

DEALERS AWAIT FURTHER ADVICES FROM SHEET MILLS

Montreal.

With local stocks of both black and galvanized sheets well filled to take care of requirements during the earlier months, and chances of a slightly easier tone in the market not unlikely because of the quieter demand usual during this period from a production standpoint there seems little indication of a recession. As pointed out in past reports any softening in the local market would in all probability be responsible to distributors themselves. There is still a feeling that lower prices will appear at a little later date, while on the other hand importers of English galvanized sheets have been advised by their principals to withdraw present quotations as the higher price basis of spelter is reflected on these products. No definite information with regard to future price levels has been received, but an increase is thought to be in line.

Distributors of American sheets are also awaiting action of the Corporation in connection with the announcement of prices for the first quarter, and this is expected later this week. Opinions are that black and galvanized sheets will show little or no change, and higher prices on tin plate would not be surprising. Nominal quotations locally are as follows:

BLACK SHEETS—		
10 gauge, base	4 00	4 25
12 gauge	4 10	4 35
14 gauge	4 20	4 45
16 gauge	4 30	4 55
18—20 gauge	4 55	4 80
22—24 gauge	4 60	4 85
26 gauge	4 65	4 90
28 gauge	4 75	5 10
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	6 75	7 25
26 gauge	6 50	7 00
24 gauge	6 20	6 70
22 gauge	6 15	6 65
18—20 gauge	5 90	6 40
Other Brands—		
Other Brands—		
10¾ oz.	6 50	7 00
28 U. S. gauge	6 00	6 50
26 U. S. gauge	5 75	6 25
24 gauge	5 60	6 70
22 gauge	5 60	6 10
18—20 gauge	5 40	5 90
16 gauge	5 25	5 75

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25
20 x 28 IC, 112s	12 75
20 x 28 IC, 112s	15 00

Galvanized, 52s	7 25
Galvanized, 60s	7 75
Half bright 60s	4 90

METAL STRENGTH SEEN IN LEAD PRODUCTS

Montreal.

There is still a strengthening tendency in the undertone of the market for lead and zinc products due to the firm market position of metals in primary circles. Lead appears to be holding quite firm at its new high levels, while spelter continues to make gains. Tin is a little easier but the softer tone is not of sufficient importance to affect solder prices. No change is made in quotations on the finished products, and following are average prices:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	14 00
Do., 2" to 8"	15 00
Do., 8" and over	16 00
Lead waste, per 100 lbs.	15 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs., sq. ft. lb.	0 11
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs., sq. ft. lb.	0 10
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 22½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

NEW HIGHER PRICES ON STEEL FENCING

Montreal.

As briefly outlined in last week's issue of Hardware and Metal, new advanced quotations were issued on field fencing. Revised list prices and discount are as follows:

FIELD FENCE— Style No.	Spacing of Stays	Price per Rod.
433-0	0 22	0 27
540-0	0 22	0 34
630-0	0 22	0 37
640-0	0 22	0 38½
740-0	0 22	0 44½
740	0 16½	0 48
748-0	0 22	0 46
842-0	0 22	0 50
842	0 16½	0 54
847-0	0 22	0
847	0 16½	0 55½
936	0 16½	0 58½
948	0 16½	0 61½
950-0	0 22	0 56½
950	0 16½	0 61½
1050	0 16½	0 67½
Medium Weights—		
635	0 13	0 35
726	0 13	0 36
726-1	0 06	0 45
742	0 13	0 41
935	0 13	0 45
Poultry Fencing—		
1848	0 08	0 77
2060	0 08	0 85

Less 10 per cent.

PIPE FITTINGS STILL IN GOOD DEMAND

Montreal.

A fair amount of business is still reported in pipe fittings, the continued mild weather allowing construction work which demands supplies. A steady market tone is again reported on these products, and following are prevailing quotations;

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%
MALLEABLE FITTINGS—	
Price list effective June 1st, 1922. Discount 70 per cent.	

ASBESTOS PIPE COVERINGS HAVE REVISED DISCOUNTS

Montreal.

Following the advance in magnesia pipe covering and asbestos sheathing last week is the announcement of higher prices on air cell pipe covering, in two, three and four ply. Discounts in each case are revised and the increase shown is from 20 to 25 per cent. A firm undertone remains in the market for these products. Following are present discounts;

ASBESTOS PRODUCTS—	Off list prices
2 ply pipe covering	57½%
3 ply pipe covering	55%
4 ply pipe covering	50%
85% magnesia	40%
Boiler covering	$1.50 per bag

SEASONAL SLACKENING IN ROPE SALES

Montreal.

Sales of rope and cordage are now limited to the usual volume at this season of the year. With the close of navigation little further activity is expected for the balance of this year. Dealer trade is also quieter, and a revival of this cannot be expected until earlier spring months. No further change has been made in quotations since the revision at the commencement of this month.

FAIRLY GOOD TRADE RECORDED IN WIRE NAILS

Montreal.

Local jobbing houses report a fairly good movement in wire nails notwithstanding the advancing season. The open weather in past weeks has permitted building construction to continue in almost unusual proportions for this late season of the year. Current quotations are unchanged at $3.75 base and a fairly steady market exists, although unsettlement has been noted in other domestic market centres for some weeks past. Manufacturers describe the undertone of the market as steady to firm.

FAIR MOVEMENT CONTINUES IN BOILER TUBES

Montreal.

Current quotations on boiler tubes are unchanged, and a much steadier market is recorded than has been evident during past months. There is a fairly firm undertone in these products, and while the movement at the present time is fair a further improvement in demand is looked for after the first of the month when repair work usually commences, the close of navigation being one of the first factors to stimulate sales. Deliveries from the mills were reported as slower a few weeks ago, but stocks are now fairly in good shape. Following are average local quotations:

BOILER TUBES—

	Seamless	Lapweld
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	21 00	.....
1¾ inch	24 50	24 00
2 inch	21 00	19 75
2¼ inch	24 00	22 25
2½ inch	27 00	23 25
3 inch	33 00	29 50
3½ inch	38 00	34 25
4 inch	49 00	43 50

Prices per 100 ft. f.o.b. Montreal.

NO FURTHER CHANGE IN COMPRESSION GOODS

Montreal.

While there is still a little easier feeling in the local market for compression goods owing to certain firms quoting an extra discount on some lines, no general announcement of revisions is looked for at the present time. Trade is keeping up in fairly satisfactory volume for this season of the year and raw materials display a firm market tone. The opinion was expressed in one quarter that a steady market would prevail until the end of the year. Prevailing discounts are;

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Jenkins iron body, gate	25%
Bath cocks, quick opening	41%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	54%
Do., removable discs	54%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins gate or straightway	16%
Jenkins iron body, globe and angle	5%

Toronto, Ont.

TORONTO, November 23.—The current budget of market developments again contains a majority of price advances. Higher levels appear on hack saw blades, brooms, whisks, axe handles, hammer, hatchet and pick handles, cotter pins, peavies and cant hooks, zinc sheets and steel field fencing, the latter change being briefly announced in last week's issue of Hardware and Metal. Revised quotations are recorded on a number of hardware specialties made by the Otterville Mfg. Co., affecting wire stretchers, corn planters and clothes bars. The Eureka line of diggers is quoted at new levels. An improvement is evident in the market for asbestos products, with sheathing and magnesia pipe covering registering certain price increases. The reduction in Thermos products is an example of the opposite trend. Local prices on radiator valves are not uniform, certain distributors maintaining the former discount of 58 per cent off, while in other quarters the quotation is 54 per cent.

HIGHER QUOTATIONS ON STEEL FIELD FENCING

Toronto.

As announced in last week's issue of Hardware and Metal, new higher prices are now in effect on steel field fencing. Gates remain unchanged in price. Lists and discounts on fencing are both revised, the current quotations being reproduced on another page in this section.

MALLEABLE PRICE LIST IN UNIFORM EFFECT

Toronto.

Certain jobbing houses who have hitherto maintained prices per pound on malleable fittings are now adopting the unit list quotations. This gives a separate price on each fitting, and is described as rendering it much easier for the merchant to base costs on these products. The prevailing discount is less 70 per cent on classes A, B, and C. While the new piece list on malleable fittings was adopted in some quarters in June, 1922, the present announcement renders it more uniform.

HEAVY CALL DEPLETES STOCKS OF GAME TRAPS

Toronto.

Due to the exceptionally large call for game traps experienced this season, present stocks, particularly on No.'s 1 and 1½, are practically depleted. Manufacturers state they will not be able to ship further supplies until about the second week in December.

HACK SAW BLADES TEN PER CENT. HIGHER

Toronto.

Manufacturers announce that prices on hack saw blades are advanced ten per cent., this change becoming effective from November 21.

REVISED PRICES APPEAR ON "EUREKA" DIGGERS

Toronto.

New prices are announced by the manufacturers on the Eureka line of diggers. These are now priced at $22 per dozen.

BROOMS AND WHISKS PRICES AGAIN HIGHER

Toronto.

Household brooms of various kinds and also whisks have been advanced in price approximately ten per cent. This additional change is effective from November 17.

NEW PRICE LEVELS ON WIRE STRETCHERS

Toronto.

New price levels appear this week on Hercules wire stretchers. These products are now quoted at $4 per dozen.

HANDLE PRICES NOW TEN PER CENT. HIGHER

Toronto.

An advance in handle prices is announced this week. This upward change affects axe handles, hammer, hatchet and pick handles. The approximate extent of the increase is ten per cent.

ZINC SHEET PRICES AGAIN CLIMB UPWARD

Toronto.

Zinc sheet prices also show an advance this week, quotations on No. 9, being advanced to 12 cents per pound. This development reflects the steady climb of spelter in the primary metal markets.

BOOKING PRICES FOR SPRING ON HAMMOCKS

Toronto.

Hammocks are now being booked for 1923, without any change in prices.

It is pointed out that owning to the recent advances in the raw cotton market, manufacturers claim that present prices are somewhat lower than warranted and advances in the near future are considered quite likely.

CORN PLANTERS ALSO AT REVISED QUOTATIONS

Toronto.

The season's quotations on the "King of Field" corn planters are now announced by the manufacturers at $16.20 per dozen.

REVISED QUOTATIONS ON HARDWARE SPECIALTIES

Toronto.

New prices on certain hardware specialities made by the Otterville Manufacturing Co., are now in effect. These include curtain stretchers, ironing boards and clothes bars. The prevailing quotations follow:

Star Curtain Stretchers No. 1, 5 x 10 ft.	27 00
Star Curtain Stretchers No. 2, 6 x 10 ft.	29 00
Reversible Drip Tub Stands, will take 11" Wringer	33 00
Ironing Boards, No. 1	28 50
Sleeve Boards, No. 3	8 00
Skirt Boards, No. 11	15 00
Clothes Bars, No. 1	17 00
Clothes Bars No. 2	21 50
Clothes, Bars, No. 3	17 00

REVISED DISCOUNTS ON COTTER PINS AGAIN

Toronto.

New discounts are announced this week on cotter pins. The revision is 10 and 10 per cent. This applies to the list issued two weeks ago. The former discount is withdrawn.

PEAVIES AND CANT HOOKS ALSO INCREASED

Toronto.

Quotations on peavies and cant hooks have again been advanced. The current increase is in the neighborhood of ten per cent.

TEN PER CENT. REDUCTION ON THERMOS PRODUCTS

Toronto.

Reduced prices are made this week on the thermos line of bottles and lunch kits. Certain numbers are lowered approximately ten per cent.

HIGHER PRICE LEVELS ON ASBESTOS SHEATHING

Toronto.

A general improvement in the market for asbestos products is now recorded together with some higher price levels on asbestos sheathing. Quotations on sheathing having gradually climbed upward until the prevailing figure is $7.75, an approximate advance of $1 per cwt. There is a slightly better movement in these lines generally, which contributes to a seasonable volume of activity, although manufacturers and distributors state that there still remains plenty of room for improvement.

The outlook for the asbestos industry is described as brighter now than it has been during the past two years. Dominion mines are stated to be operating at an average capacity of around 50 per cent., with producers reporting an increasing volume of inquiry. It is also pointed out that while stocks are in fairly good shape, yet the improvement in demand has tested the condition of supplies to some extent, owing to fuel conditions and shipping facilities. Magnesia pipe covering is now quoted at 40 per cent.

ASBESTOS PRODUCTS—

Pipe Covering—	
Air cell, 4 ply	60 per cent. off list.
Air cell, 3 ply	65 per cent. off list.
Air cell, 2 ply	67½% off standard list.
Boiler Covering	$1.50 per bag
Asbestos Sheathing	$6.75 per 100 lbs.
Magnesia pipe covering	less 40%

PRICES NOT UNIFORM ON RADIATOR VALVES

Toronto.

Although an upward change was announced several weeks ago in the quotations on radiator valves, discounts being revised from 58 per cent. to 54 per cent., it is noted that certain manufacturers are still maintaining the previous level of 58 per cent. off. Thus the prevailing price shows this range in the local market, but the opinion is expressed that a uniform basis will be arrived at in the near future. Brass compression goods are described as recording a fair share of activity for this time of the year, the movement being better than former seasons in this month. This is of, course, attributed to the fall construction program and the fact that many buildings are being rushed to completion.

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in	50%

No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

CONDITIONS IN SHEETS ON STEADIER BASIS

Toronto.

Conditions are unchanged in the local sheet and tin plate markets. Chief interest at this time centres around what the quotations for the first quarter of 1923 will be. Up to the present, no announcement in this direction has been made by the Steel Corporation either on sheet or tin plate. It is pointed out that the increase in costs during the past six months is a factor of consideration. Both sheet and tin plate mills have been operated on a larger scale in the last two weeks, 75 per cent. of capacity being reached by important producers. Local distributors state that while southern developments are not always immediately reflected in domestic price levels, yet any upward movement in primary markets would undoubtedly serve to materially strengthen prevailing local quotations. In other quarters there is a growing feeling that these prices will remain steady for the first quarter business, at least. However, Welsh tin plate markets record slightly firmer trends.

GALVANIZED SHEETS—

	Premier and Apollo
10¾ oz.	6 65
U. S. 28 base	6 25
U. S. 26 base	5 95
22 and 24	5 80
18 and 20	5 65

22-24 gauge	4 95
26 gauge	5 00
28 gauge	5 10

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

SUSTAINED ACTIVITY IN BAR IRON MARKETS

Toronto.

Local activity in bar iron and steel is described as very good for this time of the year. There is a uniform movement in all departments, which compares well with the volume transacted last month. It is pointed out that warehouses in the month of November last year were in a more or less dull condition. Prices remain unchanged on the local market. Recent reports from southern primary centres record the fact that steel manufacturers thus far have been fairly successful in resisting efforts to weaken prices, but the pressure of buyers is increasing. They are using as a lever in this direction the current weaker tone in pig iron, which has declined as recorded in last week's issue of Hardware and Metal. According to recent indications, pig iron also shows some signs of going still lower.

IRON AND STEEL—

Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40

Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

BRISK MOVEMENT STILL EVIDENT IN RADIATORS

Toronto.

Brisk trade in radiators and boilers is still the rule, with the seasonal volume of activity not only being slightly heavier than in recent years at this time, but the period is also described as more spread out owing to late building and construction work. With stocks moving out fairly rapidly, therefore, prices have remained on a firm basis.

No changes are anticipated for the present, at least, although pig iron is now on a receding market. Manufacturers point out that other producing and distributing factors enter into current quotations, such as fuel prices and labor costs. Following are unchanged lists and discounts:

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in. $1.40; 16 in. $1.50; 14 in. $1.55; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 55 per cent. for water and 56 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizes 47 per cent. for water and 48 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05. Discount 52 per cent.

BOILERS—

Water:

Round, 60 per cent off list. Square, 20 per cent. off list.

Steam:

Round, 25 per cent. off list; square, 15 per cent. off list.

LATE SEASONAL ACTIVITY IN TROUGH AND PIPE

Toronto.

The late fall building activity combined with favorable weather which has been generally experienced during recent weeks, has contributed towards maintaining a brisk seasonal movement of eavestrough and conductor pipe. Distributors state that current trading is quite satisfactory, and in fact better than anticipated in most quarters for this time of the year. Stocks have been moving out in good shape and prices are therefore continuing for the present on a firm level. A slightly easier trend has been recorded in flat galvanized sheets, but this development is described as not of sufficient extent to affect the finished market products. Current quotations follow:

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per 100 ft.
8 inch	15 inch	$28 80
10 inch 17 70	18 inch	36 80
12 inch 21 20		

O. G. Round and Half Round—

8 inch 16 90	15 inch	29 80
10 inch 18 70	18 inch	37 80
12 inch 22 20		

Less 70 per cent.

5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

RAW COTTON TREND MAY AFFECT WASTES

Toronto.

It is considered possible that some higher price levels on cotton wastes will develop in the near future. Quotations on raw cotton have continued to record a series of marked revisions, the average result of which, however, places raw cotton markets on a very firm basis. Practically all semi-finished and manufactured cotton lines have been advanced in reflecting this upward movement in primary centres. Up to the present, cotton wastes have remained on a steady level, but adjustments would not be surprising.

ONLY ROUTINE DEMAND FOR SCRAP MATERIALS

Toronto.

Scrap metals are in routine demand, and prices have not shown much change. There have been numerous inquiries during the week for copper and red brass scrap, and a larger proportion of sales has taken place. There is not, however, sufficient demand to take care of the stocks held by dealers, and in consequence the market is a little easier.

There has been little demand for ferrous scrap, even cast scrap being rather difficult to sell to customers, due to easing in pig iron.

Scrap rubber business has been confined to the same few items as previously. The following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)		10 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings, (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Rails (scrap)		10 00
Net tons—		
No. 1 cast		18 00

No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 00
Heavy yellow brass	5 50	6 00
Heavy Lead	5 25	5 50
Tea Lead	3 25	3 50
Scrap zinc	4 50	4 75
Scrap Rubber		
Boots and shoes	2 00	2 25
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	0 60	1 00

CALL FOR CEMENT RECEDES IN VOLUME

Toronto.

The call for cement is now receding in volume as construction activities for the year near completion. With the approach of colder weather, trade in cement naturally enters upon the quiet period. Quotations remain unchanged, however, ruling prices being as follows:

CEMENT—Carload Lots—	
Per barrel	3 63
Less Carload Lots—	
Per barrel, f.o.b. yard	4 35
Per barrel, delivered	4 55

Single bags, $1.15 each; 4 bags to barrel.

Extra charge of $1.50 per load on less than 24 bag lots.

Rebate of 20 cents for empty bags.

SPELTER AND TIN FEATURE INGOT METALS

Toronto.

The current ingot metal markets continue to feature tin and spelter. Lead also retains its recent strength, but prices are steady. Copper is now described as on the way to improvement, the period of weakness drawing to a close. Tin is experiencing somewhat of a see-saw movement, there having been a natural reaction from the rapid climb.

COPPER.—Evidence in copper now points towards the elimination of the lower prices which have been a disturbing factor in this market for several weeks past. Reports from primary centres indicate that export trade has improved, and consumers are also more interested, with the result that sales have been in moderately heavier volume. The statistical position of this metal thus points towards a firmer market. Local quotations remain around 17¼ cents.

TIN.—The London tin market has declined sharply from the recent high levels, and this metal is somewhat duller in tone. A reaction was more or less looked for, however, owing to the sudden climb. Consuming demand is relatively quieter, although recovery is looked for. The current average price is now 41 cents.

LEAD.—The lead market is as strong as ever, and this metal is described as somewhat scarce, supplies available for December being none too large. The general position is strong, but domestic trading is quiet. Quotations locally are unchanged at $7.50.

SPELTER.—Prices for zinc again show a disposition to fluctuate. It is pointed out that several factors are the cause of this. Buying is fairly good, by galvanizers and brass makers, while export trade has also increased. The statistical position is also receiving attention, the heavier consumption in October having further reduced stocks. There has been a sharp decline abroad, however, while domestic demand is dull. In spite of this, local prices continue in the neighborhood of $9.50.

ANTIMONY.—This market is dull and neglected. It is estimated that consumers' requirements are of a moderate nature and they already have these taken care of. Prevailing local prices continue unchanged at 8 cents.

ALUMINUM.—There has been no change in this metal. In primary centres some buying for the early part of 1923 is recorded, but trading in general is on the quiet side. Quotations locally hover around 21 to 22 cents.

London, Ont.

LONDON, November 23.—Reports of good business continue the feature of local trade. The mild weather, while holding back the sale of some winter lines, is keeping up the sale of builders' hardware, roofings and many other lines used for building and repair work.

Prices continue very firm, with changes not so numerous this week. Collections in this district are reported as good at present.

MADE-UP STOVE PIPE AT HIGHER PRICES

London, Ont.

New prices which are a little higher appear this week on bright made-up stove pipe. Revised quotations on 6 inch are $18.32 per 100 lengths, and for the 7-inch, $19.25 per 100 lengths.

REVISED QUOTATIONS ON ONWARD SLIDING SETS

London, Ont.

List prices issued this fall on Onward sliding shoes are slightly higher than lists previously used. The discount has also been increased, however, thus making very little change in the net prices. Revised quotations follow:

SLIDING SHOES—

4B, 35c. set; 5B 40c.; 6B, 45c.; 8B, 55c.; 10B, 75c.; 5F, 75c. set; 6F, 80c.; 8F, $1.00; 10F, $1.50; 12F, $2.00; 8B, 70c. set.; 10BB, 90c.; 8FF, $1.10; 10FF, $1.5;5 12FF, $2.25. 18H, for pianos, $4.50.

Less 33 1-3 per cent.

SLIGHT REDUCTION IN THERMOS LUNCH KITS

London, Ont.

List prices are now reduced on Thermos lunch kits and bottles. The decline on lunch kit prices is 25 cents each. New list prices and discounts follow:

THERMOS KITS—

No. 396, $3.75 ea., and No. 400, $3.75 each., Less 25/10 per cent.

EXTEND BOOKING DATE ON WHITE LEAD IN OIL

London, Ont.

The decision to extend the booking date on white lead in oil to April 1, 1923, with no change from the present price levels, constitutes one of the premier current market developments.

WHITE LEAD IN OIL—

	Tons Per 100 lbs.	Less Tons
Pure	13 55	13 90
Elephant	14 05	14 40

MANURE FORKS ACTIVE

London, Ont.

There is a fairly good sale recorded for manure, potato, barn and ensilage forks at present. Quotations on these products remain at list less 60 per cent.

FLASHLIGHTS AND BATTERIES AMONG POPULAR LINES

London, Ont.

The fall and winter sale of flashlights and batteries is generally reported up to expectations. Quotations on the Ever-Ready line remain at list less 33-1/3 per cent.

CATTLE CHAINS ALSO IN SEASONAL ACTIVITY

London, Ont.

There has been a seasonal movement recorded in cattle chains. The present prices remain at list less 25 per cent.

SEASONAL INTEREST IN GLASS OVEN WARE

London, Ont.

There is also an active seasonal interest in glass oven ware. The prevailing quotation on the Pyrex line is list less 33-1/3 per cent.

LINSEED OIL PRICE REDUCED FIVE CENTS

London, Ont.

A reduction of five cents per gallon is made this week in linseed oil prices, this change bringing prices to $1.10 for raw and $1.13 for boiled in barrel lots.

PUTTY REQUIREMENTS ALSO IN SEASONAL VOLUME

London, Ont.

There is also an excellent sale recorded for putty. Quotations remain firm at the following levels:

PUTTY—

Standard, 100 lb. drums	4 80
Do., 25 lb. drums	5 05
Pure, 100 lb. drums	6 05
Do., 25 lb. drums	6 30

BUCK SAWS RECEIVE UNUSUAL ATTENTION

London, Ont.

There has been an extra good sale for buck saws this season, chiefly on account of the coal shortage. Present prices are as follows:

BUCK SAWS—

	Doz.
Happy Medium	12 30
Arrow Head, Lance Tooth	16 65
Prince Rupert	16 65
Disstons	16 65

Winnipeg, Man.

WINNIPEG, Nov. 23.—There is little change in business, dealers reporting that the demand is largely for seasonable lines. Fair mild weather is keeping the farmer on the land, but with the approach of cold weather an improvement is expected. Collections do not show much change.

Advances continue on many lines of hardware. Higher prices are recorded on wrought steel butts, light tee hinges, and cotton twine. There has been a decline in quotations on Corbin ball bearing padlocks and also a revision on Yale padlocks. Galvanized range boilers are in good demand and quotations have advanced.

HIGHER PRICES ON WROUGHT STEEL BUTTS

Winnipeg.

There has been an advance in quotations on wrought steel butts. Following are prevailing prices:

WROUGHT STEEL BUTTS—

2½ x 2½	2 06
3 x 3	2 20
3½ x 3	2 50
3½ x 3½	2 80
4 x 4	3 47
4½ x 4½	4 80
5 x 5	7 07

REVISED QUOTATIONS NOTED ON YALE PADLOCKS

Winnipeg.

There has been a revision on several lines of Yale padlocks. New quotations are as follows:

YALE PADLOCKS—

No. 455, $3.80; No. 645C, $6.60; No. 326, $12.30; No. 215, $9.10; No. 805, $17.80; No. 8454, $21.80; No. 813, $18.45; No 833, $2325; No. 853, $28.75; No. 863, $34.20; No 873, $51.85; No 225, $9.10; No. 813½, $20.50; No. 833½, $25.65; No. 853½, $31.00.

DECLINE ON CORBIN BALL BEARING PADLOCKS

Winnipeg.

There has been a slight decline recorded on Corbin ball bearing padlocks. Following are the new quotations now in effect:

CORBIN PADLOCKS—

No. 2879A	19 85
No. 2880A	22 20
No. 2880¼A	28 75
No. 2881A	27 80
No. 2882A	33 00
No. 2883A	39 60
No. 990	21 00

HIGHER QUOTATIONS ON LIGHT TEE HINGES

Winnipeg.

Slight revisions have been made in prices on light tee hinges in cartons and bulk. Current price levels are as follows:

HINGES—(Light Tee in Cartons)—

3 in., $1.45; 4 in., $1.75; 5 in., $2.00; 6 in., $2.70; 8 in., $3.35.

Heavy Tee—

4 in., $2.30; 5 in., $2.80; 6 in., $3.20; 8 in., $3.70; 10 in., $6.37; 12 in., $9.45.

Corrugated Tee—

4 in., $2.87; 5 in., $3.55; 6 in., $4.40; 8 in. $7.00; 10 in, $9.60.

WROUGHT STEEL LIGHT STRAP—

3 in., $1.48; 4 in, $1.70; 5 in, $2.12; 6 in., $2.80; 8 in., $3.72; 10 in., $5.72.

Heavy Strap—

4 in., $2.27; 5 in., $2.87; 6 in., $3.45; 8 in., $4.87; 10 in., $8.00; 12 in., $10.50.

Corrugated Strap—

4 in., $2.27; 5 in., $2.95; 6 in, $4.85; 8 in., $5.85; 10 in., $8.55.

COTTON TWINE PRICES RISE TO HIGHER LEVELS

Winnipeg.

In sympathy with the continued strength of the raw cotton markets an advance of two cents has been recorded on cotton twine in balls and cones. New quotations are as follows:

TWINE (Wrapping)—

Cotton, 3 ply cones, per lb.	0 54
Cotton, 3 ply balls, per lb	0 58
Cotton, 4 ply cones, per lb	0 58
Cotton 4 ply balls, per lb.	0 62

TEN CENTS ADVANCE ON TURPENTINE PRICES

Winnipeg.

A further advance of ten cents per gallon is quoted on turpentine by local

dealers. This brings the present price to $2.45 per gallon in barrel lots.

GALVANIZED RANGE BOILERS SHOW UPWARD TENDENCY

Winnipeg.

Dealers report that there is an improved movement in the demand for galvanized range boilers. This condition is attributed to building activities and the undertone of the market is reported as firm. Quotations on the following sizes are as follows:

GALVANIZED RANGE BOILERS—
Size—18 gals., $10.25; 30 gals. $10.50; 35 ga. $12.45; 40 ga., $17.05; 52 ga., $24.60; 66 ga., $35.30; 82 ga., $50.00; 100 ga. $65.00; 120 ga., $76.25.

LINSEED OIL PRICES DROP FIVE CENTS

Winnipeg.

Linseed oil prices have declined five cents per gallon and quotations on raw are $1.20 with boiled at $1.23.

Calgary, Alta.

Seasonable Weather With Increased Retail Business Recorded in Alberta

CALGARY, November 23.—Reports from points throughout the province, other than the larger cities, point to a better condition than has been noticeable for some months. Crop returns already available, or in sight, are now pretty well known, and a general balancing up is in process, while the farmer is in a position to know how much he has to work on to liquidate his debts and provide for winter and spring requirements. The result is a noticeable increase in retail business, especially in cash sales. Buying will continue on the conservative side but even these requirements with the ability to pay for them is providing sufficient business to make marked increases over earlier months.

Seasonable weather and a fall of snow has helped out immediate buying and goods are moving out now that ordinarily should have moved a month ago. Stocks generally in the country points are not heavy and a few days of brisk business has made a marked difference in the sorting business received by jobbers. Retail business in the city has not reacted to the extent noticed in the country points, and outside of the essential seasonable lines the turn over is not up to an average year. The improvement in collections is being maintained, and gives promise of outstandings reaching comfortable levels by the end of the year.

Early winter sporting goods are going out in good volume. Skating and hockey goods generally are given a prominent display place. Hardware stores are making more of a feature than usual of winter motor accessories and good returns are evident.

General paint trade has dropped away in volume but better business than is usual at this time of the year is being done in small sundries for interior work. The nature of retail advertising has had good effect in drawing attention to the many little inside jobs that can be done by the householder, and paint departments have shown up well in a month that is commonly quiet.

A number of retail hardware stores are adding toys to their usual Christmas displays. With most it probably is an experiment, the result of which is very likely to bring the public to the hardware store for their better class toys. Those who went earliest into this line seem to have made a success of it and the movement is extending from the city stores to those at country points.

The few price changes on record this week show moves in both directions on a few staple lines. A further reduction on rope is made effective, making the reduction for the month quite a marked one. Jobbers report active booking on this commodity covering spring needs as the price is considered an attractive one, and probably not justified by market conditions only. Sisal is now 16½ cents; New Zealand, British manilla and African hemp, 17½ cents, pure manilla 20 cents, and lath-yarn 16½ cents, at Calgary, Edmonton and Lethbridge.

Reductions of $1.00 per dozen are also effective on grub hoes, pick mattocks and cutter mattocks, bringing current prices in conformity with recent reductions on clay and rock picks. The change makes the following prices effective at Calgary, Edmonton, and Lethbridge:—grub hoes 8.25; pick mattocks 10.55; cutter mattocks 10.55, per dozen.

An advance on lead goods reflects the stiffening tendency in this line on eastern markets. Prices range about 1.00 per cwt., advance on lead pipe and sheet lead, while pig lead is up 25 cents per 100 pounds. Trading shows a seasonable slackness on this line with jobbers buying only for immediate needs. The following prices are current at Calgary, Edmonton and Lethbridge.

Sheet lead, small lots	14.75
Sheet lead, Roll lots	14.25
Lead waste pipe, small lots	16.50
Lead waste pipe, case lots	16.00
Lead coil pipe, small lots	15.60
Lead coil pipe, coil lots	15.10
Lead wool, small lots	17.75
Lead wool, 100 lb. lots	17.25
Pig lead, small pigs	10.75
Pig lead, large pigs	10.50

Factory advances are reported on solder, but local quotations remain unchanged at present.

Turpentine is again prominent in the week's changes with another advance of 10 cents a gallon. Jobbers report orders coming in for small quantities only at prevailing figures and expect buying to be on a hand to mouth basis until recessions set in. Barrel lots are now quoted at 2.55 per gallon at Calgary, Edmonton and Lethbridge and 2.65 for less than barrels.

Linseed Oil registers a decline of five cents a gallon. With the closing down of outside painting this commodity is showing a seasonable falling away of quantity buying. Stocks are reported low with no tendency to date to book spring requirements. The change makes following prices current at Calgary, Edmonton and Lethbridge: raw 1.26 and boiled 1.29 in barrels, with 10 cents added for lesser quantities.

Sheet zinc has stiffened up in sympathy with recent eastern advances and is now 15 cents a pound at Calgary, Edmonton, and Lethbridge. This is an advance of one cent.

Vancouver, B. C.

Difficulty in Making Collections Still Salient Point in Coast Trade

VANCOUVER, B. C., November 23.—Coast trade this week has been up to the average, retailers expressing satisfaction with the outward movement although they still complain of the difficulty in making their collections. The unusual mild weather for this time of year has kept stove, furnace and heating appliance sales backward but it is believed they are up to the mark.

The toy houses are getting in a good line of stocks for the holiday trade a good proportion of stock coming from Japan who made the most of the opportunity afforded them through the great war. They copied German lines to perfection and are taking a lot of this trade which formerly went to Europe. Some cutlery is also coming along, although in no great quantity.

For the purpose of making room for incoming shipments of Christmas goods, and the installation of a toy department, some of the downtown retailers announce an alteration sale for the disposal of all surplus lines. Everything from stoves to kitchen utensils is included.

Another feature in Vancouver hardware circles was the preparation of special bargains for "Dollar Day." This is a semi-annual event, the other occasion being in May. Inaugurated about ten

years ago it immediately "caught on" and has since been in vogue. Retailers generally throughout the city have made these occasions for the disposal of odd lines. From the standpoint of volume of sales, the day was a decided success, merchants giving special bargains to the value of a dollar, while in higher priced lines, substantial cuts are made in many instances, to take advantage of the advertising.

One of the local distributors has ready for shipment a trial order of electric heaters which will be loaded on the Niagara next week for New Zealand. The company will establish an agency there provided results are satisfactory.

St. John, N. B.

Lumber Industry in New Brunswick Prepares for Busy Winter Season

ST. JOHN, N. B.—The New Brunswick mills are still busy sawing laths on account of the unusually heavy demand in the New York and Boston markets. Nearly every day sees a new concern going into the lath sawing business.

E. W. Mair, mayor of Woodstock, N. B., was in St. John last week, and had encouraging news from that section of the country, so far as the lumber industry is concerned. He stated that the outlook is for a large cut this year, and the preparations being made to send crews into the woods have resulted in the merchants of Woodstock doing a good business. His worship stated that the potato situation showed little improvement, the car shortage still interfering with shipments to the West, but there had been a better demand of late for local needs. S. R. Weston, assistant chief engineer of the New Brunswick Electric Power Commission, has spent two weeks on the Nepisiguit gathering data for further hydro electric development in the province. He has made a careful and detailed survey of The Narrows, about four miles from the hydro plant of the Bathurst Lumber Co., Ltd., at Nepisiguit Falls.

The report of the secretary-treasurer of St. John Exhibition Association shows that the last fair held in St. John was a splendid success, showing an encouraging surplus, practically wiping off the deficit with which the association started last year. A resolution was passed favoring the holding of another exhibition beginning September 1, 1923.

A. J. Tingley, district special agent of the C. N. R., while in St. John last week, stated that the freight traffic to and from St. John will be exceptionally heavy, and that there was big business ahead.

W. H. Thorne & Co., Ltd., hardware merchants, have just carried out one of their semi-annual big advertising schemes. The largest theatre in the city was hired by them for a demonstration of their phonographs, and nearly two thousand citizens attended by special invitation. Messrs. Thorne have a very systematic method of handling these musical recitals, and for several days before the event, they advertise that tickets for admission can be obtained at their store, it always follows that all the tickets are disposed of, and the name of the applicant for a ticket is carefully filed. After the recital, the firm has in its possession a brand new mailing list of interested music lovers, and they are all forwarded letters and various advertising matter. These recitals are always followed by a good sale of records that have been heard during the demonstration.

The sale of winter automobile accessories is gradually increasing as the cold weather approaches, so dealers state, and several dealers are advertising the fact that now is the time to watch the radiator, as the weather may be mild in the evening, but below zero before morning, and the motorist may discover his radiator frozen up. The window trims in St. John during the last week were devoted to the displaying of fire-side furnishings, and stove and heater necessities. The advertising was along the same lines, pipeless furnaces receiving a good deal of attention. It is reported that the sale of pipeless furnaces in St. John has been very heavy this year, and that many householders who formerly used self feeders have now had pipeless furnaces installed.

The paint business has quieted down somewhat, but it is believed that there is a good deal of inside work underway, and that the automobile and carriage painters are expecting to be busy. Winter sporting goods are very much in evidence at the present time, a slight snow storm caused the dealers to make displays of sleds, sleighs, snowshoes, shovels, etc. The snow did not last, however, owing to a heavy rainstorm following.

Toy departments are now in good shape for Christmas business, and some of the stores have engaged extra help to carry them through the Christmas season.

Hamilton, Ont.

Retail Merchants Making Preparations for Active Christmas Hardware Trade

HAMILTON, November 23.—With the approach of the Christmas season, preparations are being made for the prospective annual trade in toys, specialties, and other lines enjoyed by the hardware industry during this period of the year. This season, however, merchants are concentrating more intensely on "gift hardware." All the indications in this direction are generally regarded as promising from the viewpoint of normal business.

In commenting upon fall business, jobbing houses state that the call for lines usually in demand at this season has kept up in satisfactory proportions, and activity is still pronounced. In addition, winter lines are moving up in satisfactory volume.

Hardware merchants are advertising furnaces, stoves, fireside furnishings, coal buckets and ash sifters, and various window displays also feature these and kindred lines. Winter automobile accessories are also coming in for a share of display in anticipation of snow and colder weather generally.

Many of the current business reports indicate that collections cannot be described as in a satisfactory condition. While contributory reasons are given for this state, the principal cause is ascribed to the lack of interest displayed on the part of the farmer in discharging liabilities, which, in many cases, have now been carried over for several months, awaiting the present crop returns. Retailers and wholesalers are both suffering, each in turn. The collection situation is, therefore, a troublesome item. The fact that the fine weather experienced during recent weeks has had a tendency to keep the farmer on the land, engaged in fall plowing and similar activities, is one of the reasons encountered, while another prominent reason submitted by the farmer when expecting continued credit is the fact that existing low prices for crops have resulted in these being withheld from the market by the producer, pending higher levels in the future. Where pressing obligations should be met, however, it would seem reasonable to dispose of sufficient returns in the shape of produce in order that retail merchants and those depending on them should not suffer through the business routine employed by the agricultural interests. Restricted collections mean hampered business operations, not only for the retailer, but also through the jobbing and manufacturing channels, with its consequent reflection upon prosperity in general at a time of the year when it is most desirable to maintain as high a ratio of employment in cities and producing centres, as is possible under the circumstances.

Pittsburgh, U. S. A.

Factors in Steel Markets Still Continue Largely in Favor of Buyers

PITTSBURGH, November 23.—Operation of the steel industry continues at slightly above 75 per cent. of capacity. There are no striking cases of any mill curtailing its output on account of lack of orders, although a month ago it seemed not entirely improbable, on account of the heavy shipments being made, that something of this sort would occur well before the end of the year. Thus the situation from the mill standpoint is perhaps somewhat stronger than might have been expected. Another point is that mills report less irregularity in prices of bars, shapes and plates than a week ago, i.e., the 2c market price is being sustained better.

That it is no foregone conclusion that the steel market has to stay strong, with producers having continuously the upper hand over consumers, is obvious from a survey of conditions and trends. In the long run the alternate innings of buyers and sellers even up rather well and since about April 1, the date when the coal strike began, everything has been in favor of sellers.

The situation as to production and consumption can be put in clear and concise form. In 1921 there was drastic liquidation of material, both stocks of steel in the hands of buyers and stocks of manufacturers of steel, including hardware, tools, agricultural implements, machinery, etc. Production of steel ingots was about 19,000,000 tons against about 41,000,000 tons in 1920. The country must have been practically bare of stocks of all sorts April 1 of this year. From that date to October 1 the production of ingots averaged 34,500,000 tons a year. Consumption could not have been at a greater rate than the production, there being no stocks to draw upon. Since October 1 production of ingots has been at a rate of 40,000 000 tons a year, or 15 per cent. more. If steel is not growing more plentiful it has to be shown that consumption, with winter approaching, is considerably greater than in spring, summer and early autumn, and that is something that does not normally occur.

The Steel Corporation's last report showed 6,902,287 tons of unfilled obligations, equal to nearly six months of production at 75 per cent., though, of course, the orders and contracts are not equally distributed among the different departments. At any rate, the Steel Corporation is really very well sold up. For a long time the independents, as a whole, have not had nearly as heavy order books, partly because their prices have frequently been higher than those of the corporation.

In some quarters it has been expected of late that before the end of the year some of the independents would find themselves with so little business that they would have to choose between curtailing operations and going out to seek additional business by the price-cutting route. The common opinion has been that in such case choice would be made of the latter alternative. At the present time, however, some of the large independent mills that were supposed to have the leanest order books state that they can run for two months at their present rate without booking additional business. Then the question arises whether their customers will continue to take shipments at the present rate. Some of them may ask shipments to be curtailed or discontinued for a time. There have been such experiences in the past, two years ago, for instance.

Building Materials Strong

There continues to be pressure upon pipe mills for better deliveries of butt weld merchant pipe, both black and galvanized. The mills seem to be considerably in arrears.

GIFT HARDWARE NOW HAS RIGHT OF WAY

(Continued from page 37)

our trade in the least. In fact, it helps us, because we consider that if we can draw attention to our store by attractive window displays, half the battle is won. The chances are ten to one that the department store will not have as appealing a display of hardware and sporting goods as we will have and therefore we do not fear the competition."

Moving picture machines usually form part of this firm's stock during the Christmas season. As a rule one machine is displayed in the toy window while others are shown on a special table inside the store. Films are also sold, and the offer to demonstrate is made. A room for this purpose is set aside on the second floor of the establishment, and this is a service that is much appreciated by the buyers.

At night attention is drawn to the windows and the interior of the store by Christmas trees lighted up with electric bulbs, and dressed with other dazzling ornaments. One of these trees is placed right at the front door inside the store where it is bound to catch the eye of all passers-by.

REDUCING COST OF DISTRIBUTION

(Continued from page 45)

economical for merchants in Houston to buy from St. Louis. They got into the habit of dealing with St. Louis. Not long ago a boat line was established between New Orleans and the Texas city, taking advantage of the deep water canal up to Houston, and the boat rates were much lower than the freight rates by rail. We then began to urge our merchants to receive their shipments from our New Orleans factory.

"Paint from New Orleans?" they inquired, and shook their heads doubtfully. The suggestion encountered the resistance of fixed habit.

It took a great deal of pains and perseverance before we managed to point out successfully that the New Orleans plant had exactly the same formulas and made precisely the same product as the other plants. That might not have proved a conclusive argument, had not it been taken into conjunction with the fact that the freight was 5 cents less per gallon on goods ordered from New Orleans.

The Qualities That Are Needed In Selling To-day

Wasteful habits, practices which have no merit except age, will usually continue as long as competition allows them to continue and a profit is shown, but no longer. Right now, many such habits must go by the board. We have established a special department for the purpose of studying freight rates, in order to give each customer the benefit of the lowest shipping charges. That has more than once proved a deciding factor in securing business.

The price of almost everything is still up; hotel rates, meals, railroad fares, Pullman accommodations, bus transportation, and so on. As I have explained, we depend on our salesman to sell faster and more, and we frankly reason out the situation with our customers. Our wish, we explain, is to give the most service at the least cost. All high-cost items have to be paid by somebody. We have to be reimbursed by the merchant, and they in turn have to take the cost out of the pockets of consumers.

In closing, perhaps I cannot do better than to repeat and emphasize what I have already said: to do business profitably to-day requires a return to some familiar qualities, the names of which sound just a trifle old-fashioned. We need salesmen with enough energy to wear out the soles of their shoes travelling for orders, and endowed with enough stamina not to be satisfied with little orders if big ones are in sight.

We need men who understand how to get the value out of a dollar—we must have thrift in the management and the spirit of thrift throughout the organization. We need resourcefulness. We need an abundance of common sense.

In all this there is assuredly no secret, no profound mystery. Plenty of people are making money to-day. We are doing it ourselves. And perhaps all of us will glimpse more clearly the answer to the question: "How can we cut the high cost of selling?" when we quit thinking of ourselves with too severe dignity as "business men," and strive again for the homely merits that characterize "good traders."

SERVICE

CONFIDENCE

FAIR DEALING

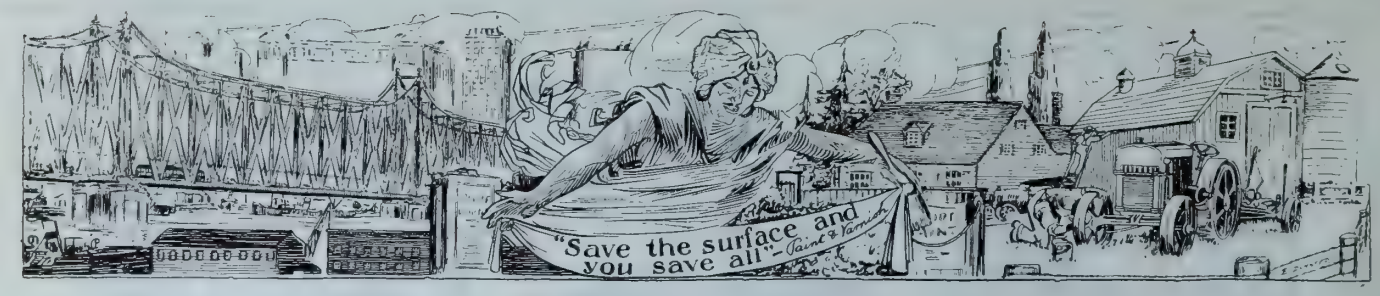
The Paint on a Pedestal

The Retailer's Question!

IS THE Manufacturer's responsibility!

"How can I make money in my Paint Department?" asks a Merchant—and the answer usually is "Sell My Products."

Lack of appreciation of the fact that "Products" and "Advertising," although they are very important, are not sufficient in themselves to the maintenance of a successful business, has been and is responsible for much distrust in the relationship between manufacturer and retailer.



We believe in the principle of Quality, and the virtue of Advertising as faithfully as any other institution—but more important than this, we **know** that there are far greater factors underlying the accomplishment of success than are commonly thought of.

Accordingly, we do not invite you to "Sell our Products," but rather to discuss with us the solution to making your Paint Department pay, if it is not now doing so to your complete satisfaction.

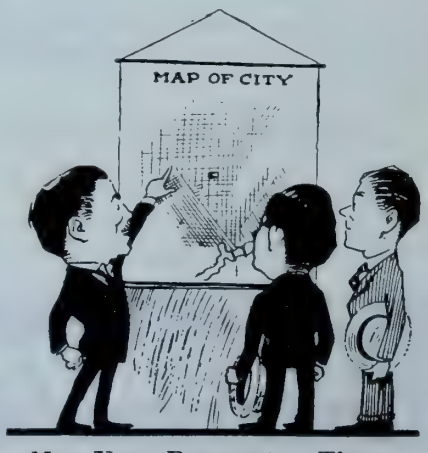
Mapping Out Local Paint Prospects

To Reach Goal of Doubling Paint and Varnish Business by 1926 Steps Must be Taken to Stimulate the Slack Periods—Only 25 Per Cent. of Paint Goes to New Construction—For Every 5 Paint Customers There Are Fifteen Not "Sold" on Value of Paint



By NELSON M. GROSS

NOT LONG ago I had occasion to inspect replies from a questionnairs sent to over 200 hardware dealers. One of the questions asked was, "What is the ratio of your paint and varnish sales to the rest of your business?" Replies ran all the way from 10 p. c. to 50 per cent and this range would seem to be significant at this time when we are discussing the topic, "How can the Hardware Dealer Sell More Paint and Varnish?"

As such a topic would seem to indicate, we are not merely "handling" paint and varnish but are actually "selling it," and it is inspiring to a paint man to be called on to help in discussing means of increasing these sales.

Before taking up this topic specifically, let us consider for a moment the paint and varnish industry and its direct bearing on and application to the hardware dealer. The paint and varnish industry is only in its infancy. A definite goal has been set to double the industry by 1926 and to achieve this goal, the vast amount of potential orders for paint and varnish must be realized. Last year's paint and varnish sales represent approximately only 25 per cent. of the volume that might be realized were property properly protected. Applied to your own store, it means that for five of your customers there are fifteen others not yet sold on the economic value of paint and varnish. New construction is responsible for only 25 per cent. of the normal consumption of paints and varnish. The remaining 75 per cent. goes for the repainting and revarnishing of surfaces to remove the effects of wear and exposure and prevent deterioration. It is on the endeavor to enlarge the latter field of consumption that our energies should be directed, for it is this broader aspect of the industry that all of us manufacturers, jobbers and dealers must appreciate if we are to realize the goal we have set for ourselves. It is a question of enlarging the size of the pie, rather than fighting for the same piece.

The Save the Surface Campaign has conceived and launched a great advertising and educational campaign that is rapidly breaking down any obstacles that may have existed in the way of greater use of paint and varnish, and is creating in the public mind a realization of the economic features of paint and varnish—for up to quite recently paint and varnish were luxuries—beautifiers—rather than the economic necessities they are now realized to be. The value of this campaign to all of us interested in the manufacture and sale of paints and varnishes, is immense; the slogan itself—"Save the Surface and you Save All"—is from an advertising standpoint alone, one of the most valuable slogans now in use and is the envy of other lines of industry not so well organized. Retailers undoubtedly appreciate the value of the Save the Surface movement, but what they are perhaps more interested in is how it is going to help sell more paint and varnish and how they can best act to sell more paint and varnish. The place to start is with yourselves and with your own store. If you really believe in the greater use of paint and varnish, it is only consistent that the outside and inside of your store should represent what you believe. It is often effective to paint the outside with some distinctive color so that your store stands out and is remembered for its attractive appearance. No less important is the inside of your store, the walls of which should be painted a color that is pleasing to the eye and is inviting to the women customers who often contribute the bulk of your sales.

Map Your Prospects: Then "Study the Map!"

Reduction of Stock

The reduction of your stocks is a point which deserves serious consideration. Most stores that I have been in carry anywhere from two to five lines of varnish stain, for example. This not only means economic waste and too large an investment, but also makes it impossible for you or your clerks to know what is exactly in stock. If I were to advise, I would say, get a good line; carry complete stocks of it and stick to it. It would be impossible to carry everything that customers ask for. What you can do is to carry adequate stocks of the line you decide to push in addition to certain specialities that can be stocked profitably even at the risk of duplication, and then really push it. One of the next things to do is to put your paint and varnish stock up near the front of the store where it can be seen. People take it for granted that you handle nails and hardware, stoves, tools, etc., and they are sold on the necessity for buying many of these articles before they come into the store. In my judgment, there is no line that you handle that has the possibilities that your paint and varnish line has. Give it, therefore, the position of prominence it deserves. I have been in some stores where the paint stock has been kept al-

(Continued on page 52)

THIS WINTER IN YOUR PAINT DEPT.

During the winter months suggest painting to your customers.

There are a "thousand and one" inside jobs of painting and decorating that can be done in the winter, the houses are warm, the surfaces are dry, and there is the long winter evenings to do the work.

Show them how easy it is to make a good painting job with MOORE'S HOUSE PAINT, how easy it flows, how well it covers, and how attractive it looks when the job is finished.

And after you have closed the sale of the MOORE'S HOUSE PAINT be sure he has a good brush, some sandpaper, some shellac, and maybe a scraping knife.

Don't you see that you can get as many sales through your paint department this winter as any other time of the year, paint is not seasonable, it can be used to advantage at any time, get that spring and fall idea out of your paint sales, train your clerks to sell paint at all times.

With Moore's House Paint and Muresco

on your shelves, the rest is up to you.

Get your clerks to read this ad, and use the suggestions in the paint department and watch results.

Write us for our sales helps and dealer proposition, we are ready to help you make Paint Pay a Profit.

"QUALITY FOREVER MOORE"

If interested, tear out this page and place with letters to be answered

MAPPING OUT PROSPECT

(Continued from page 60)

together out of sight and even in the cellar, and the dealers owning the stores have invariably complained of their poor sales. Put paint and varnish at the front, for what other line that you carry represents a potential market four times as large as that at present being exploited? As you travel through the country by train or auto, look closely at the houses you pass and you can more readily appreciate that for every well painted, well kept house, there are three others badly in need of paint and varnish.

Having decided on one line of paint, varnish, enamel, etc., and having a sufficient stock of it on hand, the next important thing to do is to know your line and to give the time necessary to educate your clerks, so that they may be real paint and varnish salesmen instead of "figure heads." In this you can among other things call on the manufacturer and the manufacturer's representative, who are only too glad to furnish all necessary literature and the time required for imparting the knowledge of the line that you and your clerks should have. The manufacturer's representative is generally glad to help with suggestions of a practical nature.

Get out of your store more; become familiar with your neighbors and business acquaintances, so that they know you are in the paint and varnish business and will call on you for their requirements.

Learn to know your town and its needs. I have heard of some dealers who have secured a map of their town and have put pins on the property needing paint and varnish. As fast as this need was supplied, they removed the pin and in this way kept a check on any possible sales.

The telephone can be utilized to good advantage for calling up people you know and even names taken at random in the directory. The average of sales you will make by this means is unusually large.

In order to sell paint and varnish all the year round, conduct a special drive on house paint, floor paint, etc., during the spring and summer months; push flat wall paint, stains, interior finishes, etc., when the cold weather comes around and between these drives, put special effort on certain specialties for which there is special seasonal demand. In this way, the valleys and peaks can be avoided and a steady flow of sales assured. A poor salesman always complains that his territory is unusually hard and presents problems which are not present in other territories. In the same way a poor merchant will always complain that his particular neighborhood presents obstacles to the sale of paint and varnish which other neighborhoods do not possess. You sell good paint and varnish any place, any time, if the will is there and the confidence in the line you are selling.

Preparing Brush Stock for Xmas Trade

Good Care of Brush Stock Produces Big Returns at Christmas—Some Harmful Practices to Avoid in Stocking and Selling Brushes

THERE is no reason why brushes, as articles of distinct utility, should not be given as gifts at the Christmas season. So many are the uses for which special brushes are designed these days that they carry a definite appeal and fill a very pressing need with almost every class of prospect. Making use of brushes for such trade brings out the importance of always keeping the stock in the very best of condition. This is also a live topic just now in hardware stores because of the approach of the very cold weather when less painting is done and when the trade in various brushes runs into a period of less strenuous selling. During that season it is very necessary that the brush stock be given the best of care so as to be in good condition for the next active spell of trade. The Christmas display will sell more brushes if they are in good shape than if they have been taken from a drawer where they have been scraped and jostled around.

It seems a difficult job in some stores to keep the brush stock from becoming shopworn in appearance but the following of a few simple rules will solve this difficulty. The wrong way to treat the brush stock is to unwrap them all when they arrive and dump them into drawers or bins which in many cases have probably not been cleaned out for a long time. If these drawers are dark and warm and dirty they make an ideal breeding place for moths which cause much loss in value to brushes. The larvae of the moths eat the bristles and seriously impair the usefulness of the brush. Sometimes too, brushes handled in this way become dust laden, and when the customer takes one home his first impulse is to wash it out. No new brush should be put into water as the cells of the bristles absorb the water and then when it is dipped into paint for work, trouble starts as the paint is not absorbed and streaky work results.

The merchant who can hand out a nice looking, clean brush to the prospective customer right now, at Christmas time, or any time, will have a much better chance of boosting his brush sales than if he extracts a scratched brush from a drawer and hands it in a cloud of dust to the prospect to get his eyes and nose filled. This is an important factor in Christmas brush trade.

Notes of Convention of National Paint, Oil and Varnish Ass'n. at Atlantic City

DISCUSSION of the two big business promotion campaigns of the paint and varnish industry occupied most of one session of the convention. L. R. Atwood made the following statement;

"1.—The Clean-Up and Paint-Up Campaign and the Save the Surface Campaign have both proved themselves effective in increasing the interest of the public in paint and varnish and are different enough in their nature and appeal to warrant and require separate existence and separate and adequate financial support by the industry.

"2.—Both movements are of so great value to the industry that neither should knowingly allow the impression to exist that it embraces or represents the whole of the promotional activities of the industry.

"3.—Each recognizes that the other must be allowed to organize every arm of the paint and varnish industry, both national and local, for the furtherance of its own particular line of effort, but owing to the peculiar impersonal character of the Clean-Up and Paint-Up movement, we believe that outside the paint trade, the organization of community effort through civic and other bodies should be left entirely to the Clean-Up and Paint-Up Committee."

Organization of the advertising men of the paint and varnish industries was completed at one of the meetings through the formation of what will be known as the Advertising Group of the Paint and Varnish Industry. This linking together of the advertising men of the industry into an organization of their own is the outcome of the conference of advertising managers at Buffalo last June.

The new Save the Surface film, "Brushin' Up" was shown to the convention. This is a moving picture designed to show paint and varnish men how they can help the communities in which they live to become brighter, cleaner, more sanitary and more prosperous places. Unlike most films for industrial use, it carries its message in story form, with the moral vigorously pointed that the way to sell more paint and varnish is to sell harder and that selling more paint and varnish directly benefits the buyers more than it does the sellers.

Boeckh's Brush News

Placing Spring Orders Now

How time flies! Here we are, once again, thinking about spring! And spring isn't so far off either, just over the New Year a piece!

We are entering orders now for spring delivery, at prices recently revised as per supplementary list No. 60, which we mailed to all hardware merchants a short while ago. These prices were figured on a basis of bristles purchased earlier in the season at very low prices. Our values are exceptionally good. Further, due to future market conditions which show a tendency to higher prices on bristles, you will be fully protected in placing your order now.

Our travellers are on the road carrying a full line of samples and a number of new lines — all good sellers. All orders will be filled promptly.

If you have not received our revised Price List drop us a card and it will be mailed promptly.

Weekly Paint Markets

Montreal

MONTREAL, November 23.—A firmer tone in the local glass market, with higher prices on plate glass, is a feature of the paint markets this week. Owing to higher levels on window glass being reached in Belgium, and domestic manufacturers increasing their prices on plate, it is felt that the active demand, usual during the following weeks, will hold the glass market generally in a much firmer position than formerly. Up to the present the gain on the overseas market has been offset to a great extent by the low exchange value of the franc, but it is noted that here also a slight improvement in the past few weeks has been made. Local spot quotations on linseed oil are unchanged, but price levels on future are lower owing to the easier tone in flaxseed. Transportation difficulties, and the fact that crushers are still behind in their deliveries, are two factors holding the nearby oil market in its present steady position. With prospects of a better movement of seed from the North West after the rush of grain, an easier oil market is naturally expected in later weeks. The good crop this year has not really been felt locally up until now owing to the difficulty in getting supplies through. Turpentine prices are also unchanged, and although there is a fluctuating market reported from the south, with a slightly easier tendency resulting, this has not been sufficient to materially affect the market locally.

SLIGHT EASING IN LINSEED OIL MARKET

Montreal.

With an easing in the flax market during the past week, linseed oil is displaying a softer tone than has been evident for some time past. Up to the present, however, local quotations are unchanged, but slightly lower levels in the near future would not be surprising. Developments in the seed market so far are said to be not of sufficient importance to change the nearby position of the oil market, but any further slump will naturally mean a recession in oil. Price developments, however, have occurred, futures now being quoted at lower figures following the first of the year. To some there is little indication of any great decline for the remainder of this year, as the transportation question, and the fact that crushers are behind in their deliveries, should be sufficient to maintain a fairly steady market during this time. The good crops, however, will be felt as soon as the rush in traffic is over, and an easier oil market may naturally then be expected. Local prevailing prices are the following:

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.....	1 08	1 10
5 to 9 bbl. lots, per gal.	1 03	1 05

Less quantities, add ten cents per gallon.

FIRMER MARKET RECORDED ON WINDOW GLASS

Montreal.

A slightly stronger tendency is now recorded on the local window glass market, due to the usual heavier demand at this season and recent developments on imports from Belgium. New higher levels have been reached there, and while this has been somewhat offset by the low exchange value of the franc, it is felt that the glass market has reached bottom for this season at least. Whether or not currency value will make gains is of course problematical, but it is noted that some progress has been made in the past few weeks. Another factor is the close of navigation which now means higher transportation rates on imports. A cargo of window glass arrived at the close of last week and this marks the last shipment by the water route.

Importers and distributors report a fairly steady sales movement, but it is felt that a good volume of fall business is yet to be had. The continued mild weather has not brought the most active turn and the first appearance of winter weather should result in the usual rush for requirements.

ADVANCED QUOTATIONS ON PLATE GLASS

Montreal.

There is also a firmer tendency in plate glass and domestic manufacturers announce slightly higher quotations. Local distributors have revised prices and are now quoting 50 and 10 per cent., Montreal, and 50 per cent. off list prices to outside territories. Former discount was 60 per cent.

TURPENTINE MARKET NOW FLUCTUATING

Montreal.

Fluctuations are now appearing on the turpentine market in the south, although importers state that the product is still in a fairly firm market position. Towards the close of last week a sudden drop was recorded, but some recovery was made a few days later. What developments may occur within the near future is hard to say. To some a further slump would not be surprising, although it is thought that it would be of temporary duration, and merely due to a slackening in demand. There is the question of light receipts that cannot be overlooked, and while demand may fall off this week, more activity will probably be shown the week following. Local prices are unchanged, distributors stating that the recession in the south has not yet been sufficient to affect the local market. Demand is seasonably quiet at the following quotations:

TURPENTINE—

1 barrel lots	2 15	2 20
2 to 4 barrel lots, per gal.....	2 13	2 18
Broken lots	2 25	2 30

Toronto

TORONTO, November 23.—The easier developments in linseed oil prices, combined with the appearance of a firmer trend in both plate and window glass provide the principal features of the current paint markets. Turpentine is also on a reactionary trend, but no change is made in domestic quotations. The recession in linseed is stated to be primarily due to the quiet conditions at this time of the year, while the appearance of English oil on the market at slightly easier levels, has also had a contributory effect. White lead in oil remains on a very strong price basis, while brisk seasonal movement continues in putty and window glass.

FLUCTUATIONS NOTED IN TURPENTINE MARKETS

Toronto.

Although some easier levels and fluctuations generally have been recorded in southern primary turpentine markets, no change in this respect is made on local centres. The former levels of between $2.25 and $2.30 per gallon are still in effect, distributors stating that while present trade is of a quiet nature, this condition is usual at this season. Shipments from the south are hardly any more plentiful, as offerings continue moderate. As previously pointed out, minor reactions may be looked for from time to time, but the general undertone is considered firm when based upon the fact that 85 per cent. of the season's crop has come to market. In addition, current reports from Savannah indicate that the scrape crop is almost off the

(Continued on page 66)

Beauty—that will not fade

—And Decotint Beauty is So Easily Secured

No intricate measuring or mixing of materials. Deco-tint merely requires the addition of cold water and it's ready for use.

Easy to apply, sanitary and durable, it is the most satisfactory and economical medium for the permanent decoration of all interior walls and ceilings.

It furnishes your customers with the answer to the home beautifying problem. And the range of Decotint colors is so wide—twenty-two delicate tints—that it is an easy matter for every customer to select the right combination for the job he has in view.

Let your customers know you handle DECOTINT. Order your supply now and include a stock of the other Deco-tint Blue Labeled Products listed here.

TORONTO MARKETS

(Continued from page 64)

trees now and this development has contributed to some extent in the slightly heavier receipts and reactionary market. New local prices follow:

TURPENTINE—

1 barrel lots	2 25	2 30
2 to 4 barrel lots	2 24	2 29
5 gallon lots	2 35	2 40

Less barrels, add 15 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

LINSEED OIL PRICES REDUCED FIVE CENTS

Toronto.

Linseed oil prices are lowered five cents per gallon this week due to a combination of circumstances. One of the primary reasons is stated to be the current quiet condition of trade which has led to easier levels as an inducement to open up business. Another premier cause is the appearance of English oil on the domestic market at quotations somewhat below the levels recently quoted. Some recession in the tone of the flax seed market has also contributed towards a corresponding movement in oil. The current changes are in line with the general expectancy of recessions at this season of the year, and bring the following prices into effect locally, as well as practically eliminating, for the time being at any rate, the range in prevailing quotations:

LINSEED OIL—	Per gallon Raw	Per Gallon Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, 15 cents per gallon.

BELGIAN WINDOW GLASS PRICES MOVE UPWARD

Toronto.

Revised discounts are now in effect on imported window glass, thus bringing quotations to a higher level and on a more uniform basis with domestic glass prices. The revised quotations are less 7½ per cent. on less than 25 cases, and on 25 cases or over, less 12½ per cent. This change is generally attributed to the higher cost of Belgian window glass, the discounts having been increased by around twelve points. To some extent this rise was offset by the variations in exchange, the franc having weakened again. There is also reported, however, a shortage in window glass of the imported variety in certain quarters, owing to the seasonably brisk movement that has prevailed during recent weeks.

ORDERING PAINT BRUSHES FOR SPRING DELIVERY

Toronto.

Paint brushes are now being ordered in fair volume for spring delivery, and a good seasonable demand is anticipated. Requirements are being placed in preparation for spring trade in the brush lines, and the lower quotations on these products which came into effect three months ago, are expected to be a factor in future market activity.

RESIN TONE EASIER: DOMESTIC PRICES STEADY

Toronto.

While no changes are recorded on domestic resin prices this week, yet it is noted that the gains recently recorded in primary centres have not been entirely sustained. The easier tone which has developed is generally attributed to the fact that large buyers have lacked a disposition to come into the market, and quotations on most resin grades suffered through the temporary absence of consumer interest. A recovery in this respect is looked for. It is pointed out however, that these fluctuations are not considered of sufficient extent to immediately affect domestic prices, which generally remain unchanged at the following levels:

RESIN—	
G., medium grade	4 00
Water White	5 50

Benjamin Moore & Co. Annual Banquet

Splendid Spirit of Good Fellowship Among Members of Staff Commented on—Much Company Talent Among the Entertainers

A SPLENDID spirit of good fellowship prevailed at the third annual banquet of Benjamin Moore & Co. held in the company's offices at West Toronto, and what with tasty edibles daintily arranged, good music, and witty addresses, everyone thoroughly enjoyed themselves. The banquet was attended by the entire staff of the Toronto branch. Music was provided by an orchestra composed of members of the staff, and was assisted by an entertainer, a quartet and some other company talent. Hearty response was made in the singing of the many songs prepared for the occasion, especially when they dealt with some of the company officers. Some of these songs were as follows:—

THE PRESIDENT.

(Tune: "How Dry I Am.")

Mister "L. P." How do you do?
The Canadian Branch it welcomes you.
Your genial ways and cheery smile
Keep us good natured all the while.

* * * * * * *

OUR GENERAL MANAGER

(Tune: "What's the Matter with Father?"

What's the matter with Frederick Moore?
He's all right.
He's a jolly good Manager from noon till night;
He has a kind heart, and a will to do;
And a spirit that surely will push things through.
What's the matter with Frederick Moore?
He's all right.

* * * * * * *

Bobby Barrington is a wonder,
He's the Dean of the whole sales force;
His selling talk it sounds like THUNDER,
He can work just like a horse.

* * * * * * *

Scotty Smith, the rooting wonder,
The noisiest ball player in the land,
Got leather lungs and a voice like a foghorn,
Makes more row than a big brass band.

* * * * * * *

When pay day comes we look to Wilson,
The Paymaster with a wad of cash,
We only wish he'd come more often,
Before we get to eating "Hash."

* * * * * * *

Harry Lawford just got married,
The happiest time in all his life;
All the other boys are jealous
Since they've seen his charming wife.

* * * * * * *

Fat Jack Bowring is an angel,
But from grace he often fell,
If he wasn't so good natured
He'd tell us all to go to—Hamilton.

Frederick Moore, Treasurer and Managing Director, in expressing the pleasure of the officers of the company in having their staff as guests, referred to the splendid spirit which prevailed throughout the organization and also told of the aim of the company to build up an even better and bigger organization not only in the manufacture of their products but in the upbuilding of men and women and in creating better conditions for all the Moore family. Mr. Moore stated that the year had been a most satisfactory one to the chief officers of the company and he thanked the members of the organization who had co-operated with him to bring about such a satisfactory state of affairs. He paid tribute to the loyalty of the staff and also outlined the opportunities existing for those who wished to make progress in the organization.

Rev. Dr. Scott gave a witty and instructive talk interspersed with some amusing stories. He also gave some splendid advice to young men and women of the company.

L. P. Moore, president, in expressing his pleasure at being present stated there was no branch of the company's organization that seemed more like home to him than Toronto where such a splendid spirit of harmony appeared to exist. He gave an inspiring talk tracing the growth of the company since 1883. He told of the ideals of the organization and the splendid progress which it is making due chiefly to the splendid men and women who comprised its staff. Mr. Moore dwelt at length upon the place of the individual employee of the organization and the part which each played, showing the opportunities which existed for all.

W. C. Belcher, Vice-President, and W. P. Talbot, Director, provided an amusing entertainment feature when Mr. Talbot led some group singing, assisted at the piano by Mr. Belcher.

J. H. Shaffer, Director, also convulsed his audience many times with the witticisms contained in an interesting talk.

16 Pounds of Ice Lasts 67 Hours

This is one of the tests which prove the high standard of efficiency of Davidson's "Frost River" Refrigerators. Sixteen pounds of ice obtaining a minimum temperature of 48 degrees in the food chamber, with an outside temperature of 68 degrees.

These are the points that interest your customers when they are buying Refrigerators—economy of ice and efficiency in keeping food in perfect condition. The sturdy construction and beautiful finish of the

Frost River

is apparent and make its durability undoubted.

The white enamelled food chamber and drip cup and the galvanized ice container leave no doubt as to its sanitary features.

The rapidly increasing sales of the "FROST RIVER" Refrigerator are evidence of its success. Write for illustrated booklet to-day.

Another Owl Quality Product

Owl Brand Sheathing Paper

MAKES A BIG HIT WITH THE BUILDING TRADE

Owl Sheathing Paper went with a bang from the start—being an Owl Quality Product it had a good name to begin with. We have yet to learn of one dissatisfied customer and at time of writing orders are doubling on Owl Sheathing Paper so that the factory is being taxed to capacity.

You Know How Good Owl Roofing Is—Well!! Owl Sheathing is Another Winner

Send a trial order in for Owl Sheathing Paper and see how quick your trade will take it up. Owl Sheathing (insulating) Paper is made 32 inch width and 432 sq. ft. to the roll. It is made from an all rag felt thoroughly saturated with asphalt of a high grade quality. Owl Sheathing Paper is vermin proof, is strong, durable and does not deteriorate with age. For use between sheathing and siding, also in lining refrigerators and under floors.

Write now for prices and samples.

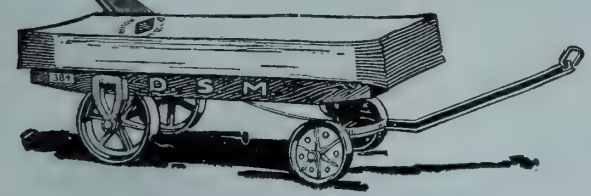
No. 386

Zinc Spelter



We use for coating "Premier" Galvanized Steel Sheets nothing but **Electrolytic Zinc Spelter** made in British Columbia.

This Spelter is so pure that it **adheres better, coats more uniformly** and hence **gives 100% protection.**

On our purchases of zinc this year the labor in mining and smelting amounts to over $150,000, while the freight paid to Canadian railways will run $28,000.

Isn't that better than spending the money outside of Canada?

TINKER TOM

DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

THREE OF A KIND

They're three of a kind, in that all are screw wrenches and all are made by "The Wrench People." But then, again, they're different because they're made to serve different purposes.

"W. & B." Knife Handle and "Railroad Special" Wrenches are quality tools. The latter is fitted with indestructible iron handle—otherwise they're the same. Both are absolutely dependable and are strongly recommended for heavy duty.

"W. & B." Agricultural Wrenches meet the demand for good tools at moderate price.

Screw Wrench Book on request.

J. H. WILLIAMS & CO., LIMITED

About That Spring Booking Order

Reputation lives longer than any other quality in merchandise. That is why when selling CANADA Brushes you have made an investment in reputation—an enduring asset to any business or product.

We are the only makers in Canada of the Solid, Straight Compressed Rubber-set Brushes—The bristles of such brushes will not bush or flare or come out. We guarantee them.

Better get our Dealer Proposition Right Away.
